(a) *General.* To keep records and books of account pertaining to information included in the annual return, including items of gross income, receipts, disbursements, and contributions and gifts received, and to keep other pertinent information which will enable the district director to inquire into the organization's exempt status. An organization claiming an exception from the filing of an information return must maintain adequate records to substantiate such claim. 26 CFR 1.6001–1, 1.6033–1, 1.6033–2

(b) *Employees' trusts.* To keep as a part of its records for taxable years beginning after December 31, 1969, and ending before December 31, 1971, written notification, or a copy thereof, from an employer to the trustee that the employer has or will timely file the information required under section 404 of the Internal Revenue Code. 26 CFR 1.6033–2

(c) *Group returns.* The central organization shall retain the certified statements of those local organizations authorizing their inclusion in a group return. 26 CFR 1.6033–1, 1.6033–2

Retention period; (a) and (b) See Item 4.1; (c), for taxable years prior to January 1, 1970, permanent; for taxable years after December 31, 1969, until the expiration of 6 years after the last taxable year for which a group return includes the local organization.

4.42a Banking institutions, trust companies, or brokerage firms, who elect to file Form 1087, Nominee's Information Return, for each actual owner for whom it acts as nominee.

Must maintain such records as will permit a prompt substantiation of each payments of dividends made to the actual owner. 26 CFR 1.6042–1

Retention period: See Item 4.1.

4.42b Any trustee, insurance company, or other person, which is notified under section 6047(b) of the Code that contributions to a trust or under a retirement plan have been made on behalf of an owner-employee.

Shall maintain a record of such notification.

Retention period: Until all funds of the trust or under the plan on behalf of the owner-employee have been distributed. 26 CFR 1.6047–1

4.42c Persons making payments of estimated tax installments in foreign currency.

Maintain a copy of the statement certified by the foundation, commission, or other person having control of the payments to the taxpayer in nonconvertible foreign currency which are expected to be received during the taxable year for the purpose of exhibiting it to the disbursing officer when making installment deposits of foreign currency. 26 CFR 301.6316–6

Retention period: See Item 4.1.

4.43 Persons engaged in construction of aircraft for the Army and the Air Force.

To keep books, records, and original evidences of costs pertinent to the determination of the true profit, excess profit, deficiency in profit, or net loss from the performance of a contract or subcontract.

Retention period: So long as the contents thereof may become material in the administration of the act of March 27, 1934, as amended. 26 CFR App. A 16.13

4.44 Persons engaged in construction of naval vessels or aircraft for the Navy.

To keep books, records, and original evidences of costs pertinent to the determination of the true profit, excess profit, deficiency in profit, or net loss from the performance of a contract or subcontract.

Retention period: So long as the contents thereof may become material in the administration of the act of March 27, 1934, as amended. 26 CFR App. A 17.14

4.44a Domestic building and loan associations.

To maintain adequate records to establish to the satisfaction of the district director that various assets tests are met for taxable years beginning after October 16, 1962, and ending before November 1, 1964. 26 CFR 301.7701–13

Retention period: See Item 4.1.

4.44b Organizations seeking classification as private nonoperating foundations.

To maintain adequate records substantiating that all contributions received in taxable years ending in either 1970 or 1971 were distributed not later than the 15th day of the third month after the close of the taxable year or by the 30th day after final regulations under section 170(b)(1)(E)(ii) are published in the Federal Register, whichever is later. 26 CFR 13.15.

Retention period: See Item 4.1.

ESTATE TAX

4.45 Executors of estates.

To keep detailed records of the affairs of the estate as will enable the district director to determine the amount of the estate tax liability, including copies of documents relating to the estate, appraisal lists of items included in the gross estate, copies of balance sheets or other financial statements relating to value of stock, and any other information necessary in determining the tax.

Retention period: Not specified. 26 CFR 20.6001–1

GIFT TAX

4.46 Persons making transfers of property by gift.

To maintain books of account or records as are necessary to establish the amount of the total gifts together with the deductions allowable in determining the amount of taxable gifts, and other information required to be shown in their gift tax returns.

Retention period: Permanent. 26 CFR 25.6001–1

EMPLOYMENT TAX

4.47 General record retention requirements for employment taxes.

(a) *Form of records.* Records shall be kept accurately, but no particular form is required. Such forms and systems of accounting shall be used as will enable the district director to ascertain whether liability for tax is incurred and, if so, the amount thereof.

(b) *Copies of returns, schedules, and statements.* Every person who is required to keep any copy of any return, schedule, statement, or other document, shall keep such copy as a part of his records.

(c) *Records of claimants.* Any person (including an employee) who claims a refund, credit, or abatement, shall keep a complete and detailed record with respect to the tax, interest, addition to the tax, additional amount, or assessable penalty to which the claim relates. Such record shall include any records required of the claimant by paragraph (b) of this section which relate to the claim.

(d) *Records of employees.* While not mandatory (except in the case of claims), it is advisable for each employee to keep permanent, accurate records showing the name and address of each employer for whom he performs services as an employee, the dates of beginning and termination of such services, the information with respect to himself which is required to be kept by employers, and all receipts furnished by employers.

(e) *Place for keeping records.* All records required shall be kept, by the person required to keep them, at one or more convenient and safe locations accessible to internal revenue officers, and shall at all times be available for inspection by such officers.

Retention period: 4 years after the due date of such tax for the return period to which the records relate, or the date such tax is paid, whichever is the later. The records of claimants required by paragraph (c) shall be maintained for a period of at least 4 years after the date the claim is filed. 26 CFR 31.6001–1

4.48 [Reserved]

4.49 Employers required to deduct and withhold income tax on wages which include sick pay.

To keep records with respect to payments (sick pay) made directly by the employer to his employees after December 31, 1955, under a wage continuation plan showing, with respect to each employee, the beginning and ending dates of each period of absence from work for which any such payment was made, and sufficient information to establish the amount and weekly rate of each such payment; and, to the extent that income tax is not withheld on the amount of any such payment excludable from the gross income of the employee, the amount of the payment and the excludable portion thereof, and data substantiating the employee's entitlement to the exclusion from gross income.

Retention period: So long as the contents thereof may become material in the administration of any internal revenue law. 26 CFR 31.3401(a)–1, 31.6001–5 (retention: 1.6001–1)

4.50 Employers liable for tax under the Federal Insurance Contributions Act.

(a) *General.* (1) To keep records of all remuneration, whether in cash or in a medium other than cash, paid to his employees after 1954 for services (other than agricultural labor which constitutes or is deemed to constitute employment, domestic service in a private home of the employer, or service not in the course of the employer's trade or business) performed for him after 1936; and records of all remuneration in the form of tips received by employees after 1965 and reported to him. Records shall show with respect to each employee receiving such remuneration:

(i) The name, address, and account number of the employee and such additional information with respect to the employee as is required when the employee does not advise the employer what his account number and name are as shown on an account number card issued to the employee by the Social Security Administration.

(ii) The total amount and date of each payment of remuneration (including any sum withheld therefrom as tax or for any other reason) and the period of services covered by such payment.

(iii) The amount of each such remuneration payment which constitutes wages subject to tax.

(iv) The amount of employee tax, or any amount equivalent to employee tax, collected with respect to such payment, and, if collected at a time other than the time such payment was made, the date collected.

(v) If the total remuneration payment and the amount thereof which is taxable are not equal, the reason therefor.

(2) Every employer shall keep records of the details of each adjustment or settlement of taxes under the Federal Insurance Contributions Act and a copy of each statement furnished.

(3) Every employer shall keep employee statements of tips furnished him (unless the information disclosed by such statements is recorded on another document retained by the employer) and copies of employer statements furnished employees.

(b) *Agricultural labor, domestic service, and service not in the course of employer's trade or business.* (1) Every employer who pays cash remuneration after 1954 for the performance for him after 1950 of agricultural labor which constitutes or is deemed to constitute employment, of domestic service in a private home of the employer not on a farm operated for profit, or of service not in the course of his trade or business shall keep records of all such cash remuneration with respect to which he incurs, or expects to incur, liability for

V 38 - 12 JAN 18 73 XUM

the taxes imposed by the Federal Insurance Contributions Act, or with respect to which amounts equivalent to employee tax are deducted. Such records shall show with respect to each employee receiving such cash remuneration:

(i) The name of the employee.

(ii) The account number of each employee to whom wages for such services are paid and such additional information as is required when the employee does not advise the employer what his account number and name are as shown on the account number card issued to the employee by the Social Security Administration.

(iii) The amount of such cash remuneration paid to the employee (including any sum withheld therefrom as tax or for any other reason) for agricultural labor which constitutes or is deemed to constitute employment, for domestic service in a private home of the employer not on a farm operated for profit, or for service not in the course of the employer's trade or business; the calendar month in which such cash remuneration was paid; and the character of the services for which such cash remuneration was paid. When the employer incurs liability for the taxes imposed by the Federal Insurance Contributions Act with respect to any such cash remuneration which he did not previously expect would be subject to the taxes, the amounts of any cash remuneration not previously made a matter of record shall be determined by the employer to the best of his knowledge and belief.

(iv) The amount of employee tax, or any amount equivalent to employee tax, collected with respect to such cash remuneration and the calendar month in which collected.

(v) To the extent material to a determination of tax liability, the number of days during each calendar year after 1956 on which agricultural labor which constitutes or is deemed to constitute employment is performed by the employee for cash remuneration computed on a time basis.

(2) Every person to whom a "crew leader" furnishes individuals for the performance of agricultural labor after December 31, 1958, shall keep records of the name; permanent mailing address, or if none, present address; and identification number, if any, of such "crew leader."

Retention period: 4 years after the due date of such tax for the return period to which the records relate, or the date such tax is paid, whichever is the later. 26 CFR 31.6001-2 (retention: 31.6001-1)

4.51 Persons subject to the Railroad Retirement Tax Act.

(a) *Records of employers.* (1) To keep records of all remuneration (whether in money or in something which may be used in lieu of money) other than tips, paid to his employees after 1954 for services rendered to him (including "time lost") after 1954. Such records shall show with respect to each employee:

(i) The name and address of the employee.

(ii) The total amount and date of each payment of remuneration to the employee (including any sum withheld therefrom as tax or for any other reason) and the period of service (including any period of absence from active service) covered by such payment.

(iii) The amount of such remuneration payment with respect to which the tax is imposed.

(iv) The amount of employee tax collected with respect to such payment, and, if collected at a time other than the time such payment was made, the date collected.

(v) If the total payment of remuneration and the amount thereof with respect to which the tax is imposed are not equal, the reason therefor.

(2) The employer shall keep records of the details of each adjustment or settlement of taxes under the Railroad Retirement Tax Act.

(b) *Records of employee representatives.* Every individual liable for employee representative tax under the Railroad Retirement Tax Act shall keep records of all remuneration (whether in money or in something which may be used in lieu of money) paid to him after 1954 for services rendered (including "time lost") by him as an employee representative after 1954. Such record shall show:

(1) The name and address of each employee organization employing him.

(2) The total amount and date of each payment of remuneration for services rendered as an employee representative (including any sum withheld therefrom as tax or for any other reason) and the period of service, including any period of absence from active service, covered by such payment.

(3) The amount of such remuneration payment with respect to which the employee representative tax is imposed.

(4) If the total payment of remuneration and the amount thereof with respect to which the employee representative tax is imposed are not equal, the reason therefor.

Retention period: 4 years after the due date of such tax for the return period to which the records relate, or the date such tax is paid, whichever is the later. 26 CFR 31.6001-3 (retention: 31.6000-1)

4.52 Employers subject to tax under the Federal Unemployment Tax Act.

(a) *Records of employers.* To keep such records as are necessary to establish:

(1) The total amount of remuneration (including any sum withheld therefrom as tax or for any other reason) paid to his employees during the calendar year for services performed after 1938.

(2) The amount of such remuneration which constitutes wages subject to the tax.

(3) The amount of contributions paid by him into each State unemployment fund, with respect to services subject to the law of such State, showing separately (i) payments made and neither deducted nor to be deducted from the remuneration of his employees, and (ii) payments made and deducted or to be deducted from the remuneration of his employees.

(4) The information required to be shown on the prescribed return and the extent to which the employer is liable for the tax.

(5) If the total remuneration paid and the amount thereof which is subject to the tax are not equal, the reason therefor.

(6) To the extent material to the determination of a tax liability, the dates, in each calendar quarter, on which each employee performed services not in the course of the employer's trade or business, and the amount of cash remuneration paid at any time for such services performed within such quarter.

The term "remuneration," as used in this paragraph, includes all payments whether in cash or in a medium other than cash, except that the term does not include payments in a medium other than cash for services not in the course of the employer's trade or business.

(b) *Records of persons who are not employers.* Any person who employs individuals in employment during any calendar year but who considers that he is not an employer subject to the tax shall, with respect to each such year, be prepared to establish by proper records (including, where necessary, records of the number of employees employed each day) that he is not an employer subject to the tax.

Retention period: 4 years after the due date of such tax for the return period to which the records relate, or the date such tax is paid, whichever is the later. 26 CFR 31.6001-4 (retention: 31.6001-1)

4.53 Employers required to deduct and withhold income tax on wages paid.

(a) Every employer required to deduct and withhold income tax upon the wages of employees shall keep records of all remuneration paid to such employees and tips received by employees and reported to him. Such records shall show with respect to each employee:

(1) The name and address of the employee and, after December 31, 1962, the account number of the employee.

(2) The total amount and date of each payment of remuneration (including any sum withheld therefrom as tax or for any other reason) and the period of services covered by such payment.

(3) The amount of such remuneration payment which constitutes wages subject to withholding.

(4) The amount of tax collected with respect to such remuneration payment and, if collected at a time other than the time such payment was made, the date collected.

(5) If the total remuneration payment and the amount thereof which is taxable are not equal, the reason therefor.

(6) Copies of any statements furnished by the employee relating to permanent residents of the Virgin Islands. (See 26 CFR 31.3401(a)-1(b)(12).)

(7) Copies of any statements furnished by the employee relating to nonresident alien individuals. (See 26 CFR 31.3401(a)(6)-1 and 31.3401(a)(7)-1.)

(8) Copies of any statements furnished by the employee relating to residence or physical presence in a foreign country. (See 26 CFR 31.3401(a)(8)(A)-1.)

(9) Copies of any statements furnished by the employee relating to citizens resident in Puerto Rico. (See 26 CFR 31.3401(a)(8)(C)-1.)

(10) The fair market value and date of each payment of noncash remuneration, made to an employee after August 9, 1955, for services performed as a retail commission salesman, with respect to which no income tax is withheld.

(11) With respect to payments made in 1955 under a wage continuation plan, the records required to be kept in respect of such payments must (i) separately show the amounts of such payments, and distinguish such amounts from all other payments, and (ii) establish the facts necessary to show that the employee is entitled to the exclusion, either by means of a written statement from the employee as to the injury, illness, or hospitalization, or by any other information which the employer believes to be accurate and which he is willing to accept. (See 26 CFR 31.3401(a)-1(b)(8)(i).)

(12) With respect to payments made directly by an employer after December 31, 1955, under a wage continuation plan, the records must show (i) the beginning and ending dates of each period of absence from work for which any such payment was made; and (ii) sufficient information to establish the amount and weekly rate of each such payment.

(13) The withholding exemption certificates (Forms W-4 and W-4E) filed with the employer by the employee.

(14) The agreement, if any, between the employer and the employee for the withholding of additional amounts of tax. (See 26 CFR 31.3402(i)-1.)

(15) To the extent material to a determination of tax liability, the dates, in each calendar quarter, on which the employee performed services not in the course of the employer's trade or business, and the amount of cash remuneration paid at any time for such services performed within such quarter. (See 26 CFR 31.3401(a)(4)-1.)

(16) Every employer shall keep employee statements of tips furnished him (unless the information disclosed by such statements is recorded on another document retained by the employer) and copies of employer statements furnished employees. (See 26 CFR 31.3401(a)(11)-1, 31.3401(a)(16)-1.)

(17) The employer shall keep records of the details of each adjustment or settlement of income tax withheld. (See 26 CFR 31.3402.)

(18) The written request of an employee to have the amount of tax withheld from his wages computed on the basis of his cumulative wages, and any notice of revocation thereof. (See 26 CFR 31.6001-5)

Retention period: 4 years after the due date of such tax for the return period to which the records relate, or the date such tax is paid, whichever is later. 26 CFR 31.6001-5 (retention: 31.6001-1)

4.54 Employers claiming a refund, credit, or abatement of tax under the Federal Insurance Contributions Act or Railroad Retirement Tax Act.

Every employer who has filed a claim for refund, credit, or abatement of employee tax under section 3101 or section 3201 of the Internal Revenue Code, or a corresponding provision of prior law, collected from an employee shall retain as part of his records the written receipt of the employee showing the date and amount of the repayment, or the written consent of the employee, whichever is used in support of the claim. Where employee tax was collected under section 3101 of the Code, or a corresponding provision of prior law, from an employee in a calendar year prior to the year in which the credit or refund is claimed, the employer shall also retain as part of his records a written statement from the employee (a) that the employee has not claimed refund or credit of the amount of the overcollection, or if so, such claim has been rejected, and (b) that the employee will not claim refund or credit of such amount.

Retention period: 4 years after the date the claim is filed. 26 CFR 31.6402(a)-2, 31.6404(a)-1 (retention: 31.6001-1)

4.55 Repayment by employer of tax erroneously collected from employee under the Federal Insurance Contributions Act or the Railroad Retirement Tax Act and of income tax withheld from wages.

(a) *Before employer files return.* To obtain and keep as part of his records the written receipt of the employee showing the date and amount of the repayment.

(b) *After employer files return.* If the amount of an overcollection is repaid to an employee, the employer shall obtain and keep as part of his records the written receipt of the employee, showing the date and amount of the repayment. If in any calendar year, an employer repays or reimburses an employee in the amount of an overcollection of employee tax under section 3101 of the Internal Revenue Code, or a corresponding provision of prior law, which was collected from the employee in a prior calendar year, the employer shall obtain from the employee and keep as part of his records a written statement (a) that the employee has not claimed refund or credit of the amount of the overcollection, or if so, such claim has been rejected, and (b) that the employee will not claim refund or credit of such amount.

Retention period: 4 years after the due date of such tax for the return period to which the records relate, or the date such tax is paid, whichever is the later. The records of claimants shall be maintained for a period of at least 4 years after the date the claim is filed. 26 CFR 31.6413(a)-1 (retention: 31.6001-1)

Excise Tax

4.56 Persons required to file a return and pay tax on the sale or use of any article subject to manufacturers' excise tax, or disposing of articles free of tax.

To keep accurate records, including duplicates of returns, and accounts of all transactions. To keep, in the case of dispositions of products to other manufacturers free of tax, accurate records of all such transactions including certificates from purchasers certifying to the fact that the products are purchased for further manufacture of taxable articles, with supporting invoices, etc. To maintain evidence with respect to sales for export, or shipment to a possession of the United States, and sales to States or political subdivisions thereof, upon which no tax is due, and other tax-free sales, and evidence required to support a claim for credit or refund.

Retention period: 4 years from the date the tax became due; with respect to tax-free sales, for a period of 4 years from the last day of the month following the month in which the sale was made; and with respect to credits or refunds, 4 years from the date any credit is taken or refund is claimed. 26 CFR 48.4041-5—48.4041-9, 48.4071-2, 48.6416, 48.6420, 48.6421; App. D 314.62, 316.7, 316.202

4.57 Persons seeking credit or refund due to repeal of manufacturers excise tax on passenger automobiles, light-duty trucks, etc.; Revenue Act of 1971. [Added]

(a) *Light-duty trucks; gross weight.* Manufacturer shall maintain a record of the gross vehicle weight rating of each truck, bus, trailer, and semitrailer sold after September 22, 1971, as excluded from tax. 26 CFR 142.1(d)(3)

(b) *Tax-free sales of buses for use in mass transportation service and articles to be used as trash containers.* Seller shall obtain from purchaser and retain in his possession evidence, such as Certificate of Registry or written statement, to indicate the purpose for which the article purchased is to be used as will establish sale of the article tax free. 26 CFR 142.1-1(g)(3)

(c) *Leases and installment or conditional sales entered into before December 11, 1971; automobiles, light-duty trucks or buses, local transit buses, and trash containers.* Manufacturer shall retain evidence of the tax reimbursement or reimbursement obligation to establish that the amount of remaining payments made or payable on or after December 11, 1971, has been reduced by an amount equal to the aggregate amount of the tax applicable with respect to such remaining payments. 26 CFR 142.1-1(i)(2)

(d) *Floor stocks refunds or credit; dealer claims.* Manufacturer shall retain dealer's inventory and maintain records of the articles held by each dealer showing (i) the name and address of each dealer, (ii) the quantities of each article

V 38 I 12 JAN 18 73 XUM

held by dealer as floor stocks, (iii) the amount of tax considered as paid, (iv) total amount of reimbursement due the dealer, (v) date dealer's request received, and (vi) date and amount of each payment to a dealer and the written consent of dealer of allowance to the manufacturer of the floor stocks credit or refund. Manufacturer shall keep sufficient records to substantiate the correctness of any claim or credit for a price readjustment of an article on which a floor stock refund was claimed. 26 CFR 142.2–1(a)(4); 26 CFR 142.2–1(e)

(e) *Consumer purchases refunds or credit.* Manufacturer filing a claim for credit or refund for tax paid on consumer purchases shall keep sufficient records with respect to each article covered by the claim (i) the name and address of the ultimate purchaser, (ii) the name and address of the dealer or other person from whom the article was purchased, (iii) date of sale of the article to the ultimate purchaser, (iv) the number or the invoice (sales slip) as required, (v) the serial number in case of a passenger automobile, light-duty truck or bus and the identification number in the case of a trailer or semitrailer and the gross vehicle weight, (vi) date and amount of the reimbursement. If reimbursement is made by check or cash by person other than the manufacturer, the manufacturer shall retain a receipt or statement, or copy thereof, signed by the ultimate purchaser setting forth the date and amount of reimbursement. If reimbursement is made direct by the manufacturer, the manufacturer shall retain the canceled check. A person, other than the manufacturer, who makes reimbursement shall retain a receipt, statement, or canceled check. Manufacturer shall keep readily available sufficient records to substantiate the correctness of any claim for credit or refund for a price readjustment of an article. 26 CFR 142.2–2(a)(4); 26 CFR 142.2–2(c)(4)

(f) *Use of averaging method-refunds.* A manufacturer employing the averaging method with respect to refunds made to consumers shall retain evidence of his efforts to locate any purchaser to whom reimbursement has not been made on or before October 2, 1972. 26 CFR 142.2–3(1)

Retention period: Not specified.

4.58–4.59 [Reserved]

4.59a Persons acquiring secondhand highway motor vehicles.

To maintain as part of his records evidence showing whether there was taxable use of such vehicle at any time in the taxable period prior to the time when the vehicle was registered in his name. If evidence is not obtained showing whether there was such use, the person must keep as part of his records a written statement of the reasons why he was unable to obtain such evidence.

Retention period: At least 3 years after the date the tax becomes due or the date the tax is paid, whichever is later. 26 CFR 41.4481–2 (retention: 41.6001–1)

4.60 Persons subject to the tax on use of certain highway motor vehicles.

(a) *Person in whose name vehicle registered.* Every person in whose name any highway motor vehicle having a taxable gross weight in excess of 26,000 pounds is registered at any time in the taxable period shall keep certain specified records with respect to each vehicle to enable the district director to determine whether such person is liable for the tax and, if so, the amount thereof.

(b) *Transit systems.* Every person engaged in the operation of a transit system who claims exemption from tax with respect to a transit-type bus shall keep records sufficient to show, with respect to each taxable period, whether he meets the 60-percent passenger fare revenue test for the period prescribed as the test period for such system for such taxable period.

(c) *Claimants.* Any person claiming refund, credit, or abatement of the tax, interest, additional amount, addition to the tax, or assessable penalty, shall keep a complete and detailed record with respect to the claim.

Retention period: Records required by paragraphs (a) and (b) shall be maintained for a period of at least 3 years after the date the tax becomes due or the dates the tax is paid, whichever is later. Records required by paragraph (c) (including any record required by paragraph (a) or (b) which relates to the claim) shall be maintained for a period of at least 3 years after the date the claim is filed. 26 CFR 41.6001–1

4.61 Persons required to collect taxes on amounts paid for local and toll telephone services and teletypewriter services.

To keep accurate records and accounts of all such services and facilities furnished upon which the tax is imposed and evidence of the right to exemption relative to any such services or facilities furnished in respect of which tax is not collected. A complete and detailed record of all credits taken and a duplicate of the return shall also be kept.

Retention period: 4 years from the date the tax is due; with respect to evidence of the right to exemption. 4 years from the date the tax would have become due if applicable; and, with respect to credits, 4 years from the date of the return on which the credit appears. 26 CFR 49.4253–11; App. D 130.71, 130.77

4.62–4.64 [Reserved]

4.65 Persons required to collect taxes on amount paid for the transportation of persons and seating or sleeping accommodations in connection therewith.

To keep accurate records to show with respect to each ticket or order sold or fare collected, or other individual transaction, the amount of tax collected or evidence of the right to exemption where tax is not collected. A complete and detailed record of all credits taken and a duplicate of the return shall also be kept.

Retention period: (a) Except as provided in paragraph (b) *below*, 4 years from the date the tax is due; with respect to evidence of the right to exemption, 4 years from the date the tax would have become due if payable; and, with respect to credits, 4 years from the date of the return on which the credit appears.

(b) On or after October 1, 1956, carriers furnishing transportation or facilities paid by a State, a Territory of the United States, or any political subdivision thereof, or the District of Columbia, shall retain all exemption certificates accepted, with the record of services and facilities rendered for a period of at least 3 years from the date the tax would have become due if payable. 26 CFR 49.4261–6(e); App. D 130.54, 130.62, 130.71, 130.77

4.65a Shippers or other persons transporting by air; exportation by continuous movement. [Amended]

Shippers or other persons making payment for export shipments subject to tax shall retain the duplicate of Form 1363, Export Exemption Certificate, or Form 1363A, Blanket Export Exemption Certificate, with the shipping papers. The carrier shall retain the original certificate with the document or documents showing payment of the transportation charges.

Retention period: 3 years from the last day of the month during which shipment was made from the point of origin. 26 CFR 154.2–1

4.65b Persons acquiring secondhand civil aircraft. [Added]

After May 31, 1972, to obtain and keep as part of his records evidence showing whether or not there was a taxable use prior to acquisition, or, evidence of the reasons why he was unable to obtain such evidence.

Retention period: Not specified. 26 CFR 154.3–1(d)(4).

4.66 Persons required to pay excise tax on wagering.

(a) *General.* To keep records as will clearly show as to each day's operation: (a) Gross amount of all wagers accepted; (b) gross amount of each class or type of wager accepted on each separate event, contest, or other wagering medium; (c) separately, the gross amount of wagers: (1) accepted directly by the taxpayer or at any registered place of business of the taxpayer (other than laid-off wagers), (2) accepted for his account by agents at other than a registered place of business of the taxpayer (other than laid-off wagers), (3) accepted as laid-off wagers from persons subject to the excise tax; (d) with respect to wagers laid-off with others: (1) The name, address and registration number of each person with whom placed, (2) the gross amount laid-off with each person showing separately the gross amounts of laid-off wagers with respect to each contest, event, or other wagering medium; and (e) the gross amount of tax collected from or charged to bettors as a separate item. To keep, in the case of the taxpayer's employees or agents receiving wagers on his behalf, separate records showing the name, address, the period of employment of, and number of the special tax stamp issued to, such employee or agent. To also keep duplicates of returns and a complete and detailed record of each overpayment.

(b) *Records of agent or employee.* Every person who is engaged in receiving for or on behalf of another person (at any place other than a registered place of business of such other person) wagers of a type subject to tax shall keep a record showing for each day (1) the gross amount of such wagers received by him, (2) the amount, if any, retained as a commission or as compensation for receiving such wagers, and (3) the amount turned over to the person on whose behalf the wagers were received, and the name and address of such person.

(c) *Records of claimants.* Any person claiming a credit or refund shall keep a complete and detailed record of each overpayment and of each laid-off wager for which credit is taken or refund is claimed, including a copy of the required certificate.

(d) *Place for keeping records.* Every person required to pay the tax on wagering shall keep or cause to be kept, at his office or principal place of business, or, if he has no office or principal place of business, at his residence or some other convenient or safe location, all such records as are required pursuant to paragraphs (a) and (c).

Retention period: All records required by the regulations in this part shall at all times be available for inspection by internal revenue officers. Records required by § 44.4403–1 and by paragraph (a) of this section shall be maintained for a period of at least 3 years from the date the tax became due. Records required by paragraph (b) of this section shall be maintained for a period of at least 3 years from the date the wager was received. Records required by paragraph (c) of this section shall be maintained for a period of at least 3 years from the date any credit is taken or refund is claimed. 26 CFR 44.4403–1, 44.6001–1

4.67 [Reserved]

4.68 Manufacturers of white phosphorus matches.

(a) *General.* Every manufacturer is required to keep a daily record showing the total of each material used each day and the total number of matches produced and the number of stamped packages and original packages in which packed; also the total number of stamped packages and original packages, together with the total number of matches, disposed of each day.

(b) *Names of customers.* The names of customers to whom matches are consigned and the quantities so sold will not be entered in the manufacturers' daily record and quarterly returns, but the manufacturer shall, upon request of any internal revenue officer, furnish a record of all sales for such period as may be desired.

Retention period: 3 years after the due date of such tax for the return period to which the records relate, or the date such tax is paid, whichever is the later. 26 CFR 45.4804–10 (retention: 45.6001–1)

4.69 Persons making contracts of sale of cotton for future delivery, and persons who act in the capacity of a clearing house or association for such transactions.

(a) All persons who make contracts of sale of cotton for future delivery at, on, or in any exchange, board of trade, or similar institution or place of business, whether said contracts shall be cleared and adjusted through a clearing association, or direct between seller and buyer, or otherwise, shall keep a record (in accordance with forms prescribed in § 45.4872–3 of the regulations) thereof showing: (1) name and address of contracting person keeping record; (2) name and address of other party to contract; (3) date contract was made; (4) quantity of cotton involved, in bales or pounds; (5) time specified in contract for delivery; (6) whether transaction is a purchase or a sale; (7) whether the contract is a contract subject to section 4863, 4864, or 4865 of the Internal Revenue Code, and the basis grade; (8) grade, type, sample, or description of cotton, if not basis grade; (9) specified price per pound; (10) date of delivery or settlement; (11) method of actual fulfillment or settlement; and (12) amount of tax paid (or, if exempt, so state).

(b) All persons who act in the capacity of a clearinghouse or clearing association for the purpose of clearing, settling, or adjusting transactions mentioned in section 4851(a) of the Internal Revenue Code shall keep a record (see forms prescribed in § 45.4872–3 of the regulations) thereof showing: (1) name and address of clearinghouse or clearing association keeping record; (2) name and address of person for whom contract is cleared; (3) date contract was made; (4) quantity of cotton involved, in bales or pounds; (5) time specified in contract for delivery; (6) whether transaction is a purchase or a sale; (7) whether the contract is a contract subject to section 4863, 4864, or 4865 of the Internal Revenue Code, and the basis grade; (8) grade, type, sample, or description of cotton, if not basis contract; (9) specified price per pound; (10) date of delivery or settlement; and (11) method of actual fulfillment or settlement.

(c) *Records to be kept in separate books and open for inspection.* All records required by the regulations in this subpart must be in writing and shall be kept in separate books, and not mixed with records of other accounts or transactions, and shall be open to inspection, when demand is made therefor by officers and agents of the Internal Revenue Service. Agents duly appointed shall have authority to examine the books and records kept in pursuance to §§ 45.4872–1 to 45.4872–3, inclusive, and may require the production of any other books, papers, records, or statements of account necessary to determine any liability to the tax imposed by section 4851 of the Internal Revenue Code.

Retention period: Not less than 3 years. 26 CFR 45.4872–1, 45.4872–2 (retention: 45.4872–4)

4.70 [Reserved]

4.71 Persons subject to certain miscellaneous stamp taxes.

(a) *General.* The records required by Part 45 of the regulations shall be kept accurately, but no particular form is required for keeping such records. See, however, the requirements in § 45.4804–10, relating to form for daily record in the case of manufacturers of white phosphorus matches, and §§ 45.4872–1 to 45.4872–4, inclusive, relating to records regarding sales of cotton for future delivery. Such forms and systems of accounting shall be used as will enable the district director to ascertain whether liability for tax is incurred and, if so, the amount thereof.

(b) *Copies of returns, schedules, and statements.* Every person who is required, by the regulations in this part or by instructions applicable to any form prescribed thereunder, to keep any copy of any return, schedule, statement, or other document, shall keep such copy as a part of his records.

(c) *Records of claimants.* Any person who, pursuant to the regulations in this part, claims a refund, credit, or abatement, shall keep a complete and detailed record with respect to the tax, interest, addition to the tax, additional amount, or assessable penalty to which the claim relates. Such record shall include any records required of the claimant by paragraph (b) and by §§ 45.6001–2 to 45.6001–5, inclusive, which relate to the claim.

(d) *Place for retention of records.* All records required by the regulations in this part shall be maintained, by the person required to keep them, at one or more convenient and safe locations accessible to internal revenue officers, and shall at all times be available for inspection by such officers.

(e) *Microfilm reproduction.* General books of account, such as cash books, journals, voucher registers, ledgers, etc., shall be maintained and preserved in their original form. However, microfilm reproductions of supporting records of details, such as invoices, vouchers, production reports, sales records, certificates, proofs of exportation, etc., may be kept in lieu of the original records provided the person required to keep such records retains such microfilmed copies for the required period, provides adequate facilities for the preservation of such films and for the ready inspection and location thereof, including a projector for viewing such records in the event inspection is necessary for tax purposes, and makes any transcription which may be required of the information contained on the microfilm.

Retention period: 3 years after the due date of such tax for the return period to which the records relate, or the date such tax is paid, whichever is the later. The records of claimants required by paragraph (c) shall be retained for a period of at least 3 years after the date the claim is filed. 26 CFR 45.6001–1

V 38 - 12 JAN 18 73 XUM

4.72 Manufacturers of adulterated butter, process or renovated butter, or filled cheese.

(a) *General.* A manufacturer shall keep at his place of business separate records of adulterated butter, of process or renovated butter, and of filled cheese. If the record is kept as hereinafter prescribed in the manufacturer's own books or in other convenient form no other record will be necessary. Care should be taken to exclude from the record any product other than adulterated butter, process or renovated butter, filled cheese, and the materials or ingredients used in the manufacture of each product.

Entry shall be made not later than the day following that on which each transaction occurred. Quantities reported shall be as indicated by the tax-paid stamps affixed to the packages, except that where the product is withdrawn free of tax for export, or where the product is returned to the factory, the actual quantity will be recorded. A fraction of a pound shall be accounted as a pound.

(b) *Item.* The record must show:

(1) The number of pounds of each material or ingredient used in the production of adulterated butter, process or renovated butter, or filled cheese, and the number of such materials used for other purposes.

(2) The number of pounds of each product produced.

(3) The number of pounds in each lot disposed of, the name of the consignee, the address to which delivered, and the date of shipment.

(4) The number of pounds in each lot returned to the factory, the name of the person by whom returned, the address from which returned, and the date of receipt.

(5) The number of pounds reworked, disposed of as grease, dumped, or otherwise destroyed.

(6) The total value of tax stamps purchased and used.

(c) *Transactions.* The following rules will apply:

(1) *Samples.* Sample packages of tax-paid adulterated butter, process or renovated butter or filled cheese distributed gratuitously shall be recorded in the same manner as if the packages were sold.

(2) *Transfers to self.* Where adulterated butter, process or renovated butter, or filled cheese is transferred by a manufacturer to himself as a wholesale or retail dealer, the transaction shall be recorded in the same manner as a transfer to another person.

(3) *Sales to chain stores.* Where adulterated butter, process or renovated butter, or filled cheese is shipped to one person doing business at different places, as in the case of chain stores, the deliveries to each address shall be recorded separately.

(4) *Drop shipment.* Where a manufacturer receives an order from one person to ship adulterated butter, process or renovated butter, or filled cheese to another, the transaction shall be recorded in the name and address of the consignee, followed by "acc't. of" and the name and address of the person for whose account the shipment was made. A manufacturer shall not record consignments on orders in the names of agents, solicitors, or other persons transmitting an order for another party.

Retention period: 3 years after the due date of such tax for the return period to which the records relate, or the date such tax is paid, whichever is the later.

The records of claimants required by paragraph (c) of § 45.6001–1 of the regulations shall be retained for a period of at least 3 years after the date the claim is filed. 26 CFR 45.6001–2 (retention: 45.6001–1)

4.73 Wholesale dealers in adulterated butter.

(a) *General.* A wholesale dealer shall keep at his place of business records of transactions in adulterated butter. If the record is kept as hereinafter prescribed in the dealer's own books or in other convenient form no other record will be necessary. Care should be taken to exclude from the record any product other than tax-paid and branded adulterated butter.

Entry shall be made not later than the day following that on which the transaction occurred. Quantities reported shall be as indicated by the tax-paid stamp affixed to the packages, except that where goods are returned to or by the wholesaler the actual quantity shall be recorded. A fraction of a pound shall be accounted as a pound.

(b) *Items.* The record must show:

(1) The number of pounds in each consignment of adulterated butter received, the name and address of the consignor, and the date of receipt.

(2) The number of pounds in each lot disposed of, the name of the consignee, the address to which delivered, and the date of shipment.

(c) *Transactions.* The following rules will apply:

(1) *Samples.* Sample packages of tax-paid adulterated butter received and disposed of gratuitously shall be recorded in the same manner as adulterated butter which is purchased and sold.

(2) *Transfers to self.* Where adulterated butter is transferred by a wholesale dealer to himself as a retail dealer, the transaction shall be recorded in the same manner as a sale to another person.

(3) *Sales to chain stores.* Where adulterated butter is shipped to one person doing business at different places, as in the case of chain stores, the deliveries to each address shall be recorded separately.

(4) *Drop shipments.* A wholesale dealer shall not record the receipt of adulterated butter which he orders delivered direct to a third party. The dealer's connection with the transaction shall be shown by the manufacturer as provided in paragraph (c) of § 45.6001–2. Where a wholesale dealer receives an order from one person to ship adulterated butter to another, the transaction shall be recorded in the name and address of the consignee followed by "acc't. of" and the name and address of the person giving the order. A wholesale dealer shall not record consignments in the names of agents, solicitors, or other persons transmitting orders for other parties.

(5) *Returned goods.* Where adulterated butter is returned by a customer to a wholesale dealer the transaction shall be recorded separately from other receipts. The sale of repossessed goods shall be recorded with other disposals. Adulterated butter returned by a wholesale dealer to the manufacturer or other wholesale dealer from whom received shall be recorded separately from other disposals (see paragraph (c)(6) of § 45.4821–3 as to resales).

Retention period: 3 years after the due date of such tax for the return period to which the records relate, or the date such tax is paid whichever is the later. The records of claimants required by paragraph (c) of section 45.6001–1 of the regulations shall be retained for a period of at least 3 years after the date the claim is filed. 26 CFR 45.6001–3 (retention: 45.6001–1)

4.74 Wholesale dealers in filled cheese.

Every wholesale dealer in filled cheese shall keep at his place of business a daily record of (a) the number of pounds in each consignment of filled cheese received by him, giving the name and address of the consignor and date of receipt, and (b) the number of pounds of filled cheese disposed of in each instance, name of person to whom shipped or delivered, date of shipment or delivery, and address to which sent.

Retention period: 3 years after the due date of such tax for the return period to which the records relate, or the date such tax is paid, whichever is the later. The records of claimants required by paragraph (c) of section 45.6001–1 of the regulations shall be retained for a period of at least 3 years after the date the claim is filed. 26 CFR 45.6001–4 (retention: 45.6001–1)

4.75 Persons liable for miscellaneous excise taxes payable by return.

(a) *General.*—(1) *Form of records.* Records shall be kept accurately, but no particular form is required. Such forms and systems of accounting shall be used as will enable the District Director of Internal Revenue to ascertain whether liability for tax is incurred and, if so, the amount thereof.

(2) *Copies of returns, schedules, and statements.* Every person who is required to keep any copy of any return, schedule, statement, or other document, shall keep such copy as a part of his records.

(3) *Records of Claimants.* Any person who claims a refund, credit, or abatement, shall keep a complete and detailed record with respect to the tax, interest, addition to the tax, additional amount, or assessable penalty to which the claim relates. Such record shall include any record required of the claimant by paragraph (a)(2), and by paragraph (b) below.

(4) *Place for keeping records.* All records required shall be kept, by the

person required to keep them, at one or more convenient and safe locations accessible to internal revenue officers, and shall at all times be available for inspection by such officers.

(5) *Microfilm reproductions.* General books of account, such as cash books, journals, voucher registers, ledgers, etc., shall be maintained and preserved in their original form. However, microfilm reproductions of supporting records of details, such as invoices, vouchers, production reports, sales records, certificates, proofs of exportation, etc., may be kept in lieu of the original records provided the person required to keep such records (i) retains such microfilmed copies for the specified retention period, (ii) provides adequate facilities for the preservation of such films and for the ready inspection and location thereof, including a projector for viewing such records in the event inspection is necessary for tax purposes, and (iii) makes any transcription which may be required of the information contained on the microfilm.

(b) *Manufactured sugar*—(1) *Manufacturing records.* Every person who manufactured sugar shall keep an accurate monthly record of the manufacturing done by him.

(2) *Content of records.* Such records shall show:

(i) The quantity of manufactured sugar and other sugar on hand at the beginning of the month;

(ii) The quantity received during the month;

(iii) The quantity of manufactured sugar produced during the month;

(iv) The quantity sold during the month;

(v) The quantity of manufactured sugar used during the month in the production of other articles for sale; and

(vi) The quantity of manufactured sugar and other sugar on hand at the end of the month.

For periods prior to August 31, 1963, the records shall show the polariscopic test or total sugars of each grade and type of sugar and manufactured sugar.

For periods after August 30, 1963, the records shall show the total sugars of each grade and type of sugar and manufactured sugar.

Retention period: 3 years after the due date of such tax for the return period to which the records relate, or the date such tax is paid, whichever is the later. The records of claimants required by paragraph (a)(3) shall be maintained for a period of at least 3 years after the date the claim is filed. 26 CFR 46.6001–1, 46.6001–2 (retention: 46.6001–1)

4.76–4.78 [Reserved]

4.79 Persons required to keep records with respect to foreign insurance policies.

(a) *Records to be kept by solicitors, brokers, etc.* Each person, solicitor, or broker, accepting, placing, soliciting, or making, directly or indirectly, or paying or receiving compensation with respect to, a policy or other instrument subject to the tax imposed by section 4371 of the Code shall keep a record of such policy or other instrument with respect to the issuance thereof and shall be prepared to furnish full information to the district director at any time upon demand.

(b) *Records to be kept by policy holder.* The person having control or possession of a policy of insurance, or reinsurance, or other instrument to which documentary stamps must be affixed shall retain such instrument with respect to the issuance thereof to enable internal revenue officers to ascertain whether the requisite stamps have been affixed and canceled.

(c) *Records to be kept by persons paying premiums on or after January 1, 1966.* Resident persons making premium payments to a foreign insurer, reinsurer, nonresident agent, solicitor or broker shall keep or cause to be kept accurate records of all policies or other instruments, identifying each such policy or instrument to establish (1) gross premium paid, (2) policy of casualty insurance or bond, life, sickness or accident insurance, annuity contract, or reinsurance policy, (3) identity of insured, (4) identity of foreign insurer or reinsurer, and (5) total premiums charged and if paid in installments, the amount and anniversary date of such installment.

Retention period: (a) and (b) At least 3 years from date any part of the tax was paid, 26 CFR 47.6001–2; (c) 3 years from date any part of the tax became due or date tax is paid, whichever is later, 26 CFR 46.6001–4.

4.80–4.81 [Reserved]

4.82 Sellers of tax-free sales and purchases of aircraft fuel for non-taxable purposes.

To maintain exemption certificates and proper supporting records such as invoices, orders, etc., relative to tax-free sales.

Retention period: 4 years from the last day of the month following the month in which the sale was made. 26 CFR 154.1–1

4.83 Persons claiming exemption from tax on the sale or use of diesel fuel, special motor fuel, and lubricating oil.

(a) *Bulk purchases by users.* Persons who purchase taxable liquid in bulk delivered into storage tanks or other containers and use it for various purposes, both taxable and nontaxable, or in both registered and nonregistered vehicles, must maintain adequate records of all fuel used for each purpose to permit verification of the tax paid and any of the credits, refunds, or exemptions claimed.

(b) *Dual use of taxable liquid.* If the taxable liquid used in a separate motor, or during a period the vehicle does not have the essential characteristics of a motor vehicle, is drawn from the same tank as the one which supplies fuel for the propulsion of the vehicle, a reasonable determination of the quantity of taxable liquid used in such separate motor or during such period will be acceptable for purposes of application of the tax. Such determination must be based, however, on the operating experience of the person using the taxable liquid and the taxpayer must maintain records which will support the allocation used.

(c) *Use as supplies for vessels or aircraft.* Seller must obtain and retain a properly executed exemption certificate, maintain records of invoices, orders, etc., relative to tax-free sales.

(d) *Use on a farm for farming purposes.* Maintain adequate records to establish that the taxable liquid was used on a farm for farming purposes.

(e) *Sales to State, Territory of the United States or a political subdivision or the District of Columbia.* Vendor must retain clearly identified orders or contracts properly signed by an authorized officer that the liquid sold was purchased for the exclusive use of a State, Territory of the United States, or a political subdivision, or the District of Columbia.

(f) *Sales for export.* Vendor must maintain adequate records, such as export bill of lading, certificate of carrier or customs officer, or statement of foreign consignee, to establish that the liquid was sold for export and actual exportation.

(g) *Sales to nonprofit educational organizations.* Retailer must obtain from purchaser and retain a properly executed exemption certificate.

Retention period: 4 years from the date the tax became due or, in the case of tax-free sales, for a period of at least 4 years from the last day of the month following the month in which the sale was made. 26 CFR 48.4041–5, 48.4041–6, 48.4041–8, 48.4041–9, 148.1–4 (retention: App. D 314.62, 324.42)

4.83a Manufacturers, producers, or importers selling automobile tires or tread rubber.

To maintain records of tires sold with metal rims or rim bases attached which will establish what portion of the finished product represents the weight of the tire exclusive of the metal rim or base; and for tax-free sales of tread rubber, to retain exemption certificates and to keep records of invoices, orders, etc., for inspection by the district director.

Retention period: Not specified. 26 CFR 48.4071–2, 48.4073–3

4.84 Sales on or after July 1, 1966, of lubricating oil seldom used as a lubricant.

Manufacturers must obtain from the purchaser and retain in his possession a properly executed exemption certificate. The certificates and proper records of invoices, orders, etc., relative to such sales must be kept for inspection by the district director.

Retention period: So long as the contents thereof may become material in the administration of any internal revenue law. 26 CFR 48.4091–6

4.85 Claims by suppliers for credit or refund due to repeal of tax by Excise Tax Reduction Act of 1965.

(1) An inventory statement of articles held for sale on the first moment of

V 38 - 12 JAN 18 73 XUM

June 22, 1965, by a retailer, and not used, must be kept in the supplier's records; (2) either evidence that the supplier has reimbursed the retailer or the written consent of the retailer to the allowance of the credit or refund to the supplier must be kept in the supplier's records.

Retention period: Not specified. 26 CFR 48.6011(c)–1

4.86 Persons claiming a credit or refund for diesel fuel, special motor fuel, lubricating oil, or gasoline used for certain nonhighway purposes, by a local transit system, or for farming purposes.

(a) *General.* To keep in accordance with the form outlined in the regulations an accurate record of the number of gallons purchased and the dates of purchases, the name and address of each vendor, the number of gallons used during the period covered by the claim and such other information as is necessary to establish the correctness of the claim.

(b) *Local transit systems.* In addition to the records required by paragraph (a), to keep records that establish for each calendar quarter: (1) the total passenger fare revenue (not including with respect to gasoline used before November 16, 1962, the tax imposed by section 4261 of the Internal Revenue Code) derived from scheduled common carrier public passenger land transportation service along regular routes, and (2) the commuter fare revenue derived from such scheduled service.

(c) *Farming purposes.* To keep a record of the gasoline purchased and used by the claimant on a farm which he is the owner, tenant, or operator, and to show, in cases where trucks or other vehicles are used both on and off the farm an allocation of the number of gallons used in such trucks or vehicles for farming purposes. Where the claimant is entitled to claim payment for gasoline used on his farm by a person other than the owner, tenant, or operator thereof, the records must show: (1) the name and address of the person who performed the farming operation, (2) a description of the type of work and the type of equipment used, (3) the date or dates on which the work was done, and (4) the number of gallons of gasoline so used.

Retention period: At least 3 years from the last date prescribed for the filing of the claim. 26 CFR 48.6416(b)–2, 48.6420(f)–1, 48.6421(g)–1

4.86a Manufacturer of tires and tubes floor stocks inventories October 1, 1966.

Maintain physical inventory of tires and inner tubes held at each retail outlet as of 12:01 a.m., on October 1, 1966.

Retention period: Not specified. 26 CFR 144.1–2(d)

4.87–4.88 [Reserved]

4.88a [Deleted]

4.88b Manufacturers making tax-free sales of supplies for vessels and aircraft.

To retain in his possession properly executed exemption certificates and supporting invoices, orders, etc., relative to the tax-free sales.

Retention period: Not specified. 26 CFR 145.4–1

4.88c [Reserved]

4.88d Interest equalization tax; acquisitions of foreign stock or debt obligations. [Revised]

Individuals, participating custodians, nominees, brokers, and domestic and foreign lending and financing corporations shall maintain complete and adequate records with respect to all such transactions involving such acquisitions as will establish ownership identification, exemptions, authorizations, consents, conversions, sales, withholding of taxes, etc.

Retention period: So long as the contents thereof may become material in the administration of any internal revenue law. 26 CFR 147.1–147.10

4.89 Private foundations; taxable expenditures. [Added]

(a) *Grants to individuals for travel, study, or other similar purposes.* To maintain records reflecting information evaluating qualification of potential grantees; identification of grantees; amount and purpose of each grant; and grantee progress reports.

Retention period: Not specified. 26 CFR 53.4945–4(c)(6)

(b) *Grants to organizations.* To maintain copy of expenditure responsibility agreement signed by grantee organization; records of receipts and expenditures; and copies of such reports required to be part of the records.

Retention period: 4 years after completion of use of grants funds. 26 CFR 4945–5(b)(3), 53.4945–5(c)(3), 53.4945–5(d)(3)

(c) *Program-related investments.* To maintain books and records adequate to provide information required.

Retention period: Not specified. 26 CFR 53.4945–5(b)(4)

4.90–4.122 [Reserved]

4.123 Persons required to file returns and pay tax on the sale or use of gasoline, lubricating oil, or matches.

To keep accurate and complete records, including accounts with respect to sales or use of gasoline, lubricating oil, or matches. Duplicates of returns, supporting information with respect to exempt or tax-free sales must also be kept.

Retention period: 4 years from the date the tax became due, or, in the case of exempt or tax-free sales, 4 years from the last day of the month immediately following that in which the sale occurs. 26 CFR App. D 314.62

4.124–4.125 [Reserved]

4.126 Persons required to file a return and pay tax on the sale or use of diesel fuel and special motor fuel.

To keep accurate records and accounts of all taxable transactions.

Retention period: 4 years from the date the tax became due. 26 CFR App. D 324.42

4.127–4.212 [Transferred to XI 8; Bureau of Alcohol, Tobacco and Firearms]

5. Office of Foreign Assets Control

5.1 Persons engaged in transactions subject to Foreign Assets Control Regulations, Transaction Control Regulations, Cuban Assets Control Regulations, Foreign Funds Control Regulations, and Rhodesian Sanctions Regulations.

To keep a full record of each transaction subject to the provisions of 31 CFR Ch. V, whether effected pursuant to license or not.

Retention period: At least 2 years after date of transaction. 31 CFR 500.601, 500.804, 505.40, 505.60, 515.601, 515.804, 520.601, 520.804, 530.601, 530.804

6. Office of Domestic Gold and Silver Operations

6.1 Persons authorized by license or by 31 CFR 54.18 or 54.21 to acquire, hold, process, and dispose of gold.

To keep full and accurate records of all operations and transactions respecting gold, including the name, address, and Treasury gold license number of each person from whom it is acquired or to whom it is delivered (or, when no Treasury gold license is held, the section of regulations in this part pursuant to which the gold was held or acquired by such person), the amount, date, description and purchase or sales price of each acquisition and delivery, any other papers and records required to be kept by a Treasury Department gold license, and costs and expenses in computation of total domestic value of articles of fabricated or semiprocessed gold.

Retention period: Until end of the fifth calendar year (or fifth fiscal year, if accounts are so maintained). 31 CFR 54.26

6.2 Licensed importers of gold-bearing materials for reexport of gold refined therefrom.

To cause to be kept at the plant of first treatment an exact record of percentages and weights as specified, for each importation, an attested copy of such record to be filed with the assay office at New York or the assay office at San Francisco, whichever is designated.

Retention period: At least 1 year after date of disposition of gold. 31 CFR 54.32

6.3 Persons delivering silver to a mint or assay office pursuant to the Coinage Act of 1965.

To maintain records of all acquisitions and dispositions of newly-mined domestic silver.

Retention period: 5 years following date of transaction to which they relate. 31 CFR 81.8, 81.10

7. Office of Operations [Added]

7.1 Corporations, partnerships, individuals, and associations having interests in foreign financial accounts.

To maintain records pertaining to such accounts as specified in section cited.

Retention period: 5 years. 31 CFR 103.32

7.2 Financial institutions.

To maintain either the original, microfilm, or other reproduction of records specified in section cited.

Retention period: 5 years. 31 CFR 103.33 (retention: 103.36)

7.3 Banks.

To maintain records as specified in section cited.

Retention period: 2 years for records needed to reconstruct a demand deposit account, or trace a check through the domestic processing system or to supply a description of a deposited check; 5 years for all other records. 31 CFR 103.34 (retention: 103.36)

7.4 Brokers and dealers in securities.

To maintain records as specified in section cited.

Retention period: 5 years. 31 CFR 103.35 (retention: 103.36)

8. Bureau of Alcohol, Tobacco and Firearms [Transferred from XI 4.127–4.212]

Liquors

8.1 Manufacturers recovering taxpaid alcohol.

To keep records of distilled spirits recovered from dregs or marc of percolation or extraction, or from medicines, medicinal preparations, food products, flavors, or flavoring extracts and the subsequent use to which such recovered spirits are put.

Retention period: Not less than 2 years. 26 CFR 170.617

8.2 Persons disposing of substances or articles of the character used in manufacturing distilled spirits, or disposing of containers of the character used for packaging distilled spirits.

To keep records pertaining to the disposition of such substances or articles or containers.

Retention period: 3 years. 26 CFR 173.15

8.3 Persons manufacturing liquor bottles.

To keep records of the receipt, manufacture, and disposition of liquor bottles.

Retention period: 3 years. 26 CFR 173.39 (retention: 173.15)

8.4 Wholesale dealers in distilled spirits (except proprietors of distilled spirits plants, who are subject to the record keeping provisions of 26 CFR Part 201).

To keep (a) daily records of the physical receipt and disposition of distilled spirits (including any spirits transferred between wholesale and retail departments of the dealer's own premises), copies of all invoices and delivery receipts (or bills of lading if delivered to a common carrier), and a daily (or less frequent, interval if authorized) recapitulation record showing total quantities of bottled and packaged spirits received and disposed of during the day; and (b) file copies of reports on Forms 52A and 52B (unless the requirement to prepare and submit such forms is waived) and 338.

Retention period: Not less than 2 years. (a) 26 CFR 194.221, 194.223, 194.225—194.230, 194.238; (b) 194.231, 194.234—194.238 (retention: 194.242)

8.5 Wholesale dealers in wine and/or beer.

To keep a complete record of all wines and beer received, showing the quantities thereof, from whom received, and the receiving dates.

Retention period: Not less than 2 years. 26 CFR 194.222, 194.223 (retention: 194.222, 194.242)

8.6 Retail liquor dealers.

To keep a complete record of all distilled spirits, wines, and beer received showing the quantities thereof, from whom received, and the receiving dates; a record of each sale of distilled spirits, wines, or beer in quantities of 20 wine gallons or more to the same person at the same time, showing the date of sale, the name and address of the purchaser, the kind and quantity of each kind of liquors sold, the serial numbers of all ful cases of distilled spirits included in the sale; and the delivery receipt supporting each entry in the sales record.

Retention period: Not less than 2 years. 26 CFR 194.223, 194.238, 194.239 (retention: 194.242)

8.7 Liquor dealers packaging alcohol for industrial uses.

To keep records, daily, showing bulk alcohol received, dumped for packaging, packaged, strip stamped, and disposed of, including the name and address of each consignor and consignee. To keep copies of quarterly reports of strip stamp transactions (Form 2260) and monthly reports of bulk alcohol transactions (Form 2733).

Retention period: Not less than 2 years. 26 CFR 194.271 (retention: 194.242)

8.8 Proprietors of vinegar factories.

To keep daily records of operations, showing the kind and quantity of fermenting and distilling material received, produced, used and removed from the premises, the quantity of mash set, the quantity of low wines produced and used, the quantity of vinegar produced and removed, and the identity of each consignor and consignee; and copies of monthly reports (Form 1623).

Retention period: Not less than 2 years. 26 CFR 195.152, 195.153, 195.155, 195.159—195.161, 195.175, 195.176 (retention: 195.177)

8.9 Manufacturers and vendors of distilling apparatus.

(1) In the case of any distilling apparatus removed for exportation without payment of tax, to keep a copy of each bill of lading covering exportation or consignment to a foreign-trade zone;

(2) In the case of distilling apparatus for domestic use for purposes other than distilling (as defined in 26 CFR 196.10), to keep a record showing the apparatus manufactured, received, and removed or otherwise disposed of, the name and address of each purchaser, and the purpose for which each still is to be used.

Retention period: Not less than 2 years. 26 CFR 196.62, 196.80, 196.82

8.10 Manufacturers of nonbeverage products claiming drawback.

(a) To keep a copy of each approved quantitative formula (Form 1678).

Retention period: Not less than 2 years from the date of filing last claim for drawback under such formula. 26 CFR 197.95 (retention: 197.133)

(b) To keep records showing the distilled spirits received and used, the products produced, and the disposition of such products; and all Forms 179 and bills of lading relating to the spirits shipped to him.

Retention period: Not less than 2 years. 26 CFR 197.95, 197.99, 197.130–197.132 (retention: 197.133)

8.11 Proprietors of volatile fruit-flavor concentrate plants.

(a) To keep daily records showing processing material used; processing material removed and the reason for such removal; concentrate produced, used, and removed, and returned concentrates received; substances received for use in rendering concentrate unfit for use as a beverage, and the use or other disposition of such substances; and the name and address of each person to whom processing material or concentrate is shipped and, in the case of concentrates shipped to or returned by a bonded wine cellar, the registry number of such bonded wine cellar and the identity of such concentrate.

(b) To keep file copies of Form 3874, Notice of Transfer of Fruit-Flavor Concentrate.

(c) To keep file copies of monthly reports (Form 1695).

Retention period: Not less than 2 years. 26 CFR 198.111, 198.112, 198.116, 198.117, 198.121—198.125 (retention: 198.121)

8.12 Scientific institutions and colleges of learning authorized to conduct experimental or research operations.

To keep records, daily, of quantities of spirits produced, received, and used.

Retention period: Not less than 4 years. 26 CFR 201.72 (retention: 201.612)

8.13 Persons receiving distilling material from the bonded premises of a distilled spirits plant.

To keep records of the receipt, use, and disposition of such material.

Retention period: Not less than 4 years. 26 CFR 201.74 (retention: 201.612)

8.14 Proprietors of distilled spirits plants.

(a) *Production.* To keep, as prescribed by regulations, records and copies of the applications, schedules, notices, and reports of transactions and operations relating to production facilities, including the receipt, use, and disposition of fermenting and distilling materials; the production of spirits and denatured spirits; the production and disposition of

V 38 - 12 JAN 18 73 XUM

distillates and chemical byproducts; losses in production processes; inventories; and the taking of samples.

Retention period: Not less than 4 years. 26 CFR 201.261, 201.262, 201.264, 201.265, 201.268, 201.269, 201.271, 201.274, 201.275, 201.278, 201.279, 201.562, 201.582, 201.587, 201.603, 201.611, 201.612, 201.616–201.620, 201.626, 201.627, 201.630, 201.632, 201.633 (retention: 201.612)

(b) *Storage in bond.* To keep, as prescribed by regulations, records and copies of the applications, schedules, notices, and reports of transactions and operations relating to the receipt and storage of spirits and denatured spirits; quick-aging; addition of oak chips or caramel; repairing, filling, and changing packages; mingling and consolidation of spirits; blending of beverage rums or brandies; losses and voluntary destruction; inventories; and the taking of samples.

Retention period: Not less than 4 years from the date thereof, the date transferred to an inactive file, or the date the spirits covered thereby are removed from the proprietor's bonded premises, as applicable. 26 CFR 170.125, 170.131, 201.291, 201.292, 201.294, 201.295, 201.298, 201.302–201.308, 201.311, 201.312, 201.312c, 201.313, 201.562, 201.582, 201.583, 201.587, 201.603, 201.611, 201.612, 201.616–201.618, 201.622, 201.626–201.630, 201.632–201.634 (retention: 201.612)

(c) *Bottling on bonded premises.* To keep, as prescribed by regulations, records and copies of applications and reports relating to bottling operations on bonded premises, including bottling in bond, bottling of alcohol before taxpayment, bottling losses and gains, strip stamp transactions, and rebottling, relabeling, and restamping operations.

Retention period: Not less than 4 years from the date the bottled spirits are removed from the proprietor's bonded premises. 26 CFR 201.322, 201.327, 201.336–201.338, 201.341–201.343, 201.346–201.348, 201.352, 201.543, 201.546, 201.611, 201.612, 201.616–201.618, 201.622, 201.624, 201.632, 201.633, 201.633a (retention: 201.612)

(d) *Transfers and withdrawals.* To keep, as prescribed by regulations, records and copies of applications, notices, and withdrawal and taxpayment forms relating to transfer and withdrawal of spirits and denatured spirits, including transfers between bonded premises, removals from storage to production facilities, determination and payment of tax and removal of spirits after taxpayment, withdrawals without payment of tax, and withdrawals free of tax.

Retention period: Not less than 4 years from the date thereon, the date transferred to an inactive file, or the date the spirits covered thereby are removed from the proprietor's bonded premises, as applicable. 26 CFR 201.363, 201.364, 201.366–201.380, 201.381–201.385, 201.387, 201.388, 201.390, 201.393, 201.394, 201.602, 201.603, 201.606, 201.611, 201.612, 201.614, 201.616–201.618, 201.622, 201.624, 201.628, 201.629, 201.632, 201.633 (retention: 201.612)

(e) *Denaturation.* To keep, as prescribed by regulations, records and copies of statements, certifications, applications, notices, and reports relating to denaturing transactions and operations, including receipt, test, use, and disposition of denaturants and the denaturation of spirits (including redenaturation and restoration of recovered denatured spirits and articles).

Retention period: Not less than 4 years. 26 CFR 201.404, 201.406–201.408, 201.410, 201.602, 201.603, 201.611, 201.612, 201.614, 201.616–201.618, 201.621, 201.626, 201.630, 201.632, 201.633 (retention: 201.612)

(f) *Rectification and bottling on bottling premises.* To keep, as prescribed by regulations, records and copies of applications, affidavits, statements, reports, and taxpayment forms relating to transactions and operations on bottling premises, including the receipt, use, and disposition of flavoring materials and of taxpaid spirits and wines; rectification of spirits and wines; production of vodka and gin by redistillation; packaging, bottling, and removal of rectified and unrectified spirits and wines; tax liability accounts; tax payment; stamping; operational losses; disaster losses; voluntary destruction of spirits; inventories; and rebottling, relabeling, and restamping operations.

Retention period: Not less than 4 years. 26 CFR 170.60, 170.61, 170.62, 201.426, 201.427, 201.430, 201.432, 201.435, 201.444, 201.446, 201.448, 201.450, 201.451, 201.452, 201.454, 201.455, 201.460, 201.463–201.466, 201.470, 201.470f, 201.482–201.484, 201.487, 201.490, 201.492, 201.543, 201.551, 201.562, 201.563, 201.611, 201.612, 201.614, 201.616–201.618, 201.623, 201.624, 201.627, 201.630, 201.632, 201.633, 201.633a (retention: 201.612)

(g) *Wholesale liquor dealer and taxpaid storeroom operations.* To keep daily records of the receipt and disposition of distilled spirits and wines at such premises, and of restamping operations, and to keep copies of periodic reports of spirits received at and removed from such premises.

Retention period: Not less than 4 years. 26 CFR 201.611, 201.612, 201.614, 201.616, 201.618, 201.625, 201.634 (retention: 201.612)

(h) *Receipt, use, and disposition of liquor bottles.* To keep, as prescribed by regulations, records covering the receipt, use, and disposition of liquor bottles in such manner as to enable any internal revenue officer to verify and trace the receipt and disposition of such bottles.

Retention period: Not less than 4 years. 26 CFR 201.630a (retention: 201.612)

8.15 Users of rubbing alcohol base.

To keep such records as will enable an internal revenue officer to verify and trace the receipt of rubbing alcohol base; records of production, bottling, and distribution of such alcohol.

Retention period: 3 to 6 years. 26 CFR 211.190e (retention: 211.273)

8.16 Dealers in and users of completely denatured alcohol.

To keep such records as will enable an internal revenue officer to verify and trace the receipt, storage, and disposal of such alcohol.

Retention period: 3 to 6 years. 26 CFR 211.118, 211.125, 211.261, 211.273, 211.274 (retention: 211.273)

8.17 Manufacturers of and dealers in proprietary anti-freeze made with completely denatured alcohol.

To keep such records as will enable an internal revenue officer to verify and trace the production, receipts, storage, and disposal of such products.

Retention period: 3 to 6 years. 26 CFR 211.125, 211.262, 211.273, 211.274 (retention: 211.273)

8.18 Persons recovering completely denatured alcohol and articles.

To keep such records as will enable an internal revenue officer to verify and trace recovery, redenaturation (if any) and reuse; to keep copies of monthly reports.

Retention period: 3 to 6 years. 26 CFR 211.212, 211.214, 211.215, 211.218, 211.263, 211.269, 211.273, 211.274 (retention: 211.273)

8.19 Dealers in specially denatured spirits.

To keep records and copies of all applications, notices, and reports reflecting details of procurement, packaging, losses, and disposition of specially denatured spirits.

Retention period: 3 to 6 years. 26 CFR 211.139, 211.145, 211.148, 211.234, 211.241, 211.243, 211.251–211.253, 211.255, 211.264, 211.270, 211.272–211.274, 211.285 (retention: 211.273)

8.20 Users of specially denatured spirits.

To keep records and copies of all applications, notices, and reports reflecting details of (a) specially denatured spirits received, used, recovered (including redenaturation), lost, and otherwise disposed of, and (b) products and articles manufactured and the disposition of such products and articles.

Retention period: 3 to 6 years. 26 CFR 211.139, 211.168, 211.212, 211.214, 211.215, 211.218, 211.241–211.243, 211.251–211.253, 211.255, 211.265–211.267, 211.271–211.274 (retention: 211.273)

8.21 Reprocessors, repackagers, and bottlers of bay rum, skin and hair lotions, and similar products and purchasers of such products in containers larger than 1 gallon for resale.

To keep records of receipt, manufacture, packaging, bottling, and sales.

Retention period: 3 to 6 years. 26 CFR 211.265–211.267, 211.272–211.274 (retention: 211.273)

8.22 Dealers in and users of proprietary solvents and special industrial solvents.

To keep records of receipt, use, and disposition.

Retention period: 3 to 6 years. 26 CFR 211.268, 211.272–211.274 (retention: 211.273)

8.23 Users of tax-free alcohol.

To keep records and copies of all applications, notices, and reports relating to receipt, use, recovery (including restoration), losses, and inventories of tax-free alcohol.

Retention period: 3 to 6 years. 26 CFR 213.116, 213.134, 213.151–213.153, 213.161–213.163, 213.165, 213.171–213.176 (retention: 213.175)

8.24 Proprietors of taxpaid wine bottling houses.

To keep records of wine received, bottled, packaged, and removed, and of semiannual and special inventories.

Retention period: 3 years. 26 CFR 231.110–231.114 (retention: 231.114)

8.25 Persons (other than proprietors of bonded wine cellars) producing wine for family use.

To keep the copy of the registration (Form 1541), with production data entered thereon, at the place of manufacture.

Retention period: While the wine produced pursuant thereto remains on hand. 26 CFR 240.542

8.26 Universities, colleges of learning, and institutions of scientific research authorized to conduct wine experimental or research operations.

To keep copies of approved applications and appropriate records of experiments and research.

Retention period: 3 to 6 years. 26 CFR 240.546–240.549, 240.731, 240.732, 240.924 (retention: 240.924)

8.27 Proprietors of vinegar plants receiving wine free of tax for use in manufacturing vinegar.

To keep records showing receipt and use of wine, and vinegar produced and disposed of.

Retention period: Not specified. 26 CFR 240.656, 240.657

8.28 Proprietors of bonded wine cellars.

(a) Production of wine, nonbeverage wine, distilling material, vinegar stock, and commercial fruit products. To keep, as prescribed by regulations, records and copies of all applications, notices, statements, and reports of transactions and operations relating to the receipt and use or other disposition of basic winemaking materials such as fruit, or juice, or concentrated juice, and of sugar, acids, chemicals, preservatives, distillates, wine spirits, volatile fruit-flavor concentrates, and other materials used in production of wine, nonbeverage wine, and allied products and in cellar and finishing operations; fermentation; amelioration and sweetening; baking; use of carbon dioxide in still wines; removal of excess color in white wine; reduction of acid content; and other cellar and finishing treatment of wines.

Retention period: 3 to 6 years. 26 CFR 170.683, 170.686, 170.690, 240.359a, 240.362, 240.363, 240.366, 240.367, 240.368, 240.375–240.379, 240.382–240.385, 240.402, 240.406, 240.407, 240.408, 240.409, 240.443, 240.484–240.487, 240.491, 240.525–240.527a, 240.532, 240.537, 240.771, 240.773, 240.822, 240.826, 240.832–240.834, 240.836, 240.837, 240.890, 240.892, 240.900, 240.904, 240.908–240.911, 240.913–240.919, 240.922–240.925 (retention: 240.924)

(b) Storage in bond, filling bottles and containers, voluntary destruction, reconditioning of foreign wine, losses, and inventories. To keep, as prescribed by regulations, records and copies of all applications, notices, and reports relating to the receipt and storage of wine, wine spirits, nonbeverage wine, and volatile fruit-flavor concentrates on bonded premises; bottling, casing, and the filling of containers; losses and voluntary destruction; and semiannual and special inventories.

Retention period: 3 to 6 years. 26 CFR 170.691, 240.359a, 240.534, 240.561, 240.751, 240.753, 240.783, 240.786–240.789, 240.804, 240.854–240.858, 240.871, 240.900, 240.903, 240.912, 240.913, 240.916, 240.922–240.925 (retention: 240.924)

(c) Transfers and removals. To keep, as required by regulations, records and copies of all applications, notices, transfer and withdrawal forms, and returns relating to wine, wine spirits, and nonbeverage wine, including transfers between bonded premises, return of wine to bonded storage, return of concentrates to volatile fruit-flavor concentrate plants, tax payment and removal, withdrawal free of tax and without payment of tax, disposition of lees and other residues, and the disposition of commercial fruit products and other allied products.

Retention period: 3 to 6 years. 26 CFR 170.687, 240.359b, 240.590–240.592, 240.600, 240.613–240.615, 240.618–240.620, 240.630, 240.633, 240.652, 240.660, 240.662, 240.672, 240.722, 240.726, 240.730, 240.732, 240.741, 240.743, 240.746, 240.761–240.763, 240.802, 240.804, 240.839, 240.871, 240.892, 240.900–240.902, 240.904, 240.920, 240.922–240.925 (retention: 240.924)

(d) Taxpaid storeroom operations. To keep records of receipt and disposition.

Retention period: 3 to 6 years. 26 CFR 170.690, 240.801, 240.921–240.925 (retention: 240.924)

8.29 Brewers.

To keep, as required by regulations, records and copies of all applications, statements, notices, tax returns, and reports of brewery operations and transactions relating to receipt and use or disposition of brewing materials; production of beer and cereal beverages; production of wort, wort concentrate, malt sirup, and malt extract for sale or removal; beer entered into concentration process; concentrate produced, received, and used in reconstituting beer; beer reconstituted; transfers of beer and beer concentrate between breweries of same ownership; removals of yeast and malt; removal of beer unfit for beverage use; racking and bottling operations; losses; voluntary destruction; beer returned to the brewery; beer procured from another brewer; removal of cereal beverage; removal of beer for sale or consumption; removal of beer free of tax; removal of beer and beer concentrate without payment of tax; removal of wort, wort concentrate, malt sirup, and malt extract; beer consumed at the brewery and inventories of brewing materials, beer and cereal beverage in process, concentrate, and finished beer and cereal beverage on hand.

Retention period: Not less than 4 years. 26 CFR 245.135, 245.136, 245.145–245.148, 245.152, 245.153, 245.155, 245.157, 245.158, 245.161, 245.205–245.208, 245.210, 245.215, 245.225–245.227, 245.230, 245.232, 245.233, 245.243, 245.245 (retention: 245.232)

8.30 Proprietors of pilot brewing plants.

To keep, as required by regulations, records including information sufficient to account for the receipt, production, and disposition of all beer received or produced on the premises and the receipt (and disposition, if removed) of all brewing materials.

Retention period: Not less than 4 years. 26 CFR 245.256 (retention: 245.232)

8.31 Proprietors of bonded warehouses or bonded processing rooms in Puerto Rico withdrawing spirits of Puerto Rican manufacture for shipment to the United States.

To keep file copies of Forms 2899, 2901, 2925, and 2630.

Retention period: Not less than 2 years. 26 CFR 250.78–250.81, 250.112 (retention: 250.276)

8.32 Proprietors of rectifying plants in Puerto Rico withdrawing spirits of Puerto Rican manufacture for shipment to the United States.

To keep file copies of Forms 2925 and 2926.

Retention period: Not less than 2 years. 26 CFR 250.85 (retention: 250.276)

8.33 Proprietors of bonded premises in Puerto Rico withdrawing wine of Puerto Rican manufacture for shipment to the United States.

To keep file copies of Forms 2900, 2927, and 2928.

Retention period: Not less than 2 years. 26 CFR 250.93–250.96, 250.112 (retention: 250.276)

8.34 Proprietors of bonded premises in Puerto Rico withdrawing beer of Puerto Rican manufacture for shipment to the United States.

To keep file copies of Forms 2900, 2929, and 2930.

Retention period: Not less than 2 years. 26 CFR 250.102–250.105, 250.112 (retention: 250.276)

8.35 Shippers of liquors and articles of Puerto Rican manufacture to the United States.

To keep file copies of Forms 487–B and 3039.

Retention period: Not less than 2 years. 26 CFR 250.88, 250.89, 250.116 (retention: 250.276)

8.36 Persons, other than tourists, bringing liquors into the United States from Puerto Rico or the Virgin Islands (except proprietors of distilled spirits plants).

To keep records and copies of reports pertaining to receipt and disposition of such liquors (except while in customs custody) in accordance with 26 CFR Part 194 (Liquor Dealer).

V 38 - 12 JAN 18 73 XUM

Retention period: At least 2 years. 26 CFR 250.163, 250.272 (retention: 194.242)

8.37 Proprietors of distilled spirits plants bringing liquors into the United States from Puerto Rico or the Virgin Islands.

To keep records and copies of reports of transactions pertaining to such liquors in accordance with 26 CFR Part 201 (Distilled Spirits Plants).

Retention period: Not less than 4 years. 26 CFR 250.164, 250.273 (retention: 201.612)

8.38 Importers bringing bottled distilled spirits into the United States from the Virgin Islands.

To keep daily records and copies of strip stamp reports.

Retention period: Not less than 2 years. 26 CFR 250.270, 250.271 (retention: 250.276)

8.39 Importers of distilled spirits receiving and storing used liquor bottles pending return to Puerto Rico or the Virgin Islands or exportation.

To keep records of the receipt and disposition of used liquor bottles.

Retention period: Not less than 2 years. 26 CFR 250.319, 251.209 (retention: 250.276, 251.137)

8.40 Importers of distilled spirits.

To keep daily records and copies of strip stamp reports.

Retention period: Not less than 2 years. 26 CFR 251.130, 251.131 (retention: 251.137)

8.41 Importers of distilled spirits, wines, or beer (except proprietors of premises qualified under the provisions of Chapter 51, I.R.C.).

To keep records and copies of reports of the receipt and disposition of such liquors (except while in customs custody) in accordance with 26 CFR Part 194 (Liquor Dealers).

Retention period: At least 2 years. 26 CFR 251.133 (retention: 251.137)

8.42 Proprietors of premises qualified under the provisions of Chapter 51, Internal Revenue Code, importing liquors.

To keep records and copies of reports of transactions in accordance with the regulations governing the operations of such premises.

Retention period: Not less than 2 years. 26 CFR 251.134 (retention: 251.137)

8.43 Importers of liquors.

To keep records, documents or copies of documents supporting such records, and copies of reports required to be submitted to the assistant regional commissioner or to the collector of customs.

Retention period: Not less than 2 years. 26 CFR 251.136, 251.137 (retention: 251.137)

8.44 Proprietors of distilled spirits plants who transfer distilled spirits from customs custody to their bonded premises.

To keep file copies of Form 2609.

Retention period: Not less than 2 years. 26 CFR 251.172 (retention: 251.137)

8.45 Proprietors or claimants exporting liquors under the provisions of 26 CFR Part 252.

To keep file copies of all export forms involved, and the records, documents, or copies of the records and documents supporting such forms.

Retention period: Not less than 2 years. 26 CFR 252.45

8.46 Proprietors of distilled spirits plants.

(1) To keep a copy of each Form 206 (with attached Form 2630, if any) covering distilled spirits withdrawn without payment of tax for exportation, use on vessels and aircraft, transfer to a foreign-trade zone, or transfer to a manufacturing bonded warehouse, and any return of the spirits so withdrawn to the distilled spirits plant.

Retention period: Not less than 2 years. 26 CFR 252.107, 252.118 (retention: 252.45)

(2) To keep a copy of each Form 206 (with attachments, if any) covering the withdrawal of specially denatured spirits, free of tax, for exportation or transfer to a foreign-trade zone, and any return of the spirits so withdrawn to the distilled spirits plant.

Retention period: Not less than 2 years. 26 CFR 252.153 (retention: 252.45)

8.47 Proprietors of bonded wine cellars.

To keep a copy of each Form 206 covering the withdrawal of wine without payment of tax for exportation, use on vessels and aircraft, or transfer to a manufacturing bonded warehouse, and any return of the wine so withdrawn to the bonded wine cellar.

Retention period: Not less than 2 years. 26 CFR 252.125, 252.133 (retention: 252.45)

8.48 Brewers.

To keep a copy of each Form 1689 covering beer removed without payment of tax for use as supplies on vessels and aircraft; and a copy of each Form 1689 covering beer, and Form 3021 covering beer concentrate, removed without payment of tax for exportation or transfer to a foreign-trade zone, and any return to the brewery of the beer or beer concentrate so removed.

Retention period: Not less than 2 years. 26 CFR 252.145, 252.146, 252.150f—252.150h (retention: 252.45)

8.49 Bottlers or packagers of distilled spirits stamped or restamped and marked, especially for export with benefit of drawback.

To keep a copy of each Form 1582 (with attachments, if any) on which claim for drawback is filed.

Retention period: Not less than 2 years. 26 CFR 252.195, 252.195a (retention: 252.45)

8.50 Exporters of wine.

To keep a copy of each Form 1582–A on which claim for drawback is filed and the supporting tax certification Form 2605.

Retention period: Not less than 2 years. 26 CFR 252.215, 252.218 (retention: 252.45)

8.51 Brewers.

To keep a copy of each Form 1582–B on which a claim for drawback is filed.

Retention period: Not less than 2 years. 26 CFR 252.225–252.227 (retention: 252.45)

8.52 Airlines withdrawing distilled spirits or wines from its stock held in customs custody.

To keep a copy of each requisition.

Retention period: Not less than 2 years. 26 CFR 252.280 (retention: 252.45)

TOBACCO

8.53 Manufacturers of tobacco products.

To keep authorizations to employ alternate methods or procedures, to employ emergency variations from requirements, to engage in another business within the factory, to use alternate means for marking packages of cigars or cigarettes, to repackage cigars or cigarettes, to remove cigars or cigarettes in bond for experimental purposes, to temporarily store cigars or cigarettes outside of factory, and to destroy cigars or cigarettes without supervision.

Retention period: 3 years following close of calendar year in which operations under authorizations granted under Parts 270 and 295 are concluded. Not specified for authorizations granted under Part 290. 26 CFR 270.45–270.47, 270.212, 270.217, 270.232, 270.251, 270.253, 290.72, 290.73, 290.184, 295.21, 295.22 (retention under Part 270: 270.185)

8.54 Manufacturers of tobacco products.

To keep receipted copy of each semimonthly tax return, Form 3071, and of each prepayment tax return, Form 2617.

Retention period: 3 years following close of calendar year in which filed. 26 CFR 270.162, 270.167 (retention: 270.185)

8.55 Manufacturers of tobacco products.

To keep daily records of his operations, either commercial records or internal revenue Form 3065 or Form 3066, together with auxiliary and supplemental records from which such records are compiled, supporting records of cigars and cigarettes removed subject to tax and transferred in bond, and separate records with respect to Puerto Rican cigars and cigarettes released from customs custody, without payment of tax. To keep daily records of his operations in tobacco.

Retention period: 3 years following close of calendar year in which made. 26 CFR 270.181, 270.182, 270.183, 270.184, 270.186, 275.139 (retention: 270.185, 275.22)

8.56 Manufacturers of tobacco products.

To keep a copy of each inventory, Form 3067.

Retention period: 3 years following the close of calendar year in which made. 26 CFR 270.201 (retention: 270.185)

8.57 Manufacturers of tobacco products.

To keep a copy of each monthly report, Form 3068, together with copy of any supplemental report covering cigars and cigarettes of Puerto Rican manufacture.

Retention period: 3 years following close of calendar year in which filed. 26 CFR 270.202, 275.141 (retention: 270.185, 275.22)

8.58 Manufacturers of tobacco products.

To keep a copy of each claim for abatement or refund, Form 843, and of each claim for allowance, credit, or remission, Form 2635, together with any verified supporting schedules, Form 3069.

Retention period: 3 years following close of calendar year in which filed. 26 CFR 270.281–270.284, 270.286, 270.287 (retention: 270.185)

8.59 Manufacturers of tobacco products.

To keep a copy of each notice of release, Form 2145 or Form 3072, covering the release from customs custody without payment of tax or certain duty of imported, returned, or Puerto Rican cigars, cigarettes, or cigarette papers or tubes.

Retention period: 3 years following close of calendar year in which release is made. 26 CFR 275.86, 275.138 (retention: 275.22)

8.60 Manufacturers of tobacco products.

To keep a copy of each notice of removal, Form 2149, covering shipment of cigars and cigarettes removed, without payment of tax, for export, and notice of removal, Form 2150, covering the return of such products to the factory.

Retention period: 2 years following close of calendar year in which shipment was removed or received. 26 CFR 290.199, 290.201

8.61 Manufacturers of tobacco products.

To keep a supporting record showing appropriate entries with respect to removals of cigars and cigarettes, without payment of tax, for use of the United States.

Retention period: 3 years following close of year in which removal was made. 26 CFR 295.51

8.62 Manufacturers of cigarette papers and tubes.

To keep a copy of each notice of release, Form 2145 or Form 3072, covering the release from customs custody without payment of tax or certain duty of imported, returned, or Puerto Rican cigarette papers or tubes.

Retention period: 3 years following close of calendar year in which release is made. 26 CFR 275.86, 275.138 (retention: 275.22)

8.63 Manufacturers of cigarette papers and tubes.

To keep a receipted copy of each monthly tax return, Form 2137.

Retention period: 3 years following close of calendar year in which made. 26 CFR 285.25 (retention: 285.31)

8.64 Manufacturers of cigarette papers and tubes.

To keep authorizations to employ alternate methods or procedures and to employ emergency variations from requirements.

Retention period: 3 years following close of calendar year in which operations under authorizations granted under Parts 285 and 295 are concluded. Not specified for authorizations under Part 290. 26 CFR 285.34a, 285.35, 290.73, 295.21, 295.22 (retention under Part 285: 285.31)

8.65 Manufacturers of cigarette papers and tubes.

To keep a copy of each inventory, Form 2132.

Retention period: 3 years following close of calendar year in which made. 26 CFR 285.91 (retention: 285.31)

8.66 Manufacturers of cigarette papers and tubes.

To keep daily records of his operations and transactions, and also separate records with respect to Puerto Rican cigarette papers and tubes released from customs custody, without payment of tax.

Retention period: 3 years following close of calendar year in which made. 26 CFR 275.139, 285.101 (retention: 275.22, 285.31)

8.67 Manufacturers of cigarette papers and tubes.

To keep a copy of each report, Form 2138, together with copy of any supplemental report covering cigarette papers and tubes of Puerto Rican manufacture.

Retention period: 3 years following close of calendar year in which filed. 26 CFR 275.141, 285.111 (retention: 275.22, 285.31)

8.68 Manufacturers of cigarette papers and tubes.

To keep a copy of each claim for abatement or refund, Form 843, and of each claim for allowance, credit, or remission, Form 2635, together with any verified supporting schedules, Form 3069.

Retention period: 3 years following close of calendar year in which filed. 26 CFR 285.171–285.174 (retention: 285.175)

8.69 Manufacturers of cigarette papers and tubes.

To keep a copy of each notice of removal, Form 2149, covering shipment of cigarette papers and tubes removed, without payment of tax, for export, and notice of removal, Form 2150, covering the return of such articles to the factory.

Retention period: 2 years following close of calendar year in which shipment was removed or received. 26 CFR 290.199, 290.201

8.70 Manufacturers of cigarette papers and tubes.

To keep a supporting record showing appropriate entries with respect to removals of cigarette papers and tubes, without payment of tax, for use of the United States.

Retention period: 3 years following close of year in which removal was made. 26 CFR 295.51

8.71 Persons shipping Puerto Rican cigars, cigarettes, or cigarette papers or tubes to the United States.

To keep receipted copy of each prepayment return, Form 3073.

Retention period: 3 years following close of calendar year in which filed. 26 CFR 275.105 (retention: 275.22)

8.72 Persons shipping Puerto Rican cigars, cigarettes, or cigarette papers or tubes to the United States.

To keep certified copy of notice of release, Form 3072.

Retention period: 3 years following close of calendar year in which filed. 26 CFR 275.137 (retention: 275.22)

8.73 Puerto Rican manufacturer shipping cigars, cigarettes, or cigarette papers or tubes to the United States.

To keep receipted copy of semimonthly tax return. Form 2988.

Retention period: 3 years following close of calendar year in which filed. 26 CFR 275.112 (retention: 275.22)

8.74 Importers of cigars, cigarettes, or cigarette papers or tubes.

To keep receipted copy of each return made on customs form.

Retention period: 3 years following close of calendar year in which filed. 26 CFR 275.81 (retention: 275.22)

8.75 Importers of cigars, cigarettes, and cigarette papers and tubes.

To keep authorizations to employ alternate methods or procedures and to employ emergency variations from requirements.

Retention period: 3 years following close of calendar year in which operation under the authorization is concluded. 26 CFR 275.26, 275.27 (retention: 275.22)

8.76 Persons filing claims for tax assessed or paid on imported cigars, cigarettes, and cigarette papers and tubes.

To keep a copy of each claim for abatement or refund, Form 843, together with verified supporting schedules, Form 3069.

Retention period: 3 years following close of calendar year in which filed. 26 CFR 275.161, 275.163 (retention: 275.22)

8.77 Proprietors of bonded internal revenue tobacco export warehouses.

To keep authorizations to employ alternate methods or procedures and to employ emergency variations from requirements.

Retention period: Not specified. 26 CFR 290.72, 290.73

8.78 Proprietors of bonded internal revenue tobacco export warehouses.

To keep complete and adequate daily records of operations of his warehouse, with a copy of each notice of removal, Form 2149 or 2150, covering receipt of cigars, cigarettes, and cigarette papers and tubes from a manufacturer, another export warehouse proprietor, or customs warehouse proprietor, and of each Form 2150 covering such articles removed from his warehouse.

V 38 N 12 JAN 18 73 XUM

Retention period: **2 years** following close of calendar year in which shipment was removed or received. **26 CFR** 290.142, 290.199–290.201

8.79 Proprietors of bonded internal revenue tobacco export warehouses.

To keep a copy of each inventory made.
Retention period: 2 years following close of calendar year in which made. 26 CFR 290.143

8.80 Proprietors of bonded internal revenue tobacco export warehouses.

To keep a copy of each monthly report, Form 2140.
Retention period: 2 years following close of calendar year in which filed. 26 CFR 290.147

8.81 Proprietors of bonded internal revenue tobacco export warehouses.

To keep a copy of each monthly report, mission, Form 2635, and for refund, Form 843.
Retention period: 2 years following close of calendar year in which filed. 26 CFR 290.152, 290.154

8.82 Proprietors of customs bonded manufacturing warehouse, class 6.

To keep a copy of each notice of removal of cigars, Form 2149, withdrawn from the customs warehouse, without payment of tax for export, and of each notice of removal, Forms 2149 and 2150, relating to the return of cigars to the customs warehouse.
Retention period: 2 years following close of calendar year in which shipment was withdrawn or received. 26 CFR 290.201, 290.257, 290.266, 290.267

FIREARMS AND EXPLOSIVES

8.83 Persons responsible for returns and payment of tax on sales of pistols and revolvers.

To keep such records and memoranda as will clearly show the amount of the sales of pistols and revolvers for each month; evidence of the right to exemption from the tax; and a complete and detailed record of overpayments for which credits are taken. A duplicate of the return shall also be kept.
Retention period: 4 years from the date the tax becomes due and, with respect to credits, 4 years from the date the credit is taken. 26 CFR (1939) 302.9, 302.12, 302.15

8.84 Persons making exports of pistols and revolvers.

(a) *Manufacturers selling pistols and revolvers for export and in due course so exported.* To preserve the orders or contracts of sale, and certificates with respect to shipment to a foreign destination, and "proofs of exportation."

(b) *Persons, other than manufacturers, exporting pistols and revolvers.* To carefully preserve in their own files copies of export bills of lading or other shipping documents and all other papers bearing on the transactions.
Retention period: Not specified. 26 CFR (1939) 302.16–302.18

8.85 Licensed firearms manufacturers, importers, dealers, and collectors.

To maintain complete and adequate records and supporting documents reflecting the production, importation, receipt, and disposition of all firearms and ammunition produced, imported, received or disposed of in the course of licensed operations, except that no record need be kept of retail sales of shotgun ammunition, ammunition suitable for use only in rifles, or components for such shotgun and rifle ammunition.
Retention period: For ammunition 2 years from date transaction occurs. For firearms—permanent. Upon discontinuance of business, firearms and ammunition records must be delivered to successor, or, if discontinuance of the business is absolute, to Assistant Regional Commissioner, Alcohol, Tobacco and Firearms. 26 CFR 178.122–178.127, Public Law 91–128 (83 Stat. 269)

8.86 Transferees of firearms.

To maintain the application (filed by the transferor and approved by the Director, Alcohol, Tobacco and Firearms Division) for the transfer of a firearm. This includes transfers exempt from, as well as subject to, the transfer tax.
Retention period: Transferee retains approved application for duration of his ownership of the related firearm. 26 CFR 179.84–179.93

8.87 Manufacturers, importers, or dealers in firearms (including pawnbrokers).

To keep records showing (a) the manufacture, receipt, transfer or other disposition of all firearms taxable under the Internal Revenue Code, (b) date of such manufacture, receipt, transfer or disposition, (c) the number, model, and trade name or other mark identifying each firearm, (d) the name and address of the person to whom any firearm is transferred.
Retention period: At least 4 years from date of disposition of the firearm. 26 CFR 179.131

8.88 Licensed explosives manufacturers, importers limited-manufacturers, dealers and permittees.

To take true and accurate inventory of explosives material on hand as of February 12, 1971, or at time of commencing business. To maintain complete and adequate records and supporting documents reflecting the production, importation, receipt, and disposition of all explosives material.
Retention period: 5 years from date transaction occurs. Upon discontinuance of business, explosives records must be delivered to successor, or if discontinuance of business is absolute, to Assistant Regional Commissioner, Alcohol, Tobacco and Firearms. 26 CFR 181.121–181.129

8.89 Registered importers of arms, ammunition, or implements of war, shown on the Import List.

Importers who are required to register under 26 CFR Part 180 shall maintain records of articles on the U.S. Munitions Import List that are imported, their acquisition and disposition.
Retention period: 6 years. The Director, Alcohol, Tobacco and Firearms Division may prescribe a longer or shorter period in individual cases as he deems necessary. 26 CFR 180.24

XII. DEPARTMENT OF TRANSPORTATION

1. Federal Aviation Administration

1.1 Aircraft and related products manufacturers.

To maintain records of inspection identified with the completed product and records of Materials Review Board action applying to materials, parts, assemblies, and the completed product.
Retention period: At least 2 years. 14 CFR 21.125

1.2 Aircraft and related products manufacturers.

To maintain records of inspection applying to the manufacture of replacement or modification parts and identifiable with the completed part.
Retention period: At least 2 years. 14 CFR 21.303

1.3 Certificated air carriers and commercial operators. [Amended]

To keep (a) all the records necessary to show that all requirements for the issuance of an airworthiness release under 14 CFR 121.709 or 127.319 have been met and (b) records of total time in service of airframe; current status of life limited parts of each airframe, engine, propeller, rotor, and appliance; time since last overhaul of all items required to be overhauled on a specified time basis; identification of current inspection status of aircraft, including time since last inspection required by inspection program under which aircraft and its appliances are maintained; current status of applicable airworthiness directives, including method of compliance; and a list of current major alterations to each airframe, engine, propeller, rotor, and appliance.
Retention period: (a) Until work is repeated or superseded by other work or for 1 year after work is performed, except for records of last complete overhaul of each airframe, engine, propeller, rotor, or appliance which are retained until work is superseded by work of equivalent scope and detail; (b) transferred with the aircraft at the time the aircraft is sold. 14 CFR 121.380, 127.141

1.4 Certificated repair stations or airframe, powerplant, propeller, or appliance manufacturers.

To maintain a duplicate copy of the customer's work order, when accepted in lieu of the Major Repair and Alteration Form (FAA–337 or equivalent).
Retention period: At least 2 years. 14 CFR Part 43, App. B

1.5 Domestic, flag, and supplemental air carriers and commercial operators of large aircraft.

To retain information taped by flight recorders.
Retention period: At least 60 days or, for a particular flight or series of flights, for a longer period if requested by a representative of the Federal Aviation Administration or the National Transportation Safety Board. 14 CFR 121.343

1.6 Domestic, flag, and supplemental air carriers and commercial operators of large aircraft.

To maintain current records of every crewmember and aircraft dispatcher, as is necessary to show compliance with the appropriate requirements of Federal Aviation Regulations and each action taken concerning the release from employment or physical or professional disqualification of flight crewmembers or aircraft dispatchers.
Retention period: At least 6 months after termination of employment. 14 CFR 121.683

1.7 Domestic, flag, and supplemental air carriers and commercial operators of large aircraft. [Amended]

To maintain (a) an aircraft maintenance log; (b) copies of alteration and repair reports; and (c) copies of airworthiness release forms.
Retention period: Not specified for (a) and (b); 2 months for (c). 14 CFR 121.701, 121.707, 121.709

1.8 Flag and domestic air carriers.

To maintain a list of aircraft in current operation and airplanes operated under interchange agreements.
Retention period: Not specified. 14 CFR 121.685

1.9 Flag and domestic air carriers.

To retain copies of load manifests, dispatch releases, and flight plans.
Retention period: 3 months. 14 CFR 121.695

1.10 Flag and domestic air carriers.

To maintain records pertaining to radio contacts by or with pilots en route.
Retention period: 30 days. 14 CFR 121.711

1.11 Air taxi operators and commercial operators of small aircraft.

To maintain at principal business office (a) a current list of aircraft used or available for use and the operations for which each is equipped and (b) an individual record of each pilot used (including name, certificate and ratings held, aeronautical experience, current duties, medical certificate, etc.).
Retention period: 6 months. 14 CFR 135.43

1.12 Registered owners or operators of civil aircraft. [Amended]

To keep (a) records of maintenance, alterations, 100-hour, annual, and progressive inspections, and other required or approved inspections for each aircraft, and for each airframe, engine, propeller, rotor, and appliance of an aircraft including a description of the work performed, the date the work was completed, and signature and certificate number of the persons approving the aircraft for return to service and (b) records of total time in service of airframe; current status of life limited parts of each airframe, engine, propeller, rotor, and appliance; time since last overhaul of all items required to be overhauled on a specified time basis; identification of current inspection status of aircraft, including time since last inspection required by inspection program under which aircraft and its appliances are maintained, current status of applicable airworthiness directives, including method of compliance; and a list of current major alterations to each airframe, engine, propeller, rotor, and appliance.
Retention period: (a) Until the work is repeated or superseded by other work or for 1 year after the work is performed; (b) transferred with the aircraft at the time the aircraft is sold. 14 CFR 91.173

1.13 Air carriers (utilizing helicopters in scheduled interstate air transportation).

To keep (a) maintenance records of such information as total time in service, time since last overhaul, and time since last inspection on all major components of the airframe, engines, rotors, and appliances, and (b) a maintenance log for all data specified in (a), except time since last overhaul.
Retention period: Not specified. 14 CFR 127.309, 127.311

1.14 Air carriers (utilizing helicopters in scheduled interstate air transportation).

To maintain records of every crewmember as is necessary to show compliance with the appropriate requirements of Federal Aviation Regulations and each action taken concerning the release from employment or physical or professional disqualification of any flight crewmember.
Retention period: At least 3 months. 14 CFR 127.301

1.15 Air carriers (utilizing helicopters in scheduled interstate air transportation).

To retain copies of load manifest, flight release, and airworthiness release forms.
Retention period: At least 60 days. 14 CFR 127.307, 127.319

1.16 Air carriers.

To retain copy of shipper's certification for transportation of explosives and other dangerous articles.
Retention period: Not specified. 14 CFR 103.3

1.17 Pilots.

To keep a reliable record of the flight time used to meet the experience requirements for pilot certificate or rating, or the recent flight experience requirements of 14 CFR 61.47, including as to each flight such general data as points of departure and arrival, date, duration, and identification mark; type of piloting time; and conditions of flight.
Retention period: Not specified. 14 CFR 61.39

1.18 Airline transport pilots.

To keep an accurate and legible record of flying time in a bound logbook arranged for easy reference, including specified information on each flight. Pilot must certify solo flying time entries, and his instructor must certify entries on instruction.
Retention period: Not specified. 14 CFR 61.41

1.19 Flight instructors.

To maintain separately or in his logbook a record of (a) the name of each person to whom he has given flight instruction or whose student pilot certificate he has endorsed, and the date and type of each flight instruction period or endorsement, and (b) the name of each person for whom he has signed a recommendation for a written or flight test, under this part, the kind of test, and the date of recommendation.
Retention period: 3 years. 14 CFR 61.174

1.20 Flight navigator training course operators.

To keep an accurate record of each student, including a chronological log of all instructions, subjects covered, and course examinations and grades.
Retention period: During continuation of approval of course. 14 CFR Part 63, App. B, para. (f)

1.21 Certificated parachute riggers.

To keep a record of the packing, maintenance, and alteration of parachutes performed or supervised by him.
Retention period: At least 2 years after the date record is made. 14 CFR 65.131

1.22 Aircraft dispatcher course operators.

To keep an accurate record of each student including a chronological log of all instructions, subjects covered, and course examinations and grades.
Retention period: During continuation of approval of course. 14 CFR Part 65, App. A, para. (g)

1.23 Certificated pilot schools.

To keep a current, accurate, and individual record of each student's participation and accomplishments in the course for which he is enrolled, including a chronological log of his instruction, attendance, subjects covered, tests, and test grades.
Retention period: 1 year following student's graduation or termination of his participation in the training course. 14 CFR 141.21

1.24 Certificated domestic repair stations and applicants for a domestic repair station certificate and rating.

To maintain a roster of its supervisory and inspection personnel, and a summary of the employment of each person whose name is on the roster containing enough

V 38 - 12 JAN 18 73 XUM

information to show compliance with experience requirements.

Retention period: Not specified. 14 CFR 145.43

1.25 Certificated domestic repair stations.

To maintain adequate records of work performed, naming the certificated mechanic or repairman who performed or supervised the work, and the inspector of that work.

Retention period: At least 2 years. 14 CFR 145.61

1.26 Certificated foreign repair stations.

To keep a record of the maintenance and alteration performed on United States registered aircraft.

Retention period: Not specified. 14 CFR 145.79

1.27 Certificated aviation maintenance technician schools.

To keep (a) current record of each student enrolled showing his attendance, tests, and grades received on subjects required, instruction credited by reason of instruction completed at another aviation maintenance technician school (or other specified source), and authenticated transcript of his grades; and (b) current progress chart or individual progress record showing the projects or laboratory work completed, or to be completed, by the student in each subject.

Retention period: At least 2 years after the end of the student's enrollment as to (a); (b) not specified. 14 CFR 147.33

1.28 Holders of parachute loft certificates.

To maintain records of work performed, including names of persons doing the work.

Retention period: At least 2 years. 14 CFR 149.15

1.29 Owners of VOR, nondirectional radio beacon, and instrument landing system facilities.

To keep for each facility the following records on the forms named, or on an equivalent form acceptable to the Regional Director: (a) Record of meter readings and adjustments—Form FAA-198 (1 copy); (b) Radio equipment operation record—Form FAA-418 (original); and (c) VOR check error data, FAA Forms 2396 and 2397 (originals—for VOR facilities only).

Retention period: Permanent for (a); not specified for (b) and (c). 14 CFR 171.13, 171.33, 171.73

1.30 Manufacturers of aircraft.

To maintain at factory, for each product type certificated under the delegation option procedures, current records containing the following: (a) technical data file including type design drawings, reports on tests, and original type inspection report and amendments; (b) data (including amendments) required with original application for each production certificate; (c) record of all rebuilding and alteration performed; (d) complete inspection record for each product manufactured; (e) record of reported service difficulties.

Retention period: (a), (b), and (c) for the duration of the manufacturing operation under the delegation option authorization; (d) and (e), 2 years. 14 CFR 21.293

1.31 Contractors for construction of public airports.

To keep payrolls and basic records during the course of the work for all laborers and mechanics as specified in the Appendix cited.

Retention period: 3 years from the completion of the work. 14 CFR 151.49; Part 151, App. H, para. C(1)

1.32 Sponsors of the construction of public airports.

To keep records of all affidavits and copies of payrolls furnished by the contractor.

Retention period: 3 years from the date of the completion of the contract. 14 CFR 151.53

1.33 Sponsors of the construction of public airports.

To retain in its files documentary evidence supporting each item of project cost, such as invoices, cost estimates and payrolls. Also evidence of all payments for items of project costs including vouchers, canceled checks or warrants, and receipts for cash payments

Retention period: 3 years after final grant payment. 14 CFR 151.55

1.34 Supplemental air carriers and commercial operators.

To maintain originals or copies of load manifests, flight releases, flight plans, airworthiness releases, and pilot route certification.

Retention period: 6 months. 14 CFR 121.697

1.35 Commercial operators using large aircraft.

To retain a copy of each contract under which it provides service, or a memorandum stating elements of oral contracts, and of each contract amendment.

Retention period: 1 year after date of execution of contract or amendment. 14 CFR 121.713

1.36 Commercial agricultural aircraft operators.

To maintain records showing name and address of persons for whom service was provided, date of service, name and quantity of material dispersed for each operation conducted, and the name, address, and certificate number of each pilot used, and the date he met the requirements of 14 CFR 137.19(c).

Retention period: At least 12 months. 14 CFR 137.71

1.37 Designated alteration stations.

To maintain current records of technical data (including drawings, photographs, specifications, instructions, and reports) for each product for which it has issued a supplemental type certificate; list of products by make, model, manufacturer's serial number, etc.; and a file of information on alteration difficulties of products altered.

Retention period: For duration of the operation under the DAS authorization. 14 CFR 21.493

1.38 Flight engineer training course operators.

To keep a record of each student's training, including a chronological log of the subject course, attendance, examinations, and grades.

Retention period: At least 2 years after student graduates, fails, or drops from course. 14 CFR Part 63, App. C, para. (g)

1.39 Domestic, flag, and supplemental air carriers.

To keep a log of each flight conducted with a provisionally certificated airplane and to keep accurate and complete records of each inspection and all maintenance performed on the airplane.

Retention period: Not specified. 14 CFR 121.207

1.40 Domestic, flag, and supplemental air carriers, and commercial operators of large aircraft.

To keep, in the event of an accident or occurrence requiring immediate notification of the National Transportation Safety Board under Part 430 of its regulations, the information recorded on cockpit voice recorders.

Retention period: At least 60 days or longer if requested by the Administrator or the Board. 14 CFR 121.359

1.41 Domestic, flag, and supplemental air carriers.

To maintain, or determine that each person with whom it arranges to perform its required inspections maintains, a current listing of persons who have been trained, qualified, and authorized to conduct required inspections.

Retention period: Not specified. 14 CFR 121.371

1.42 Aircraft and related products manufacturers holding Technical Standard Order Authorizations.

To keep records pertaining to each article manufactured including (a) a complete and current technical data file, design drawings, and specifications, and (b) complete and current inspection records.

Retention period: (a) Until the TSO article is no longer produced by the manufacturer; (b) and at least 2 years. 14 CFR 37.13

1.43 Air carriers (utilizing helicopters in scheduled interstate air transportation).

To keep a log of each flight conducted with a provisionally certificated helicopter and to keep accurate and complete records of each inspection made and all maintenance performed on the helicopter.

Retention period: Not specified. 14 CFR 127.85

1.44 Air carriers (utilizing helicopters in scheduled interstate air transportation).

To maintain, or determine that each person with whom it arranges to perform its required inspections maintains, a current listing of persons who have been trained, qualified, and authorized to conduct required inspections.

Retention period: Not specified. 14 CFR 127.135

1.45 Air travel clubs using large airplanes.

To maintain (a) current records of every crewmember and aircraft dispatcher, as is necessary to show compliance with the appropriate requirements of Federal Aviation Regulations and each action taken concerning the release from employment or physical or professional disqualification of flight crewmembers as aircraft dispatchers, and (b) an aircraft maintenance log.

Retention period: At least 6 months after termination of employment. 14 CFR 123.27 (retention: 121.683)

1.46 Sponsors and contractors of airport development and planning projects. [Amended]

To keep records pertaining to the expenditure of the Federal grant, the total project cost, and the amount supplied by other sources.

Retention period: 3 years after date of final grant payment. 14 CFR 152.63, 152.143

1.47 Aircraft and related products manufacturers—production under type certificate only.

To maintain at the place of manufacture the technical data and drawing necessary for the Administrator to determine whether the product and its parts conform to the type design.

Retention period: Not specified. 14 CFR 21.123

1.48 Owners of non-Federal Simplified Directional Facilities (SDF); non-Federal Distance Measuring Equipment (DME) Facilities; and non-Federal VHF Marker Beacon Facilities.

To maintain: (a) record of meter readings and adjustments (Form FAA-198) reflecting an accurate record of facility operation and adjustment and must be revised after any major repair, modification, or retuning; (b) a facility maintenance log (Form FAA-406(c)), consisting of a permanent record of all equipment malfunctioning met in maintaining the facility, including information on the kind of work and adjustments made, equipment failures, causes (if determined), and corrective action taken; (c) a radio equipment operation record (Form FAA-418) containing a complete record of meter readings, recorded on each scheduled visit to the facility.

Retention period: (a) Permanent; (b) and (c) not specified. 14 CFR 171.117, 171.163, 171.213

1.49 Lessees and conditional buyers of U.S. registered large civil aircraft other than a foreign air carrier or certificate holder under 14 CFR Parts 121, 123, 127, 135, or 141. [Added]

To keep a copy of lease or contract of conditional sale, to which cited section applies, in the aircraft.

Retention period: Not specified. 14 CFR 91.54

2. Federal Highway Administration

2.1 State highway departments or their agents.

To maintain all records and documents as may be prescribed in the "Retention Schedule of Federal-Aid Highway Records for State Highway Departments" relating to (a) projects undertaken pursuant to Federal law and regulations, and (b) toll facilities financed in part with Federal funds.

Retention period: (a) 3 years from date of final payment of Federal funds to State or as otherwise specified in the retention schedule, and (b) at least 3 years after facility has been operated on a free basis. 23 CFR 1.30

2.2 State agencies administering relocation assistance programs.

To maintain records of relocation as required in section cited.

Retention period: Not specified. 23 CFR Part 1, Appendix A, paragraph 37

2.3 Class I and II motor carriers.

To keep records as listed in the part cited.

Retention period: Various. 49 CFR Part 1226

2.4 Class III motor carriers.

To keep records as listed in the part cited.

Retention period: Various. 49 CFR Part 1226

2.5–2.6 [Deleted]

2.7 Carriers of migratory workers by motor vehicles.

To keep records as listed in the section cited.

Retention period: Various. 49 CFR 398.3

2.8 Motor carriers in interstate commerce transporting Class A or Class B explosives.

To maintain drivers' receipts for documents pertaining to safety and procedures in case of accident or delay.

Retention period: 1 year. 49 CFR 397.19

2.9 Motor carriers reviewing drivers' records.

To maintain records of all violations of motor vehicle traffic laws of which the driver has been convicted.

Retention period: Not specified. 49 CFR 391.27

2.10 All common, contract, and private motor carriers operating in interstate or foreign commerce, except private carriers of persons.

To maintain driver qualification files as listed in the section cited.

Rentention period: Various. 49 CFR 391.51

2.11 All common, contract, and private motor carriers operating in interstate or foreign commerce, except private carriers of persons. [Amended]

To maintain an accident register and associated documents as set out in the section cited.

Retention period: 3 years from the date of the occurrence of any accident recorded. 49 CFR 394.13

2.12 All common, contract, and private motor carriers operating in interstate or foreign commerce, except private carriers of persons.

To maintain drivers' daily logs as set out in the section cited.

Retention period: Approximately 1 year from the date the carrier receives the daily log from the driver. 49 CFR 395.8

2.13 All common, contract, and private motor carriers operating in interstate or foreign commerce, except private carriers of persons.

To maintain records of inspection and maintenance for each motor vehicle for the period the motor vehicle is controlled by the carrier as set out in the section cited.

Retention period: Varies. 49 CFR 396.2

2.14 All common, contract, and private motor carriers operating in interstate or foreign commerce, except private carriers of persons.

To maintain daily driver reports on the condition of motor vehicles as set out in the section cited.

Retention period: 3 months from date of the report. 49 CFR 396.7

2.15 Owners of private interstate toll bridges.

To keep records relating to construction, financing, and promotion of such bridges.

Retention period: At least 3 years after completion of bridge. 33 U.S.C. 528

2.16 States or municipalities or other political subdivisions or public agencies there of taking over or acquiring or constructing an interstate toll bridges.

To keep an accurate record of the amount paid for acquiring the bridge and its approaches, the actual expenditures for maintaining, repairing, and operating same, and of the daily tolls collected.

Retention period: Not specified. 33 U.S.C. 529

3. United States Coast Guard

3.1 Certificates or documents issued to the public by Coast Guard.

To maintain certificates or documents, as required by laws, rules, or regulations, for the applicable period of time.

Retention period: If the certificate or document (a) specifies a definite period of time for which it is valid, it shall be retained for so long as it is valid unless it is required to be surrendered; (b) does not specify a definite period of time for which it is valid, it shall be retained for

V 38 - 12 JAN 18 73 XUM

that period of time such certificate or document is required for operation of the vessel; or, (c) is evidence of a person's qualifications, it shall be retained for so long as it is valid unless it is required to be surrendered. 46 CFR 2.95–1

3.2 Owners, masters or persons in charge of vessels required to have cargo gear certificates and/or registers, and records regarding such gear.

To keep on board the current, valid cargo gear certificate and/or register, and records regarding such gear, such as inspections and tests or examinations, original or certified copies of certificates of manufacturers and/or testing laboratories, companies, or organizations for loose cargo gear, wire rope, or the annealing of gear, and records of all tests and examinations conducted by or under the supervision of surveyors of organizations or associations approved by the Commandant.

Retention period: The cargo gear certificate and/or register shall be retained for so long as it is valid unless it is required to be surrendered, and in addition until the next Coast Guard inspection for certification of the vessel. The certificates of manufacturers and/or testing laboratories, companies, or organizations shall be maintained so long as the gear described in such certificates is on board the vessel. The records of inspections by ship's officers shall be maintained on the vessel for that period of time which agrees with the period covered by the current Coast Guard certificate of inspection issued to the vessel. 46 CFR 31.10–16, 31.37–75, 71.25–25, 71.47–75, 91.25–25, 91.37–75 (retention: 2.95–5)

3.3 Owners, masters, or persons in charge of vessels required to have performed tests and inspections of all firefighting equipment.

To keep on board records of required tests and inspections of all firefighting equipment.

Retention period: For the period of validity of the current Coast Guard certificate of inspection for the vessel. 46 CFR 31.10–18, 78.17–80, 97.15–60, 196.15–60

3.4 Owners, masters or persons in charge of new vessels having cargo gear described in approved plans. [Amended]

To keep on board a set of approved plans of cargo gear showing a stress diagram with the principal details of the gear and a diagram showing arrangement and safe working loads.

Retention period: During period such cargo gear is on board vessel. 46 CFR 31.37–15, 31.37–20, 31.37–23, 71.47–15, 71.47–20, 71.47–23, 91.37–15, 91.37–20, 91.37–23 (retention: 31.37–75, 71.47–75, 91.37–75)

3.5 Masters of tank vessels or vessels towing tank barges transporting flammable or combustible cargo. [Amended]

To keep on board a bill of lading manifest or shipping document giving name of consignee and the delivery point, the kind, grades, and approximate quantity of each kind and grade of cargo, and for whose account the cargo is being handled.

Retention period: Not specified. 46 CFR 35.01–10

3.6 Masters or persons in charge of vessels required to conduct fire and lifeboat drills. [Amended]

To make entries in the ship's logs relating to the fire and lifeboat drills and examinations of emergency equipment.

Retention period: Until official log book is required to be surrendered to the Coast Guard, or for a vessel not required to use the official log book such logs shall be kept for a period of one year after date entries were made. 46 CFR 35.10–5, 78.17–50, 97.15–35, 167.65–1, 196.15–35

3.7 Owners, agents, masters, or persons in charge of vessels involved in marine casualties.

To keep such voyage records of the vessel as are maintained by the vessel, such as both rough and smooth deck and engineroom logs, bell books, navigation charts, navigation work books, compass deviation cards, gyro compass records, stowage plans, records of draft, aids to mariners, radiograms sent and received, the radio log, and crew and passenger lists.

Retention period: Until notification of completion of investigation is received from Coast Guard. 46 CFR 35.15–1, 78.07–15, 97.07–15, 136.05–15, 167.65–65, 196.07–15

3.8 Masters or senior deck officer of tank ships in charge of transfer of flammable and combustible cargo. [Amended]

To keep on board copy of Declaration of Inspection Prior to Bulk Cargo Transfer.

Retention period: Not specified. 46 CFR 35.35–30

3.9 Manufacturers or contractors responsible for welding procedures. [Amended]

To maintain records of test results obtained in welding procedure, welder's performance qualifications, and identification data.

Retention period: Not specified. 46 CFR 57.02–3

3.10 Owners, masters, or persons in charge of nuclear vessels required to have "Operating Manuals."

To keep on board a copy of the approved "Operating Manual," which shall be kept up to date.

Retention period: At all times vessel has a nuclear reactor on board. 46 CFR 99.20–1

3.11 Owners, operators, and masters of vessels. [Amended]

To maintain (a) official logbooks or (b) for those not required to have such a logbook, logs and records as prescribed by regulations.

Retention period: (a) Until filed with Officer in Charge, Maritime Inspection; (b) other, 1 year. 46 CFR 35.07–5, 35.07–10, 78.37–3, 78.37–5, 97.35–3, 97.35–5

3.12 [Combined with XII 3.11]

3.13 [Deleted]

3.14 [Combined with XII 3.11]

3.15 Masters of vessels storing explosives for a period exceeding 24 hours (other than barges, magazine vessels, and oceanographic vessels). [Amended]

To keep records of temperature readings.

Retention period: 1 year for vessels. 46 CFR 146.02–12

3.16 Owners, persons, or corporations chartering or contracting the use of vessels shipping explosives or other dangerous articles. [Amended]

To keep shipping orders, manifests; or other shipping documents, cargo lists, cargo stowage plans, reports, papers, and records as required to be prepared, unless persons or corporations charter or engage or contract for the use of these vessels under such terms and conditions that they have full and exclusive control of the management and operation of such vessels.

Retention period: 1 year. 46 CFR 146.02–22

3.17 [Combined with XII 3.16]

3.18 [Combined with XII 3.19]

3.19 Owners, operators, charterers, agents, or masters of vessels. [Amended]

To keep memoranda describing the shipments of explosives or other dangerous articles or substances, and combustible liquids being transported, conveyed or stored on board vessels.

Retention period: 1 year. 46 CFR 146.05–12, 146.05–13

3.20 Masters of vessels transporting or storing explosives or other dangerous articles or substances, and combustible liquids, as cargo.

To keep on board dangerous cargo manifests or lists.

Retention period: During the period of transportation or storage. 46 CFR 146.06–12, 151.45–7

3.21 Owners, charterers, or agents of vessels transporting or storing explosives or other dangerous articles or substances, and combustible liquids, as cargo.

To keep ashore copies of dangerous cargo manifests or lists.

Retention period: 1 year. 46 CFR 146.06–12 (retention: 146.02–22)

3.22 [Deleted]

3.23 Manufacturers of equipment or material which must be approved or found satisfactory for use.

To keep the required drawings, plans, blueprints, specifications, production models (if any), qualification tests, and related correspondence containing evidence that the Coast Guard has found such equipment satisfactory, during the period of time the approval or listing is valid.

Retention period: Not specified. Most of the specifications containing detailed descriptions of records to be retained are contained in 46 CFR Parts 160—164.

3.24 Each voluntary association holding a Certification of Authorization under the Great Lakes Pilotage Uniform Accounting System.

To keep all books, records and memoranda and file them in such a manner to readily permit the audit and examination thereof by representatives of the U.S. Coast Guard. Also, the records must be housed or stored in such a manner as to afford protection from loss, theft or damage by fire, flood or otherwise.

Retention period: 10 years unless otherwise authorized by the Commandant. 46 CFR Part 403

3.25 Masters or operators of vessels subject to Oil Pollution Act of 1961, as amended.

To keep on board an Oil Record Book and enter therein a descriptive statement of the circumstances of and reasons for discharge of oil or oily mixtures, the escape of oil or oily mixtures, or the discharge of residue arising from purification or clarification of fuel oil or lubricating oil, and entries regarding various activities which may result in discharging oil or oily mixtures.

Retention period: 2 years from the date of the last entry, or until surrendered to the U.S. Government. 33 CFR 151.35

3.26 Owners, operators, and/or masters of oceanographic vessels. [Amended]

(a) To keep official logbook, or (b) for vessels not required to have such a logbook, to keep their own logs or records as prescribed by regulations.

Retention period: (a) 1 year or for period of validity of vessel's current certificate of inspection, whichever is longer; (b) 1 year, except for separate records of tests and inspections of firefighting equipment, which shall be maintained for the period of validity of the vessel's certificate of inspection. 46 CFR 196.35–3, 196.35–5

3.27 Masters of ships subject to International Convention on Load Lines, 1966.

To enter in the ships logs, before departure from loading port, the data required by section 6 of the load line acts, including statements of load line marks applicable to the voyage, position of load line marks, and actual drafts of the vessel.

Retention period: Until official logbook is surrendered to Coast Guard, or 1 year for ships not required to use official logbook. 46 CFR 42.07–20

3.28 Manufacturers of marine sanitation devices.

To maintain records required to determine compliance with the act.

Retention period: Not specified. 33 U.S.C. 1163

3.29 Nonprofit firms or associations designated to certify containers for international transport under Customs seal.

To maintain copy of each Certificate of Approval by design type issued, together with copy of plans and applications to which approval refers, and records of manufacturer's serial number assigned to containers manufactured under each approval.

Retention period: Not specified. 49 CFR 421.30

3.30 Operators of oil transfer facilities. [Added]

To maintain (a) letter of intent, name of person in charge of transfer operations, tests and inspections, and hose information, and (b) signed copy of each declaration of inspection for facility.

Retention period: (a) Not specified; (b) 1 month from date of signature. 33 CFR 154.740, 156.130

3.31 Owners and operators of vessels engaged in oil transfer operations. [Added]

To maintain (a) name of person in charge of transfer operations, date and results of tests, hose information, and valve inspection data; and (b) signed copy of each declaration of inspection for such vessel-to-vessel transfer.

Retention period: (a) Not specified; (b) 1 month from date of signature. 33 CFR 155.820, 156.130

4. Federal Railroad Administration

4.1 Railroad companies. [Amended]

To keep records as listed in the sections or part cited.

Retention period: Various. 49 CFR 213.241, 228.9, Part 1220

4.2 Electric railway companies.

To keep records as listed in the part cited.

Retention period: Various. 49 CFR Part 1221

4.3 [Reserved]

4.4 Express companies.

To keep records as listed in the part cited.

Retention period: Various. 49 CFR Part 1223

4.5 Pipeline companies.

To keep maps and records as indicated in the citation.

Retention period: Various. 49 CFR 195.404, Part 1224

5. National Transportation Safety Board

5.1 Operators of aircraft (involved in an accident or incident).

To preserve to the extent possible all records, including tapes of flight recorders and voice recorders, pertaining to the operation and maintenance of the aircraft and to the airmen involved in an accident or incident for which notification must be given to the Board.

Retention period: Until the Board takes custody thereof or a release is granted by an authorized representative of the Board. 14 CFR 430.10

5.2 Operators of aircraft involved in an accident or incident.

To retain all records and reports, including all internal documents and memoranda dealing with the accident or incident.

Retention period: Until authorized by the Board to the contrary. 14 CFR 430.10

6. Office of the Secretary [Revised]

PIPELINE SAFETY

6.1 Welders of steel materials to be used in pipelines.

To keep records of welding procedures that have been qualified under either section IX of the ASME Boiler and Pressure Vessel Code or section 2 of API Standard 1104.

Retention period: As long as procedure is used. 49 CFR 192.225(c)

6.2 Operators of natural gas pipelines.

Records must be retained showing by milepost, engineering station, or by geographic feature, the number of girth welds made, the number nondestructively tested, the number rejected and the disposition of the rejects whenever nondestructive testing is required under § 192.241(b).

Retention period: Life of the pipeline. 49 CFR 192.243(f)

6.3 Operators of natural gas pipelines.

To keep records of safety tests required with names of those involved, methods used, and results of the tests.

Retention period: Duration of pipeline's use. 49 CFR 192.517

6.4 Operators of natural gas pipelines.

To retain records of each segment of pipeline that has been uprated showing each investigation required by the subpart, all work performed and each pressure test conducted in connection with the uprating.

Retention period: Life of the segment of pipeline. 49 CFR 192.553(b)

6.5 Operators of natural gas pipelines.

To keep records necessary to administer the operating and maintenance plan established for each segment of pipeline.

Retention period: Not specified. 49 CFR 192.603(b)

6.6 Operators of natural gas transmission lines.

To keep records governing each leak discovered, repair made, transmission line break, leakage survey, line patrol and inspection.

Retention period: As long as the segment of transmission line involved remains in service. 49 CFR 192.709

6.7 Operators of liquid pipelines.

To retain records of the nondestructive testing of welds, including (if radiography is used) the developed film, with so far as practicable, the location of the weld.

Retention period: 3 years following the placement of the line in operation. 49 CFR 195.234(g)

6.8 Operators of liquid pipelines.

To maintain records showing the total number of girth welds and the number nondestructively tested, including the number rejected and the disposition of each rejected; the amount, location, and

V 38 - 12 JAN 18 73 XUM

cover of each size of pipe installed; the location of each crossing of another pipeline; the location of each buried utility crossing; the location of each overhead crossing; the location of each valve, weighted pipe, corrosion test station, or other item connected to the pipe.

Retention period: Life of each facility. 49 CFR 195.266

6.9 Operators of liquid pipelines.

To retain records of each hydrostatic test including the recording gauge charts, deadweight tester data, and the reasons for any failure during a test. Where elevation differences in the section under test exceed 100 feet, a profile of the pipeline that shows the elevation and test sites over the entire length of the test section must also be included.

Retention period: As long as the facility tested is in use. 49 CFR 195.310

6.10 Operators of liquid gas pipelines.

To maintain maps and records of its pipeline systems including at least the location and identification of all major facilities, all crossings of public roads, railroads, rivers, buried utilities and foreign pipelines, the maximum operating pressure of each pipeline, the diameter, grade, type and nominal wall thickness of all pipe.

Retention period: Not specified. 49 CFR 195.404(a)

6.11 Operators of liquid pipelines.

To maintain daily operating records that indicate the discharge pressures at each pump station and any unusual operations of a facility.

Retention period: At least 3 years. 49 CFR 195.404(b)

6.12 Operators of liquid pipelines.

To maintain records that indicate the date, location and description of each repair made to its pipeline systems as well as a record of each inspection and test required by the subpart.

Retention period: Useful life of the part of the pipeline system to which the record relates. 49 CFR 195.404(c)

6.13 Operators of natural or other gas pipelines.

To maintain corrosion control records and maps as indicated in section cited.

Retention period: Length of pipeline service. 49 CFR 192.491

6.14–6.19 [Reserved]

HAZARDOUS MATERIALS

6.20 State agencies participating in relocation assistance programs.

(a) To maintain all documents associated with an appeal.

Retention period: Not specified. 49 CFR 25.21(b)(4)

(b) To maintain relocation records as cited in Appendix A of Part 25.

Retention period: 3 years. 49 CFR 25.23

6.21 Manufacturers of compressed gas cylinders.

To maintain data sheets recording the results of visual inspections of certain compressed gas cylinders.

Retention period: Permanent. 49 CFR 173.34(e)(10)

6.22 Owners of compressed gas cylinders.

To maintain records showing results of reinspection and retest of such cylinders.

Retention period: Until expiration of retest period, or until cylinder is reinspected and retested, whichever occurs first. 49 CFR 173.34(e)(5)

6.23 Motor carriers operating MC 330 and MC 331 cargo tanks. [Amended]

To maintain records relating to the reason and date of withdrawal of certification of cargo tank.

Retention period: 3 years after the date of withdrawal of the certification. 49 CFR 177.824(i)

6.24 Owners of tank motor vehicles transporting flammable liquids.

To maintain records of inspection as required in section cited.

Retention period: 2 years after date of inspection. 49 CFR 177.824(b)

6.25 Manufacturers of cylinders and tanks.

To maintain (a) inspector's report on specification DOT–39 cylinders, and (b) test samples on specification DOT–56 and 57 portable tanks.

Retention period: (a) 3 years; (b) 1 year. 49 CFR 178.65–15(a), 178.251–5(a)

6.26 Motor carriers operating cargo tanks.

To maintain manufacturer's data report and certificate of compliance and related papers on specification MC331 cargo tanks; and manufacturer's certificate of compliance on specifications MC306, 307, and 312 cargo tanks.

Retention period: During time of use of tank plus 1 year thereafter. 49 CFR 178.337–18(b), 178.340–10(c)

6.27 Cargo tank manufacturers.

To maintain sketch of location of plate in specification MC331 cargo tank and records of welder qualification in fabrication of such cargo tanks.

Retention period: 5 years. 49 CFR 178.337–2(a)(3), 178.337–4(b)

6.28 Owners of portable tanks carrying hazardous materials.

To maintain records of date and results of all required tests and information about tester.

Retention period: Until satisfactory completion of next retest. 49 CFR 173.32

7. National Highway Traffic Safety Administration

7.1 States participating in the National Highway Safety Program.

To maintain records described in Highway Safety Program Standards 1, 2, 5, 10, and 14.

Retention period: Not specified. 23 CFR 204.4

7.2 Manufacturers of complete or incomplete motor vehicles.

To maintain list of names and addresses of first purchasers or subsequent purchasers to whom a warranty has been transferred and vehicle identification number involved in each safety defect notification campaign.

Retention period: 5 years after defect information report is submitted to the Administrator. 49 CFR 573.6

7.3 Manufacturers, brand name owners, distributors, and dealers of new and retreaded tires.

To maintain records of name and address of tire purchaser and tire seller, and the tire identification number.

Retention period: 3 years from date information is submitted. 49 CFR 574.7, 574.8

7.4 Tire manufacturers. [Amended]

To maintain records of each distributor or dealer purchasing tires directly from him and selling them to purchasers, number of tires purchased, and number of tires for which reports have been received from distributor or dealer.

Retention period: 3 years from date information is submitted. 49 CFR 574.7

7.5 Manufacturers of motor vehicles. [Amended]

To maintain records of tires on or in each vehicle shipped to a distributor or dealer, and the name and address of the first purchaser.

Retention period: 3 years from date of sale of vehicle to first purchaser. 49 CFR 574.10

XIII. ACTION

1.1 State agencies or other public and nonprofit private agencies participating in the retired citizens volunteer program.

To maintain accounting and other records as determined by the Commissioner.

Retention period: Accounting records—3 years after end of budget period or if audit has not occurred, until audit or 5 years following end of budget period, whichever is earlier, or until resolution of any audit questions; other records—not specified. 45 CFR 906.10 (retention: 901.4)

1.2 State agencies, organizations, or grantees administering a project under the Foster Grandparent program.

To maintain records to assure correctness and verification of such reports required by this section.

Retention period: Not specified. 45 CFR 907.15

XIV. APPALACHIAN REGIONAL COMMISSION

1.1 Recipients of grants.

To maintain accurate and complete records of transactions and activities financed with Federal funds under section 302 of the Appalachian Regional Development Act of 1965, as amended.

Retention period: Not specified. 40 App., U.S.C. 302(c)(2)

The Commission requires, as a condition in all grants and contracts under this section, that records be retained, usually for 3 years following last disbursement.

XV. ATOMIC ENERGY COMMISSION

1.1 Cost-type contractors. [Amended]

To keep justifications in support of subcontracts and purchase orders adequate to reflect the procurement practices and procedures used and the circumstances supporting particular transactions.

Retention period: Not specified. 41 CFR 9–55.204

1.2 Licensees receiving, possessing, using, or transferring byproduct material, source material, or special nuclear material.

To maintain records (a) used in preparing Form AEC–4, "Occupational External Radiation Exposure History"; (b) showing individual exposure to radiation and to radioactive material and records of bio-assays, including results of whole body counting examinations; (c) showing the results of surveys made to evaluate the radiation hazards incident to the production, use, release, disposal or presence of radioactive materials or other sources of radiation; and (d) of disposals of licensed material by release into sanitary sewerage systems, by burial in soil or pursuant to procedures specifically authorized by license.

Retention period: Until disposal is specifically authorized by the Commission. 10 CFR 20.102, 20.401

1.3 Holders of restricted data access permits. [Amended]

To keep written agreements from all individuals who will have access to Restricted Data under the access permit to give effect to waivers of claims (a) for damages under 35 U.S.C. 183; (b) for compensation under section 173 of the Atomic Energy Act of 1954, as amended; and (c) against the United States and the Commission arising in connection with use of information supplied. To establish a document accountability procedure for documents containing Secret Restricted Data and maintain records to show disposition of all such documents which have been in his custody at any time.

Retention period: Not specified. 10 CFR 25.23, 95.34

1.4 Nonexempt licensees manufacturing, producing, transferring, receiving, acquiring, owning, possessing, importing, or exporting byproduct material.

To maintain records showing the receipt, transfer, export, and disposal of such byproduct material.

Retention period: Not specified. 10 CFR 30.51

1.5 Licensees utilizing sealed sources of byproduct material for radiography.

To maintain (a) records of the dates of calibration for each radiation survey instrument possessed by the licensee; (b) records of results of leak tests of sealed sources; (c) records of quarterly physical inventories of all sealed sources received and possessed under the license; (d) current logs showing for each sealed source a description of the radiographic exposure device or storage container, the identity of the radiographer to whom assigned, and the plant or site where used and dates of use; (e) film badge reports and records of pocket dosimeter and pocket chamber readings; (f) records of physical radiation surveys.

Retention period: Not specified. (a) 10 CFR 34.24; (b) 10 CFR 34.25; (c) 10 CFR 34.26; (d) 10 CFR 34.27; (e) 10 CFR 34.33; (f) 10 CFR 34.43

1.6 Licensees receiving, using, transferring, delivering, importing, or exporting source material.

To maintain (a) such records as may be determined by the Commission to be necessary or appropriate to effectuate the purposes of the Atomic Energy Act of 1954, as amended, and the regulations issued thereunder; (b) records showing the receipt, transfer, export, and disposal of such source material.

Retention period: Not specified. (a) 10 CFR 40.41; (b) 10 CFR 40.61

1.7 Licensees and holders of construction permits. [Amended]

To maintain (a) such records as may be required by conditions of the license or permit or by rules, regulations, and orders of the Commission, (b) records of any tests and experiments carried out under an operating license or changes in a production and utilization facility and its procedures performed without prior Commission approval; (c) records of design, fabrication, erection, and testing of structures, systems, and components important to safety of a production or utilization facility; and (d) records sufficient to furnish evidence of activities affecting quality.

Retention period: (a) Not specified, 10 CFR 50.71; (b) not specified, 10 CFR 50.59; (c) throughout life of facility, 10 CFR Part 50, App. A, Criterion 1; (d) not specified, 10 CFR Part 50, App. B, sec. XVII

1.8 Lessees of uranium deposits on land controlled by the Atomic Energy Commission.

To keep records of (1) shifts worked; (2) wages and salaries paid; (3) expenditures for supplies and services and costs of operation of every kind; (4) tonnage and grade of ore mined; (5) development work and drilling performed; and (6) such other matters as in the Commission's opinion would be of assistance to it in determining the cost of the operations.

Retention period: At least 3 years after termination or expiration of the lease. 10 CFR 60.8

1.9 Licensees receiving special nuclear material. [Amended]

To keep (a) such records of ownership, receipt, possession, use, transfer, import, and export of special nuclear material as may be incorporated as a condition or requirement in any license and (b) records showing the receipt, inventory, disposal, acquisition, import, export, and transfer of special nuclear material.

Retention period: Not specified. (a) 10 CFR 70.32; (b) 10 CFR 70.51

1.10 Holders of construction and operating authorizations for certain nuclear reactors exempt from licensing requirements.

To maintain records as may be required by the conditions of the authorization or by the rules, regulations and orders of the Commission.

Retention period: Not specified. 10 CFR 115.51

1.11 Licensees and other persons subject to financial protection requirements and indemnity agreements.

To maintain records as deemed necessary by the Commission for the administration of the regulations concerning financial protection requirements and indemnity agreements.

Retention period: Not specified. 10 CFR 140.6

1.12 Contractors having negotiated contracts with Atomic Energy Commission (except foreign governments, agencies thereof, and foreign producers) and their subcontractors.

To keep directly pertinent books, documents, papers, and records.

Retention period: The General Accounting Office shall, until the expiration of 3 years after final payment, have access to and the right to examine the above-mentioned records, provided that earlier disposal of contractor and subcontractor records is possible in accordance with records disposal schedules agreed upon between the Commission and the General Accounting Office. 41 CFR 9–7.5004–10. 42 U.S.C. 2206

1.13 Licensees packaging radioactive material for transport.

To keep records of each shipment of fissile material and of a large quantity of licensed material in a single package.

Retention period: 2 years after its generation. 10 CFR 71.62

1.14 Contractors whose contract contains the safety, health, and fire protection clause prescribed in 41 CFR 9–7.–5006–47.

To maintain individual occupational radiation exposure records generated in performance of contract work.

Retention period: Until disposal is specifically authorized by the Commission; or at the option of the contractor delivered to the Commission upon completion or termination of the contract. 41 CFR 9–7.5006–60

1.15 Licensees transporting special nuclear materials.

To maintain records of names and addresses of all authorized personnel, results of tests and inspections of security containers and protected areas, shipments of special nuclear material and information to comply with requirements of this part, and procedures for controlling access to protected areas.

Retention period: Note specified. 10 CFR 73.41

1.16 Licensees manufacturing, distributing, or transferring exempt quantities of byproduct material.

To maintain records of name and address of each person to whom material

V 38 - 12 JAN 18 73 XUM

is transferred, and kinds and quantity of byproduct material transferred.

Retention period: Not specified. 10 CFR 32.20

1.17 Recipients of cost sharing contracts.

To maintain records of cost contributions and costs charged to AEC.

Retention period: Not specified. 41 CFR 9–4.5604

1.18 Cost-type contractors and subcontractors. [Added]

To maintain records in accordance with the provisions of their contract or subcontract.

Retention period: Various. 41 CFR 9–7.5006–1 (AEC Manual Chapter Appendix 0230 contains established retention periods for more than 900 record items of cost-type contractors and subcontractors.)

1.19 Licensees authorized to possess at any one time and location more than 10,000 curies of tritium. [Added]

To maintain records sufficient to enable the licensee to account for the tritium in his possession under specific license.

Retention period: Not specified. 10 CFR 30.54, 150.18

XVI. CIVIL AERONAUTICS BOARD

1.1 Certificated route and supplemental air carriers. [Amended]

(a) To keep at its principal or general office a complete file of all tariffs issued by it and by its agents and those issued by other carriers in which it concurs; to keep a file of current tariffs at all places where tickets are sold or property is received for transportation.

Retention period: 3 years after expiration or cancellation. 14 CFR 221.170, 221.171 (retention: 249.8, 249.13)

(b) To keep general books of account and supporting books, records, and memorandums including organization tables and charts, internal accounting manuals, minute books, stock books, reports, work sheets, memorandums, etc.

Retention period: Various. 14 CFR 241.1–5 (retention: 249.8, 249.13)

(c) To maintain records of all passes issued (and of regular tickets or bills of lading used in lieu of trip passes) and related correspondence or memorandums.

Retention period: 3 years. 14 CFR 223.5 (retention: 249.8, 249.13)

(d) To maintain a record of the names, addresses and telephone numbers of all passengers transported on each pro rata charter trip.

Retention period: 2 years. 14 CFR 207.9, 208.4 (retention: 249.8, 249.13)

(e) To preserve a copy of each charter contract (exclusive of interline agreements with other air carriers or foreign air carriers).

Retention period: 2 years. 14 CFR 207.9, 208.4 (retention: 249.8, 249.13)

(f) To preserve all passenger lists, including those filed by charterers (supplemental air carriers only).

Retention period: 6 months. 14 CFR 208.34 (retention: 249.8)

(g) To maintain records of proof of commission paid to travel agent for each pro rata charter trip.

Retention period: 2 years. 14 CFR 207.9, 207.53, 208.303 (retention: 249.8, 249.13)

(h) Written confirmation and accompanying passenger list received from another carrier and a copy of request and passenger list to such other carrier for confirmation.

Retention period: 2 years. 14 CFR 207.9, 208.4 (retention: 249.8, 249.13)

1.2 Certificated route local service air carriers; certificated route air carriers furnishing transportation within Hawaii or Alaska; certificated route helicopter air carriers; and one certificated trunkline route air carrier receiving subsidy for services over part of its routes.

To maintain a record pertaining to each trade agreement entered into, including all correspondence and records concerning advertising and transportation services provided.

Retention period: Not specified. 14 CFR 225.10

1.3 Certificated route air carriers, certificated supplemental air carriers, commuter air carriers, air freight forwarders, international air freight forwarders, and foreign route air carriers. [Added]

To maintain complete file of papers and correspondence relating to each freight loss or damage claim.

Retention period: 3 years after settlement. 14 CFR 239.10 (retention: 249.27)

1.4 Foreign route air carriers. [Amended]

(a) To keep at its principal or general office a complete file of all tariffs issued by it and by its agents and those issued by other carriers in which it concurs; to keep a file of current tariffs at all places where tickets are sold or property is received for transportation.

Retention period: 3 years. 14 CFR 221.170, 221.171 (retention: 249.12)

(b) To maintain records of all passes issued (and of regular tickets or bills of lading used in lieu of trip passes) and related correspondence or memorandums.

Retention period: 3 years. 14 CFR 223.5 (retention: 249.12)

(c) To preserve a copy of each contract covering on-route charter flights originating or terminating in the United States together with all traffic documents pertaining to such on-route charters.

Retention period: 2 years. 14 CFR 212.7 (retention: 249.12)

(d) To maintain true copies of all passenger lists, air waybills, invoices, and other traffic documents covering off-route charter trips performed under a "Statement of Authorization."

Retention period: 2 years. 14 CFR 212.7 (retention: 249.12)

(e) To maintain a record of the names, addresses, and telephone numbers of all passengers transported on each pro rata charter trip originating or terminating in the United States.

Retention period: 2 years. 14 CFR 212.7 (retention: 249.12)

(f) To preserve every statement of supporting information and proof of the commission paid to any travel agent for each pro rata charter trip.

Retention period: 2 years. 14 CFR 212.7 (retention: 249.12)

(g) Written confirmation and accompanying passenger list received from another carrier and a copy of request and passenger list to such other carrier for confirmation.

Retention period: 2 years. 14 CFR 212.7 (retention: 249.12)

1.5 Air freight forwarders and international freight forwarders. [Added]

To maintain (a) complete file of tariffs issued and those issued by other carriers in which it concurs; and (b) records as indicated in 249.27.

Retention period: (a) 3 years after expiration or cancellation; (b) various. 14 CFR 221.170, 296.71, 297.51 (retention: 249.27)

1.6 Holders of permits to operate foreign aircraft in the United States.

(a) To keep available for inspection at a place in the United States true copies of all manifests, air waybills, invoices, and other traffic documents covering flights originating or terminating in the United States.

(b) To keep lists of names and addresses of all passengers on charter flights originating or terminating in the United States.

Retention period: (a) 1 year; (b) 6 months. 14 CFR 249.11, 375.43

1.6a Foreign air carriers authorized to perform charter flights only. [Amended]

(a) To maintain at its principal or general office (1) every charter contract, proof of commissions paid to any travel agent, and every statement of supporting information; (2) all passenger lists including those filed by charterers.

Retention period: (1) 2 years; (2) 6 months. 14 CFR 214.6

(b) To keep at its principal or general office a complete file of all tariffs issued by it and by its agents and those issued by other carriers in which it concurs; to keep a file of current tariffs at all places where tickets are sold or property is received for transportation.

Retention period: 3 years. 14 CFR 221.170, 221.171 (retention: 214.6)

(c) To maintain records of all passes issued (and/or regular tickets or bills of lading used in lieu of trip passes) and related correspondence or memorandums.

Retention period: 3 years. 14 CFR 223.5 (retention: 214.6)

(d) Written confirmation and accompanying passenger list received from another carrier and a copy of request and passenger list to such other carrier for confirmation.

Retention period: 2 years. 14 CFR 214.6

1.7 Air freight forwarders and international air freight forwarders.

(a) To keep at its principal or general office a complete file of all tariffs issued

by it and by its agents and those issued by other carriers in which it concurs; to keep a file of current tariffs at all places where tickets are sold or property is received for transportation.

Retention period: 3 years after expiration or cancellation. 14 CFR 221.-170, 221.171 (retention: 249.27)

(b) To keep other records as listed in the section cited.

Retention period: Various. 14 CFR 249.27

1.8 Air carriers (domestic and foreign).

To maintain evidence of compliance with regulations imposed under Regulation Z of the Board of Governors of the Federal Reserve System, implementing the provisions of the Truth in Lending Act and the Consumer Credit Protection Act.

Retention period: 2 years. 14 CFR 249.31

1.9 Foreign and domestic air carriers and study group charterers.

To maintain records of deposits made by each student participant, invoices, bills, and receipts from suppliers or furnishers of goods or services in connection with the study group charter.

Retention period: 2 years after completion of study group charter. 14 CFR 373.8 (retention: 249.9)

1.10 Tour operators, overseas military personnel charter operators, travel group charter organizers, supplemental air carriers, and certain foreign air carriers. [Amended]

To maintain records evidencing deposits made by tour participants; commissions received by, paid to, or deducted by travel agents; and all statements, bills, invoices, and receipts in connection with the tour.

Retention period: 2 years after completion of the tour. 14 CFR 372.28, 372a.-31, 378.7 (retention: 249.9)

1.11 Air carriers extending credit to political candidates. [Added]

To maintain all documents which evidence or reflect the furnishing of transportation and all statements, invoices, bills, and receipts relating to such transportation.

Retention period: 2 years. 14 CFR 374a.7

1.12 Holders of commercial permits to operate foreign civil aircraft in the United States. [Added]

To maintain passenger lists and copies of manifests, air waybills, invoices, and other traffic documents covering flights originating or terminating in the United States.

Retention period: 6 months for passenger lists; 1 year for all others. 14 CFR 375.43 (retention: 249.11)

XVII. COMMITTEE FOR PURCHASE OF PRODUCTS AND SERVICES OF THE BLIND AND OTHER SEVERELY HANDICAPPED.

1.1 National Industries.

To maintain a record of all qualifying agencies for the blind and such necessary data as will enable it to equitably allocate orders among such agencies for the blind.

Retention period: Not specified. 41 CFR 51–1.4

1.2 Agencies for the blind (employing blind to extent of 75 percent of hours of employment of personnel in direct labor) selling to Government agencies and participating in the program of the Committee on Purchases of Blind-Made Products.

To keep accounting system records from which can be drawn annually a financial report and operating statement accurately reflecting operations.

To keep eye record cards containing information establishing that employees are blind (as defined in 41 CFR 51–1.1).

Retention period: Not specified. 41 CFR 51–1.9

XVIII. ENVIRONMENTAL PROTECTION AGENCY

1.1 Persons awarded EPA grants for research, demonstration, training and fellowships, State and local government assistance, and to such other programs.

To maintain (a) payroll records, accounting, and fiscal records reflecting the amount, receipt, and disposition of the grant assistance, and (b) the total cost of the project, the amount and identification of that portion of the cost of the project supplied from other sources, including Federal assistance and any matching share incurred for the performance of the project for which the EPA grant was awarded, and (c) records subject to inspection and audit by the Grants Officer, the Comptroller General of the United States, or any other authorized representative.

Retention period: (a) 3 years from the date of final payment, date of any resulting final termination settlement, or final audit; (b) records relating to appeals, litigations, claims, or exceptions shall be retained until the case is disposed of; and (c) until completion of the project. 40 CFR 30, Appendix A.

1.2 Persons obtaining an experimental permit for use of a pesticide chemical for which a temporary tolerance is established.

To maintain temporary tolerance records of production, distribution, and performance.

Retention period: 2 years. 40 CFR 180.31(e)(4)

1.3 Manufacturers of new motor vehicles or new motor vehicle engines subject to air pollution control regulations. [Amended]

To maintain records that (1) identify and describe vehicles or engines for which testing is required under 40 CFR 85; (2) describe emission control systems which are installed on or incorporated in each vehicle or engine; (3) describe procedures used to test such vehicles or engines; (4) contain test data which will show emissions at specified mileage or operating hours; (5) contain test data which will show performance of systems installed on or incorporated in vehicles or engines during extended mileage or operation, including all pertinent maintenance performed.

Retention period: Not specified. 40 CFR 85.006

1.4 State agencies participating in relocation assistance programs.

To maintain relocation records in accordance with the requirements of appendix A to Part 4.

Retention period: 3 years after completion of a project. 40 CFR 4.19

1.5 Owners or operators of any building, structure, facility, or installation emitting air pollutants.

To maintain records of compliance tests, monitoring equipment pertinent analyses, feed rates, and production rates.

Retention period: 2 years. 40 CFR 60.7, 60.53, 60.63, 60.73, 60.84

1.6 Owners and operators of stationary sources emitting air pollutants for which a national standard is in effect. [Added]

To maintain records of nature and amount of emission and other information deemed necessary to determine compliance with applicable emission limitations or other control measures.

Retention period: 2 years. 40 CFR 51.19, 52.627, 52.826, 52.1224, 52.2075, 52.2374, 52.2626

1.7 Manufacturers of products subject to noise emission standards and labeling requirements of the Noise Control Act of 1972. [Added]

To maintain records relating to such products to determine compliance to the act.

Retention period: Not specified. Public Law 92–574 (86 Stat. 1244)

1.8 State or interstate agency participating in the national pollutant discharge elimination program. [Added]

To maintain records of all information resulting from monitoring activities as indicated in section cited.

Retention period: 3 years, or longer during period of unresolved litigation or when requested by Director or Regional Administrator. 40 CFR 124.62

XIX. EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

1.1 Employers subject to title VII of the Civil Rights Act. [Amended]

To maintain personnel and employment and other records having to do with hiring, promotion, demotion, transfer, lay-off or termination, rates of pay, and selection for training or apprenticeship.

Retention period: 6 months from date of making record or personnel action involved, whichever is later. Whenever a charge of discrimination has been filed, or an action brought by the Commission or the Attorney General—until final disposition of the charge or action. 29 CFR 1602.14

V 38 - 12 JAN 18 73 XUM

1.2 Employers, labor organizations, and joint labor-management committees controlling apprenticeship programs.

(a) To maintain a list in chronological order of names and addresses, sex, and minority group identification of all applicants in the apprenticeship program, and any other records relating to applicants for apprenticeship, such as completed test papers, and records of interviews.

(b) To maintain any other records made solely for completing Report EEO–2, or similar reports.

Retention period: (a) 2 years or period of successful applicant's apprenticeship, whichever is later; (b) 1 year from the due date of the report. Whenever a charge of discrimination has been filed, or an action brought by the Attorney General—until final disposition of the charge or action. 29 CFR 1602.20, 1602.21

1.3 Local unions. [Amended]

To maintain prescribed records concerning local union practices; and "referral unions" to maintain membership, referral, and applicant records by sex and minority group identification.

Retention period: 1 year except for other membership or referral records required of "referral unions" which are to be retained for a period of 6 months. Whenever a charge of discrimination has been filed, or an action brought by the Commission or the Attorney General—until final disposition of the charge or action. 29 CFR 1602.22, 1602.28

XX. FARM CREDIT ADMINISTRATION. [Revised]

1.1 Farm credit banks and associations.

To maintain original corporate records, payroll records, basic personnel records, records required by Federal or State laws, Federal records, financial reports as of June 30 and December 31 each year, applications, notes, security instruments, financial statements, and individual records pertaining to loans charged off where net loss after recoveries exceeds $1,000, and listing of obsolete records destroyed.

Retention period: Not specified. 12 CFR 618.8360

XXI. FEDERAL COMMUNICATIONS COMMISSION

1.1 Licensees of standard and FM broadcast (radio) stations.

To keep at each transmitter records of equipment performance measurement data including diagrams and appropriate graphs, together with descriptions of instruments and procedures, signed by the engineers making measurements.

Retention period: 2 years. 47 CFR 73.47, 73.254

1.2 Licensees of FM, noncommercial educational FM, and international radio, and television broadcast stations. [Amended]

To keep records of time and results of auxiliary transmitter tests.

Retention period: 2 years. 47 CFR 73.255, 73.555, 73.638, 73.757

1.3 Licensees or permittees of standard, FM, noncommercial educational FM, and international radio, and television broadcast stations. [Amended]

To keep program, operating and maintenance logs except for licensees of international radio stations who keep program and operating logs, including rough logs and transcribed portions thereof.

Retention period: 2 years and for such additional periods as required as follows: (a) logs involving communications incident to a distress or disaster and those involved in an investigation by the Commission—until written authorization by the Commission to destroy; (b) logs incident to or involved in any claims or complaint—until satisfaction of such claim or complaint or until barred by the statute limiting the time for filing of such suits upon such claims. 47 CFR 73.111—73.115, 73.281—73.285, 73.581—73.585, 73.669—73.673, 73.781—73.786

1.4 Licensees of standard, FM, noncommercial educational FM radio, and television broadcast stations.

To keep complete records of all requests for broadcast time made by or on behalf of candidates for public office, together with appropriate notations showing disposition made and charge, if any, if request is granted.

Retention period: 2 years. 47 CFR 73.120, 73.290, 73.590, 73.657

1.5 Licensees of radio stations in the experimental, auxiliary, and special broadcast services, and of cable television relay stations. [Amended]

To keep log of station operations including hours of operation, programs transmitted, frequency checks, pertinent remarks concerning transmission, research and experimentation conducted, tower light inspections, and such other records as indicated in sections cited.

Retention period: 2 years, except licensees of instructional television fixed stations and cable television relay stations keep records for such longer period as the Commission may direct or in case of claim or complaint, until satisfaction of such claim or complaint or until barred by statute limiting the time for filing of suits upon such claims. 47 CFR 74.181, 74.281, 74.381, 74.481, 74.581, 74.681, 74.781, 74.881, 74.981, 74.1291, 78.69

1.6 Licensees of low power broadcast auxiliary stations.

To maintain records, at the main studio or transmitter of broadcast station with which the auxiliary is principally used, which will accurately show current location of all transmitting units, periods of operation at such locations and other pertinent remarks concerning transmissions.

Retention period: 2 years. 47 CFR 74.437

1.7 Licensees of radio stations in the experimental services (other than broadcast). [Amended]

To keep adequate station records of operation; of service or maintenance duties which may affect proper station operation; and of the illumination of antennas or antenna supporting structures.

Retention period: 1 year. 47 CFR 5.163, 17.49 (retention: 5.165)

1.8 Licensees of radio stations holding student authorizations for experimental services.

To maintain record of date, time, and frequency of operation and brief description of experimentation being conducted.

Retention period: 1 month after termination of authorization. 47 CFR 5.410

1.9 Licensees of radio stations in the international fixed public radio communication services. [Amended]

To keep station logs.

Retention period: 1 year and such additional periods as required as follows: (a) logs involving communications incident to a distress or disaster or those involved in an investigation by the Commission—until written authorization by the Commission to destroy; (b) logs incident to any claim or complaint—until satisfaction of such claim or complaint or until barred by statute limiting time for filing of suits upon such claims. 47 CFR 23.47

1.10 Licensees of radio stations on land in the maritime services and Alaska-public fixed stations. [Amended]

To maintain station records and logs as indicated in sections cited.

Retention period: 1 year from date of entry and for such additional periods as required as follows: (a) Logs involving communications incident to a distress or disaster—3 years from date of entry; (b) logs including communications incident to an investigation by the Commission—until written authorization by the Commission to destroy; (c) logs incident to or involved in any claim or complaint—until satisfaction of such claim or complaint or until barred by statute limiting the time for the filing of suits upon such claims. 47 CFR 81.193, 81.194, 81.214, 81.314, 81.370, 81.458, 81.477, 81.504, 81.536, 81.704 (retention: 81.115)

1.11 Licensees of limited coast stations or marine-utility stations used on shore.

To keep a copy of agreements with vessel owners, verifying that licensee has sole right of control of the ship radio station involved and that the vessel operators shall use the ship stations subject to the orders of the licensee of the coast station or marine utility station on shore.

Retention period: Not specified. 47 CFR 81.352

1.12 Licensees of limited coast stations, marine-utility stations, and marine-fixed stations. [Amended]

To keep records which reflect the cost of the service and its nonprofit, cost-sharing, cooperative arrangement or basis on which radio communication service is rendered.

Retention period: Not specified. 47 CFR 81.352, 81.451

1.13 Licensees of radio stations on shipboard in the maritime services. [Amended]

To maintain station logs and such other records as indicated in sections cited.

Retention period: 1 year from date of entry and such additional periods as required as follows: (a) logs involving communications incident to a distress or disaster—3 years from date of entry; (b) logs including communications incident to or involved in an investigation by the Commission—until written notification by the Commission to destroy; (c) logs incident to or involved in any claim or complaint—until satisfaction of such claim or complaint or until barred by statute limiting the time for the filing of suits upon such claims (47 CFR Part 42 prescribes the requirement concerning record retention by communications common carriers); (d) ship-radar station licensees retain a permanent installation and maintenance record. 47 CFR 83.39, 83.111, 83.115, 83.184, 83.330, 83.368, 83.405, 83.456, 83.457, 83.462, 83.463, 83.473, 83.548

1.14 Licensees of radio stations in the aviation services. [Amended]

All stations at fixed locations, except radionavigation land test stations (MTF), to keep adequate records of operation; and stations whose antenna structure is required to be illuminated—a record of illumination; Aeronautical Public Service Stations—to keep a file of all record communications handled and all ground stations so licensed to keep a record of radiotelephone contacts either in the form of telephone traffic tickets or as a separate list.

Retention period: 30 days; except those logs involving communications incident to a distress or disaster or involved in an investigation by the Commission—until written notification by the Commission to destroy; or logs incident to or involved in a claim or complaint—until satisfaction of such claim or complaint or until barred by statute limiting time for filing suit upon such claim. 47 CFR 87.99, 87.101, 87.103

1.15 Public service aircraft. [Amended]

To keep adequate records to permit ready identification of individual aircraft if in lieu of radio station call letter, the official aircraft registration number, or company flight identification is used and make them available for inspection upon request of an authorized representative of the Commission.

Retention period: Not specified. 47 CFR 87.115

1.16 Licensees of public safety, industrial, and land transportation radio services stations. [Amended]

To keep records as follows: By all stations—transmitter measurements, service and maintenance records, the name, address, and license information of person or persons responsible for the foregoing and stations whose antenna or antenna supporting structure is required to be illuminated—a record of illumination.

Retention period: 1 year. 47 CFR 89.175, 89.179, 91.160, 93.160

1.17 Licensees of public safety, industrial, land transportation, and citizens radio stations sharing costs and facilities with other licensees. [Amended]

To keep a copy of cooperative agreements and contracts as well as records which reflect the non-profit, cost-sharing nature of that sharing.

Retention period: 1 year. 47 CFR 89.13, 89.14, 91.6, 91.9, 93.3, 93.4, 95.87 (retention: 89.179, 91.160, 93.160, 95.103)

1.18 Nonprofit corporations or associations organized to operate radio stations in the power, petroleum, forest product, motion picture, relay press, and base and mobile stations. [Amended]

To keep records which reflect the cost-sharing nonprofit basis under which they operate.

Retention period: 1 year. 47 CFR 91.251, 91.301, 91.351, 91.401, 91.451, 93.3, 93.4 (retention: 91.160, 93.160)

1.19 Licensees of amateur radio stations. [Amended]

To maintain accurate logs of station operation including information indicated in sections cited.

Retention period: 1 year following the last date of entry or if portions of log deal with public safety or national defense retain until authorized by the Commission to destroy. 47 CFR 97.103, 97.105, 97.209, 97.211, 97.213

1.20 [Combined with XXI 1.19]

1.21 Manufacturers, owners, or distributors of radio receivers.

To keep certificate of compliance with the requirements of 47 CFR Part 15, Subpart C.

Retention period: 5 years. 47 CFR 15.69

1.22 [Combined with XXI 1.16]

1.23 Licensees of citizens radio service stations. [Amended]

To keep records as follows: for each station operated as a mobile station, the current authorization; for stations where the licensee installs a unit of his station on the premises of a telephone answering service, the required written agreement; and for stations whose antenna structure is required to be illuminated, a record of illumination.

Retention period: 1 year. 47 CFR 17.49, 95.89, 95.101, 95.111 (retention: 95.103)

1.24 [Combined with XXI 1.25]

1.25 Licensees of disaster communications service radio stations. [Amended]

To keep an accurate log of all operations including information indicated in sections cited.

Retention period: 1 year or if a portion of log related to an actual disaster, until approval by the Commission to destroy. 47 CFR 99.25, 99.27

1.26 Licensees of radio stations in the domestic public radio services. [Amended]

To maintain a technical log of station operations and an operation logbook as indicated in section cited.

Retention period: 1 year, or if records involving communications incident to a disaster or involved in an investigation by the Commission—until written authorization by the Commission to destroy; or if involved in a claim or complaint—until satisfaction of claim or complaint or until barred by statute limiting time for filing a suit upon such claim. 47 CFR 21.208

1.27 Communication common carriers, including Communications Satellite Corporation and certain contractors. [Amended]

To keep accounts, records, memoranda, documents, microfilm, correspondence and related indexes prepared by or on behalf of the carrier as well as records of property or services acquired by a carrier through purchase, consolidation, merger, etc.

Retention period: Various. 47 CFR 25.177 (retention: 42.9)

1.28 Owners or operators of industrial heating equipment.

To keep a log of inspections of industrial heating equipment.

Retention period: Not specified. 47 CFR 18.105

1.29 [Deleted]

1.30 Applicants, permittees, and licensees of standard, FM, noncommercial educational FM radio, and television broadcast stations.

To maintain applications for construction permits, employment records, and such other records as may be required by section cited.

Retention period: Applicant for construction permit—while application is pending before the Commission; licensees and permittees—7 years from date of tendering for filing, except engineering material pertaining to former modes of operation—3 years, or whatever longer period is necessary to comply with requirements of section cited. 47 CFR 1.526

1.31 Licensees of standard, FM, and international radio, and television broadcast stations.

To keep a list of the chief executive officers or members of the executive committee or of the board of directors of any corporation, committee, association, or other unincorporated group which sponsors, pays for or furnishes, in whole or in part, or provides material or services for any program, other than a program advertising commercial products or services, which is broadcast by the station.

Retention period: 2 years. 47 CFR 73.119, 73.289, 73.654, 73.789

1.32 [Deleted]

V 38 - 12 JAN 18 73 XUM

1.33 Licensees of operational stations in the aviation services sharing costs and facilities with other licensees. [Amended]

To keep a copy of cooperative agreements and contracts as well as records which reflect the nonprofit, cost sharing nature of that sharing and make them available for inspection upon request of an authorized representative of the Commission.

Retention period: Not specified. 47 CFR 87.467

1.34 Operators of cable television systems. [Amended]

To maintain (a) record of all television signals carried, (b) equal employment opportunity file, (c) records of results of performance tests of the system.

Retention period: (a) 2 years, (b) and (c) 5 years. 47 CFR 76.305, 76.311, 76.601

1.35 Licensees of FM broadcast translator stations and FM broadcast booster stations.

To maintain station records of current instrument of authorization, official correspondence, maintenance records, contracts, permissions for rebroadcast, and other pertinent documents.

Retention period: 2 years. 47 CFR 74.1281

1.36 Licensees of plurality ship stations.

To keep a current list, available for inspection, of all vessel names and registration numbers authorized by the plurality ship station license.

Retention period: Not specified. 47 CFR 83.39

1.37 Licensees of ship stations authorized to transmit on frequencies in the band 400–535.

To maintain and post a written record of adjustments of transmitting and receiving equipment for operation on frequencies 410 and 500 kc/s and two working frequencies.

Retention period: Not specified. 47 CFR 83.331

1.38 Licensees of ship radiotelegraph stations provided for compliance with part II, title III of the Communications Act or the radio provisions of the Safety Convention.

To keep a record on board the ship of the direction finder calibrations, and check bearings made of their accuracy.

Retention period: 1 year. 47 CFR 83.459, 83.462

1.39 Common carrier licensees or permittees employment records. [Amended]

Each licensee or permittee required to file annual employment reports, equal opportunity programs and reports on complaints of Federal, State, or local equal opportunity laws must maintain for public inspection a copy of all employment reports, exhibits, letters, documents and correspondence between Commission and licensee or permittee pertaining to reports after they are filed and all documents incorporated therein by reference.

Retention period: 2 years. 47 CFR 21.307, 23.49

1.40 Grantee of certification for door opener, field disturbance sensor.

To keep a file of technical data for each field disturbance sensor and each radio control for a door opener that has been certificated.

Retention period: Not specified. 47 CFR 15.272, 15.313

XXII. FEDERAL DEPOSIT INSURANCE CORPORATION

1.1 Insured banks.

Each insured bank, as a condition to the right to make any deduction, allowed under section 7(b) of the Federal Deposit Insurance Act (12 U.S.C. 1817), in determining its assessment base, shall maintain such records as will readily permit verification of the correctness of its assessment base.

Retention period: 5 years from the date of the filing of any certified statement, except that when there is a dispute between the insured bank and the Corporation over the amount of any assessment the bank shall retain such records until final determination of the issue. 12 U.S.C. 1817(b); 12 CFR 304.3

1.2 Insured banks.

To keep certified statement forms.

Retention period: Same as for item 1.1. 12 CFR 304.3

XXIII. FEDERAL HOME LOAN BANK BOARD

1. Federal Savings and Loan System

1.1 Federal savings and loan associations.

To keep at home office and branch offices complete records of all business transactions, and to keep at agencies an original record of all business transacted at such agencies.

Retention period: Not specified. 12 CFR 545.15, 545.20

1.2 Federal savings and loan associations.

To maintain a detailed record of the transactions made at each mobile facility operated by the association.

Retention period: Not specified. 12 CFR 545.14–4

1.3 Federal savings and loan associations.

To establish and maintain such books, records, and accounting practices as will clearly and fully disclose the operations of a data processing service center in which two or more institutions participate.

Retention period: Not specified. 12 CFR 545.14–3

1.4 Federal savings and loan associations.

To keep records for each real estate loan, the security for which includes one or more dwelling units.

Retention period: Not specified. 12 CFR 545.6–1

1.5 Federal savings and loan associations.

To keep a record of the status of taxes, assessments, insurance premiums, and other charges on all real estate on which the association has loans or which is owned by it.

Retention period: Not specified. 12 CFR 545.6–11

1.6 Federal savings and loan associations.

To keep a signed copy of the report of the appraisal of each parcel of real estate owned made at the time of its acquisition.

Retention period: Not specified. 12 CFR 545.19

1.7 Federal savings and loan associations.

To keep signed statements of intention to make regular monthly payments of a specified amount to bonus accounts.

Retention period: Not specified. 12 CFR 545.2–2

1.8 Federal savings and loan associations. [Added]

To earmark all real estate loan investments subject to percentage limitations so that the association will be able to determine the total investments allocable to any percentage-limitation category.

Retention period: Not specified. 12 CFR 545.6–7

2. Federal Savings and Loan Insurance Corporation

2.1 Institutions insured by the Federal Savings and Loan Insurance Corporation.

To establish and maintain such accounting and other records as will provide an accurate and complete record of all business transacted by it and, without any limitation on the generality of the foregoing, to establish and maintain records with respect to: (1) loans on the security of real estate, (2) property purchased subject to, or with assumption by a third party of, an institution's loan, (3) loans sold, (4) the acquisition of mortgaged security, (5) insured accounts, and (6) such other records as are required by statute or by any other regulation to which such institution is subject.

Retention period: Not specified. 12 CFR 563.17–1

2.2 Institutions insured by the Federal Savings and Loan Insurance Corporation.

To keep a dated, signed copy of each report of appraisal of each parcel of real estate owned which is a scheduled item.

Retention period: Not specified. 12 CFR 563.17–2

2.3 Institutions insured by the Federal Savings and Loan Insurance Corporation.

To keep signed appraisals of real estate loans located more than fifty miles from institution's principal office.

Retention period: Not specified. 12 CFR 563.10

2.4 Institutions insured by the Federal Savings and Loan Insurance Corporation.

To keep records showing compliance with the limitations on real estate loans to one borrower if the total balances of all outstanding loans on the security of real estate owed to an institution by any one borrower exceeds $100,000.

Retention period: Not specified. 12 CFR 563.9–3

2.5 [Reserved]

2.6 Institutions insured by the Federal Savings and Loan Insurance Corporation.

(a) To establish and maintain by a separate ledger control or otherwise records showing the aggregate of outstanding balances of all accounts opened or increased as the result of the services of a broker and to make and retain an itemized record of each payment of sales commission to any broker, identifying each account and stating the amount thereof in respect to which such sales commission is paid.

(b) To retain original or signed duplicate of each agreement by which a broker is employed, engaged, or retained.

Retention period: Not specified. 12 CFR 563.25

2.7 Institutions insured by the Federal Savings and Loan Insurance Corporation.

To include in its account records evidence of any relationship pursuant to which the funds in an account are invested, such as trustee, agent, custodian or executor, which may provide a basis for additional insurance, together with any details concerning the relationship and the interests of other parties in the account, unless such details are ascertainable from the records of the accountholder maintained in good faith and in the regular course of business.

In connection with a trust account, to include in its account records the name of both the settlor (grantor) and the trustee of the trust and to keep an account signature card executed by the trustee.

In connection with joint accounts, to keep an account signature card personally executed by each co-owner.

Retention period: Not specified. 12 CFR 564.2, 564.9

2.8 Institutions insured by the Federal Savings and Loan Insurance Corporation.

In connection with the sale of real estate owned by an insured institution, to maintain records of the book value of such real estate at the time of sale and the price at which it was sold.

Retention period: Not specified. 12 CFR 563.23–1

2.9 Savings and loan holding companies.

To maintain such books and records as may be prescribed by the Federal Savings and Loan Insurance Corporation.

Retention period: Not specified. 12 CFR 584.1

2.10 [Reserved]

2.11 Institutions insured by the Federal Savings and Loan Insurance Corporation.

To maintain such books and records as will support its financial statements and reports to the Corporation.

Retention period: Not specified. 12 CFR 563.23–3

3. Federal Home Loan Bank System

3.1 Federal Home Loan Bank Members.

To maintain such records as may be required to certify compliance with liquidity requirements.

Retention period: Not specified. 12 CFR 523.13

3.2 Federal Home Loan Bank members participating in the housing opportunity allowance program. [Amended]

To keep a copy of borrowers application and the originals of all other closing documents.

Retention period: Not specified. 12 CFR 527.6, 527.16

XXIV. FEDERAL MARITIME COMMISSION

1.1 Independent ocean freight forwarders.

(a) To keep books of account and records, including each document prepared, processed, or obtained by the licensee, in connection with carrying on the business of forwarding

Retention period: 5 years. 46 CFR 510.23

(b) To keep in its files a true copy, or if oral, a true and complete memorandum of every special arrangement or contract with its principal, or modification or cancellation.

Retention period: Not specified. 46 CFR 510.25

1.2 Carriers and conferences of carriers.

To keep records of votes on each question voted on.

Retention period: At least 2 years. 46 CFR 537.4

1.3 Resident representative of a conference or other rate-making group domiciled outside the United States.

To keep a complete record of requests and complaints filed by shippers and consignees situated in the United States and its territories.

Retention period: 2 years. 46 CFR 527.5

XXV. FEDERAL POWER COMMISSION

1.1 Public utilities and licensees. [Amended]

To maintain records as indicated in section cited.

Retention period: Various. 18 CFR 125.3

1.2 Natural gas companies. [Amended]

To maintain records as indicated in section cited.

Retention period: Various. 18 CFR 225.3

XXVI. FEDERAL RESERVE SYSTEM [Renumbered]

1.1 Persons extending credit for purpose of purchasing or carrying margin securities.

To maintain such records as shall be prescribed by the Board of Governors of the Federal Reserve System to enable it to perform the functions conferred upon it by the Securities Exchange Act of 1934.

Retention period: Not specified. 12 CFR 207.3

1.2 Persons extending credit for purpose of purchasing or carrying margin securities.

To maintain statements obtained in conformity with requirements of Federal Reserve Form G–3 in connection with any extension of credit secured directly or indirectly, in whole or in part, by collateral that includes any margin security.

Retention period: 3 years after the credit is extinguished. 12 CFR 207.1

1.3 Banks extending credit for purpose of purchasing or carrying margin stocks. [Amended]

To maintain statements obtained in conformity with requirements of Federal Reserve Forms: U–1 in connection with any credit secured directly or indirectly, in whole or in part, by any stock (unless specifically not required); U–2 in connection with credit extended to an OTC market maker; U–3 in connection with credit extended to a third market maker; U–5 and U–6 in connection with credit extended to block positioners.

Retention period: 3 years after the credits are extinguished. 12 CFR 221.3

1.4 Brokers and dealers extending credit.

To maintain statements obtained in conformity with requirement of Federal Reserve Form T–4 for every extension of credit on a margin security (other than an exempted security) not for the purpose of purchasing or carrying or trading in securities.

Retention period: 3 years after the credit is extinguished. 12 CFR 220.7

1.5 Persons obtaining credit that is collateralized by securities.

To maintain such records as shall be prescribed by the Board of Governors of the Federal Reserve System to enable it to perform the functions conferred upon it by the Securities Exchange Act of 1934.

Retention period: Not specified. 12 CFR 224.4

1.6 Persons obtaining credit from outside the United States that is collateralized by securities.

To maintain records substantially in conformity with requirements of Federal Reserve Form X–1 in connection with credit obtained from sources outside the United States, with certain exceptions, if the credit is secured in any way by collateral that includes any United

V 38 I 12 JAN 18 73 XUM

States security or security registered on a national securities exchange.

Retention period: 6 years after credit is extinguished. 12 CFR 224.2

1.7 Creditors making disclosures under the Truth in Lending Act.

To maintain evidence of compliance with Federal Reserve Regulation Z.

Retention period: 2 years after date of each disclosure. 12 CFR 226.6

XXVII. FEDERAL TRADE COMMISSION

1.1 Wool products manufacturers.

To keep records of the various fibers used in wool products. The records should show not only the fiber content of wool, reprocessed wool, and reused wool, but also any other fibers used. Such records should contain sufficient information whereby each of the wool products manufactured can be identified with its respective record of fiber content including the source of the material used therein.

Retention period: 3 years. 16 CFR 300.31

1.2 Fur products manufacturers and dealers in furs and fur products.

To keep records showing all the information required under the Fur Products Labeling Act and under rules and regulations relating to such products or furs in a manner that will permit proper identification of each fur product or fur manufactured or handled. The item number required to be assigned to a fur product and to appear on the label and on the invoice relating to such product must appear in the records in such a manner as to identify the product through the various processes of manufacture, from whom purchased and the date of purchase; if exemption on basis of cost claimed, records of cost required.

Retention period: 3 years. 16 CFR 301.39, 301.41

1.3 Dealers advertising prices of furs and fur products.

To keep records to support pricing representations where comparative prices and percentage savings claims are used in advertising.

Retention period: Not specified. 16 CFR 301.44

1.4 Persons guarantying as to flammable quality of fabrics in wearing apparel on basis of guaranties received by them.

To keep the guaranty received and identification of the fabric or fabrics guaranteed.

Retention period: 3 years after guaranty furnished. 16 CFR 302.8

1.5 Persons guarantying as to flammable quality of fabrics in wearing apparel on basis of class tests.

To keep records showing (a) identification of the class test; (b) fiber composition, construction, and finish type of the fabrics; (c) a swatch of each class of fabrics guaranteed.

Retention period: 3 years after test. 16 CFR 302.8

1.6 Persons guarantying as to flammable quality of fabrics in wearing apparel who have made tests thereof.

To keep records showing (a) style or range number, fiber composition, construction, and finish type of each fabric used in the article of wearing apparel, including a swatch of the fabric tested; (b) stock or formula number, color, thickness and general description of each film used in the article and a sample of the film; (c) results of actual tests.

Retention period: 3 years after test. 16 CFR 302.8

1.7 Textile fiber products manufacturers and distributors substituting labels.

To keep records of the various fibers used in the manufacture of textile fiber products. Such records should contain sufficient information whereby each of the textile fiber products manufactured can be identified with its respective record of fiber content including the source of the material used therein.

Those substituting labels shall keep such records as will show the information set forth on the label removed and the name of the person from whom such textile fiber product was received.

Retention period: 3 years. 16 CFR 303.39

1.8 Importers of flammable textile fabrics or articles of wearing apparel.

To maintain records which establish that the imported flammable textile fabrics or articles of wearing apparel have been shipped for appropriate flammability treatment and that such treatment has been completed, and records showing disposition of such fabrics or articles of wearing apparel subsequent to the completion of such treatment.

Retention period: Not specified. 16 CFR 302.14(c)

1.9 Persons selling flammable fabrics or using such fabrics in interlinings or other exempted unexposed parts of wearing apparel.

To maintain records which show the acquisition, disposition, and end use or intended end use of such fabrics.

Retention period: Not specified. 16 CFR 302.6(a)

1.10 Persons selling flammable fabrics or using such fabrics in hats, gloves, and footwear.

To maintain records which show the acquisition, disposition, and end use or intended end use of such fabrics.

Retention period: Not specified. 16 CFR 302.6(b)

1.11 Persons shipping flammable fabrics or articles of wearing apparel for processing.

To maintain records which establish that the flammable textile fabrics or articles of wearing apparel have been shipped for appropriate flammability treatment and that such treatment has been completed, and records showing disposition of such fabrics or articles of wearing apparel subsequent to the completion of such treatment.

Retention period: Not specified. 16 CFR 302.14(b)

1.12 Packagers or labelers engaged in retail sale price representations.

To maintain invoices or other records in compliance with sections cited for those sponsoring (a) cents-off representations; (b) introductory offers; and (c) economy size representations.

Retention period: (a) 1 year beyond year in which representation is made; (b) 1 year subsequent to offer; and (c) 1 year. 16 CFR 502.100(d), 502.101(e), 502.102(d)

1.13 Manufacturers of carpets and rugs subject to flammability standard FF 1–70. [Amended]

To maintain records of (a) tests made to guarantee flammable quality including all identifying numbers, symbols, and specifications, a sample of carpet covered by guaranty, a copy of each test report, and a record showing the yardage at which test was performed; (b) the guaranty received and identification of carpet or rug.

Retention period: 3 years (a) from date tests performed; (b) from date guaranty furnished. 16 CFR 302.15

XXVIII. GENERAL ACCOUNTING OFFICE

1.1 Contractor using Government bill of lading as shipper.

To keep bill of lading, memorandum copy, certified by initial carrier's agent.

Retention period: Where the bill of lading covers shipments made under a Government contract having a records retention clause, the memorandum copies should be retained together with other records pertaining to the contract for the specified period. When the shipment is made under a Government contract not having a records retention clause, the contractor's normal business practice as to retention of similar records may be followed. 4 CFR 52.18

1.2 Contractors having Government contracts negotiated without advertising.

To keep records pertaining to the contracted project. This requirement does not apply to contracts with foreign contractors or subcontractors, including foreign governments or agencies thereof, excepted from the requirement pursuant to 10 U.S.C. 2313(c) or 41 U.S.C. 254(c). Nor does this requirement apply to certain contracts entered into with foreign governments or their agencies for service rendered to the United States or its agencies within the continental limits of the United States or to purchases made outside the continental limits of the United States under section 633(a) of the Foreign Assistance Act of 1961, 75 Stat. 424, 454, 22 U.S.C. 2393(a), as implemented by Executive Order 11223, May 12, 1965, or under the Peace Corps Act, 75 Stat. 612, 22 U.S.C. 2501 et seq., as implemented by Executive Order 11603, June 30, 1971.

Retention period: 3 years after final payment under contract. 41 U.S.C. 254; 10 U.S.C. 2313. However, subcontracts under contracts for experimental, developmental or research work may contain clauses specifying that records pertaining to such subcontract need be retained only 3 years after final payment under the subcontract. Comptroller General's decision B–101404, September 8, 1952

1.3 Contractors and subcontractors having Government contracts or subcontracts under Public Law 85–804, relating to national defense.

To keep pertinent books, documents, papers, and records related to contracts and subcontracts, and amendments or modifications thereof, entered into without regard to other provisions of law governing contracts in order to facilitate the national defense under Public Law 85–804, August 28, 1958, as amended (50 U.S.C. 1431–1436) as implemented by Executive Order No. 10789, November 14, 1958, as amended (50 U.S.C. 1431 note). This requirement does not apply to contracts with foreign contractors or subcontractors, including foreign governments or agencies thereof, excepted from the requirement pursuant to 50 U.S.C. 1433(b).

Retention period: 3 years after final payment under contract. 50 U.S.C. 1433(b). However, subcontracts under contracts for experimental developmental or research work may contain clauses specifying that records pertaining to such subcontract need be retained only 3 years after final payment under the subcontract. Comptroller General's decision B–101404, September 8, 1952.

1.4 Newspapers, magazines, or outdoor advertising businesses or operators. [Added]

To maintain all certifications and authorizations needed by or for each legally qualified candidate for Federal elective office and record of date used and charges made.

Retention period: 2 years. 11 CFR 4.12

1.5 Treasurers of political committees and candidates. [Added]

To maintain full and complete records of proceeds from all fund raising events as well as sale of campaign emblems, literature, pins, etc.

Retention period: 4 years. 11 CFR 14.4

XXIX. GENERAL SERVICES ADMINISTRATION

1.1 War contractors and subcontractors, World War II, having contract of $25,000 or more or having termination inventory worth $5,000 or more.

To keep records essential to determining performance under the contract or subcontract and to justify the settlement thereof as required by the Contract Settlement Act of 1944 (41 U.S.C. 101–125) and 18 U.S.C. 443 (excluded from this provision are contractor or subcontractor records title to which is transferred to a Federal agency; war contractor or subcontractor records that are included by Federal agencies on records disposition schedules approved by the Congress in the manner provided in the Records Disposal Act (44 U.S.C. ch. 33), and war contractor or subcontractor records disposal of which is approved in writing by the Administrator of General Services and the Comptroller General of the United States).

Retention period: (a) 5 years after such disposition of termination inventory by such war contractor or subcontractor or Government agency, or (b) 5 years after the final payment or settlement of such war contract or subcontract, whichever applicable period is longer. 41 CFR 101–13.3

1.2 Recipients of Federal grants or allocations for collecting and publishing historical documents.

To keep such records as the Administrator of General Services shall prescribe, including records which fully disclose the amount and disposition of such funds, the total cost of the undertaking, the portion of the cost supplied by other sources, and such other records as will facilitate an effective audit.

Retention period: Not specified. 44 U.S.C. 2506

1.3 Contractors and subcontractors under negotiated contracts pursuant to 41 U.S.C. 254(c).

To maintain books, documents, papers, and records involving transactions relating to the contract or subcontract.

Retention period: 3 years after final payment under the contract or subcontract or until expiration of the time periods for certain records specified in 41 CFR Part 1–20, whichever expires earlier. 41 CFR 1–3.814–2 (e), 1–7.101–10, 1–7.602–7

1.4 Contractors with contracts containing the Small Business Subcontracting Program clause, and subcontractors with contracts containing provisions which conform substantially to the language of that clause.

Maintain records showing information required by the clause.

Retention period: 1 year after award of the contract or subcontract or for such longer period as may be required by any other clause of the contract, subcontract, or applicable law or regulation. 41 CFR 1–1.710–3(b)

1.5 Contractors with contracts containing the Labor Surplus Area Subcontracting Program clause, and subcontractors with contracts containing provisions which conform substantially to the language of that clause.

Maintain records showing procedures which have been adopted to comply with the policies set forth in the clause.

Retention period: 1 year after award of the contract or subcontract or for such longer period as may be required by any other clause of the contract, subcontract, or applicable law or regulations. 41 CFR 1–1.805–3(b)

1.6 Contractors with fixed-price supply contracts containing the standard inspection clause.

Keep complete records of all inspection work by the contractor and make such records available to the Government.

Retention period: During performance of the contract and for such longer period as may be specified elsewhere in the contract. 41 CFR 1–7.101–5

1.7 Contractors with fixed-price contracts in excess of $2,500 for (a) supplies, or (b) experimental, developmental, or research work where a profit is contemplated, when such contracts contain the standard long-form Termination for Convenience of the Government clause.

Unless otherwise provided for in the contract, or by applicable statute, preserve and make available to the Government at all reasonable times at the office of the contractor but without direct charge to the Government, all his books, records, documents, and other evidence bearing on the costs and expenses of the contractor under the contract and relating to the work terminated thereunder, or, to the extent approved by the contracting officer, photographs, microphotographs, or other authentic reproductions thereof.

Retention period: 3 years after final settlement under the contract. 41 CFR 1–8.701

1.8 Contractors with fixed-price construction contracts estimated to exceed $10,000, when such contracts contain the standard Termination for Convenience of the Government clause.

Unless otherwise provided for in the contract, or by applicable statute, preserve and make available to the Government at all reasonable times at the office of the contractor but without direct charge to the Government, all his books, records, documents, and other evidence bearing on the costs and expenses of the contractor under the contract and relating to the work terminated thereunder, or, to the extent approved by the contracting officer, photographs, microphotographs, or other authentic reproductions thereof.

Retention period: 3 years after final settlement under the contract. 41 CFR 1–8.703

1.9 Sellers with fixed-price subcontracts which contain the termination clause suggested for use in such contracts.

Unless otherwise provided for in the subcontract, or by applicable statute, make available to the buyer and the Government at all reasonable times at the office of the seller all his books, records, documents, or other evidence bearing on the costs and expenses of the seller under the subcontract and in respect of the termination of work thereunder, or, to the extent approved by the Government, photographs, microphotographs, or other authentic reproductions thereof.

V 38 - 12 JAN 18 73 XUM

Retention period: 3 years after final settlement under the contract. 41 CFR 1-8.706

1.10 Contractors and subcontractors under contracts entered into, amended, or modified under the extraordinary, emergency authority granted by the act of August 28, 1958 (72 Stat. 972; 50 U.S.C. 1431-1435).

To maintain books, documents, papers, and records involving transactions relating to the contracts.

Retention period: 3 years after final payment or until expiration of the time periods for the particular records specified in Part 1-20 of the Federal Procurement Regulations (41 CFR 1-20), whichever expires earlier. 41 CFR 1-17.206(e)

1.11 [Deleted]

1.12 Participants in the lead and zinc stabilization program pursuant to act of October 3, 1961 (75 Stat. 766; 30 U.S.C. 681-689).

To keep any pertinent books, documents, papers, and records of any participant involving transactions related to the program established under the regulations of 41 CFR 101-15 and authorized representatives of the United States Government shall have access to and the right to examine such records.

Retention period: 3 years after termination of the program. 41 CFR 101-15.109

1.13 Contractors and subcontractors required to submit cost and pricing data in conjunction with certain firm fixed-price or fixed-price with escalation negotiated contracts in excess of $100,000 or in conjunction with certain contract modifications in excess of $100,000.

To maintain books, records, documents, and other supporting data which will permit adequate evaluation by the contracting officer or his authorized representatives of the cost or pricing data submitted, along with the computations used therein, which were available to the contractor or subcontractor as of the date of execution of his Contractor's Certificate of Current Cost or Pricing Data.

Retention period: 3 years after final payment under the contract or subcontract or until expiration of the time periods for certain records specified in 41 CFR Part 1-20, whichever expires earlier. 41 CFR 1-3.814-2 (a) and (b), 1-7.101-30, 1-7.602-5

1.14 Contractors and subcontractors having certain cost-reimbursement type, time and material, labor-hour, incentive, or price redeterminable contracts in excess of $100,000.

To maintain books, records, documents, and other evidence and accounting procedures and practices, sufficient to reflect properly all direct and indirect costs of whatever nature claimed to have been incurred for the performance of the contract or subcontract.

Retention period: 3 years after final payment under the contract or subcontract or until expiration of the time periods for certain records specified in 41 CFR Part 1-20, whichever expires earlier; (2) if contract or subcontract is completely or partially terminated, the records relating to the work terminated shall be preserved for 3 years from the date of any resulting settlement; or (4) records which relate to appeals under the "Disputes" clause of the contract, litigation or the settlement of claims arising out of performance of the contract or subcontract, or costs and expenses of the contract or subcontract as to which exception has been taken by the contracting officer, shall be retained until disposition has been made of such appeals, litigation, claims, or exceptions. 41 CFR 1-3.814-2(c), 1-7.101-30, 1-7.602-5

XXX. INTERSTATE COMMERCE COMMISSION

1.1 Refrigerator car lines.

To keep records as listed in the part cited.

Retention period: Various. 49 CFR Part 1220

1.2 Railroad companies.

To keep records as listed in the part cited.

Retention period: Various. 49 CFR Part 1220

1.3 Electric railway companies.

To keep records as listed in the part cited.

Retention period: Various. 49 CFR Part 1221

1.4 [Reserved]

1.5 Express companies.

To keep records as listed in the part cited.

Retention period: Various. 49 CFR Part 1223

1.6 Pipeline companies.

To keep records as listed in the part cited.

Retention period: Various. 49 CFR Part 1224

1.7 Persons furnishing cars to railroads.

To keep records as listed in the part cited.

Retention period: Various. 49 CFR Part 1225

1.8 Rate-making organizations.

To keep records as listed in the part cited.

Retention period: Various. 49 CFR Part 1253

1.9 Motor carriers and brokers.

To keep records as listed in the part cited.

Retention period: Various. 49 CFR Part 1226

1.10 Water carriers.

To keep records as listed in the part cited.

Retention period: Various. 49 CFR Part 1227

1.11 Freight forwarders.

To keep records as listed in the part cited.

Retention period: Various. 49 CFR Part 1228

XXXI. NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

1.1 Contractors with negotiated fixed-price supply contracts and purchase orders or fixed-price research and development contracts, in excess of $2,500.

To maintain books, documents, papers, and records involving transactions related to the contract.

Retention period: 3 years after final payment under the prime contract, or as specified in Appendix M of NASA Procurement Regulation. 41 CFR 18-7.104-15; 18-7.302-6

1.2 Subcontractors with contracts or purchase orders in excess of $2,500 (excluding subcontracts or purchase orders for public utility services at rates established for uniform applicability to the general public) under negotiated fixed-price supply contracts and purchase orders or fixed-price prime research and development contracts, in excess of $2,500. [Amended]

To maintain books, documents, papers, and records involving transactions related to the subcontract.

Retention period: 3 years after final payment under the subcontract, or as specified in Appendix M of NASA Procurement Regulation. 41 CFR 18-7.104-15; 18-7.302-6

1.3 Contractors with cost-reimbursement type contract, including facilities contracts.

To maintain books, records, documents, and other evidence pertaining to the expenses for which reimbursement is claimed.

Retention period: 3 years after date of final payment, until settlement of litigation, or as specified by Appendix M of NASA Procurement Regulation. 41 CFR 18-7.203-7; 18-7.402-7; 18-7.451-7; 18-7.460-6; 18-7.702-13; 18-7.703-11; 18-7.704-5

1.4 Subcontractors with subcontracts of a cost, cost-plus-fixed-fee, time-and-material, or labor-hour type under cost-reimbursement type prime contracts, including facilities contracts.

To maintain books, records, documents, and other evidence pertaining to all direct and indirect costs of whatever nature for which reimbursement is claimed under the subcontract.

Retention period: 3 years after date of final payment, until settlement of litigation, or as specified by Appendix M of NASA Procurement Regulation. 41 CFR 18-7.203-7; 18-7.402-7; 18-7.451-7; 18-7.460-6; 18-7.702-13; 18-7.703-11; 18-7.704-5

1.5 Subcontractors with subcontracts in excess of $2,500 on other than cost, cost-plus-fixed-fee, time-and-material or labor-hour basis (excluding subcontracts or purchase orders for public utility services at rates established for uniform applicability to the general public) under cost-reimbursement type prime contracts, including facilities contracts.

To maintain books, documents, papers, and records involving transactions related to the subcontract.

Retention period: 3 years after final payment under the subcontract, or as specified by Appendix M of NASA Procurement Regulation. 41 CFR 18-7.203-7; 18-7.402-7; 18-7.451-7; 18-7.460-6; 18-7.702-13; 18-7.703-11; 18-7.704-5

1.6 Contractors with fixed-price contracts in excess of $2,500 for supplies or experimental, developmental or research work other than (a) construction, alterations or repair of buildings, bridges, roads, or other kinds of real property or (b) experimental, developmental or research work with educational or nonprofit institutions when no profit is contemplated.

To maintain books, records, documents and other evidence bearing on the cost and expenses of the contractor under the contract and relating to work terminated (may be kept in microfilm or other photographic form to the extent approved by the contracting officer).

Retention period: 3 years after final settlement. 41 CFR 18-8.701

1.7 Contractors with fixed-price construction contracts amounting to more than $10,000.

To maintain books, records, documents and other evidence bearing on the cost and expenses of the contractor under the contract and relating to work terminated (may be kept in microfilm or other photographic form to the extent approved by the contracting officer).

Retention period: 3 years after final settlement. 41 CFR 18-8.701

1.8 Subcontractors with fixed-price subcontracts.

To maintain books, records, documents, and other evidence bearing on the cost and expenses of the contractor under the contract and relating to work terminated (may be kept in microfilm or other photographic form to the extent approved by the contracting officer).

Retention period: 3 years after final settlement. 41 CFR 18-8.706

1.9 Contractors with construction and facilities contracts in excess of $2,000 (for work within the United States).

To keep payroll records showing name and address of each employee, classification, rate of pay, daily and weekly number of hours worked, deductions from pay and actual pay received.

Retention period: 3 years after contract work completed. 41 CFR 18-12.403-1(d); 18-7.705-5

1.10 Industrial contractors having Government furnished property.

To maintain adequate records of all Government property, whether furnished to or acquired by them for the account of the Government, in accordance with the provisions of "Control of Government Property in Possession of Contractors" (Appendix B, Subpart 3, NASA Procurement Regulation).

Retention period: Not specified. 41 CFR 18-13.702; 18-13.703

1.11 Contractors furnishing special tooling under fixed-price contracts.

To maintain property control records on all special tooling which they furnish.

Retention period: Not specified. 41 CFR 18-13.704

1.12 Nonprofit contractors having Government furnished property under research and development contracts.

To maintain records of Government property, whether furnished to or acquired by them for the account of the Government, in accordance with the provisions of "Control of Government Property in Possession of Nonprofit Research and Development Contractors" (Appendix C, Subpart 3, NASA Procurement Regulation).

Retention period: Not specified. 41 CFR 18-13.706, 18-13.707

1.13 All contractors and subcontractors other than those having firm fixed-price contracts.

To maintain books, records, documents, and other evidence and accounting procedures and practices sufficient to reflect all direct and indirect costs claimed to have been incurred and anticipated to be incurred for the performance of the contract or subcontract.

Retention period: 3 years after date of final payment or until final settlement of litigation, whichever is longer. 41 CFR 18-7.104-42; 18-7.203-29; 18-7.303-29; 18-7.350-18; 18-7.402-30; 18-7.451-30; 18-7.702-48; 18-7.703-41; 18-7.704-33

1.14 Contractors with facilities contracts providing for the use of facilities.

To maintain adequate property control procedures and records and a system of identification of the facilities.

Retention period: Not specified. 41 CFR 18-7.702-17; 18-7.704-11

1.15 Contractors with contracts containing the Small Business Subcontracting Program clause, and subcontractors with contracts containing provisions which conform substantially to the language of that clause.

To maintain records showing (a) whether each prospective subcontractor is a small business concern, (b) procedures which have been adopted to comply with the policies set forth in the contract clause entitled "Small Business Subcontracting Program", and (c) such other information required by the clause.

Retention period: Not specified. 41 CFR 18-1.707-3(b)

1.16 Contractors with contracts containing an inspection clause.

To keep complete records of all inspection work by the contractor and make such records available to the Government.

Retention period: During performance of the contract and for such longer period as may be specified elsewhere in the contract. 41 CFR 18-7.103-5; 18-7.203-5; 18-7.302-4; 18-7.402-5; 18-7.451-5; 18-7.702-6; 18-7.703-6; 18-7.704-8

1.17 Contractors with contracts containing the "Data Requirements" clause.

To maintain the following:

(a) A set of engineering drawings sufficient to enable manufacture of any equipment or items furnished under the contract, or a set of flow sheets and engineering drawings sufficient to enable any performance of any process developed under the contract.

(b) Any subject data which is necessary to explain or to help the Government technical personnel understand any equipment, items, or process developed under the contract and furnished to the Government.

Retention period: 1 year after final payment under the contract. 41 CFR 18-9.202-1(e)

1.18 Contractors with contracts providing for progress payments.

To maintain control of progress payments and make available to the Government the books, records, and accounts thereof.

Retention period: During performance of the contract. 41 CFR 18-7.104-35

1.19 Contractors and subcontractors required to furnish cost and pricing data certificates. [Amended]

To maintain books, records, documents, and other evidence which will permit adequate evaluation of the cost or pricing data submitted along with the computations and projections used therein.

Retention period: 3 years after final payment or as specified in Appendix M of the NASA Procurement Regulation. 41 CFR 18-3.807-4

1.20 Contractors with fixed-price type letter contracts.

To maintain books, records, documents, and other evidence bearing on the cost and expenses of the contractor under the contract and relating to the work terminated (may be kept in microfilm or other photographic form to the extent approved by the contracting officer).

Retention period: 3 years after final settlement. 41 CFR 18-8.701-1

1.21 Contractors subject to the Work Hours Act of 1962.

To keep payroll records containing name, address, classification, rate of pay, hours worked, etc., for each employee.

Retention period: 3 years. 41 CFR 18-12.303-1, 18-12.403-1

V 38 - 12 JAN 18 73 XUM

1.22 Contractors and subcontractors subject to the Service Contract Act of 1965.

To keep records of each employee, name and address, basic employment, earning record, and work time schedules.

Retention period: 3 years after completion of the work. 41 CFR 18-12.1004

XXXII. NATIONAL CREDIT UNION ADMINISTRATION

1.1 [Deleted]

1.2 Custodians of records of Federal Credit Unions voluntarily liquidated. [Amended]

To keep all records of the liquidated credit union necessary to establish that creditors were paid and that members' shareholdings were equitably distributed.

Retention period: 5 years following date of cancellation of the charter of the credit union. 12 CFR 710.13

XXXIII. NATIONAL SCIENCE FOUNDATION

1.1 [Weather modification activities—see II 8.2]

XXXIV. OFFICE OF ECONOMIC OPPORTUNITY

1.1 Community action agencies receiving financial assistance under title II of the Economic Opportunity Act.

To keep a copy of each Administrative Cost Report, its supporting work sheets and a written explanation to explain the basis for classifying and allocating personnel costs, as part of their financial records.

Retention period: Not specified. 45 CFR 1068.3-8

XXXV. PANAMA CANAL COMPANY AND CANAL ZONE GOVERNMENT

1.1 Masters of vessels at sea, destined for ports of the Canal Zone.

To keep sanitary log or other official record of sanitary conditions and corrective measures taken.

Retention period: Discard at expiration of voyage. 35 CFR 61.151, 61.153

1.2 Masters of vessels transferring hazardous liquid cargoes at a port of the Canal Zone.

To keep original of the "Declaration of Inspection Prior to Bulk Cargo Transfer."

Retention period: Discard at expiration of voyage. 35 CFR 113.112

1.3 Vessels transiting or partially transiting Panama Canal.

To keep a full set of plans and a copy of the measurements made at the time of issue of the national tonnage certificate of the vessel, as well as the national tonnage certificate.

Retention period: Until vessel is decommissioned. 35 CFR 133.32

XXXVI. PRICE COMMISSION

1.1 Persons selling or leasing property or services subject to the price and rent stabilization requirements.

To maintain records to establish the base price for all property or services subject to Part 300 offered for sale and lease and the price at which property or services were actually sold or leased.

Retention period: 4 years after last day of calendar year in which the transaction occurred or property acquired, whichever is later. 6 CFR 300.501

1.2 Lessors of rental housing. [Revised]

To maintain records showing base rent with respect to each residence and reasons for any rent adjustment and customary practices before August 14, 1971, with respect to increases in nonrecurring charges when rent increased.

Retention period: 4 years. 6 CFR 301.401 (retention: 301.402)

1.3 Public utilities either not regulated by a regulatory agency, or regulated by a regulatory agency not certificated by the Price Commission. [Added]

To keep the certification by the public utility of compliance with 6 CFR 300.303 (a), and substantiating information.

Retention period: Not specified. 6 CFR 300.308 (c) and (d)

XXXVII. RAILROAD RETIREMENT BOARD

1.1 Employers subject to contributions under the Railroad Unemployment Insurance Act for any calendar quarter.

To keep such permanent records as are necessary to establish the total amount of compensation paid to employees, during each such quarter for services performed after June 30, 1939.

Retention period: At least 5 years. 20 CFR 345.24

1.2 States (employment agencies).

To make records available to Railroad Retirement Board.

Retention period: Not specified. 42 U.S.C. 503(c) (1)

1.3 Employers subject to the Railroad Retirement Act.

To keep original records necessary to establish service and compensation for a number of years prior to 1937 which, when added to the years elapsed after 1936, total at least 50.

Retention period: Not specified. 20 CFR 220.4

XXXVIII. SECURITIES AND EXCHANGE COMMISSION

1.1 Exchange members, brokers, and dealers.

To keep books and records relating to their business including blotters; ledgers; other records of orders, purchases, and sales; records of the proof of money balances of all ledger accounts in the form of trial balances and records of the computation of aggregate indebtedness and net capital; questionnaires or applications for employment executed by associated persons of such member, broker, or dealer; and other records and accounts as specified in the sections cited.

Retention period: 6 years and 3 years as specified in the sections cited. Records may be microfilmed immediately. 17 CFR 240.17a-3, 240.17a-4

1.2 Exchange members, brokers, and dealers.

To keep all partnership articles, articles of incorporation, charters, minute books, and stock certificate books.

Retention period: Life of business and its successors. Records may be microfilmed immediately. 17 CFR 240.17a-4

1.3 National securities exchanges.

To keep copies of statements, exhibits, and other information regarding registered securities, filed pursuant to sections 12, 13, 14, and 16 of the Securities Exchange Act of 1934.

Retention period: The foregoing materials may be destroyed after 5 years in accordance with plans submitted to and declared effective by the SEC pursuant to its Rule 17a-6. 17 CFR 240.17a-6, 240.24b-3

1.4 Mutual and subsidiary service companies in registered public utility holding company systems. [Amended]

To keep uniform accounts and other records to show fully facts pertaining to all entries and supported by sufficient detail to permit ready identification and analysis. These accounts and other records include not only accounting records in a limited technical sense, but all pertinent records such as minute books, contracts, billing computations, reports, memoranda, correspondence, other papers, and documents which may be useful in developing history of or facts regarding any transaction recorded in accounts.

Retention period: Various. 17 CFR 256.01-8 and Part 256a

1.5 Registered public utility holding companies which are not also operating companies. [Amended]

To keep uniform accounts and other records to show fully facts pertaining to all entries and supported by sufficient detail to permit ready identification and analysis. These accounts and other records include not only accounting records in a limited technical sense, but all records such as minute books, stock books, stockholder records, reports, memoranda, contracts, correspondence, other papers and documents which may be useful in developing history of or facts regarding any transaction recorded in accounts.

Retention periods: Various. 17 CFR 257.0-3 and Appendix to Part 257

1.6 Registered investment companies and underwriters, brokers, dealers or investment advisers which are majority-owned subsidiaries of such companies. [Amended]

To keep such accounts, books, and other documents relating to its business as indicated in sections cited.

Retention period: Various. Microfilming permitted after 3 years. 17 CFR 270.31a-1, 270.31a-2

1.7 Depositor of and principal underwriter for any registered investment company other than a closed-end investment company.

To keep such accounts, books, and other documents as are required of brokers and dealers by rule adopted under Section 17 of the Securities Exchange Act of 1934, to the extent such records are necessary or appropriate to record such person's transactions with such registered investment company.

Retention period: Not less than 6 years. 17 CFR 270.31a-1, 270.31a-2

1.8 Investment adviser not a majority-owned subsidiary of a registered investment company.

To keep such accounts, books, and other documents as are required of registered investment advisers by rule adopted under Section 204 of the Investment Advisers Act of 1940, to the extent such records are necessary or appropriate to record such person's transactions with such registered investment company.

Retention period: Not less than 6 years. 17 CFR 270.31a-1, 270.31a-2

1.9 Records prepared or maintained by others than person required to maintain and preserve them. [Amended]

Permits records to be maintained or prepared by others on behalf of the person required to maintain and preserve such records, subject to certain agreements required to be reduced to writing. See Rule 31a-3 for requirements as to such written agreements.

Retention period: Not less than 6 years. 17 CFR 270.31a-3 (retention: 270.31a-2)

1.10 Investment advisers making use of mails or of any means or instrumentality of interstate commerce in connection with business as investment adviser (other than an adviser specifically exempted from registration pursuant to Section 203(b) of the Investment Advisers Act of 1940).

To make, keep, and retain the books and records specified in section cited.

Retention period: Various. 17 CFR 275.204-2

1.11 Nonmember brokers and dealers.

To maintain current records for each customer as specified in the section cited.

Retention period: 6 years. Records may be kept on film after the first 2 years. 17 CFR 240.15b10-6

1.12 Brokers and dealers submitting quotations.

To maintain records as specified in section cited.

Retention period: 6 years and 3 years. Records may be microfilmed immediately. 17 CFR 240.15c2-11 (retention: 240.17a-4)

1.13 Registered national securities exchanges and associations. [Added]

To maintain a record of each extension granted to a broker or dealer pursuant to section cited including a summary of justification for granting such extension.

Retention period: 3 years. 17 CFR 240.15c3-3

XXXIX. SMALL BUSINESS ADMINISTRATION

1.1 Corporations licensed under the Small Business Investment Act. [Amended]

To maintain (a) general and subsidiary ledgers and special journals reflecting all asset and valuation, liability, capital stock and surplus, income, and expense accounts; corporate charter, bylaws, and proposal to operate; and all minute books, capital stock certificates or stubs, stock ledgers, and stock transfer registers; (b) applications, declarations, agreements, and all other documents and supporting materials relating to loan or investment; and (c) accounting records including vouchers, bank statements, memoranda, correspondence, etc.

Retention period: (a) Permanent; (b) 6 years following repayment, sale, or other final disposition of the related loan or investment; (c) 6 years. Notwithstanding the foregoing general statement of retention periods, after any book, document, or other record has been preserved for 3 years (or 3 years following final disposition of the related loan or investment, when applicable), a film of such record may be substituted therefor for the balance of the required time and the original destroyed. 13 CFR 107.1102

XL. UNITED STATES POSTAL SERVICE

1.1 Postage meter licensees. [Amended]

To keep a Meter Record Book (Form 3602-A), showing register readings of metered mail on each day of operation of the meter.

Retention period: At least 1 year from date of final entry. 39 CFR 144.2, 144.3

1.2 Postage meter manufacturers. [Amended]

To maintain, and make available for inspection by Postal Service officials, a complete record by serial number of all meters manufactured, showing all movements of each meter from the time it is produced until it is scrapped and the reading of the ascending register each time a meter is checked into or out of service through a post office.

Retention period: At least 3 years after the meter is scrapped. 39 CFR 144.9

1.3 Apartment house managers. [Amended]

To maintain, pursuant to Publication 17, "Apartment House Mail Receptacles, Regulations and Instructions," records of keys supplied by manufacturers and jobbers, relating the key number to the receptable number, so that, when necessary, new keys may be ordered and of the combinations of keyless locks so that new tenants may be given the combination.

Retention period: Key numbers—until the lock has been changed, when it may be destroyed; combinations to the keyless locks—until the combination is changed, when it may be destroyed. 39 CFR 155.6

1.4 Commercial mail receiving agencies.

To maintain a copy of Form 1583, Application for Delivery of Mail Through Agent.

Retention period: During period of agency. 39 CFR 154.2

1.5 Contractors with the Postal Service. [Amended]

To maintain and make available to the Postal Service books and records respecting (a) negotiated fixed-price supply contracts in excess of $5,000 (PCM, 7-104.15); (b) cost-reimbursement supply contracts (PCM, 7-203.7); (c) cost or pricing data submitted by bidders or offerors (PCM, 3-814.2); and (d) time and material and labor hour contracts (PCM, 7-901.17).

Retention period: At least 3 years after final payment under the contract pursuant to PCM. 39 CFR Part 601 (References given above are to the Postal Contracting Manual, incorporated by reference into the Code of Federal Regulations.)

XLI. VETERANS ADMINISTRATION

1.1 State owned or controlled hospitals and institutions distributing tax-free tobacco products to members or former members of the Armed Forces of the United States.

To keep copies of orders and other pertinent documents involved in the purchase, storage, and distribution of tax-free tobacco products to eligible patients.

Retention period: At least 3 years and available to the Veterans Administration and the Internal Revenue Service for inspection purposes. 41 CFR 8-11.250-2

1.2 Medical schools, hospitals, and research centers receiving grants under the Veterans Hospitalization and Medical Services Modernization Amendments of 1966.

To keep records of amount and disposition of grant, total cost of project and amount of cost of project received from other sources.

Retention period: 3 years after final payment. 38 CFR 17.266

1.3 Holders of loans for mobile homes and lots.

To keep records of payments received, disbursements chargeable thereto, and dates thereof.

Retention period: Until Administrator ceases to be liable for loan. 38 CFR 36.4215

1.4-1.6 [Reserved]

V 38 I 12 JAN 18 73 XUM

1.7 Educational institutions furnishing education or special restorative training under chapter 34 or 35, title 38, U.S. Code.

To keep appropriate records and accounts, including but not limited to, (a) records and accounts which are evidence of tuition and fees charged to and received from or on behalf of all students and trainees; (b) records of previous education or training of veterans and eligible persons enrolled under the law at time of admission and records of advance credit granted by institution; and (c) records of the veteran's and eligible person's grades and progress.

Retention period: 3 years following termination of enrollment period, unless further retention requested by General Accounting Office or Veterans Administration not later than 30 days prior to end of 3-year period. 38 CFR 21.4209

1.8 Educational institutions having veterans and eligible persons under chapter 34 or 35, title 38, U.S. Code, supra, enrolled in courses which do not lead to standard college degree.

To keep, in addition to the records and accounts described in item 1.7, above, records of leave, absences, class cuts, makeup work, and tardiness.

Retention period: 3 years following termination of enrollment period, unless further retention requested by General Accounting Office or Veterans Administration not later than 30 days prior to end of 3-year period. 38 CFR 21.4209

1.9 Educational institutions having veterans and eligible persons under chapter 34 or 35, title 38, U.S. Code, supra, enrolled in nonaccredited courses approved under section 1776, chapter 36, title 38, U.S. Code.

To keep, in addition to records and accounts described in items 1.7 and 1.8, above, (a) records of interruptions for unsatisfactory conduct or attendance; and (b) records of refunds of tuition, fees, and other charges made to a veteran or an eligible person who fails to enter the course or withdraws or is discontinued prior to completion of the course.

Retention period: 3 years following termination of enrollment period, unless further retention requested by General Accounting Office or Veterans Administration not later than 30 days prior to end of 3-year period. 38 CFR 21.4209

1.10 Holders of loans guaranteed or insured by the Veterans Administration under chapter 37, title 38, U.S. Code.

To keep a record of each loan showing the amounts of payments received on the obligation and disbursements chargeable thereto, and the dates thereof.

Retention period: Until the Administrator ceases to be liable as guarantor or insurer of the loan. 38 CFR 36.4330

1.11 Holders of loans insured by the Veterans Administration under chapter 37, title 38, U.S. Code.

To keep an insurance account showing the amounts credited as available for the payment of losses on insured loans made or purchased by the holder and the amounts debited on account of transfers of insured loans, purchases by the Veterans Administration under 38 CFR 36.4318, or payment of losses.

Retention period: Until effective date of closing of insurance account by the Veterans Administration. 38 CFR 36.4370

1.12 State approving agencies, institutions, and training establishments participating in the vocational rehabilitation and education program.

To maintain contracts, agreements, or arrangements providing for number and frequency of reports, adequate financial records to support payment for each trainee, and attendance and progress records and number of inspection, approval and supervisory visits and itemized vouchers for payment, including salary and travel.

Retention period: 4 years following the date of the last payment or a longer period if requested by the General Accounting Office or the Veterans Administration. 41 CFR 8–95.209

1.13 Training establishments furnishing training-on-the-job courses (other than a program of apprenticeship) approved under section 1777, chapter 36, title 38, U.S. Code.

To keep in addition to records and accounts described in item 1.7 above appropriate records pertaining to such training including, but not limited to (a) payroll records, (b) records of leave, absences, class cuts, makeup work, and tardiness.

Retention period: 3 years following termination of enrollment period, unless further retention requested by General Accounting Office or Veterans Administration not later than 30 days prior to and of 3-year period. 38 CFR 21.4209

XLII. WATER RESOURCES COUNCIL

1.1 State agencies receiving funds under the Water Resources Planning Act.

To maintain records relating to each allotment and grant and their allocability to the State comprehensive water and related land resources planning effort.

Retention period: 3 years after last disbursement of funds. 18 CFR 703.10

SUPPLEMENTS

Supplement I—Requirements Under the Second War Powers Act of 1942

The Second War Powers Act of March 27, 1942 (56 Stat. 185), provided that contractors with defense contracts placed after September 8, 1939, could be required to produce any books or records deemed relevant for audit and inspection by any agency or officer designated by the President or the Chairman of the War Production Board. The effectiveness of this Act was continued by the Act of June 30, 1953 (67 Stat. 120), for the duration of the national emergency proclaimed December 16, 1950, and for 6 months thereafter.

Supplement II—Aeronautics and Space Requirements on Availability of Credentials for Inspection in 14 CFR

Party	Competency certificate	Medical certificate
Pilots	61.3	61.3.
Mechanics	65.89	
Repairmen	65.106	
Parachute Riggers	65.111	
Control Tower Operator	65.49	65.49.

Registration Certificate	91.27	
Commercial Operators	121.73	
Rotorcraft External-Load Operators	133.27	
ATCO Operators	135.43	
Agricultural Aircraft Operators	137.57	
Air Travel Clubs	123.27	

INDEX

EXPLANATION: The index is a guide to the persons, groups, or products covered by the subject titles in the list. It does not purport to bring together under a given entry a complete analysis of all requirements relating to a given business or product. Thus, a requirement affecting corporations in liquidation will be found under "corporation" because the word appears in the subject title in the list. There are many other requirements, however, affecting corporations which must be sought under "taxes", "manufacturers", "employers", "contractors", name of product or other subject. In the same way general categories of persons to whom requirements may apply (such as manufacturers or importers) have been included only if they are particularly necessary in identifying the applicability of the requirements.

Items included in the index are keyed to the department (or agency) number shown in the contents. References are to agency and item numbers, not to FEDERAL REGISTER pages.

Labor-Management Reporting and Disclosure Act of 1959, VIII 3.1–3.8, 3.10
Labor-Management Services Administration, VIII 3
Labor organizations, VIII 3.1, 3.3, 3.5, 3.6
Age Discrimination in Employment Act of 1967, VIII 2.28
Apprenticeship programs, XIX 1.2
Local unions, XIX 1.3
Secretaries and election officials, VIII 3.7, 3.8
Labor relations consultants, VIII 3.2
Laboratories, clinical, IV 3.20, 3.21, 4.8
Lamb and yearling producers, I 5.6
Land transportation facilities; radio stations and carriers, XXI 1.16, 1.17
Landing systems, civil airways, XII 1.29
Lead and zinc:
Mining on Quapaw Agency lands, VI 4.11
Stabilization program, participants in, XXIX 1.12
Lead-based paint poisoning, prevention of, IV 3.30
Learners, employers of, VIII 2.11, 2.12, 2.15
Legal representatives of decedents, XI 4.33
Lemons:
See also Fruit
Marketing orders, I 2.2
Lending agencies. *See* Banks and banking institutions; *and* Housing
Lenses, impact resistant, IV 2.25
Lettuce; marketing orders, I 2.13
Libraries:
College, IV 1.30
Construction, IV 1.5
Librarianship training, IV 1.4
Medical facilities, IV 3.12–3.14
Resources and instruction materials, IV 1.17
Life insurance companies:
Coinsurance contracts, XI 4.28
Distributing dividends to policyholders, XI 4.27
Segregated assets accounts contracts, XI 4.26d
Lifeboat drills, XII 3.6
Limes:
See also Fruit
Marketing orders, I 2.3
Linseed and flaxseed oil, I 11.6
Liquors:
Bottle manufacturers, XI 8.3
Dealers, XI 8.4–8.7
Exporters, XI 8.45
Importers, XI 8.42, 8.43
Manufacturers and processors, XI 8.1, 8.2
Puerto Rican, shipped to United States, XI 8.31–8.37
Shippers, XI 8.35
Taxes, XI 8.1–8.52
Virgin Islands, shipped to the United States from, XI 8.36–8.38
Wholesalers, XI 8.4, 8.5
Livestock:
Dealers, I 9.4
Feed program, I 5.9
Market agencies, I 9.1–9.3, 9.6, 9.7, 9.10
Market operators, I 3.9
Packers, I 9.9
Slaughterhouse operators claiming exemption, I 3.12
State associations, I 9.8
Stockyard owners, I 9.1, 9.4, 9.6, 9.7
Transporters, I 3.12
Weighers, I 9.6, 9.7
Loans:
Area Redevelopment Act, recipients, II 1.1, 1.2
Farmers Home Administration, I 7.1
Federal loan insurance program, IV 1.15, 1.24
Holders of loans for mobile homes and lots, XLI 1.3
Holders of VA guaranteed or insured loans, XLI 1.10, 1.11
Private nonprofit schools, IV 1.12
Property improvement loans, V 2.1, 2.2
Public Works and Economic Development Act of 1965, recipients, II 1.1, 1.2
Refugee relief, XI 1.1
Rural development, I 7.3
Students, IV 1.24, 1.26
Tobacco loan organizations, I 4.11
Watershed, I 7.2
Locker plant operators, VI 2.1
Longshoremen, employers of, VIII 2.2, 4.3
Longshoremen's and Harbor Workers' Compensation Act, VIII 2.2, 4.3
Louisiana; persons authorized to kill depredating purple gallinules, VI 2.5
Lower income family homes, V 2.7
Lubricating oil:
Manufacturers and processors of, XI 4.84
Nonhighway or farming purposes, XI 4.86
Tax exemption, XI 4.83
Use and sale of, XI 4.83, 4.123

M

Macao; shipping restrictions, II 2.32
Machines and machinery; metalworking, II 2.5
Magazines, XXVIII 1.4
Mail, XL 1.1–1.4
Manpower training, IV 1.6
Manufacturers and processors:
Aircraft and related equipment, XII 1.1–1.2, 1.4, 1.30, 1.42, 1.47; Supp. II
Aircraft and vessel supplies, XI 4.88b
Antibiotic drugs, IV 2.16
Antifreeze solutions, XI 8.17
Arms, ammunition, and implements of war, X 1.1
Articles entitled to drawback, XI 3.14–3.16
Automobile tires, XI 4.83a
Baby toys, IV 2.26
Biological product or arsenicals, I 3.1; IV 2.28
Blood, whole, IV 2.29
Butter, adulterated and process or renovated, XI 4.72
Cargo tanks, XII 6.27
Carpets and rugs, XXVII 1.13
Cigarette papers and tubes, XI 8.62–8.73
Clacker balls, IV 2.26
Compressed gas cylinders, XII 6.21
Controlled substances, VII 1.11
Cosmetics, IV 2.1
Cotton, I 4.7
Credit due to tax reduction or repeal, XI 4.57
Cylinders and tanks, XII 6.25
Dairy products, I 2.29
Distilled spirits, persons disposing materials used in manufacture of, XI 8.2
Drug, IV 2.1, 2.14, 2.16
Electronic products, IV 2.30
Equipment for use on merchant vessels, XII 3.23
Excise taxes and exemptions, XI 4.56
Explosives, XI 8.88
Exporters, XI 8.9, 8.84
Filled cheese, XI 4.72
Firearms, XI 8.84, 8.85, 8.87
Fireworks, agricultural, IV 2.22
Fish, smoked and smoke-flavored, IV 2.19
Flammable fabrics, XXVII 1.4–1.6, 1.8–1.10
Flavoring extracts, XI 3.16, 8.1
Food and food products, I 4.2a; IV 2.1, 2.21; XI 8.1
Fur products, XXVII 1.2
Gambling devices, VII 1.2
Hair products, XI 3.6–3.8
Lenses, impact resistant, IV 2.25
Liquor bottles, XI 8.3
Liquors, XI 8.1, 8.2
Lubricating oil, XI 4.84
Marine sanitation devices, XII 3.28
Matches, white phosphorous, XI 4.68
Materials for use on merchant vessels, XII 3.23
Medicated feeds and premixes, IV 2.18, 2.20
Medicines and medicinal preparations, XI 3.16, 8.1
Methadone, IV 2.34
Motor vehicles and equipment, XII 7.2, 7.5; XVIII 1.3
Munitions List, United States, articles, X 1.1
Noise control, XVIII 1.7
Nonbeverage products, XI 8.10

MILK IN THE INDIANA MARKETING AREA

Proposed Rule Making

V 38 - 12 JAN 18 73 XUM

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 1049]

[Docket No. AO 319-A20]

MILK IN THE INDIANA MARKETING AREA

Decision on Proposed Amendments to Marketing Agreement and to Order

A public hearing was held upon proposed amendments to the marketing agreement and the order regulating the handling of milk in the Indiana marketing area.

The hearing was held, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice (7 CFR Part 900), at Indianapolis, Ind., on October 11, 1972, pursuant to notice thereof issued on September 21, 1972 (37 FR 20182).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Deputy Administrator, Regulatory Programs, on December 8, 1972 (37 FR 26688), filed with the Hearing Clerk, U.S. Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues, findings and conclusions, rulings, and general findings of the recommended decision are hereby approved and adopted and are set forth in full herein.

The material issues on the record of the hearing relate to:

1. Diversion of producer milk.
2. Louisville plan.
3. Charges on overdue accounts.
4. Order format.

FINDINGS AND CONCLUSIONS

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Diversion of producer milk.* The provisions of the order with respect to diversion of producer milk to nonpool plants should be modified. A cooperative association should be enabled to divert as producer milk in each of the months September through March up to 40 percent of the milk of its producer members. A handler who is the operator of a pool plant should be in position to divert during each such month up to 40 percent of the producer milk, for which he is the handler, exclusive of the milk of producers who are members of a cooperative association that is diverting milk under the percentage limitation described above.

The order now provides that the total quantity of milk that a cooperative association or a pool plant operator may divert as producer milk in each of the months of September through March shall not exceed 35 percent of the producer milk deliveries as described above. The order also provides an alternative basis for diversion during each of these months that permits milk of an individual producer to be diverted for the same number of days that milk of the producer is received at a pool plant. During each of the months April through August, a pool plant operator or a cooperative association may divert the milk production of a producer from a pool plant to a nonpool plant on any number of days during such month. In all months, diversion of the milk of any producer to a nonpool plant is permitted only if at least 1 day's production of the milk of such producer is received at a pool plant during the month. Of these diversion provisions, only the percentage limitations for the months September through March were considered at the hearing.

The revised diversion provisions, as adopted herein, were proposed by Hoosier Milk Marketing Agency, Inc., an organization of cooperative associations representing a substantial majority of the producers on the market. A representative of the proponent testified at the hearing in favor of the proposal. No opposition to the proposal was expressed either at the hearing or in briefs.

Over the last 2 years, production for the market has increased significantly while the number of producers has decreased. Average daily deliveries per producer increased by nearly 6 percent between 1970 and 1971. Comparing the first 8 months of 1972 to the same period for 1971, average daily deliveries per producer increased by over 7 percent. Class I sales increases for the same periods have not been as large as these increases in production. This tendency for individual producers to increase their daily deliveries is expected to continue.

One large cooperative association supplying the market submitted at the hearing that the present 35-percent diversion limitation does not provide it with the flexibility it requires in the face of current and anticipated marketing conditions. It has already had difficulty maintaining the producer status of some of its members as a result of increased production per member. For the months January through August 1972, the cooperative's member milk production increased 12 percent over the same months for 1971, while its membership increased by less than 2 percent. Loss of a single, large fluid milk account by one of the handlers this cooperative association supplies would seriously jeopardize the producer status of its members under the current diversion provisions.

A number of cooperative associations representing producers on the market are the principal or sole suppliers of high volume handlers. Handlers so supplied service large accounts for various types of outlets, including supermarket chain stores, dairy, and convenience chain stores, schools, and military establishments. Many of these accounts are serviced on a contract basis and may shift from one handler to another on the expiration of a contract. When a handler supplied primarily by one cooperative association loses such an account to a handler supplied primarily by another cooperative association or to a handler regulated under another order, the former cooperative may be left, for a time at least, with a considerable amount of milk for which there is no fluid outlet.

Another factor that could result in the need for diversion of a substantial volume of milk by a cooperative would be the closing of a large plant and the transfer of the route disposition to plants in other markets. There has been a trend in recent years for multiple-plant handlers operating in a number of markets to close their less efficient plants and concentrate their processing operations in large plants capable of serving several markets. Should this happen in the Indiana market, it could cause a serious problem for the cooperative that had supplied the closed plant.

In the event of plant closings or account losses such as those described above, manufacturing plants frequently provide the only immediately available outlet for a cooperative's member milk supplies or a handler's regular milk supplies. Diversion of milk directly from farms to manufacturing plants is the most efficient means of disposing of such supplies. The 40-percent diversion limitation adopted herein will promote orderly marketing in the face of these complex marketing problems by minimizing the impact of such circumstances on the producer status of dairy farmers who have been the regular suppliers of the market.

2. *Louisville Plan.* The order should be amended to provide that the uniform rate withheld from the pool under the Louisville seasonal incentive payment plan shall be 20 cents per hundredweight for each of the months April through July.

The order now provides for the withholding by the market administrator of 8 percent of the average monthly basic formula price for the preceding calendar year, subject to a maximum of 30 cents, with respect to each hundredweight of producer milk delivered to the market during each of the months April through July. Payback to producers of the aggregate moneys accumulated during the pay-in period is made at a monthly rate of 25 percent in each of the months September through December.

A representative of the proponent (Hoosier Milk Marketing Agency, Inc.) testified at the hearing that the payin amount provided for in the order has resulted in misalinement of Indiana producer prices relative to producer prices paid in northern Illinois and Wisconsin markets during the payout months. In response to the resulting interorder price relationships, some shifting of producers between markets has occurred during this period. Proponent testified that this situation has caused some producer unrest and has impaired the effectiveness of the Louisville plan.

In 1971 the average number of producers supplying the market during the payin period by nearly 250, or over 5 percent. Despite this situation, removal of the Louisville plan from the order was not favored by those participating in the hearing. Proponent contended that a seasonal incentive payment plan is still needed in the market not only to insure uniform production throughout the year, but also to maintain proper price alinement between the Indiana market and order markets located in Kentucky, Illinois, and Ohio that also utilize such plans.

The normal pattern of milk production results in a greater supply during the spring and early summer than during the remainder of the year. Seasonal incentive payment plans, such as the one under consideration, encourage a more uniform pattern of milk production by withholding from the uniform price computation in the flush production season funds to be added back in the short supply season. Since these funds are distributed to all producers who supply the market during the payout period, it is possible for dairy farmers who do not regularly supply the market to become producers only during these months. This seasonal pattern of producer market-shifting may occur when, as a result of too great a spread between spring and fall prices, interorder producer price differences during the short supply season more than offset transportation costs between order markets. The diluted producer prices that result during the fall months from the temporary addition of such producers to the market tend to discourage producers regularly associated with the market from managing their production in accordance with the intent of the plan.

The Ohio Valley, Louisville-Lexington-Evansville, Central Illinois and Southern Illinois orders, which abut the Indiana marketing area, continue to use the Louisville plan to even out production. Proponent stated that deletion of the plan from the Indiana order would shift to the adjoining markets the aforementioned problems currently being experienced in this market. The resulting price spread would provide a strong incentive for Ohio, Illinois, and Kentucky producers to shift to Indiana in the spring and an equally strong incentive for Indiana producers to shift to the Ohio Valley, Louisville-Lexington-Evansville, or Illinois markets in the fall months.

Official notice is taken of the uniform prices for Indiana and surrounding markets as published in the Federal Milk Order Market Statistics, a publication of the Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, for the months of April, May, June, July, September, October, November, and December 1971.

During April, May, June, and July 1971, the months when the deductions were made in the computation of the uniform price, the average uniform price under the Indiana marketing order was $5.45. In the adjoining markets, which also have "Louisville" plans, the average prices in the same months were: Central Illinois, $5.35; Southern Illinois, $5.50; Louisville, $5.27; and Ohio Valley, $5.59. Under the Chicago Regional order, the milkshed of which overlaps that of the Indiana milkshed in parts of Illinois, Indiana, Michigan, and Wisconsin, the uniform price during the same months was $5.37. The Chicago Regional order does not have a "Louisville" plan.

During the months of September, October, November, and December 1971, in which uniform prices were increased by the addition of the monies withheld in the spring, the respective average uniform prices were: Indiana, $6.19; Central Illinois, $5.96; Southern Illinois, $6.21; Louisville-Lexington-Evansville, $6.32; and Ohio Valley, $6.36.

The uniform price under the Chicago Regional order averaged $5.54 for the same 4-month period.

Had the 20-cent rate been in effect in 1971, the average uniform price under the Indiana order would have been $5.55 in the April–July period and $6.09 in the September–December period. Had there been no "Louisville" plan in effect, the uniform price would have averaged $5.75 in the April–July period and $5.89 in the September–December period. The 14-cent difference between the spring and fall prices would have reduced the incentive to producers to maintain an even production pattern. The substantially lower uniform price in the September–December period contrasted to the higher prices prevailing in some of the surrounding markets would have provided an incentive to Indiana producers to shift to those markets.

The pay-in rate of 20 cents per hundredweight adopted herein will tend to eliminate much of the temporary producer shifting that has occurred between the Indiana market and the markets located in northern Illinois and Wisconsin. The resulting uniform price to producers in the fall will reduce the incentive for producers to shift to the Indiana market from the Chicago Regional market to take advantage of the seasonally higher prices. At the same time, it will be high enough that Indiana producers will not have an incentive to shift to the Ohio Valley, Louisville-Lexington-Evansville, Southern Illinois or Central Illinois markets in the fall. The difference between the spring and fall prices will be sufficient to encourage Indiana producers to continue to produce enough milk in the fall and winter months to fully supply the needs of the market.

Interest was expressed at the hearing in a "dairy farmer for other markets" provision that would prevent dairy farmers not regularly associated with the market from taking undue advantage of the Louisville plan. Proponent was not prepared to propose such a provision at the hearing but agreed that the matter deserved further study.

In the Indiana market the moneys withheld under the seasonal incentive payment plan are invested in interest-bearing securities and both the principal and the interest earned thereon are returned to producers during the payout period. The order should be amended to reflect this practice of returning to the pool during the fall months interest earned on Louisville plan funds.

3. *Charges on overdue accounts.* The rate prescribed under the order on overdue obligations to the producer-settlement, administrative, and marketing service funds should be increased from one-half of 1 percent per month to three-fourths of 1 percent per month. The interest so provided should be applied on the sixth day following the date such obligations are due and on the same day of each succeeding month, rather than on the first day of the month following the due date and on the first day of each succeeding month as now provided in the order.

Proponent cooperative associations proposed that the rate be increased as provided herein and that the charge be applied on the first day following the day obligations to the producer-settlement, administrative, and marketing service funds are due. A representative of these cooperative associations testified that a charge of one-half of 1 percent per month is unrealistic in light of present day commercial rates for carrying charges and that it encourages delinquency in payment of the several order obligations by providing handlers with an inexpensive source of operating capital.

Representatives of several handlers regulated under the order expressed opposition to the cooperatives' proposal both at the hearing and in briefs. One such representative testified that an increase of 50 percent in the rate charged handlers for overdue accounts would be excessive and unwarranted in light of prevailing local credit conditions.

It is essential that payments to the funds maintained by the market administrator be made promptly so that the order may be administered in an efficient and timely manner. A charge on overdue accounts is intended to encourage such prompt settlement of accounts. It should not be so low as to provide handlers with an inexpensive source of credit and thus constitute a basis for holding back payments due the market administrator.

In September 1972, the market administrator billed 41 handlers for payments to the administrative fund and 26 of these handlers, or 63 percent, made such payments a week or more late. In the same month, 27 handlers were billed for payments to the producer-settlement fund and 17 of these handlers (again 63 percent) made such payments a week or more late. Since this month was not particularly unusual in terms of late payments, it appears that the present rate assessed on late payments is too low to accomplish what is intended and, in fact, may be providing a number of handlers with a relatively inexpensive source of short-term operating funds at the expense of producers.

In support of the proposal to begin application of interest charges on the day following the date handler obligations become due, proponent cooperatives testified that such a change also would further encourage prompt settlement of accounts and thereby insure

V 38 I 12 JAN 18 73 XUM

prompt payment in full to producers whose milk is delivered to handlers who rely on payments from the producer-settlement fund to meet their producer payrolls.

The same handlers that opposed the increased charge on overdue accounts also opposed this change in the date of application of such charge. They proposed that the charge on overdue obligations be applied on the sixth day following the date such obligations become due. A handler representative testified that the 5-day period during which no interest would be charged is needed to accommodate routine delays in mail deliveries to and from the market administrator's office.

The market administrator normally mails handlers' billings no earlier than 2 days prior to the date payments are due. This fact alone makes it difficult for a handler to settle his accounts on time. If, in addition, consideration is given to the time normally required for pickup and delivery of mail and the occurrence of a weekend or a holiday immediately prior to or on the due date, it is evident that the application of interest charges on the day following the due date might penalize those handlers who make an effort to pay their obligations promptly. A period of 5 days between the date payments become due and the date interest is assessed will encourage prompt payment without penalizing handlers for uncontrollable mail delays.

In order to insure that handlers pay only the adopted rate per month on overdue accounts, it is necessary to provide in the order that charges be applied on the same day each month. Also, since the interest charge itself becomes an obligation after it is added to a handler's original obligation, the order should provide for the compounding of interest charges from month to month.

For the reasons stated above, it is concluded that the sections of the order concerning charges on overdue accounts should be amended as provided herein.

4. *Order format.* The format of the Indiana order should be revised to provide a more compact order and a more precise grouping of related order provisions. In addition to redesignation of section numbers (and codified subunits), certain changes should be made in section titles, introductory paragraphs, and section content. In making these modifications, which conform with a basic and uniform format for all orders, no change is contemplated either in the intent or application of any provisions so affected.

The need for rearrangement of the order provisions in large part reflects the cumulative effect of past amendments that have resulted in a number of unused subunits that disrupt the continuity of the order. The redesignation of codified units will also accommodate future changes in the order.

RULINGS ON PROPOSED FINDINGS AND CONCLUSIONS

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

GENERAL FINDINGS

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

RULINGS ON EXCEPTIONS

In arriving at the findings and conclusions, and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

MARKETING AGREEMENT AND ORDER

Annexed hereto and made a part hereof are two documents, a marketing agreement regulating the handling of milk, and an order amending the order regulating the handling of milk in the Indiana marketing area which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

It is hereby ordered, That this entire decision, except the marketing agreement,[1] be published in the FEDERAL REGISTER. The regulatory provisions of the marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which is published with this decision.

DETERMINATION OF PRODUCER APPROVAL AND REPRESENTATIVE PERIOD

November 1972 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the order, as amended and as hereby proposed to be amended, regulating the handling of milk in the Indiana marketing area is approved or favored by producers, as defined under the terms of the order, as amended and as hereby proposed to be amended, and who, during such representative period, were engaged in the production of milk for sale within the aforesaid marketing area.

Signed at Washington, D.C., on January 12, 1973.

RICHARD E. LYNG,
Assistant Secretary.

Order[2] Amending the Order, Regulating the Handling of Milk in the Indiana Marketing Area

FINDINGS AND DETERMINATIONS

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings.* A public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Indiana marketing area. The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure (7 CFR Part 900).

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds,

[1] Filed as part of the original document.

[2] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order as hereby amended regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

Order relative to handling. It is therefore ordered that on and after the effective date hereof the handling of milk in the Indiana marketing area shall be in conformity to and in compliance with the terms and conditions of the order, as amended, and as hereby amended, as follows:

The provisions of the proposed marketing agreement and order amending the order contained in the recommended decision issued by the Deputy Administrator, Regulatory Programs, on December 8, 1972, and published in the FEDERAL REGISTER on December 14, 1972 (37 FR 26688), shall be and are the terms and provisions of this order, amending the order, and are set forth in full herein:

RECOMMENDED MARKETING AGREEMENT AND ORDER AMENDING THE ORDER

The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be the same as those contained in the order, as hereby proposed to be amended. The following order amending the order, as amended, regulating the handling of milk in the Indiana marketing area is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out:

PART 1049—MILK IN INDIANA MARKETING AREA

Subpart—Order Regulating Handling

GENERAL PROVISIONS

Sec.
1049.1 General provisions.

DEFINITIONS

1049.2 Indiana marketing area.
1049.3 Route disposition.
1049.4 [Reserved]
1049.5 Distributing plant.
1049.6 Supply plant.
1049.7 Pool plant.
1049.8 Nonpool plant.
1049.9 Handler.
1049.10 Producer-handler.
1049.11 [Reserved]
1049.12 Producer.
1049.13 Producer milk.
1049.14 Other source milk.
1049.15 Fluid milk product.
1049.16 [Reserved]
1049.17 Filled milk.
1049.18 Cooperative association.

HANDLER REPORTS

1049.30 Reports of receipts and utilization.
1049.31 Payroll reports.
1049.32 Other reports.

CLASSIFICATION OF MILK

1049.40 Classes of utilization.
1049.41 Shrinkage.
1049.42 Classification of transfers and diversions.
1049.43 General classification rules.
1049.44 Classification of producer milk.
1049.45 Market administrator's reports and announcements concerning classification.

CLASS PRICES

1049.50 Class prices.
1049.51 Basic formula price.
1049.52 Plant location adjustments for handlers.
1049.53 Equivalent price.
1049.54 Handler butterfat differentials.
1049.55 Announcement of class prices and handler butterfat differentials.

UNIFORM PRICE

1049.60 Handler's value of milk for computing uniform price.
1049.61 Computation of uniform price (including weighted average price).
1049.62 Announcement of uniform price and producer butterfat differential.

PAYMENTS FOR MILK

1049.70 Producer-settlement fund.
1049.71 Payments to the producer-settlement fund.
1049.72 Payments from the producer-settlement fund.
1049.73 Payments to producers and to cooperative associations.
1049.74 Producer butterfat differential.
1049.75 Plant location adjustments to producers and on nonpool milk.
1049.76 Payments by handler operating a partially regulated distributing plant.
1049.77 Adjustment of accounts.
1049.78 Charges on overdue accounts.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

1049.85 Assessment for order administration.
1049.86 Deduction for marketing services.

ADVERTISING AND PROMOTION PROGRAM

1049.110 Agency.
1049.111 Composition of the Agency.
1049.112 Term of office.
1049.113 Selection of Agency members.
1049.114 Agency operating procedure.
1049.115 Powers of the Agency.
1049.116 Duties of the Agency.
1049.117 Advertising, research, education, and promotion program.
1049.118 Limitation of expenditures by the Agency.
1049.119 Personal liability.
1049.120 Procedure for requesting refunds.
1049.121 Duties of the market administrator.
1049.122 Liquidation.

AUTHORITY: The provisions of this Part 1049 issued under secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

GENERAL PROVISIONS

§ 1049.1 General provisions.

The terms, definitions, and provisions, in Part 1000 of this chapter are hereby incorporated by reference and made a part of this order.

DEFINITIONS

§ 1049.2 Indiana marketing area.

"Indiana marketing area" (hereinafter referred to as the "marketing area") means all the territory within the boundaries of each of the Indiana counties listed below, including territory wholly or partly within such boundaries occupied by Government (municipal, State, or Federal) reservations, installations, institutions, or other similar establishments:

Adams.	La Porte.
Allen.	Lawrence.
Bartholomew.	Madison.
Blackford.	Marion.
Boone.	Marshall.
Brown.	Miami.
Cass.	Monroe.
Clay.	Montgomery.
Clinton.	Morgan.
Decatur.	Noble.
De Kalb.	Owen.
Delaware.	Parke.
Elkhart.	Porter.
Fayette.	Putnam.
Fountain.	Randolph.
Franklin.	Rush.
Fulton.	Shelby.
Grant.	Steuben.
Hamilton.	St. Joseph.
Hancock.	Starke.
Hendricks.	Tippecanoe.
Henry.	Tipton.
Howard.	Union.
Huntington.	Vermillion.
Jackson.	Vigo.
Jay.	Wabash.
Johnson.	Warren.
Kosciusko.	Wayne.
Lagrange.	Wells.
Lake.	Whitley.

§ 1049.3 Route disposition.

"Route disposition" means a delivery (including that custom-packaged for another person, disposition from a plant store or from a distribution point and distribution by a vendor or vending machine) of any fluid milk product classified as Class I milk other than a delivery in bulk form to any milk processing plant.

§ 1049.4 [Reserved]

§ 1049.5 Distributing plant.

"Distributing plant" means a plant approved by any duly constituted health authority for the processing or packaging of milk for fluid consumption in the marketing area and from which there is route disposition during the month in the marketing area.

§ 1049.6 Supply plant.

"Supply plant" means a plant in which some milk approved by any duly constituted health authority for fluid consumption in the marketing area is assembled and shipped in bulk as milk, cream, or skim milk to a distributing plant during the month.

§ 1049.7 Pool plant.

Except as provided in paragraph (c) of this section, "pool plant" means a

V 38 - 12 JAN 18 73 XUM

plant specified in paragraph (a) or (b) of this section.

(a) A distributing plant with:

(1) Total route disposition exclusive of packaged fluid milk products received from other plants and filled milk, in an amount not less than 50 percent of Grade A milk received at such plant during the month from dairy farmers (excluding receipts of producer milk by diversion pursuant to § 1049.13) and supply plants, except that a plant meeting such percentage requirement for the preceding month may remain qualified under this subparagraph in the current month; and

(2) Route disposition within the marketing area during the month of at least 10 percent of such receipts, such route disposition to be exclusive of packaged fluid milk products received from other plants and filled milk: *Provided*, That any plant meeting the requirements of this paragraph in each of the months of September through May, inclusive, shall continue to have pool plant status in the months of June, July, and August, immediately following if there is route disposition, except filled milk, from the plant in the marketing area during such month.

(b) A supply plant from which not less than 50 percent of the Grade A milk received from dairy farmers at such plant during the month is shipped to plants qualifying for the month pursuant to paragraph (a) of this section. A plant qualified pursuant to this paragraph in each of the immediately preceding months of September through February shall remain so qualified for the months of April through August unless written application is filed with the market administrator on or before the first day of any such month to designate such plant as a nonpool plant for such month and for each subsequent month through August during which it would otherwise not qualify under this paragraph.

(c) The term "pool plant" shall not apply to:

(1) A producer-handler plant;

(2) A distributing plant which the Secretary determines has a greater proportion of route disposition (except filled milk) in another marketing area regulated by another order issued pursuant to the Act and such plant is fully subject to regulation of such other order: *Provided*, That a distributing plant which was a pool plant under this order in the immediately preceding month shall continue to be subject to all of the provisions of this part until the third consecutive month in which a greater proportion of its route disposition (except filled milk) is made in such other marketing area, unless, notwithstanding the provisions of this paragraph, it is regulated by such other order;

(3) A distributing plant which meets the requirements set forth in paragraph (a) of this section which also meets the requirements of another order on the basis of its distribution in such other marketing area and which the Secretary determines has a greater quantity of route disposition (except filled milk) during the month in this marketing area than in such other marketing area but which plant is nevertheless fully regulated under such other order;

(4) A supply plant which during the month is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act, unless such plant is qualified as a pool plant pursuant to paragraph (b) of this section and a greater volume of fluid milk products (except filled milk) is moved to pool distributing plants qualified on the basis of route sales in this marketing area; and

(5) That portion of a plant that is physically separated from the Grade A portion of such plant, is operated separately and is not approved by any health authority for the receiving, processing, or packaging of any fluid milk product for Grade A disposition.

§ 1049.8 Nonpool plant.

"Nonpool plant" means any milk or filled milk receiving, manufacturing, or processing plant other than a pool plant. The following categories of nonpool plants are further defined as follows:

(a) "Other order plant" means a plant that is fully subject to the pricing and pooling provisions of another order issued pursuant to the Act.

(b) "Producer-handler plant" means a plant operated by a producer-handler as defined in any order (including this part) issued pursuant to the Act.

(c) "Partially regulated distributing plant" means a nonpool plant that is neither an other order plant nor a producer-handler plant, from which there is route disposition in consumer-type packages or dispenser units in the marketing area during the month.

(d) "Unregulated supply plant" means a nonpool supply plant that is not an other order plant or a producer-handler plant, from which fluid milk products are shipped during the month to a pool plant.

§ 1049.9 Handler.

"Handler" means:

(a) Any person in his capacity as the operator of a pool plant;

(b) Any cooperative association with respect to producer milk diverted for the account of such association pursuant to § 1049.13;

(c) [Reserved]

(d) Any person who operates a partially regulated distributing plant;

(e) A producer-handler; or

(f) Any person who operates an other order plant described in § 1049.7(c).

§ 1049.10 Producer-handler.

"Producer-handler" means a person who operates a dairy farm and a distributing plant and who receives no fluid milk products from other dairy farmers or from sources other than pool plants, and no milk products other than fluid milk products for reconstitution into fluid milk products: *Provided*, That such person provides proof satisfactory to the market administrator that the care and management of all dairy animals and other resources used in his own farm production and the operation of the processing and distributing business are at the personal enterprise and risk of such person.

§ 1049.11 [Reserved]

§ 1049.12 Producer.

"Producer" means any person, other than a producer-handler as defined in any order (including this part) issued pursuant to the Act, who in compliance with Grade A inspection requirements of a duly constituted health authority, produces milk for distribution as fluid milk products within the marketing area or produces milk acceptable for fluid consumption at Federal, State, or municipal institutions, which milk is received at a pool plant or is diverted pursuant to § 1049.13. "Producer" shall not include any person with respect to milk which is fully subject to the class pricing and producer payment provisions of another order issued pursuant to the Act.

§ 1049.13 Producer milk.

"Producer milk" means all skim milk and butterfat contained in milk of any producer, other than milk received at a pool plant by diversion from a plant at which such milk would be fully subject to pricing and pooling under the terms and provisions of another order issued pursuant to the Act, which is:

(a) Received at one or more pool plants during the month (milk may be diverted during the month by a handler from a pool distributing plant to another pool plant(s) for not more days of production of producer milk than is physically received at the diverting pool plant).

(b) Received at a pool plant at least one day during the month and then diverted by the operator of a pool plant or by a cooperative association to a nonpool plant during the month under any of the following conditions:

(1) During April through August the operator of a pool plant or a cooperative association may divert the milk production of a producer from a pool plant to a nonpool plant (other than that of a producer-handler) on any number of days during the month.

(2) During September through March the milk of a producer diverted by the operator of a pool plant or a cooperative association to a nonpool plant (other than that of a producer-handler) shall be limited to the amounts specified in subdivisions (i) and (ii) of this subparagraph:

(i) The operator of a pool plant may divert the milk of producers (except producer members of a cooperative association which is diverting milk under the percentage limit of subdivision (ii) of this subparagraph) for not more days of production of producer milk than is physically received at the diverting pool plant or he may divert an aggregate quantity not exceeding 40 percent of the milk of all such producers.

(ii) A cooperative association may divert the milk of its individual member producers for not more days of production of producer milk than is physically received at a pool plant or it may divert an aggregate quantity of the milk of member producers not exceeding 40 percent of all such milk either caused to be delivered to pool plants or diverted to nonpool plants by the cooperative association.

(3) When milk is diverted in excess of the limit by a handler who elects to divert on the basis of days-of-production, only that milk of the individual producer which was received at a pool plant or which was diverted to a nonpool plant for not more days of production than is physically received at a pool plant shall be considered producer milk.

(4) When milk is diverted to a nonpool plant in excess of the percentage limit by a handler who elects to divert on a percentage basis, eligibility as producer milk shall be forfeited on a quantity of milk equal to such excess. In such instances the diverting handler shall specify the dairy farmers whose milk is ineligible as producer milk. If the handler fails to designate such dairy farmers whose milk is ineligible, producer milk status shall be forfeited with respect to all milk diverted to nonpool plants by such handler.

(5) If, notwithstanding the provisions of this paragraph, diverted milk is fully subject to the pricing and pooling provisions of another Federal order, it shall not be producer milk under this order.

(c) Diverted milk shall be deemed to be received by the handler at the pool plant or nonpool plant to which the milk is diverted, unless diverted to a plant located in any part of the marketing area or to a plant at which no location adjustment would apply pursuant to § 1049.52, in which case such diverted milk shall be deemed to be received at the pool plant from which diverted.

§ 1049.14 Other source milk.

"Other source milk" means all skim milk and butterfat contained in or represented by:

(a) Receipts during the month of fluid milk products, except: (1) Fluid milk products received from pool plants either by transfer or diversion, (2) producer milk (including own farm production), or (3) inventory of fluid milk products on hand at the beginning of the month;

(b) Products, other than fluid milk products, from any source (including those produced at the plant) which are reprocessed or converted into or combined with another product in the plant during the month; and

(c) Any disappearance of nonfluid milk products not otherwise accounted for.

§ 1049.15 Fluid milk product.

"Fluid milk product" means milk, skim milk, filled milk, buttermilk, milk drinks (plain or flavored), "fortified" products, "dietary" milk products, concentrated milk or skim milk, reconstituted milk, skim milk, or milk drinks (plain or flavored), and cream or any mixture in fluid form of cream, milk or skim milk (except eggnog, yogurt, milk shake mix, frozen dessert mix, sour cream, aerated cream products, evaporated and plain or sweetened condensed milk or skim milk, and sterilized products packaged in hermetically sealed metal or glass containers). This definition shall not include a product which contains 6 percent or more nonmilk fat (or oil).

§ 1049.16 [Reserved]

§ 1049.17 Filled milk.

"Filled milk" means any combination of nonmilk fat (or oil) with skim milk (whether fresh, cultured, reconstituted or modified by the addition of nonfat milk solids), with or without milkfat, so that the product (including stabilizers, emulsifiers or flavoring) resembles milk or any other fluid milk product; and contains less than 6 percent nonmilk fat (or oil).

§ 1049.18 Cooperative association.

"Cooperative association" means any cooperative marketing association of producers which the Secretary determines, after application by the association:

(a) To be qualified under the provisions of the Act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act";

(b) To have full authority in the sale of milk of its members and is engaged in making collective sales of or marketing milk or milk products for its members; and

(c) To have all of its activities under the control of its members.

Handler Reports

§ 1049.30 Reports of receipts and utilization.

On or before the eighth day after the end of each month, each handler for each of his pool plants and a cooperative association with respect to milk for which it is the handler shall report to the market administrator for such month, in the detail and on forms prescribed by the market administrator as follows:

(a) The quantities of skim milk and butterfat contained in:

(1) Receipts of producer milk (including own farm production);

(2) Fluid milk products received by transfer or diversion from pool plants;

(3) Other source milk;

(4) A separate report of producer milk diverted pursuant to § 1049.13: *Provided*, That on or before the day prior to diverting producer milk pursuant to § 1049.13 each handler shall notify the market administrator of his intention to divert such milk, the date or dates of such diversion, and the plant to which such milk is to be diverted; and

(5) Inventories of fluid milk products on hand at the beginning and end of the month;

(b) The utilization of all skim milk and butterfat required to be reported pursuant to this section, including separate statements of route disposition, except filled milk, and filled milk inside the marketing area; and

(c) Such other information with respect to receipts and utilization of skim milk and butterfat as the market administrator may prescribe.

§ 1049.31 Payroll reports.

(a) On or before the 20th day after the end of each month, each handler, except a producer-handler and a handler in his capacity as the operator of a plant specified in § 1049.7(c) (2), (3), or (4), shall report to the market administrator in the detail and on forms prescribed by the market administrator, his producer payroll for that month which shall show for each producer:

(1) His name and address;

(2) The total pounds of milk received from such producer and the number of days, if less than the entire month, on which milk was received from such producer;

(3) The average butterfat content of such milk; and

(4) The net amount of such handlers payment, together with the price paid and the amount and nature of any deductions;

(b) Each handler, except one who elects to make payments pursuant to § 1049.76(a), operating a partially regulated distributing plant shall report to the market administrator on or before the 20th day after the end of the month for each dairy farmer from whom milk was received the same information as required from handlers operating pool plants pursuant to paragraph (a) of this section.

§ 1049.32 Other reports.

(a) Each producer-handler shall make reports to the market administrator at such time and in such manner as the market administrator shall request.

(b) Each handler specified in § 1049.9 (d) who operates a partially regulated distributing plant shall report as required of handlers operating pool plants pursuant to § 1049.30, except that receipts in Grade A milk shall be reported in lieu of those in producer milk. Such report shall include a separate statement showing the quantity of route disposition of reconstituted skim milk in fluid milk products in the marketing area.

(c) Each handler operating a plant described in § 1049.7(c) (2), (3), or (4) shall, with respect to total receipts and utilization or disposition of skim milk and butterfat at such plant, report to the market administrator at such time and in such manner as the market administrator may require and allow verification of such reports by the market administrator.

Classification of Milk

§ 1049.40 Classes of utilization.

Subject to the conditions set forth in §§ 1049.41 through 1049.44, the skim

V 38 - 12 JAN 18 73 XUM

milk and butterfat required to be reported pursuant to § 1049.30 shall be classified as follows:

(a) *Class I milk.* Class I milk shall be all skim milk and butterfat:

(1) Disposed of from the plant in the form of fluid milk products, other than those classified pursuant to paragraph (b) (2), (3), (4), and (5), of this section, except that fluid milk products which have been fortified by the addition of milk solids shall be Class I only up to the weight of an equal volume of an unmodified fluid milk product of the same nature and butterfat content; and

(2) Not specifically accounted for as Class II milk;

(b) *Class II milk.* Class II milk shall be:

(1) Skim milk and butterfat used to produce any product other than a fluid milk product;

(2) Skim milk and butterfat contained in fluid milk products disposed of for livestock feed or in products which are dumped, if the market administrator has been notified in advance and afforded the opportunity to verify such dumping;

(3) Skim milk and butterfat in fluid milk products delivered in bulk to and used at commercial food establishments devoted exclusively to the manufacture of bakery products, candy, or processed foods packaged in hermetically sealed glass or metal containers;

(4) Skim milk contained in that portion of fortified fluid milk products not classified as Class I milk pursuant to paragraph (a) (1) of this section;

(5) Skim milk and butterfat contained in inventory of fluid milk products on hand at the end of the month; and

(6) Contained in shrinkage of skim milk and butterfat, respectively, prorated pursuant to § 1049.41(b) (2) and (3) for each pool plant, not to exceed the quantities calculated pursuant to subdivisions (i) through (vi) of this subparagraph:

(i) Two percent of receipts of skim milk and butterfat physically received direct from producers and milk received in bulk by diversion from another pool plant pursuant to § 1049.13;

(ii) Plus 1.5 percent of milk or skim milk received by transfer from other pool plants in bulk;

(iii) Plus 1.5 percent of receipts of milk or skim milk in bulk from an other order plant, exclusive of the quantity for which Class II utilization was requested by the operator of such plant and the handler;

(iv) Plus 1.5 percent of receipts of milk or skim milk in bulk from unregulated supply plant, exclusive of the quantity for which Class II utilization was requested by the handler;

(v) Less 1.5 percent of bulk transfers of milk or skim milk to a pool plant of another handler; and

(vi) Less 1.5 percent of bulk transfers of milk or skim milk to nonpool plants.

(7) In shrinkage of skim milk and butterfat, respectively, assigned pursuant to § 1049.41(b)(1).

§ 1049.41 Shrinkage.

The market administrator shall assign shrinkage to each handler's receipts at each pool plant as follows:

(a) Compute the total shrinkage of skim milk and butterfat; and

(b) Prorate the resulting amounts among (1) skim milk and butterfat in other source milk received in bulk fluid form, exclusive of that specified in § 1049.40(b) (6) (ii), (iii), and (iv); (2) skim milk and butterfat in producer milk (excluding milk diverted to other plants pursuant to § 1049.13); and (3) skim milk and butterfat in bulk receipts of milk and skim milk including diversions or transfers from other pool plants, from other order plants and unregulated supply plants, exclusive of the quantities received from other order plants and unregulated supply plants for which Class II utilization was requested by the handlers, in excess of transfers of bulk milk or skim milk to other plants.

§ 1049.42 Classification of transfers and diversions.

Skim milk or butterfat in the form of a fluid milk product shall be classified:

(a) At the utilization indicated by the operators of both plants, otherwise as Class I milk, if transferred or diverted to another pool plant subject in either event to the following conditions:

(1) The skim milk or butterfat so assigned to either class shall be limited to the amount thereof remaining in such class in the transferee plant after computations pursuant to § 1049.44(a) (8) and the corresponding step of § 1049.44(b);

(2) If the transferor plant received during the month other source milk to be allocated pursuant to § 1049.44(a) (3), the skim milk and butterfat so transferred or diverted shall be classified so as to allocate the least possible Class I utilization to such other source milk; and

(3) If the transferor handler received during the month other source milk to be allocated pursuant to § 1049.44(a) (7) or (8) and the corresponding steps of § 1049.44(b), the skim milk and butterfat so transferred up to the total of such receipts shall not be classified as Class I milk to a greater extent than would be applicable to a like quantity of such other source milk received at the transferee plant.

(b) As Class I milk, if moved from a pool plant to a producer-handler.

(c) As Class I milk, if transferred or diverted in bulk to a nonpool plant that is neither an other order plant nor a producer-handler plant, unless the requirements of subparagraphs (1) and (2) of this paragraph are met, in which case the skim milk and butterfat so transferred or diverted shall be classified in accordance with the assignment resulting from subparagraph (3) of this paragraph:

(1) The transferring or diverting handler claims classification pursuant to the assignment set forth in subparagraph (3) of this paragraph in his report submitted to the market administrator pursuant to § 1049.30 for the month within which such transaction occurred;

(2) The operator of such nonpool plant maintains books and records showing the utilization of all skim milk and butterfat received at such plant which are made available if requested by the market administrator for the purpose of verification; and

(3) The skim milk and butterfat so transferred shall be classified on the basis of the following assignment of utilization at such nonpool plant in excess of receipts of packaged fluid milk products from all pool plants and other order plants:

(i) Any route disposition in the marketing area shall be first assigned to the skim milk and butterfat in the fluid milk products so transferred or diverted from pool plants, next pro rata to receipts from other order plants and thereafter to receipts from dairy farmers who the market administrator determines constitute regular sources of supply of Grade A milk for such nonpool plant;

(ii) Any route disposition in the marketing area of another order issued pursuant to the Act shall be first assigned to receipts from plants fully regulated by such order, next pro rata to receipts from pool plants and other order plants not regulated by such order, and thereafter to receipts from dairy farmers who the market administrator determines constitute regular sources of supply for such nonpool plant;

(iii) Class I utilization in excess of that assigned pursuant to subdivisions (i) and (ii) of this subparagraph shall be assigned first to remaining receipts from dairy farmers who the market administrator determines constitute the regular source of supply for such nonpool plant and Class I utilization in excess of such receipts shall be assigned pro rata to unassigned receipts at such nonpool plant from all pool and other order plants; and

(iv) To the extent that Class I utilization is not so assigned to it, the skim milk and butterfat so transferred shall be classified as Class II milk.

(d) As follows, if transferred or diverted to an other order plant in excess of receipts from such plant in the same category as described in subparagraph (1), (2), or (3) of this paragraph:

(1) If transferred in packaged form, classification shall be in the classes to which allocated as a fluid milk product under the other order;

(2) If transferred in bulk form, classification shall be in the classes to which allocated as a fluid milk product under the other order (including allocation under the conditions set forth in subparagraph (3) of this paragraph);

(3) If the operators of both the transferor and transferee plants so request in

the reports of receipts and utilization filed with their respective market administrators, transfers in bulk form shall be classified at Class II to the extent of the Class II utilization (or comparable utilization under such other order) available for such assignment pursuant to the allocation provisions of the transferee order;

(4) If information concerning the classification to which allocated under the other order is not available to the market administrator for purposes of establishing classification pursuant to this paragraph, classification shall be as Class I, subject to adjustment when such information is available;

(5) For purposes of this paragraph, if the transferee order provides for more than two classes of utilization, skim milk and butterfat allocated to a class consisting primarily of fluid milk products shall be classified as Class I, and skim milk and butterfat allocated to other classes shall be classified as Class II; and

(6) If the form in which any fluid milk product is transferred to an other order plant is not defined as a fluid milk product under such other order, classification shall be in accordance with the provisions of § 1049.40.

§ 1049.43 General classification rules.

In determining the classification of producer milk pursuant to § 1049.44, the following rules shall apply:

(a) Each month the market administrator shall correct for mathematical and other obvious errors, the reports submitted by each handler pursuant to this part and compute the total pounds of skim milk and butterfat, respectively, in each class at each of the plants of such handler.

(b) If any of the water contained in the milk from which a product is made, is removed before the product is utilized or disposed of by the handler, the pounds of skim milk used or disposed of in such product shall be considered to be an amount equivalent to the nonfat milk solids contained in such product plus all the water originally associated with the milk solids.

§ 1049.44 Classification of producer milk.

After making the computations pursuant to § 1049.43, the market administrator shall determine the classification of producer milk received at each pool plant each month as follows:

(a) Skim milk shall be allocated in the following manner:

(1) Subtract from the total pounds of skim milk in Class II the pounds of skim milk classified as Class II pursuant to § 1049.40(b)(6);

(2) Subtract from the remaining pounds of skim milk in each class the pounds of skim milk in fluid milk products received in packaged form from other order plants, except that to be subtracted pursuant to subparagraph (3) (v) of this paragraph, as follows:

(i) From Class II milk, the lesser of the pounds remaining or 2 percent of such receipts; and

(ii) From Class I milk, the remainder of such receipts;

(3) Subtract in the order specified below from the pounds of skim milk remaining in each class, in series beginning with Class II, the pounds of skim milk in each of the following:

(i) Other source milk in a form other than that of a fluid milk product;

(ii) Receipts of fluid milk products (except filled milk) for which Grade A certification is not established, and receipts of fluid milk products from unidentified sources;

(iii) Receipts of fluid milk products from a producer-handler, as defined under this or any other Federal order;

(iv) Receipts of reconstituted skim milk in filled milk from unregulated supply plants; and

(v) Receipts of reconstituted skim milk in filled milk from other order plants which are regulated under an order providing for individual handler pooling, to the extent that reconstituted skim milk is allocated to Class I at the transferor plant;

(4) Subtract, in the order specified below, from the pounds of skim milk remaining in Class II:

(i) The pounds of skim milk in receipts of fluid milk products from unregulated supply plants, that were not subtracted pursuant to subparagraph (3) (iv) of this paragraph, for which the handler requests Class II utilization, but not in excess of the pounds of skim milk remaining in Class II;

(ii) The pounds of skim milk remaining in receipts of fluid milk products from unregulated supply plants, that were not subtracted pursuant to subparagraph (3) (iv) of this paragraph, which are in excess of the pounds of skim milk determined as follows:

(*a*) Multiply the pounds of skim milk remaining in Class I milk (excluding Class I transfers between pool plants of the handler) at all pool plants of the handler by 1.25;

(*b*) Subtract from the result the sum of the pounds of skim milk at all such plants in producer milk, in receipts from other pool handlers and in receipts in bulk from other order plants, that were not subtracted pursuant to subparagraph (3) (v) of this paragraph; and

(*c*) (*1*) Multiply any resulting plus quantity by the percentage that receipts of skim milk in fluid milk products from unregulated supply plants remaining at this plant is of all such receipts remaining at all pool plants of such handler, after any deductions pursuant to subdivision (i) of this subparagraph.

(*2*) Should such computation result in a quantity to be subtracted from Class II which is in excess of the pounds of skim milk remaining in Class II, the pounds of skim milk in Class II shall be increased to the quantity to be subtracted and the pounds of skim milk in Class I shall be decreased a like amount. In such case the utilization of skim milk at other pool plant(s) of such handler shall be adjusted in the reverse direction by an identical amount in sequence beginning with the nearest other pool plant of such handler at which such adjustment can be made.

(iii) The pounds of skim milk in receipts of fluid milk products in bulk from an other order plant, that were not subtracted pursuant to subparagraph (3) (v) of this paragraph, in excess of similar transfer to such plant, but not in excess of the pounds of skim milk remaining in Class II milk if Class II utilization was requested by the operator of such plant and the handler;

(5) Subtract from the pounds of skim milk remaining in each class, in series beginning with Class II, the pounds of skim milk in inventory of fluid milk products on hand at the beginning of the month;

(6) Add to the remaining pounds of skim milk in Class II milk the pounds subtracted pursuant to subparagraph (1) of this paragraph;

(7) (i) Subtract from the pounds of skim milk remaining in each class, pro rata to the total pounds of skim milk remaining in each class in all pool plants of the receiving handler, the pounds of skim milk, in receipts of fluid milk products from unregulated supply plants that were not subtracted pursuant to subparagraphs (3) (iv) and (4) (i) or (ii) of this paragraph;

(ii) Should such proration result in the amount to be subtracted from any class exceeding the pounds of skim milk remaining in such class in the pool plant at which such skim milk was received, the pounds of skim milk in such class shall be increased to the amount to be subtracted and the pounds of skim milk in the other class shall be decreased a like amount. In such case the utilization of skim milk at other pool plant(s) of such handler shall be adjusted in the reverse direction by an identical amount in sequence beginning with the nearest other pool plant of such handler at which such adjustment can be made;

(8) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk in receipts of fluid milk products in bulk from another order plant, in excess in each case of similar transfers to the same plant, that were not subtracted pursuant to subparagraphs, (3) (v) and (4) (iii) of this paragraph pursuant to the following procedure:

(i) Subject to the provisions of subdivisions (ii) and (iii) of this subparagraph, such subtraction shall be pro rata to whichever of the following represents the higher proportion of Class II milk;

(*a*) The estimated utilization of skim milk in each class, by all handlers, as announced for the month pursuant to § 1049.45(a); or

(*b*) The pounds of skim milk in each class remaining at all pool plants of the handler;

(ii) Should proration pursuant to subdivision (i) of this subparagraph result

V 38 - 12 JAN 18 73 XUM

in the total pounds of skim milk to be subtracted from Class II at all pool plants of the handler exceeding the pounds of skim milk remaining in Class II at such plants, the pounds of such excess shall be subtracted from the pounds of skim milk remaining in Class I after such proration at the pool plants at which received;

(iii) Except as provided in subdivision (ii) of this subparagraph, should proration pursuant to either subdivision (i) or (ii) of this subparagraph result in the amount to be subtracted from either class exceeding the pounds of skim milk remaining in such class in the pool plant at which such skim milk was received, the pounds of skim milk in such class shall be increased to the amount to be subtracted and the pounds of skim milk in the other class shall be decreased a like amount. In such case the utilization of skim milk at other pool plant(s) of such handler shall be adjusted in the reverse direction by an identical amount in sequence beginning with the nearest other pool plant of such handler at which such adjustment can be made;

(9) Subtract from the pounds of skim milk remaining in each class the pounds of skim milk received in fluid milk products from pool plants of other handlers according to the classification assigned pursuant to § 1049.42(a); and

(10) If the pounds of skim milk remaining in both classes exceed the pounds of skim milk in producer milk, subtract such excess from the pounds of skim milk remaining in each class in series beginning with Class II. Any amount so subtracted shall be known as "overage";

(b) Butterfat shall be allocated in accordance with the procedure outlined for skim milk in paragraph (a) of this section; and

(c) Combine the amounts of skim milk and butterfat determined pursuant to paragraphs (a) and (b) of this section into one total for each class and determine the weighted average butterfat content of producer milk in each class.

§ 1049.45 Market administrator's reports and announcements concerning classification.

The market administrator shall make the following reports and announcements concerning classification.

(a) Whenever required for purpose of allocating receipts from other order plants pursuant to § 1049.44(a)(8) and the corresponding step of § 1049.44(b) the market administrator shall estimate and publicly announce the utilization (to the nearest whole percentage) in each class during the month of skim milk and butterfat, respectively, in producer milk of all handlers. Such estimate shall be based upon the most current available data and shall be final for such purpose;

(b) Report to the market administrator of the other order as soon as possible after the report of receipts and utilization for the month is received from a handler who has received fluid milk products from an other order plant, the classification to which such receipts are allocated pursuant to § 1049.44 pursuant to such report, and thereafter any change in such allocation required to correct errors disclosed in verification of such report;

(c) Furnish to each handler operating a pool plant who has shipped fluid milk products to an other order plant, the classification to which the skim milk and butterfat in such fluid milk products were allocated to the market administrator of the other order on the basis of the report of the receiving handler; and, as necessary, any changes in such classification arising in the verification of such report; and

(d) On or before the 14th day after the end of each month, report to each cooperative association, upon request by such association, the percentage of the milk caused to be delivered by the cooperative association or its members which was utilized in each class at each pool plant receiving such milk. For the purpose of this report, the milk so received shall be allocated to each class at each pool plant in the same ratio as all producer milk received at such plant during the month.

Class Prices

§ 1049.50 Class prices.

Subject to the provisions of §§ 1049.52 and 1049.55, the class prices for the month per hundredweight of milk containing 3.5-percent butterfat shall be as follows:

(a) *Class I price.* The Class I price shall be the basic formula price for the second preceding month plus $1.47.

(b) *Class II price.* The Class II price shall be the basic formula price computed pursuant to § 1049.51, but not to exceed an amount computed as follows:

(1) Multiply by 4.2 the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month;

(2) Multiply by 8.2 the weighted average of carlot prices per pound of spray process nonfat dry milk for human consumption, f.o.b. manufacturing plants in the Chicago area, as published for the period from the 26th day of the preceding month through the 25th day of the current month by the Department; and

(3) From the sum of the results arrived at under subparagraphs (1) and (2) of this paragraph substract 48 cents, and round to the nearest cent.

§ 1049.51 Basic formula price.

The "basic formula price" shall be the average price per hundredweight for manufacturing grade milk, f.o.b. plants in Minnesota and Wisconsin, as reported by the Department for the month, adjusted to a 3.5 percent butterfat basis and rounded to the nearest cent. For such adjustment, the butterfat differenial (rounded to the nearest one-tenth cent) per one-tenth percent butterfat shall be 0.12 times the simple average of the wholesale selling prices (using the midpoint of any price range as one price) of Grade A (92-score) bulk butter per pound at Chicago, as reported by the Department for the month. For the purpose of computing the Class I price, the resulting price shall be not less than $4.33.

§ 1049.52 Plant location adjustments for handlers.

(a) For producer milk which is received at a pool plant located outside the area for which zero location adjustment is specified in subparagraph (1)(i) of this paragraph, which milk is classified as Class I milk or assigned Class I location adjustment credit pursuant to paragraph (b) of this section, and for other source milk for which a location adjustment is applicable, the price computed pursuant to § 1049.50(a) shall be reduced on the basis of the applicable amount or rate for the location of such plant pursuant to subparagraph (1) or (2) of this paragraph, respectively. For the purpose of this section and § 1049.75, the distances to be computed shall be on the basis of the shortest hard-surfaced highway distances as determined by the market administrator:

(1) At any plant located within:

	Rate of adjustment per hundredweight (cents)
(i) The State of Ohio or any Indiana county not specifically named in subdivision (ii) through (iv) of this subparagraph	0
(ii) Any of the Indiana counties of: Adams, Allen, Blackford, Cass, Carroll, De Kalb, Huntington, Jay, La Grange, Miami, Noble, Steuben, Wabash, Wells, White, Whitley	4
(iii) Any of the Indiana counties of: Benton, Elkhart, Fulton, Jasper, Kosciusko, Marshall, Newton, Pulaski, St. Joseph, and Berrien and Cass Counties, Mich.	8
(iv) Any of the Indiana counties of: Lake, La Porte, Porter, Starke	12

(2) For any plant at a location outside the territory specified in the preceding subparagraph (1) of this paragraph, the applicable adjustment rate per hundredweight shall be based on the shortest highway distance between the plant and the nearest of the Monument Circle, Indianapolis, Ind., or the main post offices of Fort Wayne, South Bend, or Valparaiso, Ind., and shall be 1.5 cents for each 10 miles or fraction thereof from such point plus the amount of the location adjustment pursuant to subparagraph (1) of this paragraph applicable at the respective point.

(b) For the purpose of calculating adjustments pursuant to this section, transfers between pool plants shall be assigned Class I disposition at the transferee plant, in excess of the receipts at such plant from producers and the volume assigned as Class I to receipts from other order plants and unregulated supply plants, such assignment to be made first to transferor plants at which no location adjustment is applicable and then in sequence beginning with the plant at which the least location adjustment would apply.

§ 1049.53 Equivalent price.

If for any reason a price quotation or factor required by this part for computing class prices or for other purposes is not available in the manner described, the market administrator shall use a price or factor determined by the Secretary to be equivalent to the price or factor which is required.

§ 1049.54 Handler butterfat differentials.

For milk containing more or less than 3.5 percent butterfat, class prices for the month pursuant to § 1049.50 shall be increased or decreased, respectively, for each one-tenth percent butterfat variation at the appropriate rate, rounded to the nearest one-tenth cent, determined as follows:

(a) *Class I price.* Multiply the Chicago butter price described in § 1049.51 for the preceding month by 0.120.

(b) *Class II price.* Multiply the Chicago butter price described in § 1049.51 for the month by 0.113.

§ 1049.55 Announcement of class prices and handler butterfat differentials.

On or before the fifth day of each month, the market administrator shall announce publicly:

(a) The Class I price for the following month;

(b) The Class I butterfat differential for the current month; and

(c) The Class II price and Class II butterfat differential, both for the preceding month.

Uniform Price

§ 1049.60 Handler's value of milk for computing uniform price.

The net pool obligation of each pool handler during each month shall be a sum of money computed by the market administrator as follows:

(a) Multiply the quantity of producer milk in each class, as computed pursuant to § 1049.44(c), by the applicable class prices (adjusted pursuant to §§ 1049.52 and 1049.55);

(b) Add the amount obtained from multiplying the pounds of overage deducted from each class pursuant to § 1049.44(a)(10) and the corresponding step of § 1049.44(b) by the applicable class prices;

(c) Add the amount obtained from multiplying the difference between the Class II price for the preceding month and the Class I price for the current month by the hundredweight of skim milk and butterfat subtracted from Class I pursuant to § 1049.44(a)(5) and the corresponding step of § 1049.44(b);

(d) Add an amount equal to the difference between the value at the Class I price applicable at the pool plant and the value at the Class II price with respect to skim milk and butterfat in other source milk subtracted from Class I pursuant to § 1049.44(a)(3) and the corresponding step of § 1049.44(b), except that for receipts of fluid milk products assigned to Class I pursuant to § 1049.44(a)(3)(iv) and (v) and the corresponding step of § 1049.44(b) the Class I price shall be adjusted to the location of the transferor plant; and

(e) Add an amount equal to the value at the Class I price, adjusted for location of the nearest nonpool plant(s) from which an equivalent volume was received, with respect to skim milk and butterfat subtracted from Class I pursuant to § 1049.44(a)(7) and the corresponding step of § 1049.44(b).

§ 1049.61 Computation of uniform price (including weighted average price).

For each month the market administrator shall compute a "uniform price" as follows:

(a) Combine into one total the values computed pursuant to § 1049.60 for all handlers who filed the reports prescribed by § 1049.30 for the month and who made the payments pursuant to § 1049.71(a) for the preceding month;

(b) Add an amount equal to the total value of the location adjustments computed pursuant to § 1049.75;

(c) Subtract, if the average butterfat content of the milk specified in paragraph (f) of this section is more than 3.5 percent, or add, if such butterfat content is less than 3.5 percent an amount computed by multiplying the amount by which the average butterfat content of such milk varies from 3.5 percent by the butterfat differential computed pursuant to § 1049.74 and multiplying the result by the total hundredweight of such milk;

(d) Subtract an amount computed by multiplying the total hundredweight of producer milk included pursuant to paragraph (a) of this section by 5 cents;

(e) Add an amount equal to one-half of the unobligated balance in the producer-settlement fund;

(f) Divide the resulting amount by the sum of the following for all handlers included in these computations:

(1) The total hundredweight of producer milk; and

(2) The total hundredweight for which a value is computed pursuant to § 1049.60(e);

(g) Subtract not less than 4 cents nor more than 5 cents per hundredweight. The result shall be the "weighted average price" per hundredweight of milk. For the months of January, February, March, and August, such result also shall be the uniform price per hundredweight of milk of 3.5 percent butterfat content that is received from producers;

(h) For the months of April through July and September through December, subtract from the amount resulting from the computations pursuant to paragraphs (a) through (e) of this section the amount obtained from multiplying the hundredweight of milk specified in paragraph (f)(2) of this section by the weighted average price;

(i) For the months of April through July, subtract the amount obtained from multiplying the hundredweight of producer milk specified in paragraph (f)(1) of this section by 20 cents. The amount so subtracted, and interest subsequently earned thereon (less any money not available for crediting under this paragraph because of insufficient payment by a handler to the producer-settlement fund) shall be credited to the producer-settlement fund and remain as an obligated amount until disbursed pursuant to paragraph (j) of this section;

(j) For the month of September add one-fourth of the total money that has been credited to the producer-settlement fund pursuant to paragraph (i) of this section as of the eighth day of the following month. Similarly, for the months of October and November, add one-third and one-half, respectively, of the remainder that has been so credited. For the month of December, add the remainder of the money credited to the producer-settlement fund pursuant to paragraph (i) of this section;

(k) Divide the resulting sum by the total hundredweight of producer milk included in these computations; and

(l) Subtract not less than 4 cents nor more than 5 cents per hundredweight. The result shall be the "uniform price" for milk received from producers.

§ 1049.62 Announcement of uniform price and producer butterfat differential.

The market administrator shall publicly announce on or before the 14th day of each month:

(a) The uniform price for the preceding month; and

(b) The producer butterfat differential for the preceding month.

Payments for Milk

§ 1049.70 Producer-settlement fund.

The market administrator shall maintain a separate fund, known as the "producer-settlement fund," which shall function as follows:

(a) All obligated amounts pursuant to § 1049.61(i) and all payments pursuant to §§ 1049.71, 1049.76, and 1049.78 shall be credited to this fund.

(b) Payments pursuant to §§ 1049.72 and 1049.78 shall be debited to this fund.

(c) Any amount due to a handler shall be offset against amounts due from such handler.

§ 1049.71 Payments to the producer-settlement fund.

(a) On or before the 15th day after the end of the month each handler shall pay to the market administrator the amount, if any, by which the total amounts specified in subparagraph (1) of this section exceed the amounts specified in subparagraph (2) of this section:

(1) The total of the net pool obligation computed pursuant to § 1049.60 for such handler; and

(2) The sum of—

(i) The value of such handler's producer milk at the applicable uniform prices specified in § 1049.73; and

(ii) The value at the weighted average price(s) applicable at the location of the plant(s) from which received plus 5 cents (not to be less than the value at the Class II price) with respect to other source milk for which a value is computed pursuant to § 1049.60(e).

V 38 I 12 JAN 18 73 XUM

(b) Each handler operating a plant specified in § 1049.7(c), if such plant is subject to the classification and pricing provisions of another order which provides for individual handler pooling, shall pay to the market administrator for the producer-settlement fund on or before the 25th day after the end of the month an amount computed as follows:

(1) Determine the quantity of route disposition of reconstituted skim milk in filled milk in the marketing area which was allocated to Class I at such other order plant. If route disposition of reconstituted skim milk in filled milk is made from such plant in marketing areas regulated by two or more market-wide pool orders, the reconstituted skim milk assigned to Class I shall be prorated according to such disposition in each area; and

(2) Compute the value of the quantity assigned in subparagraph (1) of this paragraph to Class I disposition in this area, at the Class I price under this part applicable at the location of the other order plant and subtract its value at the Class II price.

§ 1049.72 Payments from the producer-settlement fund.

On or before the 16th day after the end of each month the market administrator shall pay to each handler the amount, if any, by which the amount computed pursuant to § 1049.71(a)(2) exceeds the amount computed pursuant to § 1049.71(a)(1). Should the unobligated balance of the fund be insufficient to make all payments pursuant to this section such payments shall be reduced uniformly and completed on or before the next date for making such payments following the date on which funds become available.

§ 1049.73 Payments to producers and to cooperative associations.

(a) Each handler shall pay each producer for producer milk for which payment is not made to a cooperative association pursuant to paragraph (b) of this section, as follows:

(1) On or before the last day of each month, for producer milk received during the first 15 days of the month at not less than the Class II price for the preceding month; and

(2) On or before the 18th day after the end of each month, for each hundredweight of producer milk received during such month, an amount computed at not less than the uniform price adjusted pursuant to §§ 1049.74, 1049.75 and 1049.86, less any payment made pursuant to subparagraph (1) of this paragraph. If by such date the handler has not received full payment from the market administrator pursuant to § 1049.72 for such month, he may reduce pro rata his payments to producers by not more than the amount of such underpayment. Payment to producers shall be completed thereafter not later than the date for making payments pursuant to this paragraph next following receipt of the balance due from the market administrator.

(b) Each handler shall make payment to the cooperative association for producer milk which it caused to be delivered to such handler, if such cooperative association is authorized to collect such payments for its members and exercises such authority, an amount equal to the sum of the individual payments otherwise payable for such producer milk, as follows:

(1) On or before the 26th day of each month for producer milk received during the first 15 days of the month; and

(2) On or before the 16th day after the end of each month for milk received during such month.

(c) Each handler shall pay to each cooperative association, on or before the 10th day of the following month, for milk the handler receives during the month from a pool plant operated by such association, not less than the minimum prices for milk in each class, subject to the applicable location and butterfat differentials.

(d) In making payments for producer milk pursuant to this section, each handler shall furnish each producer or cooperative association from whom he has received milk a supporting statement in such form that it may be retained by the recipient which shall show:

(1) The month and identity of the producer;

(2) The daily and total pounds and the average butterfat content of producer milk;

(3) The minimum rate or rates at which payment to the producer is required pursuant to this order;

(4) The rate which is used in making the payment if such rate is other than the applicable minimum rate;

(5) The amount, or the rate per hundredweight, and nature of each deduction claimed by the handler; and

(6) The net amount of payment to such producer or cooperative association.

§ 1049.74 Producer butterfat differential.

The uniform price for producer milk shall be increased or decreased for each one-tenth of 1 percent that the butterfat content of such milk is above or below 3.5 percent, respectively, at the rate determined by multiplying the pounds of butterfat in producer milk allocated to Class I and Class II milk pursuant to § 1049.44 by the respective butterfat differential for each class, dividing the sum of such values by the total pounds of such butterfat and rounding the resultant figure to the nearest one-tenth cent.

§ 1049.75 Plant location adjustments to producers and on nonpool milk.

(a) The uniform price for producer milk received or which is deemed to have been received at a pool plant shall be reduced according to the location of the pool plant at the rates set forth in § 1049.52; and

(b) For purposes of computations pursuant to §§ 1049.71(a) and 1049.72, the weighted average price shall be adjusted at the rates set forth in § 1049.52 applicable at the location of the nonpool plant from which the milk was received.

§ 1049.76 Payments by handler operating a partially regulated distributing plant.

Each handler who operates a partially regulated distributing plant shall pay to the market administrator for the producer-settlement fund on or before the 25th day after the end of the month either of the amounts (at the handler's election) calculated pursuant to paragraph (a) or (b) of this section. If the handler fails to report pursuant to §§ 1049.30 and 1049.32(b) the information necessary to compute the amount specified in paragraph (b) of this section, he shall pay the amount computed pursuant to paragraph (a) of this section:

(a) An amount computed as follows:

(1) Determine the respective route dispositions of skim milk and butterfat made as Class I milk (other than to pool plants) in the marketing area;

(2) Deduct the respective amounts of skim milk and butterfat received as Class I milk at the partially regulated distributing plant from pool plants and other order plants except that deducted under a similar provision of another order issued pursuant to the Act;

(3) Deduct the quantity of route disposition of reconstituted skim milk in fluid milk products made in the marketing area;

(4) Combine the amounts of skim milk and butterfat remaining into one total and determine the weighted average butterfat content; and

(5) From the value of such milk at the Class I price applicable at the location of the nonpool plant, subtract its value at the weighted average price applicable at such location plus 5 cents or the Class II price, whichever is greater, and add for the quantity of reconstituted skim milk specified in subparagraph (3) of this paragraph its value computed at the Class I price applicable at the location of the nonpool plant less the value of such skim milk at the Class II price;

(b) Except as a handler may elect the option pursuant to paragraph (a) of this section, an amount computed as follows:

(1) (i) The obligation that would have been computed pursuant to § 1049.60 at such plant shall be determined as though such plant were a pool plant. For purposes of such computation, receipts at such nonpool plant from a pool plant or an other order plant shall be assigned to the utilization at which classified at the pool plant or other order plant and transfers from such nonpool plant to a pool plant or an other order plant shall be classified as Class II milk if allocated to such class at the pool plant or other order plant and be valued at the weighted average price of the respective order if so allocated to Class I milk, except that reconstituted skim milk in filled milk shall be valued at the Class II price. There shall be included in the obligation so computed a charge in the amount specified in § 1049.60(e) and a credit in the amount specified in § 1049.71(a)(2)(ii) with respect to receipts from an unregulated supply plant, except that the credit for receipts of reconstituted skim milk in filled milk shall be at the Class II price, unless an obligation with respect to such plant is computed as specified below in this subparagraph.

(ii) If the operator of the partially regulated distributing plant so requests, and provides with his reports pursuant to §§ 1049.30 and 1049.32(b) similar reports with respect to the operations of any other nonpool plant which serves as a supply plant for such partially regulated distributing plant by shipments to such plant during the month equivalent to the requirements of § 1049.7(b), with agreement of the operator of such plant that the market administrator may examine the books and records of such plant for purposes of verification of such reports, there will be added the amount of the obligation computed at such nonpool supply plant in the same manner and subject to the same conditions as for the partially regulated distributing plant,

(2) From this obligation there will be deducted the sum of (i) the gross payments made by such handler for Grade A milk received during the month from dairy farmers at such plant and like payments made by the operator of a plant(s) included in the computations pursuant to subparagraph (1) of this paragraph and (ii) any payments made for such month to the producer-settlement fund of another order issued pursuant to the Act due to the plant being a partially regulated distributing plant under such other order.

§ 1049.77 Adjustment of accounts.

Whenever verification by the market administrator of reports or payments of any handler discloses errors resulting in money due (a) the market administrator from such handler (b) such handler from the market administrator, or (c) any producer or cooperative association from such handler, the market administrator shall promptly notify such handler of any amount so due and payment thereof shall be made not later than the date for making payment next following such disclosure.

§ 1049.78 Charges on overdue accounts.

Any unpaid obligation of a handler pursuant to § 1049.71(a), 1049.76, 1049.77(a), 1049.78, 1049.85, or 1049.86(a) shall be increased three-fourths of 1 percent on the sixth day following the date such obligation is due and on the same day of each succeeding month until such obligation is paid.

ADMINISTRATIVE ASSESSMENT AND MARKETING SERVICE DEDUCTION

§ 1049.85 Assessment for order administration.

As his pro rata share of the expense of administration of the order, each handler shall pay to the market administrator on or before the 15th day after the end of the month 4 cents per hundredweight or such lesser amount as the Secretary may prescribe, with respect to:

(a) Producer milk, including such handler's own farm production;

(b) Other source milk at a pool plant allocated to Class I pursuant to §§ 1049.44(a)(3) and 1049.44(a)(7) and the corresponding steps of § 1049.44(b); and

(c) Route disposition in the marketing area from a partially regulated distributing plant that exceeds the hundredweight of Class I milk received during the month at such plant from pool plants and other order plants.

§ 1049.86 Deduction for marketing services.

(a) Except as set forth in paragraph (b) of this section, each handler in making payments to each producer pursuant to § 1049.73 shall deduct 5 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to producer milk received by such handler (except such handler's own farm production) during the month, and shall pay such deductions to the market administrator not later than the 15th day after the end of the month. Such money shall be used by the market administrator to verify or establish weights, samples, and tests of producer milk and to provide producers with market information. Such services shall be performed by the market administrator or by an agent engaged by and responsible to him.

(b) In the case of producers for whom a cooperative association is performing, as determined by the Secretary, the services set forth in paragraph (a) of this section, each handler shall make, in lieu of the deductions specified in paragraph (a) of this section, such deductions as are authorized by such producers and, on or before the 15th day after the end of each month, pay over such deductions to the association rendering such services.

ADVERTISING AND PROMOTION PROGRAM

§ 1049.110 Agency.

"Agency" means an agency organized by producers and producers' cooperative associations, in such form and with methods of operation specified in this part, which is authorized to expend funds made available pursuant to § 1049.121(b)(1), on approval by the Secretary, for the purposes of establishing or providing for establishment of research and development projects, advertising (excluding brand advertising), sales promotion, educational, and other programs, designed to improve or promote the domestic marketing and consumption of milk and its products. Members of the Agency shall serve without compensation but shall be reimbursed for reasonable expenses incurred in the performance of duties as members of the Agency.

§ 1049.111 Composition of the Agency.

Each cooperative association or combination of cooperative associations as provided for under § 1049.113(b) with 3 percent or more of the total participating producers (producers who have not requested refunds for the most recent quarter) is authorized one Agency representative plus one additional Agency representative for each additional full 10 percent of the participating member producers it represents. Cooperative associations with less than 3 percent of the total participating producers that have elected not to combine pursuant to § 1049.113(b), and participating producers who are not members of cooperatives are authorized to select from such group, in total, one Agency representative for the first full 3 percent plus one additional Agency representative for each additional full 10 percent that such producers constitute of the total participating producers. For the purpose of the Agency's initial organization, all persons defined as producers shall be considered as participating producers.

§ 1049.112 Term of office.

The term of office of each member of the Agency shall be 1 year, or until a replacement is designated by the cooperative association or is otherwise appropriately elected.

§ 1049.113 Selection of Agency members.

The selection of Agency members shall be made pursuant to paragraphs (a), (b), and (c) of this section. Each person selected shall qualify by filing with the market administrator a written acceptance promptly after being notified of such selection.

(a) Each cooperative association authorized one or more representatives to the Agency shall notify the market administrator of the name and address of each representative who shall serve at the pleasure of the cooperative.

(b) For purposes of this program, cooperative associations may elect to combine their participating memberships and, if the combined total of participating producers of such cooperatives is 3 percent or more of the total participating producers, such cooperatives shall be eligible to select a representative(s) to the Agency under the rules of § 1049.111 and paragraph (a) of this section.

(c) Selection of Agency members to represent participating nonmember producers and participating producer members of a cooperative association(s) having less than the required 3 percent of the producers participating in the advertising and promotion program and who have not elected to combine memberships as provided in paragraph (b) of this section, shall be supervised by the market administrator in the following manner:

(1) Promptly after the effective date of this amending order, and annually thereafter, the market administrator shall give notice to participating producer members of such cooperatives and participating nonmember producers of their opportunity to nominate one or more Agency representatives, as the case may be, and also shall specify the number of representatives to be selected.

V 38 - 12 JAN 18 73 XUM

(2) Following the closing date for nonminations, the market administrator shall announce the nominees who are eligible for Agency membership and shall conduct a referendum among the individual producers eligible to vote. Election to membership shall be determined on the basis of the nominee (or nominees) receiving the largest number of eligible votes. If an elected representative subsequently discontinues producer status or is otherwise unable to complete his term of office, the market administrator shall appoint as his replacement the participating producer who received the next highest number of eligible votes.

§ 1049.114 Agency operating procedure.

A majority of the Agency members shall constitute a quorum and any action of the Agency shall require a majority of concurring votes of those present and voting, unless the Agency determines that more than a simple majority shall be required.

§ 1049.115 Powers of the Agency.

The Agency is empowered to:

(a) Administer the terms and provisions within the scope of Agency authority pursuant to § 1049.110;

(b) Make rules and regulations to effectuate the purposes of Public Law 91–670;

(c) Recommend amendments to the Secretary; and

(d) With the approval of the Secretary, enter into contracts and agreements with persons or organizations as deemed necessary to carry out advertising and promotion programs and projects specified in §§ 1049.110 and 1049.117.

§ 1049.116 Duties of the Agency.

The Agency shall perform all duties necessary to carry out the terms and provisions of this program including, but not limited to, the following:

(a) Meet, organize, and select from among its members a chairman and such other officers and committees as may be necessary, and adopt and make public such rules as may be necessary for the conduct of its business;

(b) Develop programs and projects pursuant to §§ 1049.110 and 1049.117;

(c) Keep minutes, books, and records, and submit books and records for examination by the Secretary and furnish any information and reports requested by the Secretary;

(d) Prepare and submit to the Secretary for approval prior to each quarterly period a budget showing the projected amounts to be collected during the quarter and how such funds are to be disbursed by the Agency;

(e) When desirable, establish an advisory committee(s) of persons other than Agency members;

(f) Employ and fix the compensation of any person deemed to be necessary to its exercise of powers and performance of duties;

(g) Establish the rate of reimbursement to the members of the Agency for expenses in attending meetings, and pay the expenses of administering the Agency; and

(h) Provide for the bonding of all persons handling Agency funds in an amount and with surety thereon satisfactory to the Secretary.

§ 1049.117 Advertising, research, education, and promotion program.

The Agency shall develop and submit to the Secretary for approval all programs or projects undertaken under the authority of this part. Such programs or projects may provide for:

(a) The establishment, issuance, effectuation, and administration of appropriate programs or projects for the advertising and promotion of milk and milk products on a nonbrand basis;

(b) The utilization of the services of other organizations to carry out Agency programs and projects if the Agency finds that such activities will benefit producers under this part; and

(c) The establishment, support, and conduct of research and development projects and studies that the Agency finds will benefit all producers under this part.

§ 1049.118 Limitation of expenditures by the Agency.

(a) Not more than 5 percent of the funds received by the Agency pursuant to § 1049.121(b)(1) shall be utilized for administrative expense of the Agency.

(b) Agency funds shall not, in any manner, be used for political activity or for the purpose of influencing governmental policy or action, except in recommending to the Secretary amendments to the advertising and promotion program provisions of this part.

(c) Agency funds may not be expended to solicit producer participation.

(d) Agency funds may be used only for programs and projects promoting the domestic marketing and consumption of milk and its products.

§ 1049.119 Personal liability.

No member of the Agency shall be held personally responsible, either individually or jointly with others, in any way whatsoever to any person for errors in judgment, mistakes, or other acts, either of commission or omission, of such member in performance of his duties, except for acts of willful misconduct, gross negligence, or those which are criminal in nature.

§ 1049.120 Procedure for requesting refunds.

Any producer may apply for refund under the procedure set forth under paragraphs (a) through (c) of this section.

(a) Refund shall be accomplished only through application filed with the market administrator in the form prescribed by the market administrator and signed by the producer. Only that information necessary to identify the producer and the records relevant to the refund may be required of such producer.

(b) Except as provided in paragraph (c) of this section, the request shall be submitted within the first 15 days of December, March, June, or September for milk to be marketed during the ensuing calendar quarter beginning on the first day of January, April, July, and October, respectively.

(c) A dairy farmer who first acquires producer status under this part after the 15th day of December, March, June, or September, as the case may be, and prior to the start of the next refund notification period as specified in paragraph (b) of this section, may, upon application filed with the market administrator pursuant to paragraph (a) of this section, be eligible for refund on all marketings against which an assessment is withheld during such period and including the remainder of the calendar quarter involved. This paragraph also shall be applicable to all producers during the period following the effective date of this amending order to the beginning of the first full calendar quarter for which the opportunity exists for such producers to request refunds pursuant to paragraph (b) of this section.

§ 1049.121 Duties of the market administrator.

Except as specified in § 1049.116, the market administrator, in addition to other duties specified by this part, shall perform all the duties necessary to administer the terms and provisions of the advertising and promotion program including, but not limited to, the following:

(a) Within 30 days after the effective date of this amending order, and annually thereafter, conduct a referendum to determine representation on the Agency pursuant to § 1049.113(c);

(b) Set aside the amounts subtracted under § 1049.61(d) into an advertising and promotion fund, separately accounted for, from which shall be disbursed:

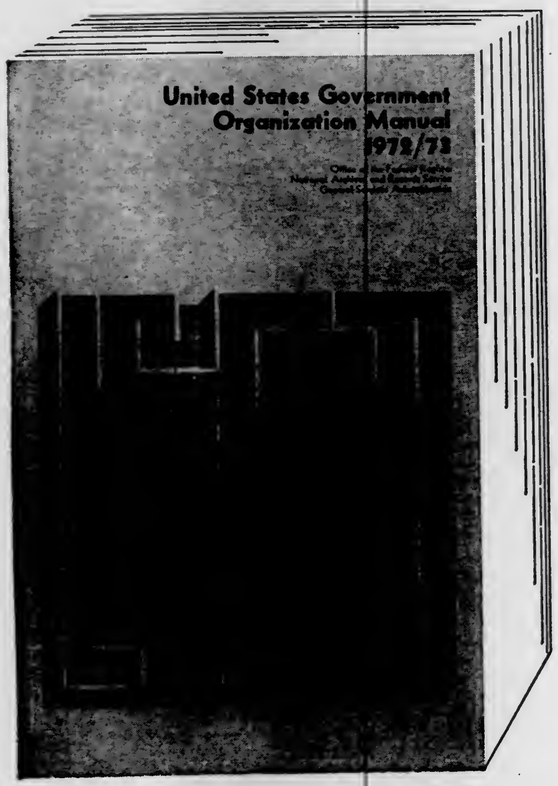
(1) To the Agency each month, all such funds less any necessary amount held in reserve to cover refunds pursuant to subparagraphs (2) and (3) of this paragraph, and payments to cover expenses of the market administrator incurred in the administration of the advertising and promotion program (including audit).

(2) Refund to producers the amounts of mandatory checkoff for advertising and promotion programs required under authority of State law applicable to such producers, but not in amounts that exceed a rate of 5 cents per hundredweight on the volume of milk pooled by any such producer for which deductions were made pursuant to § 1049.61(d).

(3) After the end of each calendar quarter, make a refund to each producer who has made application for such refund pursuant to § 1049.120. Such refund shall be computed at the rate of 5 cents per hundredweight of such producer's milk pooled for which deductions were made pursuant to § 1049.61(d) for such calendar quarter, less the amount of any refund otherwise made to be producer pursuant to subparagraph (2) of this paragraph.

(c) Promptly after the effective date of this amending order, and thereafter with respect to new producers, forward to each producer a copy of the provisions of the advertising and promotion program (§§ 1049.110 through 1049.122).

(d) Audit the Agency's records of receipts and disbursements.



§ 1049.122 Liquidation.

In the event that the provisions of this advertising and promotion program are terminated, any remaining uncommitted funds applicable thereto shall revert to the producer-settlement fund of § 1049.70.

An Invaluable Reference Tool

1972/73 Edition

This guidebook provides information about significant programs and functions of the U.S. Government agencies, and identifies key officials in each agency.

Included with most agency statements are "Sources of Information" sections which give helpful information on:

- Employment
- Contracting with the Federal Government
- Environmental programs
- Small business opportunities
- Federal publications
- Speakers and films available to civic and educational groups

This handbook is a "must" for teachers, students, librarians, researchers, businessmen, and lawyers who need current official information about the U.S. Government.

$3.00 per copy.

Volume 38 ■ Number 13

Pages 1907–2164

PART I

(Part II begins on page 2001)

(Part III begins on page 2123)

HIGHLIGHTS OF THIS ISSUE

This listing does not affect the legal status of any document published in this issue. Detailed table of contents appears inside.

FUEL OIL IMPORTS—Interior Dept. relaxes restrictions with respect to No. 2 fuel oil in Districts I–IV 1928

ANTIDUMPING—Treasury Dept. initiates investigations on polypropylene strapping from Japan, and certain iron powder from Canada (2 documents) 1945

FOOD LABELING—

New and revised FDA regulations on information panels, label designation of ingredients for standardized foods, and nutrition, cholesterol, fat and fatty acid labeling (4 documents) 2124, 2125, 2132, 2137

Proposed FDA rules on imitation foods, food containing added flavor, exemptions from requirements, nutrition labeling, frozen desserts, dietary supplements of vitamins and minerals, and special dietary use (7 documents) 2138, 2139, 2141, 2143, 2150, 2152

FDA notices on opportunity for exceptions and comments, and prospective requirements for manufacturers, packers and food distributors (2 documents); comments by 2–20–73 2163

FOOD ADDITIVES—FDA provides for safe use of certain styrene block polymers intended for use in contact with food; effective 1–19–73 1925

DRUGS—

FDA withdraws approval of selenium sulfide with hydrocortisone acetate ointment and the drug Thera-Tergent (2documents) 1946, 1948

FDA proposes to withdraw approval of certain barbiturate-analgesic drugs and desoxycorticosterone acetate (2 documents); requests for hearing by 2–20–73 ..... 1947, 1948

REMINDERS

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.

Rules Going Into Effect Today

This list includes only rules that were published in the FEDERAL REGISTER before October 1, 1972.

37 FR page no. and date

Postal Service—restrictions on mailings of turtles and turtle eggs 28045; 12–20–72

FCC—protection of Table Mountain, Boulder, Colo., from radio interference ... 26732; 12–5–72

FCC—Class I TV device operations 26601; 12–14–72

federal register

Area Code 202 Phone 962–8626

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by the Executive Branch of the Federal Government. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1973, and specifies how they are affected.

Title 47—TELECOMMUNICATION

Chapter I—Federal Communications Commission

[Docket No. 18471; FCC 73–40]

PART 1—PRACTICE AND PROCEDURE

PART 73—RADIO BROADCAST SERVICES

Type Approval of Antenna Monitors

Report and order. In the matter of amendment of Part 73 of the Commission's rules and regulations with respect to maintenance and monitoring of the relative phases and currents in the elements of directional antennas and to provide for type approval of phase monitors used by standard broadcast stations, Docket No. 18471.

1. This proceeding contemplate amendment of Part 73 of the Commission's rules and regulations to:

(1) Require the installation and use of a type approved phase monitor by every standard broadcast station employing a directional antenna.

(2) Specify the maximum permissible deviation in the relative phases of the currents in a directional antenna as ±2° from the licensed values.

(3) Set forth the essential specifications for phase monitors eligible for type approval.

Rules also were proposed for the procedures applicable when a phase monitor becomes defective. Comment was requested on the question of "grandfathering" existing phase monitors in instances where they would not be used to provide phase indications at a remote control point.

2. After full consideration of all comments filed, we are adopting rules with respect to these matters, except for (2), above. For the reasons discussed herein, we are not specifying permissible phase deviations.

3. In the notice of proposed rule making in this matter, released February 28, 1969, filing deadlines for comments were specified as April 7, 1969, and for reply comments as April 17, 1969. The dates were extended by subsequent orders to July 9, 1969, and August 8, 1969, respectively. Thirty-eight separate comments were filed in this proceeding, representing the views of many station licensees, networks, individuals, engineering and trade associations, consulting engineers, and the designers and manufacturers of phase monitors. There was one reply comment. The roster of the parties is as follows:

Michael C. Rice.
George W. Harvey.
Frank S. Colligan (Colligan).
Ralph J. Bitzer (Bitzer).
Kear & Kennedy.
A. Earl Cullum and Associates (Cullum).
J. G. Rountree (Rountree).
H. W. Holt.
J. B. Hatfield (Hatfield).
Carl E. Smith Consulting Engineers (Smith).
Walter F. Kean (two separate filings, identical in substance in behalf of two different groups of station licensees) (Kean).
Association of Federal Communications Consulting Engineers (AFCCE).
National Association of Broadcasters (NAB).
Clear Channel Broadcasting Service (CCBS).
Association for Broadcasting Standards (ABS).
American Broadcasting Companies, Inc. (ABC).
National Broadcasting Co. (NBC).
Columbia Broadcasting System, Inc. (CBS).
Westinghouse Broadcasting Co. (Westinghouse).
Storer Broadcasting Co. (Storer).
United Broadcasting Company of New York, Inc. (UBC).
Rollins, Inc.
Newhouse Broadcasting Corp.
WRVA Radio, Inc. (WRVA).
Susquehanna Broadcasting Co.
McLendon Corp.
Rice Communications, Inc. (Rice).
Strator Broadcasting Co.
Steere Broadcasting Co.
Mesabi Western Corp. (Mesabi).
KNCY Radio Corp.
WEEU Broadcasting Corp. (WEEU)
Emerald Broadcasting Corp.
Mobil Videotapes, Inc.
James A. Noe (Noe).
John K. Birch (Birch).
Defense Electronics.
Potomac Instruments, Inc. (Potomac).

4. There was a virtual consensus among those commenting concerning two of the main proposals of the Commission, viz:

(1) That the proposed maximum permissible phase deviation of ±2° as an absolute limit is too restrictive in the great majority of cases.

(2) That the Commission should require type approved phase monitors in instances where licensees propose to observe and log phases at their remote control points. In other instances, stations should be permitted to retain their present monitors (be grandfathered).

5. There were also a number of helpful criticisms and suggested changes of the proposed rules governing the replacement of a defective monitor, and of the technical requirements which we had proposed for type approved monitors.

6. While, in the light of the preponderance of the comments, our proposal to limit phase deviations to ±2° might appear unrealistically restrictive, it had the effect, which a more moderate proposal might not have had, of provoking a productive discussion of many of the problems involved in maintaining a directional antenna in proper adjustment. It is regretted, however, that the proposal was not of such a nature as to elicit an equally thorough discussion of the problems presented by varying monitoring point values. Many of those commenting took the position that the definitive indicia of proper array adjustment are proper monitoring point values, and either stated or implied that any variation in indicated phase differences and current ratios should be permissible so long as the monitoring point field strengths remain within licensed limits.

7. While several of those commenting stated that a permissible deviation of ±2° might be acceptable as a basic tolerance, nearly all wanted any rule setting such a tolerance to provide for temporary deviations beyond this limit during unfavorable weather conditions. It was pointed out that any tolerance which is reasonable under normal conditions may be exceeded when there is heavy rain, snow or icing, or abrupt and substantial changes in temperature. To what extent such excessive deviations reflect actual changes in the parameters of the array, or the effects of precipitation or temperature changes on the sampling system usually cannot be ascertained. It appears that both are affected, the latter less drastically when it is properly designed and installed. Indicated tower current ratios, as well as relative phases are affected by such weather conditions. Kear and Kennedy and Defense Electronics suggest language for rules which would take into account these effects both as to phase relationships and current ratios. Subject to appropriate qualification to provide for greater deviations under unfavorable weather conditions (notations in the operating log would be made when such conditions occurred) there was considerable sentiment for a phase tolerance of ±3°, since a deviation of this amount in phase produces an effect roughly equivalent to a 5 percent deviation in current ratio, a limit already set forth in the rules.

8. Others suggested tolerances of ±4° and ±5°, or no tolerance at all. Kean stated that even a tolerance of ±5° would be insufficient to accommodate variations caused by annual or short term environmental changes. However, Susquehanna considered this tolerance sufficiently high to accommodate such changes.[1]

[1] Bitzer and Rountree argue that if the tolerance for phase deviations is made too small, operators will be impelled to make phasor adjustments to bring phase indications back within tolerance. They hold that most operators do not possess the technical competence to make these adjustments, and the result of such a practice can be a misadjustment of the directional antenna. On the other hand, some licensees claim that too tight a tolerance will prevent them from making changes in phase relationships when such changes appear necessary to keep monitoring point readings within their licensed limits.

V 38 - 13 JAN 19 73 XUM

9. In some instances, parties who favored setting no limit at all, by rule, on phase deviations, suggest that limits be specified in the instrument of authorization for each station. They argue that in some directional antenna designs the effect on the pattern of a phase change of a stated amount is far greater than in others. Also, the requirements for the protection of other stations vary markedly from case to case. Thus, a phase deviation of a magnitude which results in objectionable interference to other stations in one instance may be of little significance in another. Accordingly, no single value for permissible deviation should be set for all stations—rather, permissible deviations should be specified for each station in its license in the light of its antenna characteristics and its protection obligations.

10. It was emphasized by many of those commenting that even under normal weather conditions, changes in phase monitor indications may reflect, not so much changes in the antenna parameters, as changes in the phase sampling system. The importance of the proper design, installation and maintenance of such systems was stressed. Several parties urged that if a rule requiring type approved phase monitors is to result in improved surveillance of directional antenna operation, it must be supplemented by rules establishing at least minimum standards for the installation of sampling systems. Alternatively, it was suggested that each licensee installing a type approved phase monitor be required to make a full disclosure of the details of the associated sampling system. There is a considerable area of agreement as to the basic requirements for such systems. Some parties, Cullum and Colligan, in particular, went into considerable detail as to the specific features of a satisfactory sampling system, Cullum emphasizing mainly the electrical characteristics, and Colligan the details of physical construction.

11. The proposition was advanced that indicated phase or current deviations beyond normal tolerance should not be considered as a definitive indication that a directional antenna is out of adjustment, but serve only as a warning of possible trouble, calling for an immediate investigation of the whole system, and a check of monitoring point field strengths. Thus, indicated deviations of these parameters beyond specified tolerances observed by a Commission engineer should not, standing alone, justify the serving of a citation for improper operation. It was suggested that stations experiencing excessive deviations should enter in their maintenance or operating logs the apparent cause of the deviations, if ascribed to temporary weather conditions, or, if not reasonably explicable on this basis, the measures that have been taken to ascertain that the array continues in proper adjustment.

12. There was general agreement that, as the Commission proposed, a phase monitor type approved for the provision of remote indications should be required if a station licensee undertakes to observe and log phase indications at a remote control point pursuant to rule amendments proposed in Docket 18455. In other cases, immediate installation of a type approved monitor should not be required. A number of those commenting favored "grandfathering" of existing monitors for unlimited periods of time. Others would establish firm deadlines, or cite circumstances under which the installation of type approved monitors would be required.

13. Opinions as to the period of grace to be allowed before type approved phase monitors be required for all stations ranged from 1 year (Smith) to 6 years (NAB). Many favored a period of about 5 years, with the proviso that, if a major change in the directional array is authorized within that period, it should be the occasion for the installation of a type approved phase monitor (NBC, CBS, Storer). CCBS noted that if a station has a history of difficulty in maintaining its directional pattern within licensed limits, the burden should be placed on the licensee for demonstrating that its phase monitor is adequate.

14. WEEU, McLendon and UBC request that in any rules adopted in this proceeding or in Docket 18455, it be made quite clear that type approved phase monitors will not be required at this time if phase monitor sample currents, but not phase indications, are observed at a remote control point.

They state that sample current indications are used by many stations at remote control points to provide the "indications • • • of • • • remote base current meters" which § 73.67(a)(5) of the rules states are to be read and entered in the operating log each half hour.[2]

[2] The occasion for this concern arises from a conflict between the clear intent of the rule, and the adoption of practices by broadcasters at odds with this intent, which, nevertheless, have been sanctioned on an informal basis by the Commission. The report and order in Docket 11677, which adopted the present rules concerning operation of stations with directional antennas by remote control clearly indicates that the language of the rule means exactly what it says—that indications of base currents must be read at the remote control point. McLendon's argument that sample currents provided at the transmitter for the phase monitor satisfy this requirement is not persuasive. Many of the parties commenting in this proceeding have emphasized the differences between the indications of array element field ratios derived from base current indications and from phase monitor samples—arguing that the latter more accurately reflect the actual field ratios than do the former. It is clear, however, that these parties contemplate the phase monitor samples will be obtained from loops mounted above ground on each element of the array. In some cases the phase monitor samples are not so derived—they are obtained by coupling to the transmission line at the base of the tower. Only in such cases (which are in the minority) could sample currents properly be considered as "indications of the base currents."

Despite the language of the rule, the Commission has permitted the output of phase monitor sampling lines, whether obtained by loop or base coupling, to be transmitted to remote control points to be read and logged in satisfaction of the requirement that indications of base current be read and logged. We do not contemplate that licensees presently following this practice will be required to acquire type approved phase monitors at this time. However, it appears obvious that any rule adopted should specifically provide for the reading of phase monitor sample currents at a remote control point in lieu of indications of base currents so that the existing anomalous situation may be corrected.

15. Section 73.69(b)(5) of the proposed rules would require, if a defective phase monitor is replaced by another monitor, "a skeleton proof of performance, consisting of measurements of three or four consecutive points on each radial used in the original application, shall be submitted to the Commission within 60 days of the date the replacement monitor is placed in service."

16. Mesabi, WRVA, NAB, AFCCE, and CBS comment on and generally take exception to the above requirement. A summary of their comments and suggestions follows:

Mesabi. If the new phase monitor shows different readings than the old, the new phase readings should be accepted as direct replacements for the corresponding values shown on the old. The license should be modified to reflect these new values without a further proof of performance.

WRVA. A skeleton proof should not be necessary if readings of new monitors are in agreement with the terms of the license. Monitoring point measurements should provide additional proof the directional antenna is functioning normally.

NAB. No skeleton proof should be required if satisfactory evidence is submitted that no material change has occurred in DA operation.

AFCCE. If the monitor becomes defective and is replaced by another type which gives changed indications, a skeleton proof should be required.

CBS. A skeleton proof should not be required in all cases of phase monitor replacement—it depends on the circumstances. If there is reason to suspect trouble in the antenna, a proof should be made. However, the simple replacement of one monitor by another should not occasion it.

17. A number of criticisms and suggestions were offered regarding the specifications for type approved monitors, viz: Proposed § 73.53(b)(5) reads "The required accuracy shall be met when the carrier is either modulated or unmodulated." Storer questions whether such a blanket requirement could be met by any phase monitor when the carrier is assymetrically modulated and peaks exceed 100 percent. It suggests that the phase monitor should be required to maintain its specified accuracy with sine wave modulations over a range of zero to 90 percent. Birch has a similar reservation, stating that any phase monitor will register an erroneous reading for the duration of peaks with negative modulation of 100 percent. He suggests that the accuracy figure should be maintained up to a level of negative modulation of about 95 percent. Potomac urges that the accuracy be specified under conditions of "sine wave modulation from zero to 95 percent at modulation frequencies from 50 Hz to 15 kHz; also with typical program material exhibiting negative modulation peaks up to 98 percent."

18. The proposed rules do not require that a type approved monitor include means for indicating the relative amplitudes of loop currents, specifying only a required accuracy if such facilities are included. Birch and Potomac Instruments take strong exception to any rules which do not make mandatory the provision of these facilities in the monitor. CBS also urges that loop current indicators be incorporated in the monitor.

19. For loop current indications, Colligan would include a requirement that they be linear to within 2 percent over a range from 5 percent of full scale to 95 percent of full scale.

20. CBS suggests that the performance of the monitor be stated in terms of its "resolution" rather than its accuracy. Birch and Potomac favor separate specifications for accuracy and "resolution" (both would specify the latter as 0.5 degrees). Resolution, as Potomac construes it, apparently is synonymous with "repeatability."

21. Birth and Potomac each suggest that proposed § 73.53(b)(1) be revised to specify that the phase differences be indicated between a reference RF input and other FR inputs, rather than "between any two RF input points," since the former is the indication directly made by phase monitors of modern manufacture.

22. Both suggest additional requirements, particularly applicable to the monitor when used for remote indication, which would insure that accurate remote point readings could be achieved without adjustment or calibration of the monitor, and that internal circuitry is included to permit the monitor to be switched among the various elements of the array from the remote control point.

23. Potomac urges that we further include the requirement that the specified accuracy of the monitor be maintained within temperature variations of ±15° F. about the temperature at which the monitor was calibrated, and with sampling line voltage changes 3 db above and 6 db below the nominal input voltage.

Discussion

24. In the light of the comments received, we will not now adopt a rule specifying a fixed permissible phase deviation for stations with directional arrays. We think that phase tolerances ultimately should be set by the Commission. Ideally, permissible deviations in relative phases and current amplitudes should be specified for each station in its instrument of authorization in the light of its antenna characteristics and its obligations for the protection of other stations. This, of course, is now done for stations having unusually rigid protection requirements. Practical and equitable considerations might militate against its accomplishment on an overall basis. A considerable burden would be placed on each station licensee in preparing the engineering study necessary to define the limits for his particular station. Moreover, a specific procedure for making such studies must be developed and presumably must be prescribed by the Commission if uniform and consistent determinations are to be made by all stations. At present, no generally accepted procedure exists.

25. Even if a case-by-case approach should not prove feasible, the establishment by rule of a fixed tolerance for phase variations for all stations with directional antennas, with suitable provision for excessive deviations because of weather and other adverse conditions, is desirable in insuring that antennas do not drift out of adjustment because of aging or defective components, or are not misadjusted by station operators. Such a requirement would be fully consistent with the longstanding Commission rule requiring the maintenance of current ratios within 5 percent of the values specified in the station license. If this approach were adopted, we think a tolerance of ±3° might be appropriate. Not only is the effect of a deviation of this amount approximately equivalent to a variation in current ratio of 5 percent, but it would appear, in the light of the comments, that under normal weather conditions reasonably stable directional antennas can operate within such a tolerance without frequent readjustments.

26. However, the successful application of a tolerance for phase deviations requires that such deviations be accurately detected. It is quite evident from the tenor of the comments that the phase monitoring systems of many stations are incapable of providing consistently accurate indications of phase or phase deviations. Almost unanimously, those commenting lay the blame for this situation on sampling systems which are inadequately designed and improperly installed. Where such systems are employed, indicated phase deviations may reflect variations in the sampling system with changes in temperature, moisture, wind velocity, etc., or deterioration of components of the system, rather than any real change in antenna phase relationships.

27. At least one comment suggests that faulty sampling systems are so numerous that, unless the situation is corrected, it is futile to require type approved monitors. Others have urged that the Commission establish at least minimum standards for the installation of sampling systems, or that each station installing a type approved monitor be required to make a showing that the sampling system to be employed therewith is adequate.

28. On the basis of the comments, we are convinced that the incidence of faulty and inadequate sampling systems is so general that any attempt by the Commission to fix and require compliance with a specific phase tolerance at this time will result, not in better maintenance of radiation patterns, but, in many cases, unnecessary and perhaps deleterious readjustments of array parameters.

29. There was a tendency on the part of some parties to minimize the importance of phase monitor readings in determining the performance of an array, and to look to the results of monitoring point measurements as the definitive indicia of proper array adjustment. Where a phase indicating system cannot be relied upon to provide accurate indications, monitoring point measurements become almost the sole basis for pattern maintenance. However, as many consulting engineers and station operators well know, monitoring point fields have their own peculiar vagaries, which must be recognized and accounted for.[3] The practice of making arbitrary changes in array operating parameters in attempts to maintain measured fields within prescribed limits often has resulted in situations where complete reproofs of arrays have become necessary.

30. We share the conviction of those parties who believe that an accurate and reliable system for determining phase relationships is an essential adjunct to proper directional antenna operation, and to the extent licensees do not now have such systems, steps should be taken to correct this situation.

31. We therefore believe that the adoption of rules for the type approval of phase monitors, and providing for the eventual installation of such monitors by all stations using directional antennas is an important step toward the improvement of the technical operation of these stations. However, it is apparent, in view of the comments received, that the problem of achieving better surveillance of antenna operations is not thereby completely solved—that little is gained by requiring the use of a monitor giving accurate and stable indications of the relationships of antenna signals delivered to its terminals, if these signals are subject to errors introduced by a faulty sampling system. Accordingly, in the near future we expect to institute a new rule making proceeding looking toward the adoption of rules which would set minimum standards for sampling systems. In the instant proceeding we have

[3] It should be noted that it is common practice to use phase monitor current indications in lieu of base current indications in determining element current ratios in an array. While this is often a matter of convenience, a number of those commenting held that loop current ratios are a more accurate indication of relative element fields than are base current ratios. In view of the apparent inadequacy of many sampling systems for presenting phase differences, a question is raised as to the accuracy with which such systems can provide information on current ratios. While this matter has not been discussed to any extent by those commenting, it would appear that the factors which adversely affect the accuracy of phase indications in general have considerably less effect on current ratio indications. However, Kear and Kennedy and Defense Electronics both suggest that the rule setting the tolerance for current ratios be modified to provide for deviations resulting from adverse weather conditions.

V 38 - 13 JAN 19 73 XUM

received a number of suggestions concerning this question, and will rely on them extensively in formulating the proposed standards.

32. As previously indicated, several of the parties urge that type approved phase monitors not be required when loop current indications, but not phases, are read at the remote control point. This matter is disposed of in the report and order in Docket No. 18455, which we are issuing simultaneously with this document.

33. Since the inception of the instant proceeding, we have concluded rule making in Docket 18930, and have amended § 73.93 of our radio operator rules so as to permit, subject to specified conditions, the routine operation of standard broadcast stations with directional antennas by licensed operators other than first-class radiotelephone licensees. Among the conditions precedent to the use of lesser grade duty operators is a requirement that the station be equipped with a type approved antenna (phase) monitor. The effectiveness of this requirement was suspended, however, pending the conclusion of the instant proceeding. In the appended rules we have specified an effective date of June 1, 1974. An appropriate amendment of § 73.93 will be made in the immediate future.

34. As suggested by several of the parties, we are requiring the installation of type approved monitors by all new stations employing directional antennas, and by all stations using such antennas which are authorized to make major changes.

35. Of course, the particular circumstance which impelled us to undertake the type approval of phase monitors was the NAB proposal that we permit phases to be logged at remote control points (with a concomitant relaxation in the frequency of readings at the transmitter). While deeming the proposal as meritorious, we concluded that reasonable assurance remote phase indications would be satisfactorily provided must rest in the mandatory requirement that the licensee install a phase monitor which the Commission had determined was properly designed for remote indication and operation.

36. However, as a result of preliminary testing of available monitors by our Laboratory, and incident to the development of type approval specifications for these instruments, we have modified to some extent our position that a type approved monitor must immediately be employed in all cases by stations undertaking to provide phase indications at a remote control point.

37. As a matter of basic principle, we have determined that the specifications for type approval should be sufficiently rigid that they can be met only by instruments of the latest and most modern design. The specifications set forth in § 73.53, as appended, reflect this principle.

38. Nevertheless, there is at least one type of monitor, used in many stations, of fairly recent design and currently being manufactured, which, while it may not be expected to meet the above mentioned specification in all respects, would appear to be satisfactory for interim use in providing remote phase indications. We believe that when such a monitor is available, its employment for this purpose for a reasonable period of time should be permitted.

39. We do not believe that a desirable upgrading of station performance is to be achieved, or the public interest otherwise would be served by the indefinite "grandfathering" of monitors, which may be obsolete or inadequate, for those stations not falling into any of the categories above discussed.

40. In a note appended to § 73.69, paragraph (a) of which requires the use of type approved monitors, we have established a schedule for the effectuation of this requirement. Pursuant to this schedule, new stations and existing stations authorized to make major changes must install type approved monitors immediately; stations employing lesser grade operators must fulfill this requirement by June 1, 1974; remotely controlled stations undertaking to read and log phases at a remote control point must employ such monitors unless a monitor designed for remote RF switching, and to provide remote phase readings is available—in which case it may be used in lieu of a type approved monitor until June 1, 1975. All stations employing directional antennas will be required to have type approved monitors installed by June 1, 1977.

41. As summarized in paragraphs 17 and 18, exception is taken by several parties to the requirement of proposed § 73.69(b)(5) that the replacement of a defective monitor by another monitor shall be the occasion for a skeleton proof of performance. The purpose of such a requirement, of course, is to establish definitively the indications of the replacement monitor which will obtain when the array is in proper adjustment. A skeleton proof is probably the only procedure, short of a partial or complete proof of performance, which will insure, under all circumstances, that the indications of the replacement phase monitor may be relied upon. For instance, the station may have been without a monitor for a considerable period of time, or the defective monitor may have been giving erroneous indications, and adjustments may have been made of the array on the basis of such readings before the monitor was taken out of service. If the station licensee has had no occasion in the recent past to run a complete or partial proof, it is questionable whether satisfactory field strength indications at the few monitoring points specified in the license will, alone, provide adequate evidence that the radiation pattern remains substantially unchanged from its original configuration. Finally, in a situation where the Commission has heretofore set no standards for the performance of phase monitors, it is perhaps unlikely, even when the array is properly adjusted, that a new monitor will give indications in all cases closely approximating those specified in the license, which were based on indications of the previous monitor.

42. In that portion of its comments filed in companion Docket 18455 concerning the replacement of an existing monitor by a phase monitor type approved for the provision of remote phase indications, Storer urges that a specific procedure be adopted for making such a replacement. We agree that this is desirable. The rules for this purpose may appropriately be included in proposed § 73.69, which we are presently discussing. We, therefore, have deleted proposed paragraph (b)(5), which deals only with the replacement of a defective monitor and have added new paragraph (c), which covers the general case of the replacement of one phase monitor by another. We will require a proof of performance only when the station is unable to establish, by the specified base current observations and monitoring point measurements that the directional array is operating within the limits and tolerances required by its license and the rules. Under such circumstances we are requiring a partial rather than a skeleton proof, since the latter ordinarily would not provide information to demonstrate that the array had been brought into proper adjustment.

43. We believe that in adopting this procedure we avoid unnecessary hardship for the station operator, and at the same time, insure that the indications of the replacement monitor represent conditions of proper array adjustment.

44. The specifications which we are adopting for type approved monitors are set forth in a new § 73.53 of the rules, included, as are the other rule amendments adopted herein, below. These specifications were formulated after full consideration of the comments filed in this proceeding, and of the results of an examination by our Laboratory of representative monitors of modern design.

45. At this point, we would note that while our original Notice, the comments filed and our subsequent discussion of the matters involved have been concerned with the characteristics and use of a phase monitor, § 73.53 and the other amended rules designate this instrument as an antenna monitor. This broader term is more truly descriptive of its functions—such a monitor customarily includes facilities for determining the relative amplitudes, as well as the relative phases of RF signals applied to its input terminals. Moreover, in response to the comments urging that this be done, we are specifying the inclusion of the amplitude indicating capability as a condition for type approval. We had initially proposed this capability as an optional feature of the monitor, since other instruments normally employed in the broadcast station provide information on the relative amplitudes of tower currents. However, we are persuaded that the incorporation of this facility in the monitor makes for more convenient, and, in some cases, more accurate determinations of amplitude ratios, particularly if a station is operated by remote control, or where lesser grade operators are

placed in charge of the transmitting system, pursuant to recently amended § 73.93.

46. We have established specifications, both for the absolute accuracy of indication of the monitor, and for its repeatability. Accuracy figures are set for phase and amplitude indications over two ranges of relative amplitudes, as the accuracy of indication of antenna monitors characteristically lessens as the ratio of the amplitudes of the applied signals increases. The decrease in accuracy of phase indications under such conditions is quite small. The loss in accuracy of amplitude indication is more substantial, and stems both from inherent nonlinearities of the system, and the reduction in reading accuracy which inevitably increases as lower scale values of the amplitude indicating device are approached. As a practical matter, the decreased accuracy available under such circumstances is quite tolerable, since the phase and amplitude relationships indicated are with respect to a tower with relatively low antenna current, whose phase and amplitude variations have a less significant effect on the directional radiation pattern configuration then would corresponding changes in an element with higher current.

47. We realize that the ability of the monitor to indicate accurately the magnitude of changes occurring in antenna parameters in day-to-day operations is of more importance than an extremely high order of absolute accuracy, and, accordingly, we have included a separate specification for this characteristic of the monitor; we are designating it as the repeatability of indication of the monitor, rather than as its resolution, the term suggested in the comments. In adopting the former term, we conceive it to reflect, not only the limit of the ability of the monitor to provide perceptible indications of changes occurring in the relationships of signals applied to the monitor at any given time, but also its ability to provide the same indications (within the limits of reading accuracy) of any particular phase and amplitude relationship, when observed at different times. Since § 73.114(a)(1)(v) of the appended rules requires the antenna monitor be calibrated at weekly intervals, our tests for type approval will determine the repeatability of indication of antenna monitors submitted for type approval, as that attained during a 7-day period, without adjustment of the monitor after its initial calibration.

48. The specified values of accuracy and repeatability must be achieved over the range of ambient temperatures and line voltages specified in § 73.53, which are considered to include variations of a magnitude encountered under actual conditions of operation.

49. A separate specification has been established for the tolerable variation in phase indication when the applied signals are modulated. The test for this variation is conducted with a sinusoidal modulating signal. This signal, of course, is reproducible, and, we believe, yields a result not appreciably differing from that which would be produced by program modulation within the same amplitude range.

50. Since we have established stated requirements for accuracy and repeatability of indication, we believe it unnecessary, to specify separately a figure for the linearity of the indicating devices, as suggested in the comments.

51. In view of all of the above: *It is ordered*, Effective February 23, 1973, that Part 73 of the rules and regulations is amended as set forth below.

52. Authority for the adoption of these rule amendments is found in sections 4(i) and 303(r) of the Communications Act of 1934, as amended.

53. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Adopted: January 10, 1973.

Released: January 15, 1973.

FEDERAL COMMUNICATIONS COMMISSION,[4]

[SEAL] BEN F. WAPLE, *Secretary.*

§ 1.1120 [Amended]

1. Amend § 1.1120 as indicated below:

Insert new entry in the table entitled Type Approval, as follows:

1. • • •
(a) • • •
(1) • • •
(2) • • •
(3) Broadcast antenna monitors 100 400.

Renumber present (3) as (4) and retain.

2. A new § 73.53 is added, to read as follows:

§ 73.53 Requirements for type approval of antenna monitors.

(a) General requirements:

(1) Any manufacturer desiring to submit a monitor for type approval shall submit an application to the Commission in accordance with the procedure set forth in § 2.561 of this chapter, and subject to the fee schedule in § 1.1120 of this chapter.

(2) Type approval of a monitor is granted subject to the limitations and requirements described in Part 2, Subparts F and I of this chapter.

(b) The Laboratory Division of the Commission will make all tests necessary to determine whether or not the specifications of paragraph (c) of this section have been met. During these tests, the monitor will be operated, to the extent possible, under service conditions. The manufacturer shall furnish to the Laboratory all instructions and services which will be supplied to a purchaser of the monitor.

(c) An antenna monitor eligible for type approval by the Commission shall meet the following specifications:

(1) The monitor shall be designed to operate on a frequency in the band 540 to 1600 kHz.

(2) The monitor shall be capable of indicating any phase difference between two RF voltages of the same frequency over a range of from 0 to 360°.

(3) The monitor shall be capable of indicating the relative amplitude of two RF voltages.

(4) The device used to indicate phase differences shall indicate in degrees, and shall be graduated in increments of 2°, or less. If a digital indicator is provided, the smallest increment shall be 0.5°, or less.

(5) The device used to indicate relative amplitudes shall be graduated in increments which are 1 percent, or less, of the full scale value. If a digital indicator is provided, the smallest increment shall be 0.1 percent, or less, of the full scale value.

(6) The monitor shall be equipped with means, if necessary, to resolve ambiguities in indication.

(7) If the monitor is provided with more than one RF input terminal in addition to a reference input terminal, appropriate switching shall be provided in the monitor so that the signal at each of these RF inputs may be selected separately for comparison with the reference input signal.

(8) Each RF input of the monitor shall provide a termination of such characteristics that, when connected to a sampling line of an impedance specified by the manufacturer, the voltage reflection coefficient shall be 3 percent or less.

(9) The monitor shall be designed so that the switching function required by paragraph (c)(7) of this section may be performed from a point external to the monitor, and phase and amplitude indications be provided by external meters. The indications of external meters furnished by the manufacturer shall meet the specifications for accuracy and repeatability of the monitor itself, and the connection of these meters to the monitor, or of other indicating instruments with electrical characteristics meeting the specifications of the monitor manufacturer shall not affect adversely the performance of the monitor in any respect.

(10) If the monitor is fitted with operational features not specifically required by this section, the features:

(i) Shall be arranged so as not to interfere with or be confused with the required functions of the monitor.

(ii) Shall meet the manufacturer's specifications for such operational features.

(11) The monitor shall be accompanied by complete and correct schematic diagrams and operating instructions. For the purpose of type approval, these diagrams and instructions shall be considered as part of the monitor.

(12) The general design, construction and operation of the monitor shall be in accordance with good engineering practice.

(13) When an RF signal of an amplitude within a range specified by the manufacturer is applied to the reference RF input terminal of the monitor, and another RF signal of the same frequency

[4] Commissioner Hooks absent.

V 38 - 13 JAN 19 73 XUM

and of equal or lower amplitude is applied to any other selected RF input terminal, indications shall be provided meeting the following specifications.

(i) The accuracy with which any difference in the phases of the applied signals is indicated shall be ±1°, or better, for signal amplitude ratios of from 2:1 to 1:1, and ±2°, or better, for signal amplitude ratios in excess of 2:1 and up to 5:1.

(ii) The repeatability of indication of any difference in the phases of the applied signals shall be ±1°, or better.

(iii) The accuracy with which the relative amplitudes of the applied signals is indicated, over a range in which the ratio of these amplitudes is between 2:1 and 1:1, shall be ±2 percent of the amplitude ratio, or better, and for amplitude ratios in excess of 2:1 and up to 5:1, ±5 percent of the ratio, or better.

(iv) The repeatability of indication of the relative amplitudes of the applied signals, over a range where the ratio of these amplitudes is between 5:1 and 1:1, shall be ±2 percent of the amplitude ratio, or better.

(v) The modulation of the RF signals by a sinusoidal wave of any frequency between 100 and 10,000 Hz, at any amplitude up to 90 percent shall cause no deviation in an indicated phase difference from its value, as determined without modulation, greater than ±0.5°.

(14) The performance specifications set forth in paragraph (c)(13) of this section, shall be met when the monitor is operated and tested under the following conditions.

(i) After continuous operation for 1 hour, the monitor shall be calibrated and adjusted in accordance with the manufacturer's instructions.

(ii) The monitor shall be subjected to variations in ambient temperature between the limits of 10 and 40°C; external meters furnished by the manufacturer will be subjected to variations between 15 and 30°C.

(iii) Powerline supply voltage shall be varied over a range of from 10 percent below to 10 percent above the rated supply voltage.

(iv) The amplitude of the reference signal shall be varied over the operating range specified by the manufacturer, and in any case over a range of maximum to minimum values of 3 to 1.

(v) The amplitude of the comparison signal shall be varied from a value which is 0.2 of the amplitude of the reference signal to a value which is equal in amplitude to the reference signal.

(vi) Accuracy shall be determined for the most adverse combination of conditions set forth above.

(vii) Repeatability shall be determined as that which may be achieved under the specified test conditions over a period of 7 days, during which no calibration or adjustment of the instrument, subsequent to the initial calibration, shall be made.

(viii) The effects of modulation of the RF signal shall be separately determined, and shall not be included in establishing values for accuracy and repeatability.

3. A new § 73.69 is added, to read as follows:

§ 73.69 Antenna (phase) monitors.

(a) Each station utilizing a directional antenna shall have in operation at the transmitter an antenna monitor which is of a type approved by the Commission: *Provided, however,* That if the instrument of authorization of the station sets specific tolerances within which phase and amplitude relationships must be maintained, or requires the use of a monitor of specified repeatability or accuracy, the antenna monitor employed under such circumstances shall be authorized on an individual basis.

(b) In the event an antenna monitor becomes defective, the station may be operated without the monitor pending its repair or replacement for a period not in excess of 60 days without further authority from the Commission: *Provided,* That:

(1) Appropriate entries shall be made in the maintenance log of the station showing the date and time the monitor was removed and restored to service.

(2) If the license specifies antenna monitor sample current ratios, during the period the antenna monitor is out of service, base currents or remote base currents shall be read and logged at least once each day.

(3) Field strength measurements at each monitoring point specified in the stations authorization shall be read and logged at least once every 7 days.

(4) If the station is operated by remote control and phase indications are read and logged at the remote control point, during the period the antenna monitor is out of service indicating instruments at the transmitter shall be read and logged at the times specified in § 73.114(a)(8)(ii) for remotely controlled stations which do not provide for the reading and logging of phases at the remote control point.

(c) If an authorized antenna monitor is replaced by another antenna monitor, the following procedure shall be followed:

(1) Temporary authority shall be requested and obtained from the Commission in Washington to operate with parameters at variance with licensed values, pending issuance of a modified license specifying new parameters.

(2) Immediately prior to the replacement of the antenna monitor, after a verification that all monitoring point values and base current ratios are within the limits or tolerances specified in the instrument of authorization or the pertinent rules, the following indications shall be read and recorded in the maintenance log for each radiation pattern: Final plate current and plate voltage, common point current, base currents, antenna monitor phase and current indications, and the field strength at each monitoring point.

(3) With the new monitor substituted for the old, all indications specified in paragraph (c)(2) of this section, again shall be read and recorded. If no change has occurred in the indication for any parameter other than the indications of the antenna monitor the new antenna monitor indications shall be deemed to be those reflecting correct array adjustments.

(4) If it cannot be established by the observations required in paragraph (c)(2) of this section, that base current ratios and monitoring point values are within the tolerances or limits prescribed by the rules and the instrument of authorization, or if the substitution of the new antenna monitor for the old results in changes in these parameters, a partial proof of performance shall be executed, consisting of at least 10 field strength measurements, on each of the radials established in the latest complete adjustment of the antenna system. These measurements shall be made at locations, all within 2 to 10 miles from the antenna, which were utilized in such adjustment, including, on each radial, the location, if any, designated as a monitoring point in the station authorization. Measurements shall be analyzed in the manner prescribed in § 73.186.

(5) An informal request for modification of license shall be submitted to the Commission in Washington, D.C., within 30 days of the date of monitor replacement. Such request shall specify the make, type, and serial number of the replacement monitor, phase and sample current indications, and other data obtained pursuant to this paragraph (c).

NOTE: § 73.69(a) shall become effective, as follows:

(1) Each new station and each existing station for which major changes (see § 1.571(a)(1)) are authorized after June 1, 1973, shall be equipped with a type approved antenna monitor.

(2) Each station electing to utilize licensed operators other than first class radiotelephone operators for routine transmitter duty (see § 73.93) shall meet this requirement by June 1, 1974.

(3) Each station operating by remote control, when adopting the schedule specified in § 73.114(a)(9)(iii) for observations at the transmitter, shall install a type-approved antenna monitor and provide phase indications at the remote control point, for observation and logging pursuant to § 73.113(a)(4)(ii): *Provided,* That, in lieu of a type-approved monitor, the station may, until June 1, 1975, employ any monitor, manufactured after January 1, 1965, which is designed to afford phase indications on a device located externally to the monitor, and which incorporates any necessary facilities whereby alternative RF inputs to the monitor may be selected by external switching.

(4) All other stations shall meet the requirements of this rule by June 1, 1977.

[Docket No. 19539; FCC 73-42]

PART 73—RADIO BROADCAST SERVICES

Television Broadcast Stations in Grand Junction, Colo.

Report and order:

In the matter of amendment of § 73.606(b), *Table of assignments,* Television Broadcast Stations (Grand Junction, Colo.), Docket No. 19539, RM-1852.

1. The Commission has before it for consideration the proposal to assign Channel 8 to Grand Junction, Colo., upon which rule making was instituted in response to a petition of Woodland Broadcasting Co. (Woodland), licensee of Radio Station KBUC(AM), Montrose, Colo. (Notice of proposed rule making, adopted July 6, 1972, 37 FR 14001.) Both supporting comments and reply comments on the proposals were received from Woodland. Opposing comments were filed by XYZ Television, Inc. (XYZ), licensee of Station KREX-TV (Channel 5), Grand Junction, and also of Station KREY-TV (Channel 10), Montrose, and Station KREZ-TV (Channel 6), Durango, Colo., both satellites of Station KREX-TV.

2. Channel 5 and Channel *18, reserved for noncommercial educational use, are assigned to Grand Junction (1970 population, 20,170), the largest city and seat of Mesa County (1970 population 54,347), located in southwestern Colorado, approximately 190 miles southwest of Denver and southwest of Salt Lake City, Utah. Channel 5 is occupied by Station KREX-TV which was under other ownership from 1954 to 1966, and has been under XYZ's ownership since 1966,[1] Channel *18 has never been activated. Station KREX-TV and its two satellites, Station KREY-TV at Montrose (1970 population 6,596), about 55 miles southeast of Grand Junction, and Station KREZ-TV at Durango (1970 population, 10,333), about 90 miles south of Montrose, all under XYZ's ownership, are the only local television stations serving this western Colorado area.

3. Additional service is, however, received from television stations outside western Colorado via numerous translators and local cable TV systems at Grand Junction, Montrose, and Durango. The 1972-73 edition of "Television Factbook" indicates that the Grand Junction cable system, which has been in operation since 1966, carriers KREX-TV (Grand Junction) and all five of the Denver television stations (KWGN-TV, KOA-TV, KLZ-TV, KBTV and KRMA-TV). The Montrose cable system, which also began operation in 1966, carries KREY-TV (Montrose), KOAA-TV (Pueblo, Colo.), and all of the Denver stations. The Durango cable system, which began operation in 1954, carries KREZ-TV (Durango), the four Albuquerque, N. Mex., television stations (KOB-TV, KOAT-TV, KNME-TV, and KGGM-TV), and two of the Denver stations (KRMA-TV, KWGN-TV).

4. This Channel 8 proposal for Grand Junction merited consideration in rule making, we felt, since the Woodland petition demonstrated that Channel 8 is technically feasible for a Grand Junction assignment; evidenced interest and intent on the part of its controlling stockholders and others to apply for use of the channel, if assigned, to provide Grand Junction, Mesa County, and this western Colorado area with a second full-fledged local commercial television outlet and service; and it appeared that the proposed assignment could implement our television goals and policies and serve a significant public interest function and need in making it possible for this area to have a first comparable and competing local television outlet and diversified off-the-air local television service from another source. While XYZ opposed rule making on the proposal on the basis of claims that a second VHF station at Grand Junction would be economically infeasible and would seriously jeopardize present television service in the area, its showing was insufficient to warrant either conclusion or to evaluate the significance of these claims in terms of the public interest. For, as we pointed out in the notice, the Commission's Table of Assignments is not static and existing licensees are not entitled to a protection from additional assignments which might have a possible adverse effect on their private economic interests. We did, however, invite comments in particular in this regard.

5. In its comments, Woodland affirms that it or another company having the same majority stockholders (Four States Television, Inc., permittee of Station KIVA-TV, Farmington, N. Mex.), or some of the principals of these companies and others intend to apply for Channel 8 at Grand Junction, if assigned, and to utilize it, if authorized. Relying on its prior showing, Woodland urges that the assignment is clearly warranted on the basis of technical feasibility, need, and the significant public interest benefits flowing from the establishment of a second local television outlet and service in this area. This being the case, Woodland takes the position that the assignment should not be withheld because of economic considerations, such as those previously raised by XYZ, in the absence of a compelling showing that the public interest would be adversely affected thereby. It maintains that its position is consistent with established Commission policy and precedent; that in a number of cases we have made it clear that where a choice of free television service would be available for the first time, there is a strong presumption that the second television channel should be assigned to the community involved and that we should be slow to act in a manner which would thwart the development of competition, citing the 1969 "Glendive, Montana" VHF channel assignment case (19 F.C.C. 2d 733, 15 Pike & Fischer, R.R. 2d 1559) as an example. Among the other consistent cases, it states, is the 1970 "Oxnard, California," TV channel assignment case (35 FR 16173, 20 Pike & Fischer, R.R. 2d 1570), wherein we stated that "it is not the Commission's function to place artificial restraints upon competition unless the overall public interest will be adversely affected by such competition" and that "such arguments, even if of substantial merit, are better considered at the application stage, where they can be evaluated in light of the specific application proposal."

6. In its opposing comments, XYZ takes essentially the same position as previously taken in opposition to rule making on the proposed Grand Junction Channel 8 assignment, specifically claiming that the addition of a second VHF station at Grand Junction would be detrimental to the public interest since neither station would be able to obtain sufficient economic support to provide a viable service in the public interest In support of this position, XYZ contends that it is inconceivable that two television stations could provide viable services in a market as small as that served by Station KREX-TV at Grand Junction and its Montrose and Durango satellites considering the extent to which it is now blanketed with television signals being brought in by cable TV systems and translators. XYZ states that, according to American Research Bureau ranking (ARB), there are approximately 61,000 homes in the area served by Station KREX-TV and its Montrose and Durango satellites; that in excess of 35 percent of these homes are served by cable TV systems; and that, coupled with those served by translators, the penetration of outside service is approximately 70 percent. XYZ further contends that the proliferation of signals in the market has resulted in a continuous decline in the number of homes reached by Station KREX-TV since 1965 and submits an exhibit, prepared from ARB surveys, to show that for every daily time period the number of homes watching KREX-TV and its satellites had declined in May 1972 to approximately one-half of its March 1965 level. In an accompanying statement the president of XYZ states that the number of homes reached is now at a dangerously low level. Estimating that this level would be cut in half again by moving in another television station, he contends that this would not leave sufficient homes for either station to service.

7. In addition, XYZ argues that the Grand Junction area does not represent a growth area which will need additional service in the future, citing U.S. census reports to show that it is one which has barely maintained its level of population in the decade from 1960 to 1970. In that 10-year period, final U.S. census reports show that Grand Junction increased from 18,694 to 20,170 in population (a 7.9-percent increase) and that Mesa County increased from 50,715 to 54,374 in population (a 7.2-percent increase). In the neighboring counties of Montrose and Delta, there was only a slight population increase in one (Montrose increased from 18,286 to 18,366, a 0.4 percent increase) and a loss in population in the other (Delta decreased from 15,602 to 15,286, a 2-percent decrease) between 1960 and 1970. The city of Montrose, however, increased in population from

[1] An application for voluntary transfer of control of XYZ Television, Inc., to Rex G. Howell, who had a controlling interest in the prior licensee of Station KREX-TV (Western Slope Broadcasting Co., Inc.), which also had controlling interests in licensee corporations for Station KREY-TV at Montrose and Station KREZ-TV at Durango, was granted Aug. 11, 1972, File No. BTC-6683. Notice of consummation of the authorized transfer of control was filed in an ownership report, as of Oct. 13, 1972.

V 38 I 13 JAN 19 73 XUM

5,044 to 6,496 (a 28.8-percent increase) during the 10-year period. The XYZ president maintains that without population growth to support an additional station, there is nothing left but fragmentation of the already small audience of the present station and that two commercial stations in as small a market as shown by these population figures do not have any hope of surviving.

8. In reply, Woodland contends that the XYZ showing is devoid of any facts to show that the proposed assignment would be contrary to the public interest and of even sufficient facts to show private economic injury to Station KREX-TV. It stresses that even assuming, for the sake of argument, that a showing of some private economic injury had been made, the Commission and the courts have consistently held that allegations of private economic injury, standing alone, without any showing of how the public interest would be adversely affected in terms of loss of service is an insufficient ground for keeping out a competitive service ("Carroll Broadcasting Co. v. F.C.C.," 258 F. 2d 440 (C.A.D.C., 1958)). Contending that XYZ's showing constitutes no showing whatsoever as to whether there would be a net loss of service resulting from the institution of a first competitive commercial television service in Grand Junction, and that XYZ has clearly failed to rebut the strong presumption applied by the Commission in favor of additional assignments, Woodland urges rejection of the XYZ position and adoption of the proposed amendment in light of its public interest benefits.

9. There is no question, we believe, that the public in the Grand Junction area would benefit greatly from having a second locally oriented commercial television broadcast service available to all in the area from a source other than XYZ, notwithstanding the translator and cable TV service available to many in the area. Providing an assignment to make this possible is also consistent with our television priorities and assignment policies. We are also satisfied that Channel 8 is technically feasible for such use at Grand Junction. In addition, based on the indicated interest and intent of Woodland, an experienced radio broadcaster in the area, and its principals and others, there appears every likelihood that a Channel 8 assignment at Grand Junction would be applied for and that, if a new station is authorized on the channel, it will be built and placed in operation. These considerations are sufficient, in our judgment, to warrant the assignment in the public interest without reaching a decision on the economic impact question raised by XYZ. It is our normal practice to make ultimate decisions in this regard when we have an application with a specific proposal for use of a channel assignment rather than in the context of a rule making proceeding for the assignment itself. We think that this is the better procedure since any possible adverse economic effect of a new station becomes a critical factor in weighing the public interest at such time as we are required to act upon an application for a new station rather than at the assignment stage, and it is exceedingly helpful to have a specific proposal before us which can, if necessary, be exposed to the give-and-take of an evidentiary hearing in making a determination as to whether the alleged economic impact of the proposed new station is likely to cause overall derogation of television service to the public.

10. This rule making proceeding, we feel, points up the difficulty, if not virtual impossibility, in most such proceedings of making a determination as to the alleged adverse economic effect of a new station on a proposed channel assignment without benefit of an application with a specific proposal for use of the proposed assignment to consider, as well as the need and desirability of adhering to our practice of considering any such applicant's proposal in reaching a reasoned judgment on such economic issues. XYZ's showing as to the size and population growth pattern of the Grand Junction area and the alleged impact of translator and cable TV operations upon its Channel 5 station and audience furnishes some reason, we feel, for questioning the ability of the relatively small Grand Junction market—the 189th ranking market, based on prime time viewing households, according to ARB market rankings, as of February/March, 1972—to support another station, but neither on the basis of its showing nor our experience can we conclude that it is impossible. More important, its showing is insufficient, in our view, to permit a determination as to whether the alleged adverse economic effect of another station in the Grand Junction area is likely to cause diminution or destruction of overall program service to the public. In the absence of such a showing, we would not deny an application for a new station on grounds of economic injury to an existing station since, as we have stated before, it is not our function to place artificial restraints upon competition unless the overall public interest would be adversely affected thereby. Nor, on the strength of XYZ's showing in this regard, do we think that it would serve the public interest to relegate the Grand Junction area to being essentially a market for one regular local station and one voice for lack of an assignment. The public interest is served, we believe, in view of the demand for the proposed assignment and its technical feasibility, by not closing the door to opportunity for the Grand Junction area to have a second comparable commercial television service from another source at this time. The economic impact question in terms of the public interest can be better evaluated, and in greater depth, in passing upon any applicant's proposal for use of the new assignment.

11. Accordingly, pursuant to the authority contained in sections 4(i), 303, and 307(b) of the Communications Act of 1934, as amended: *It is ordered*, That the television Table of Assignments, § 73.606(b) of the rules, is amended, effective February 23, 1973, insofar as the community named is concerned, to read as follows:

City	*Channel No.*
Grand Junction, Colo	5-, 8-, *18

12. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307)

Adopted: January 10, 1973.

Released: January 15, 1973.

FEDERAL COMMUNICATIONS COMMISSION,[a]

[Docket No. 18180]

PART 78—CABLE TELEVISION RELAY SERVICE

Protection of Table Mountain, Colo., From Radio Interference; Correction

In the matter of amendments to Parts 21, 23, 25, 73, 74, 78, 87, 89, 91, and 93 of the Commission's rules relative to the protection of Table Mountain, Boulder, Colo., from radio interference, Docket No. 18180.

The Appendix to FCC Report and Order, FCC 72-1100, in the above matter, released December 11, 1972, and published in the FEDERAL REGISTER of December 15, 1972, 37 FR 26732, adds a new paragraph (c) to § 78.21. In a previous Order, FCC 72-690, released August 1, 1972, published in the FEDERAL REGISTER of August 8, 1972, 37 FR 15925, former § 78.21 was deleted and its provisions were redesignated as paragraphs (c) and (d) of § 78.19. Accordingly, the Appendix of FCC 72-1100 is corrected by specifying the new text as § 78.19(e) in lieu of § 78.21(c).

Released: January 10, 1973.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Secretary.

Title 7—AGRICULTURE

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Nuts), Department of Agriculture

[Grapefruit Reg. 90]

PART 912—GRAPEFRUIT GROWN IN THE INDIAN RIVER DISTRICT IN FLORIDA

Limitation of Handling

This regulation fixes the quantity of Florida Indian River grapefruit that may be shipped to fresh market during

[a] Commissioner Hooks absent.

the weekly regulation period January 22 through 28, 1973. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 912. The quantity of grapefruit produced in the Indian River District in Florida so fixed was arrived at after consideration of the total available supply of Indian River grapefruit, the quantity currently available for market, the fresh market demand for Indian River grapefruit, Indian River grapefruit prices, and the relationship of season average returns to the parity price for Florida grapefruit.

§ 912.390 Grapefruit Regulation 90.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 912, as amended (7 CFR Part 912), regulating the handling of grapefruit grown in the Indian River District in Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendation and information submitted by the Indian River Grapefruit Committee established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling such grapefruit, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this section to limit the quantity of Indian River grapefruit that may be marketed during the ensuing week stems from the production and marketing situation confronting the Indian River grapefruit industry.

(i) The committee has submitted its recommendation with respect to the total quantity of grapefruit which it deems advisable to be handled during the next succeeding week. Such recommendation resulted from consideration of the factors enumerated in the order. The committee further reports the market demand for Indian River grapefruit is slow due to lack of consumer demand. Prices, f.o.b. per four-fifths bushel carton, for the week ended January 14, 1973, averaged $2.60 for white seedless and $3 for pink seedless. Shipments for the week ended January 14, 1973, and for the previous week were 440 carlots and 451 carlots, respectively. On January 14, 1973, there were 10,804 carloads of Indian River grapefruit remaining for interstate shipments, while 4,696 carlots have been shipped to date.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantity of grapefruit which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this section is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Indian River grapefruit, and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such Indian River grapefruit; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on January 16, 1973.

(b) *Order.* (1) The quantity of grapefruit grown in the Indian River District which may be handled during the period January 22, through January 28, 1973, is hereby fixed at 200,000 standard packed boxes.

(2) As used in this section, "handled," "Indian River District," "grapefruit," and "standard packed box" have the same meaning as when used in said amended marketing agreement and order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: January 16, 1973.

PAUL A. NICHOLSON,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.73-1259 Filed 1-18-73;8:45 am]

[Avocado Order 5, Amd. 12]

PART 915—AVOCADOS GROWN IN SOUTH FLORIDA

Container Regulation

This amendment to Avocado Order 5 revises the container regulation, currently in effect, to permit the bulk packing of avocados weighing 14 ounces or less in the ½-bushel container. The current container regulation provides that avocados weighing 8 ounces or more packed in such container shall be place packed in two layers only, and this packing method has resulted in a continuing increase in packaging labor costs. The regulation and this amendment are issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 915.

Findings. (1) Pursuant to the marketing agreement, as amended, and Order No. 915, as amended (7 CFR Part 915), regulating the handling of avocados grown in south Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendation of the Avocado Administrative Committee, established under the aforesaid marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of avocados, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) in that the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; and this amendment relieves restrictions on the handling of avocados in that it permits shipments of bulk packed avocados in the ½-bushel container in lieu of the current requirement that avocados weighing 8 ounces or more packed in such container shall be place packed in two layers only.

The need for the amendment to Avocado Order 5 stems from the continuing increase in packinghouse labor costs, because the current container regulation requires that avocados of specified weights packed in containers with inside dimensions of 13½ x 16½ and depth varying from 6½ to 8 inches shall be placed in two layers only. It is becoming increasingly more difficult to hire seasonal packinghouse employees and wage costs are also increasing. Therefore, the Avocado Administrative Committee, on January 10, 1973, unanimously recommended the amendment of the aforesaid regulation, as hereinafter set forth, so as to permit the bulk packing of avocados weighing 14 ounces or less in such containers.

The provisions of pragraph (a)(1)(x) of § 915.305 (Avocado Order 5; 7 CFR 915.305; 37 FR 11314; 16930; 26729) are amended to read as follows:

§ 915.305 Avocado Order 5.

(a) *Order.* (1) • • •

(x) With respect to the containers prescribed in paragraph (a)(1)(vi) of this section, all avocados in such containers shall be placed in two layers only and the net weight of the avocados in any such container shall be not less than 27 pounds, except that the net weight of

V 38 - 13 JAN 19 73 XUM

Booth 1, Fuchs, Trapp, and unnamed varieties packed in any such container shall be not less than 26 pounds: *Provided*, That not to exceed 5 percent, by count, of such containers in any lot may fail to meet the applicable net weight requirement: *Provided further*, That the requirement as to placing avocados in two layers only shall not apply to such container if each of the avocados therein weighs 14 ounces or less.

* * * * *

(Sec. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: January 16, 1973, to become effective January 21, 1973.

PAUL A. NICHOLSON,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.73–1258 Filed 1–18–73;8:45 am]

Title 9—ANIMALS AND ANIMAL PRODUCTS

Chapter I—Animal and Plant Health Inspection Service, Department of Agriculture

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS; EXTRAORDINARY EMERGENCY REGULATION OF INTRASTATE ACTIVITIES

[Docket No. 73–503]

PART 76—HOG CHOLERA AND OTHER COMMUNICABLE SWINE DISEASES

Release of Area Quarantined

This amendment excludes a portion of Cumberland County in Pennsylvania from the areas quarantined because of hog cholera. Therefore, the restrictions pertaining to the interstate movement of swine and swine products from or through quarantined areas contained in 9 CFR Part 76, as amended, do not apply to the excluded area, but will continue to apply to the quarantined areas described in § 76.2(e). Further, the restrictions pertaining to the interstate movement of swine and swine products from nonquarantined areas contained in said Part 76 apply to the excluded area.

Therefore, pursuant to provisions of the Act of May 29, 1884, as amended, the Act of February 2, 1903, as amended, the Act of March 3, 1905, as amended, the Act of September 6, 1961, and the Act of July 2, 1962 (21 U.S.C. 111–113, 114g, 115, 117, 120, 121, 123–126, 134b, 134f), Part 76, Title 9, Code of Federal Regulations, restricting the interstate movement of swine and certain products because of hog cholera and other communicable swine diseases, is hereby amended in the following respects:

In § 76.2, in paragraph (e) (11) relating to the State of Pennsylvania, subdivision (ii) relating to Cumberland County is deleted.

(Secs. 4–7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791–792, as amended; secs. 1–4, 33 Stat. 1264, 1265, as amended; sec. 1, 75 Stat. 481; secs. 3 and 11, 76 Stat. 130, 132; 21 U.S.C. 111–113, 114g, 115, 117, 120, 121, 123–126, 134b, 134f; 37 FR 28464, 28477)

Effective date. The foregoing amendment shall become effective January 16, 1973.

The amendment relieves restrictions presently imposed but no longer deemed necessary to prevent the spread of hog cholera and must be made effective promptly in order to be of maximum benefit to affected persons. It does not appear that public participation in this rule making proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and unnecessary, and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 16th day of January 1973.

G. H. WISE,
Acting Administrator, Animal and Plant Health Inspection Service.

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Administration, Department of Transportation

[Airspace Docket No. 72–EA–109]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Alteration of Transition Area

On page 24765 of the FEDERAL REGISTER for November 21, 1972, the Federal Aviation Administration published a proposed rule which would alter the State College, Pa., transition area (38 FR 435).

Interested parties were given 30 days after publication in which to submit written data or views. No objections to the proposed regulations have been received.

In view of the foregoing, the proposed regulations are hereby adopted, effective 0901 G.m.t., March 1, 1973.

(Sec. 307(a), Federal Aviation Act of 1958, 72 Stat. 749, 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act; 49 U.S.C. 1655(c))

Issued in Jamaica, N.Y., on December 29, 1972.

GEORGE M. GARY,
Director, Eastern Region.

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to delete the description of the State College, Pa., 700-foot-floor transition area and insert the following in lieu thereof:

That airspace extending upward from 700 feet above the surface within a 12-mile radius of the center, 40°51'05'' N., 77°51'00'' W., of University Park Airport, State College, Pa., extending clockwise from a 020° bearing to a 130° bearing from the airport; within a 13.5-mile radius of the center of University Park Airport, extending clockwise from a 130° bearing to a 165° bearing from the airport; within a 5-mile radius of the center of University Park Airport, extending clockwise from a 165° bearing to a 210° bearing from the airport; within a 7-mile radius of the center of University Park Airport, extending clockwise from a 210° bearing to a 280° bearing from the airport; within a 13.5-mile radius of the center of University Park Airport, extending clockwise from a 280° bearing to a 020° bearing from the airport; within a 5-mile radius of the center, 40°46'15'' N., 77°52'45'' W., of State College Air Depot Airport, State College, Pa., extending clockwise from a 010° bearing to a 045° bearing from the airport; within a 12-mile radius of the center of State College Air Depot Airport, extending clockwise from a 045° bearing to a 080° bearing from the airport; within a 13.5-mile radius of the center of State College Air Depot Airport, extending clockwise from a 080° bearing to a 230° bearing from the airport; within a 6.5-mile radius of the center of State College Air Depot Airport, extending clockwise from a 230° bearing to a 260° bearing from the airport; and within a 14.5-mile radius of the center of State College Air Depot Airport, extending clockwise from a 260° bearing to 010° bearing from the airport, excluding the portion that coincides with the Philipsburg, Pa., and Reedsville, Pa., transition areas.

[Airspace Docket No. 72–NE–19]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area

On page 26343 of the FEDERAL REGISTER dated December 9, 1972, the Federal Aviation Administration published a notice of proposed rule making which would alter the North Conway, N.H., transition areas (38 FR 435).

Interested parties were given 30 days after publication in which to submit written data or views. No objections to the proposed regulations have been received.

In view of the foregoing, the proposed regulations are hereby adopted effective 0901 G.m.t., March 29, 1973.

(Sec. 307(a), Federal Aviation Act of 1958, 72 Stat. 749; 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Burlington, Mass., on January 10, 1973.

FERRIS J. HOWLAND,
Director, New England Region.

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to delete the description of the North Conway, N.H., 700-foot and 1,200-foot transition areas and insert the following in lieu thereof:

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the center, latitude 44°01'30'' N., longitude 71°06'45'' W., of White Mountain Airport, North Conway, N.H.; within 4.5 miles northeast and 6.5 miles southwest of the 128° bearing and the 308° bearing from the North Conway NDB, latitude 44°01'26'' N., longitude 71°06'59'' W., extending from 6 miles northwest of the NDB to 12 miles southeast of the NDB; and within 4.5 miles northeast and 9.5 miles southwest of the 128° bearing from the North Conway NDB extending 18.5 miles southeast of the NDB.

That airspace extending upward from 1,200 feet above the surface within 5 miles northeast and 8 miles southwest of a 128° bearing from the North Conway, N.H., NDB extending from the NDB to 12 miles southeast of the NDB; within 5 miles each side of a direct line extending from the Dalton, N.H., NDB, latitude 44°21'44'' N., longitude 71°41'08'' W., to the North Conway, N.H., NDB; within 5 miles each side of a direct line extending from the Montpelier, Vt., VOR to the North Conway, N.H., NDB; within 5 miles each side of a direct line extending from the Lebanon, N.H., VOR to the North Conway, N.H., NDB and within 5 miles each side of a line bearing 115° from the North Conway, N.H., NDB extending from the NDB to the northwest boundary of the Portland, Maine, 1,200-foot transition area, excluding those portions that coincide with the Berlin, N.H., Lebanon, N.H., and Burlington, Vt., 1,200-foot transition areas. This transition area is effective from sunrise to sunset daily.

[FR Doc.73–1179 Filed 1–18–73;8:45 am]

[Airspace Docket No. 72–NE–20]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area

On page 26341 of the FEDERAL REGISTER dated December 9, 1972, the Federal Aviation Administration published a notice of proposed rule making which would alter the Claremont, N.H., transition area (38 FR 435).

Interested parties were given 30 days after publication in which to submit written data or views. No objections to the proposed regulations have been received.

In view of the foregoing, the proposed regulations are hereby adopted effective 0901 G.m.t., March 29, 1973.

(Sec. 307(a), Federal Aviation Act of 1958, 72 Stat. 749; 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Burlington, Mass., on January 10, 1973.

FERRIS J. HOWLAND,
Director, New England Region.

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to delete the description of the Claremont, N.H., 700-foot transition area and insert the following in lieu thereof:

That airspace extending upward from 700 feet above the surface within a 6-mile radius of the Claremont Municipal Airport (43°22'-15'' N., 72°22'00'' W.); within 6.5 miles south and 4.5 miles north of the Claremont NDB (43°21'50'' N., 72°17'57'' W.), 097° and 277° bearings from the NDB, extending from 12 miles east to 6 miles west of the NDB, excluding that portion within the Lebanon, N.H., and Springfield, Vt., transition areas.

[FR Doc.73–1180 Filed 1–18–73;8:45 am]

[Airspace Docket No. 72–RM–31]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Control Zone

On December 1, 1972, a notice of proposed rule making was published in the FEDERAL REGISTER (37 FR 25531) stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would establish the USAF Academy Airstrip control zone, Colorado Springs, Colo.

Interested persons were given 30 days in which to submit written comments, suggestions, or objections. No objections have been received and the proposed amendment is hereby adopted without change.

Effective date. This amendment shall be effective 0901 G.m.t., March 29, 1973.

(Sec. 307(a), Federal Aviation Act of 1958, as amended, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Aurora, Colo., on January 8, 1973.

M. M. MARTIN,
Director, Rocky Mountain Region.

In § 71.171 (38 FR 351) the following control zone is added:

COLORADO SPRINGS, COLO.

Within a 3-mile radius of USAF Academy Airstrip (latitude 38°58'15'' N., longitude 104°49'00'' W.). This control zone is effective during the specific dates and times established in advance by a notice to Airmen. The effective date and time will thereafter be continuously published in the Airman's Information Manual.

[FR Doc.73–1178 Filed 1–18–73;8:45 am]

[Airspace Docket No. 73–SW–1]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the Fort Worth, Tex. (Carswell AFB), control zone.

The present Fort Worth, Tex. (Carswell AFB), control zone description, in part, includes specific reference to the Benbrook, Tex., VOR. Since the VOR has been decommissioned, it is necessary to amend the control zone description, appropriately deleting all reference to the VOR.

As this amendment imposes no additional burden on any person, notice and public procedures herein are unnecessary.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., March 29, 1973, as hereinafter set forth.

In § 71.171 (38 FR 351), the Fort Worth, Tex. (Carswell AFB), control zone is amended by deleting "within 2 miles each side of the Benbrook VOR 360° radial extending from the 5-mile radius zone to the VOR;" and substituting therefor "within 2 miles each side of the Carswell ILS localizer S course extending from the 5-mile radius zone to 9 miles south of the airport;".

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Fort Worth, Tex., on January 10, 1973.

R. V. REYNOLDS,
Acting Director, Southwest Region.

[FR Doc.73–1176 Filed 1–18–73;8:45 am]

[Airspace Docket No. 72–WA–56]

PART 73—SPECIAL USE AIRSPACE

Extension of Temporary Restricted Areas

On November 21, 1972, a notice of proposed rule making (NPRM) was published in the FEDERAL REGISTER (37 FR 24768) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 73 of the Federal Aviation Regulations that would extend the time of designation of temporary Restricted Areas R–5116A and B from April 1, 1973, through June 30, 1973.

Interested persons were afforded an opportunity to participate in the proposed rule making through the submission of comments. No user objections were received.

In consideration of the foregoing, Part 73 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., March 29, 1973, as hereinafter set forth.

In § 73.51 (38 FR 658) the White Sands Proving Grounds, N. Mex., Restricted Areas R–5116A and R–5116B are amended as follows:

In the time of designation, "March 31, 1973," is deleted and "June 30, 1973," is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on January 12, 1973.

CHARLES H. NEWPOL,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc.73–1175 Filed 1–18–73;8:45 am]

V 38 - 13 JAN 19 73 XUM

[Airspace Docket No. 72-WA-68]

PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES

Change to Area High Route Waypoint

The purpose of this amendment to Part 75 of the Federal Aviation Regulations is to change the name of the Sanderson, W. Va., Waypoint to Rensford, W. Va., in area high route J843R. This action will avoid possible confusion caused by similar sounding names.

Since this amendment is minor in nature and no substantive change in the regulation is effected, notice and public procedure thereon are unnecessary. However, since it is necessary that sufficient time be allowed to permit appropriate changes to be made on aeronautical charts, this amendment will become effective more than 30 days after publication.

In consideration of the foregoing, Part 75 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., March 29, 1973, as hereinafter set forth.

Section 75.400 (38 FR 700 is amended as follows: In J843R "Sanderson, WV. 38°24'04" N. 81°23'29" W. Beckley, WV." is deleted and "Rensford, W. Va. 38°24'04" N. 81°23'29" W. Beckley, W. Va." is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on January 12, 1973.

CHARLES H. NEWPOL,
Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc.73-1174 Filed 1-18-73;8:45 am]

[Docket No. 12495, Amdt. 847]

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Miscellaneous Amendments

This amendment to Part 97 of the Federal Aviation Regulations incorporates by reference therein changes and additions to the Standard Instrument Approach Procedures (SIAP's) that were recently adopted by the Administrator to promote safety at the airports concerned.

The complete SIAP's for the changes and additions covered by this amendment are described in FAA Forms 3139, 8260-3, 8260-4, or 8260-5 and made a part of the public rule making dockets of the FAA in accordance with the procedures set forth in Amendment No. 97-696 (35 FR 5609).

SIAP's are available for examination at the rules docket and at the National Flight Data Center, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591. Copies of SIAP's adopted in a particular region are also available for examination at the headquarters of that region. Individual copies of SIAP's may be purchased from the FAA Public Document Inspection Facility, HQ-405, 800 Independence Avenue SW., Washington, DC 20591 or from the applicable FAA regional office in accordance with the fee schedule prescribed in 49 CFR 7.85. This fee is payable in advance and may be paid by check, draft, or postal money order, payable to the Treasurer of the United States. A weekly transmittal of all SIAP changes and additions may be obtained by subscription at an annual rate of $150 per annum from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Additional copies mailed to the same address may be ordered for $30 each.

Since a situation exists that requires immediate adoption of this amendment, I find that further notice and public procedure hereon is impracticable and good cause exists for making it effective in less than 30 days.

In consideration of the foregoing, Part 97 of the Federal Aviation Regulations is amended as follows, effective on the dates specified:

1. Section 97.23 is amended by originating, amending, or canceling the following VOR-VOR/DME SIAP's, effective March 1, 1973.

Alexandria, La.—Alexandria-Pineville, VOR-1, Original, Canceled.
Baton Rouge, La.—Ryan Airport, VORTAC Runway 22, Amdt. 2.
Crescent City, Calif.—Jack McNamara Field, VOR Runway 11, Amdt. 4.
Crescent City, Calif.—Jack McNamara Field, VOR/DME Runway 11, Amdt. 6.
Crescent City, Calif.—Jack McNamara Field, VOR/DME Runway 35, Amdt. 6.
Dodge City, Kans.—Dodge City Municipal Airport, VOR/DME Runway 32, Original.

Boston, Mass.—Gen. Edward Lawrence Logan International Airport, VOR Runway 22L, Amdt. 11, Canceled.
Boston, Mass.—Gen. Edward Lawrence Logan International Airport, VOR/DME Runway 22L, Original.
Boston, Mass.—Gen. Edward Lawrence Logan International Airport, VOR Runway 27, Amdt. 11.
Boston, Mass.—Gen. Edward Lawrence Logan International Airport, VOR Runway 33L, Amdt. 12.

• • • effective February 1, 1973:

Austin, Tex.—Robert Mueller Municipal Airport, VOR/DME Runway 30L, Amdt. 1, Canceled.

• • • effective January 9, 1973:

Vineland, N.J.—Rudys Airport, VOR-A, Amdt. 4.

2. Section 97.25 is amended by originating, amending, or canceling the following SDF-LOC-LDA SIAP's, effective March 1, 1973:

Battle Creek, Mich.—W. K. Kellogg Regional Airport, LOC (BC) Runway 4, Amdt. 7.
Colorado Springs, Colo.—Peterson Field, LOC (BC) Runway 17, Amdt. 10.
Jefferson City, Mo.—Jefferson City Memorial Airport, SDF Runway 30, Amdt. 1.
Longview, Tex.—Gregg County Airport, LOC/DME (BC) Runway 31, Original.
Rockford, Ill.—Greater Rockford Airport, LOC (BC) Runway 18, Amdt. 6.

• • • effective February 22, 1973:

Boston, Mass.—Gen. Edward Lawrence Logan International Airport, LOC (BC) Runway 22L, Amdt. 5.

• • • effective February 1, 1973:

Fort Wayne, Ind.—Municipal (Baer Field), LOC Runway 4, Amdt. 2, Canceled.

3. Section 97.27 is amended by originating, amending, or canceling the following NDB/ADF SIAP's, effective March 1, 1973:

Battle Creek, Mich.—W. K. Kellogg Regional Airport, NDB Runway 22, Amdt. 7.
Cleveland, Ohio—Cuyahoga County Airport, NDB Runway 23, Amdt. 5.
Fayetteville, Tenn.—Fayetteville Municipal Airport, NDB Runway 1, Amdt. 1.
Parsons, Kans.—Tri City Airport, NDB Runway 35, Original.
Poplar Bluff, Mo.—Earl Fields Memorial Airport, NDB Runway 36, Amdt. 2.
Saipan Island, Mariana Island—Kobler Airport, NDB-A, Amdt. 1.
San Francisco, Calif.—San Francisco International Airport, NDB Runway 19L, Amdt. 4.

• • • effective February 22, 1973:

Boston, Mass.—Gen. Edward Lawrence Logan International Airport, NDB Runway 4R, Amdt. 18.
Boston, Mass.—Gen. Edward Lawrence Logan International Airport, NDB Runway 22L, Amdt. 4.
Boston, Mass.—Gen. Edward Lawrence Logan International Airport, NDB Runway 33L, Amdt. 7.

4. Section 97.29 is amended by originating, amending, or canceling the following ILS SIAP's, effective March 1, 1973.

Battle Creek, Mich.—W. K. Kellogg Regional Airport, ILS Runway 22, Amdt. 8.

Pellston, Mich.—Emmet County Airport, ILS Runway 32, Original.

• • • effective February 22, 1973.

Boston, Mass.—Gen. Edward Lawrence Logan International Airport, ILS Runway 4R, Amdt. 21.
Boston, Mass.—Gen. Edward Lawrence Logan International Airport, ILS Runway 33L, Amdt. 9.

• • • effective February 1, 1973.

Boston, Mass.—Gen. Edward Lawrence Logan International Airport, ILS (BC) Runway 15R, Amdt. 2, Canceled.
Boston, Mass.—Gen. Edward Lawrence Logan International Airport, ILS Runway 15R, Original.
Fort Wayne, Ind.—Municipal (Baer Field), ILS Runway 4, Original.

5. Section 97.31 is amended by originating, amending, or canceling the following Radar SIAP's, effective February 22, 1973:

Boston, Mass.—Gen. Edward Lawrence Logan International Airport, Radar-2, Amdt. 1.

• • • effective January 10, 1973.

Augusta, Ga.—Bush Field, Radar-1, Amdt. 1, Canceled.
Augusta, Ga.—Daniel Field, Radar-1, Original, Canceled.

6. Section 97.33 is amended by originating, amending, or canceling the following RNAV SIAP's, effective March 1, 1973:

Cleveland, Ohio—Cuyahoga County Airport, RNAV Runway 23, Amdt. 1.
Springfield, Mo.—Springfield Municipal Airport, RNAV Runway 13, Original.

(Secs. 307, 313, 601, 1110, Federal Aviation Act of 1958; 49 U.S.C. 1438, 1354, 1421, 1510; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c), 5 U.S.C. 552 (a)(1))

Issued in Washington, D.C., on January 11, 1973.

C. R. MELUGIN, Jr.,
Acting Director, Flight Standards Service.

NOTE: Incorporation by reference provisions in §§ 97.10 and 97.20 (35 FR 5610) approved by the Director of the Federal Register on May 12, 1969.

Title 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER A—GENERAL

PART 2—ADMINISTRATIVE FUNCTIONS, PRACTICES, AND PROCEDURES

Subpart H—Delegations of Authority

AUTHORITY TO TERMINATE EXEMPTIONS FOR NEW DRUGS FOR INVESTIGATIONAL USE

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 701(a), 52 Stat. 1055; 21 U.S.C. 371(a)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120), Part 2 is amended to provide for redelegations of authority regarding the termination of exemptions for new drugs for investigational use in human beings and in animals.

Accordingly, § 2.121 is amended by adding a new paragraph (u), as follows:

§ 2.121 Redelegations of authority from the Commissioner to other officers of the Administration.

• • • • • •

(u) *Delegations regarding termination of exemptions for new drugs for investigational use in human beings or in animals.* (1) The Director and Deputy Director of the Bureau of Drugs are authorized to perform all the functions of the Commissioner of Food and Drugs with regard to the termination of exemptions for new drugs for investigational use in human beings under § 130.3 and in animals under § 130.3a of this chapter, except those which pertain to a biological product subject to the licensing provisions of section 351 of the Public Health Service Act (42 U.S.C. 262). The Director and Deputy Director of the Office of Scientific Evaluation of the Bureau of Drugs, and the Directors of Divisions of the Office, are authorized to notify sponsors and invite correction prior to termination action on such exemptions.

(2) The Director and Deputy Director of the Bureau of Biologics are authorized to perform all the functions of the Commissioner of Food and Drugs with regard to the termination of those exceptions for new drugs for investigational use in human beings under § 130.3 and in animals under § 130.3a of this chapter pertaining to a biological product subject to the licensing provisions of section 351 of the Public Health Service Act (42 U.S.C. 262).

(3) The Director and Deputy Director of the Bureau of Veterinary Medicine are authorized to perform all the functions of the Commissioner of Food and Drugs with regard to the termination of exemptions for new animal drugs for investigational use in animals under § 135.3 of this chapter.

Effective date. This order shall be effective January 19, 1973.

(Sec. 701(a), 52 Stat. 1055; 21 U.S.C. 371(a))

Dated: January 12, 1973.

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

PART 19—CHEESES, PROCESSED CHEESES, CHEESE FOODS, CHEESE SPREADS, AND RELATED FOODS

Cottage Cheese; Definitions and Standards of Identity; Correction

In FR Doc. 73-481 appearing at page 1176 in the FEDERAL REGISTER of Wednesday, January 10, 1973, § 19.530(c)(2) is corrected to read as follows:

§ 19.530 Cottage Cheese; identity; label statement of optional ingredients.

• • • • • •

(c) • • •

(2) The statement "not less than ____ percent milkfat" or "____ percent milkfat minimum", the blank being filled in with the whole number that is closest to, but does not exceed, the actual fat content of the product. This statement of fat content shall appear in letters not less than one-half of the height of the letters in the phrase specified in subparagraph (1) of this paragraph, but in no case less than one-eighth of an inch in height.

• • • • • •

Dated: January 12, 1973.

PART 121—FOOD ADDITIVES

Subpart F—Food Additives Resulting From Contact with Containers or Equipment and Food Additives Otherwise Affecting Food

STYRENE BLOCK POLYMERS WITH 1,3-BUTADIENE

The Commissioner of Food and Drugs having evaluated the data in a petition (FAP 1B2591) filed by Shell Chemical Co., a division of Shell Oil Co., 2525 Murworth Drive, Houston, TX 77025, and

V38-13 JAN 19 73 XUM

other relevant material, concludes that the food additive regulations should be amended as set forth below to provide for the safe use of styrene block polymers with 1,3-butadiene as articles or as components of articles intended for use in contact with food.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 121 is amended by adding to Subpart F the following new section:

§ 121.2622 Styrene block polymers with 1,3-butadiene.

Styrene block polymers with 1,3-butadiene identified in paragraph (a) of this section may be safely used as articles or as components of articles intended for use in contact with food, subject to the provisions of this section.

(a) For the purposes of this section, styrene block polymers with 1,3-butadiene are those produced by the catalytic solution polymerization of styrene and 1,3-butadiene such that the following specifications are met:

(1) The finished polymers have a minimum molecular weight of 29,000;

(2) The finished polymers are completely soluble in toluene; and

(3) The finished polymers have glass transition points at −86° C. to −80° C. and at 92° C. to 98° C., as determined by ASTM Method D 2236-70,[1] modified by using a forced resonant vibration instead of a fixed vibration and by using frequencies of 25 to 40 cycles per second instead of 0.1 to 10 cycles per second.

(b) Styrene block polymers with 1,3-butadiene may be used as articles or as component of articles that contact food of types I, II, IV-B, VI, VII-B, and VIII identified in Table 1 in § 121.2526(c) under conditions of use D, E, F, and G described in Table 2 in § 121.2526(c).

(c) A 0.075-inch-thick sample of the finished copolymer when extracted in sandwich form shall meet the following extractives limitations as determined by methods described in § 121.2526(d)(3):

(1) The copolymer when extracted with distilled water at reflux temperature for 30 minutes yields total extractives not to exceed 0.025 milligrams per square inch of surface.

(2) The copolymer when extracted with 50 percent ethanol in distilled water at 150° F. for 2 hours yields total extractives not to exceed 0.005 milligrams per square inch of surface.

(d) The provisions of this section are not applicable to butadiene-styrene copolymers listed in other sections of this Subpart F.

Any person who will be adversely affected by the foregoing order may at any time on or before February 20, 1973, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, Md. 20852, written objections thereto in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof. Received objections may be seen in the above office during working hours, Monday through Friday.

Effective date. This order shall become effective on January 19, 1973.

(Sec. 409(c)(1), 72 Stat. 1786; 21 U.S.C. 348(c)(1))

Dated: January 10, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

NOTE: Incorporation by reference provisions approved by the Director of the Federal Register January 15, 1973.

[FR Doc.73-1159 Filed 1-18-73;8:45 am]

SUBCHAPTER F—REGULATIONS UNDER SPECIFIC ACTS OF CONGRESS OTHER THAN THE FOOD, DRUG, AND COSMETIC ACT

PART 278—REGULATIONS FOR THE ADMINISTRATION AND ENFORCEMENT OF THE RADIATION CONTROL FOR HEALTH AND SAFETY ACT OF 1968

Transfer of Regulations

The Bureau of Radiological Health, Environmental Health Service, was assigned to the Food and Drug Administration on May 25, 1971 (36 FR 12803). The formal statement of organization, functions, and delegation of authority for the Bureau of Radiological Health, appearing in the FEDERAL REGISTER of October 3, 1972 (37 FR 20738), establishes the operational framework for the Bureau of Radiological Health, Food and Drug Administration, and the justification for transferring the regulations pertaining to radiological health under Part 78 of Title 42 of the Code of Federal Regulations to the newly established Part 278 of Title 21 of the Code of Federal Regulations to reflect the organizational changes.

Therefore, Part 278 is hereby added to Chapter I of Title 21 of the Code of Federal Regulations to provide for carrying out the functions and responsibilities of the Bureau of Radiological Health, Food and Drug Administration, regarding radiological health. These regulations, formerly appearing as Part 78 of Title 42 of the Code of Federal Regulations, are hereby transferred without change.

Effective date. This transfer of regulations becomes effective on January 19, 1973. Product labeling referring to 42 CFR Part 78 shall be revised to refer to 21 CFR Part 278, for all newly manufactured products subject to these regulations, as soon as possible, but in no event later than December 31, 1973.

Dated: January 12, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

Title 24—HOUSING AND URBAN DEVELOPMENT

Chapter II—Office of Assistant Secretary for Housing Production and Mortgage Credit—Federal Housing Commissioner (Federal Housing Administration), Department of Housing and Urban Development

[Docket No. R-73-184]

PART 275—LOW-RENT PUBLIC HOUSING

Prototype Cost Limits for Public Housing

In the FEDERAL REGISTER issued for Wednesday, May 17, 1972 (37 FR 9902), prototype per unit cost schedules were published pursuant to section 15(5) of the Housing and Urban Development Act of 1937. Consideration of subsequent factual project cost data received from the Atlanta Regional Office indicates that prototype per unit cost schedules should be established for Intermediate Care Facilities for Memphis, Tenn.

Inasmuch as the new prototype cost schedule cannot be utilized until the costs themselves become effective by publication in the FEDERAL REGISTER, continuity of contract approvals requires the immediate publication of this material. Accordingly, it is impracticable to provide notice and public procedure with respect to those cost limits in accordance with the Department's adopted publications policy (24 CFR Part 10), and good cause exists for making them effective on January 19, 1973.

For the foregoing reasons the following change is hereby made to the schedule as originally published in Volume 37 of the FEDERAL REGISTER:

1. On page 9930 add the Intermediate Care Facilities prototype per unit cost shown on the table set forth hereinafter, entitled "Prototype Per Unit Cost Schedule." (Sec. 7(d) of Dept. of HUD Act, 42 U.S.C. 3535(d).)

Effective date. This amendment is effective on January 19, 1973.

JOHN L. GANLEY,
Deputy Assistant Secretary-Commissioner.

PROTOTYPE PER UNIT COST SCHEDULE

REGION IV—UNIT TYPE

Memphis, Tenn.	Private	Semi-private	3-bed ward	4-bed ward
Intermediate care facilities	12,100	14,350	18,500	24,300

Title 32—NATIONAL DEFENSE

Chapter XVII—Office of Emergency Preparedness

PART 1705—RULES GOVERNING PUBLIC ACCESS TO RECORDS OF THE OFFICE OF EMERGENCY PREPAREDNESS

The Office of Emergency Preparedness has reviewed its regulations implementing the Public Information Section of the Freedom of Information Act (5 U.S.C. 552) with a view toward simplifying procedural requirements and facilitating public access to the records of that office. In addition, it is believed that certain recommendations made by the Administrative Conference of the United States and the Foreign Operations and Government Information Subcommittee of the Committee on Government Operations of the House of Representatives are appropriate for adoption by the Office of Emergency Preparedness.

Accordingly, Part 1705, Rules Governing Public Access to Records of the Office of Emergency Preparedness, is revised as follows:

Sec.
1705.1 Statutory requirements.
1705.2 Purpose.
1705.3 Requests for records.
1705.4 Agency handling of requests.
1705.5 Notification.
1705.6 Records of other agencies.
1705.7 Appeals.
1705.8 Fees.
1705.9 Authentication of records.

AUTHORITY: 5 U.S.C. 552.

§ 1705.1 Statutory requirements.

The Public Information Section of the Freedom of Information Act (5 U.S.C. 552(a)(3)) requires each agency, upon request for identifiable records made in accordance with published rules stating the time, place, fees to the extent authorized by statute, and procedure to be followed, to make such records promptly available to any person. That provision, however, does not apply to matters that are—

(a) Specifically required by Executive order to be kept secret in the interest of the national defense or foreign policy;

(b) Related solely to the internal personnel rules and practices of an agency;

(c) Specifically exempted from disclosure by statute;

(d) Trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(e) Interagency or intraagency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency;

(f) Personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;

(g) Investigatory files compiled for law enforcement purposes except to the extent available by law to a party other than an agency;

(h) Contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions; or

(i) Geological and geophysical information and data, including maps, concerning wells.

§ 1705.2 Purpose.

This part is designed to provide the rules referred to in 5 U.S.C. 552(a)(3) and facilitate public access to records of the Office of Emergency Preparedness.

§ 1705.3 Requests for records.

(a) Requests for access to records shall be in writing and may be filed in person or by mail with the Assistant to the Director for Congressional and Public Affairs at the headquarters of the Office of Emergency Preparedness between 9 a.m. and 5:30 p.m., Monday through Friday, except holidays.

(b) Requests for access to records may also be filed at any of the OEP Regional Offices. Regional Office addresses are listed in Part 1701 of this chapter.

(c) Requests for access to records may be made using Form OEP 174, copies of which are available in the Office of the Assistant to the Director for Congressional and Public Affairs as well as in the Office of the Director of each OEP Regional Office. This standard form is offered as an optional aid only; the Agency will accept any written request that sufficiently identifies the desired material.

§ 1705.4 Agency handling of requests.

(a) Subject to the provisions of § 1705.8, the Assistant to the Director for Congressional and Public Affairs, or the Regional Director concerned, shall promptly cause the requested record to be located and made available to the requestor unless it appears that the desired record may be subject to exemption under 5 U.S.C. 552(b). (See categories listed in § 1705.1.)

(b) If it appears that the requested record may fall within one of the exempt categories, the matter shall be referred to the Assistant to the Director for Congressional and Public Affairs.

(c) If the Assistant to the Director for Congressional and Public Affairs determines that the record is subject to exemption under 5 U.S.C. 552(b) and should, in the public interest, be withheld from public inspection, he shall promptly notify the requestor as provided in § 1705.5 of this part.

§ 1705.5 Notification.

Notice of denial of access to any record shall be in writing and shall include an explanation of the reasons for such denial, including specific citations to the relevant sections or subsections of the Freedom of Information Act. Such notice shall also inform the requestor of his right of appeal to the Director pursuant to § 1705.7.

§ 1705.6 Records of other Agencies.

In any case in which a person requests a record which originated in another Agency and which is in the custody of the Office of Emergency Preparedness, he shall be advised to submit his request to the other Agency involved. However, if in any such case, the other Agency consents to making the record involved available, such copy shall be made available to that person under the same terms and conditions as records of the Office of Emergency Preparedness are made available under this part.

§ 1705.7 Appeals.

Any person aggrieved by any determination made or action taken pursuant to the foregoing provisions of this part may request the Director of the Office of Emergency Preparedness to review that determination or action. No specific form is prescribed for this purpose, and a letter or other written statement setting forth the pertinent facts shall be sufficient for this purpose. The Director may require the person involved to present additional information in support of his request for review. The Director of the Office of Emergency Preparedness will promptly consider each such request for review and notify the person involved of his decision.

§ 1705.8 Fees.

When a requested record not withheld pursuant to § 1705.4(c) can be made available for inspection or reproduced at no cost or at nominal cost to the Agency, such record shall be provided without charge. If a copy of such record cannot be made at nominal cost, the Assistant to the Director for Congressional and Public Affairs shall make such copy available for copying or reproduction by the requestor or shall insure that a copy can be obtained by the requestor at a reasonable cost.

§ 1705.9 Authentication of records.

(a) Notice is hereby given that no seal has been prescribed for the Office of Emergency Preparedness.

(b) The Assistant to the Director for Administration is hereby authorized to designate an official custodian and deputy custodian of the records of the Office of Emergency Preparedness, and such designees are authorized to attest or otherwise authenticate copies of such records for use in judicial proceedings or other official matters.

(c) Such designees and the Assistant to the Director for Administration are authorized to issue such statements, certificates, or other documents as may be

V 38 - 13 JAN 19 73 XUM

required in connection with the authentication of copies of records so attested for use in judicial proceedings or other official matters.

(d) Such designees and the Assistant to the Director for Administration are also authorized to issue such statements, certificates, or other documents as may be required in connection with judicial proceedings or other official matters to show that after diligent search of the records of the Office of Emergency Preparedness no record or entry of a specified tenor has been found to exist in such records. (See Rule 44, Federal Rules of Civil Procedure for the U.S. District Courts.)

The provisions of this part shall become effective on January 19, 1973.

Dated: January 15, 1973.

G. A. LINCOLN,
Director,
Office of Emergency Preparedness.

[FR Doc.73-1173 Filed 1-18-73;8:45 am]

Title 32A—NATIONAL DEFENSE, APPENDIX

Chapter X—Office of Oil and Gas, Department of the Interior

[Oil Import Reg. 1 (Revision 5), Amdt. 51]

OI REG. 1—OIL IMPORT REGULATION

No. 2 Fuel Oil Imports

In view of the estimates of the increasingly tight demand-supply situation with respect to No. 2 fuel oil in Districts I–IV and in order to contribute to the alleviation of temporary supply dislocations as rapidly as possible, restrictions upon No. 2 fuel oil are being relaxed. In view of the urgency of this action it is not considered necessary to give notice of proposed rule making respecting this amendment, and it shall become effective immediately.

Accordingly, a new section 13B is added to Oil Import Regulation 1 (Revision 5), as amended.

Dated: January 17, 1973.

ROGERS C. B. MORTON,
Secretary of the Interior.

Concur: January 17, 1973.

G. A. LINCOLN,
Director, Office of Emergency Preparedness.

Sec. 13B Emergency finished products allocation.

(a) For the purpose of this section, (1) the term "No. 2 fuel oil" means a finished product which has the physical and chemical characteristics as set forth in subparagraph (1), paragraph (a) of section 30 of this regulation; and (2) the term "eligible applicant" means any person in the business of selling No. 2 fuel oil in Districts I–IV.

(b) (1) For the period January 1, 1973, through April 30, 1973, hereafter referred to as the "period" within the allocation period which begins January 1, 1973, No. 2 fuel oil may be imported by eligible applicants who comply with the provisions of this section.

(2) For the "period," the Director shall make available a license for imports of No. 2 fuel oil into Districts I–IV to any eligible applicant who certifies that such imports are required to meet obligations under contracts with, or purchase orders from, customers in Districts I–IV.

(3) An application for a license under this section may be filed in letter or telegraphic form at any time during the "period."

(c) (1) The Director shall process applications in the sequence in which they are received and make available licenses in the quantity which the applicant has certified in accordance with paragraph (b)(2) of this section.

(2) The Director shall issue a license or licenses to eligible applicants specifying the amount of No. 2 fuel oil which may be imported into Districts I–IV. All licenses issued pursuant to this section shall be valid only during the period January 1, 1973, through April 30, 1973. No licenses issued pursuant to this section may be sold, assigned, or otherwise transferred. No. 2 fuel oil imported pursuant to a license issued under this section must not be further processed in any manner, including blending or mixing with other petroleum products, by mechanical means.

[FR Doc.73-1317 Filed 1-17-73;4:25 pm]

Title 33—NAVIGATION AND NAVIGABLE WATERS

Chapter I—Coast Guard, Department of Transportation

[CGD 72-24R]

PART 110—ANCHORAGE REGULATIONS

Subpart A—Special Anchorage Areas

SAN LUIS OBISPO BAY, CALIF.

This amendment to the anchorage regulations of San Luis Obispo Bay, Calif., establishes an additional special anchorage area and deletes a portion of the existing special anchorage area which extends partially into waters governed by the International Rules of the Road (33 U.S.C. 1051–1094). In special anchorage areas, vessels under 65 feet in length, when at anchor, are not required to carry or exhibit anchor lights.

This amendment is based on a notice of proposed rule making published in the Wednesday, February 9, 1972, issue of the FEDERAL REGISTER (37 FR 2890) and Public Notice No. 12-43A issued by the Commander, Twelfth Coast Guard District on February 18, 1972.

One petition was received signed by 28 persons concerning the proposed Special Anchorage A-2. The petitioners did not object to the establishment of Special Anchorage A-2, but questioned the authority of local governments to manage the anchorage. The establishment of a special anchorage area merely relaxes the lighting requirements concerning anchor lights for vessels under 65 feet in length, but does not otherwise impair local authority to manage the anchorage.

In consideration of the foregoing, Part 110 of Chapter I of Title 33 of the Code of Federal Regulations is amended by revising § 110.120 to read as follows:

§ 110.120 San Luis Obispo Bay, Calif.

(a) *Area A–1.* Area A–1 is the water area bounded by the San Luis Obispo County wharf, the shoreline, a line drawn from the southernmost point of Fossil Point to latitude 35°10'18.5" N., longitude 120°43'38.5" W.; thence to the southeast corner of the San Luis Obispo County wharf.

(b) *Area A–2.* Area A–2 is the water area enclosed by a line drawn from the outer end of Whaler Island breakwater at latitude 35°09'22" N., longitude 120°44'56" W., to the Marre' Chimney at latitude 35°10'56" N., longitude 120°44'31" W.

NOTE: The Port San Luis Harbor District prescribes local regulations for mooring and boating activities in these areas.

(Sec. 1, 30 Stat. 98, as amended, sec. 6(g)(1)(B), 80 Stat. 937; 33 U.S.C. 180, 49 U.S.C. 1655(g)(1)(B), 49 CFR 1.46(c)(2) (36 FR 10160))

Effective date. This amendment shall become effective on February 23, 1973.

Dated: January 15, 1973.

W. M. BENKERT,
Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Environment and Systems.

[FR Doc.73-1209 Filed 1-18-73;8:45 am]

Chapter II—Corps of Engineers, Department of the Army

[ER 1105-2-502]

PART 209—ADMINISTRATIVE PROCEDURE

Public Meetings

In the interest of promoting public participation in connection with Civil Works planning activities and regulating the uses of navigable waters, the Office of the Chief of Engineers has prepared and issued an Engineer Regulation on public meetings as one important means of achieving this public participation objective. The regulation is to be used by all elements of the Corps of Engineers having such Civil Works responsibilities and is effective as of December 4, 1972.

A proposed Engineer Regulation on public meetings was published in the FEDERAL REGISTER for public comment on October 14, 1972 (37 FR 21818). All comments received were considered prior to issuing the regulation, which adds a new § 209.405 to 33 CFR Chapter II reading as follows:

§ 209.405 Public meetings.

(a) *Purpose.* This section sets forth the policy, responsibility, and guidance for holding formally organized, announced, and recorded public meetings in connection with all Civil Works planning activities and regulating the uses of navigable waters.

(b) *Applicability.* The section applies to all Corps of Engineers elements having responsibilities for Civil Works planning and for regulating the uses of navigable waters.

(c) *Policy.* In keeping the policy of the Chief of Engineers to conduct his Civil Works program in an atmosphere of public understanding, trust, and mutual cooperation, all interested individuals and agencies are to be informed and afforded an opportunity to be fully heard and their views considered in arriving at conclusions, decisions, and recommendations in the formulation of civil works proposals, plans, and projects and on the proposed uses of navigable waters. Formally organized and announced public meetings provide one important means of accomplishing this objective, and they will be held as specified herein. They are not, however, a substitute for other desirable public participation and information measures.

(d) *Definitions.* As used herein, the terms "public meeting" and "announcement of public meeting" refer to those public meetings which are formally organized, announced, and recorded; they do not include other smaller and less formally organized group discussion meetings which may also be open to the public and which are the subject of other guidance. However, it is emphasized that formality is intended only in respect to organization and announcement. The atmosphere of the meetings should be informal to the extent practicable, in keeping with the concept of public involvement and the need to encourage and develop more meaningful, two-way communication.

(e) *Purposes of public meetings.* The primary purpose of public meetings is to help to insure that solutions to water resources problems and the uses of navigable waters satisfy the needs and preferences of the people to the maximum degree possible within the bounds of local, State, and Federal interests, responsibilities, and authorities. More specifically, the purposes of public meetings are to inform the public about studies and proposals related to water resources development and the uses of navigable waters; to give all interested persons an opportunity to fully and publicly express their views concerning such studies and proposals; to obtain and exchange information which will assist all those involved in arriving at sound conclusions and recommendations; and to contribute to interagency coordination.

(f) *Holding of public meetings.* Public meetings will be held when needed, in keeping with the policy and purposes stated herein, generally as follows:

(1) For specifically authorized planning studies:

(i) An initial meeting will be held early in the course of each study to advise on the nature and scope of the study, to open lines of communication, to listen to the needs and views of the public, and to identify interested individuals and agencies.

(ii) A formulation stage meeting will be held during the course of each study when all alternative solutions are reasonably known, generally after the completion of preliminary studies but before a plan has been tentatively selected. A meeting at this stage is critical, and its scheduling and conduct will be given careful attention. A major purpose of this meeting is to present the results of preliminary studies, including the advantages and disadvantages of the various alternatives to the extent that such information has been developed, and to further develop public views and desires, particularly as they relate to the various alternatives. If the preliminary studies reveal that further studies are unwarranted, a public meeting at this stage will be held only at the discretion of the reporting officers, giving appropriate consideration to public participation concepts, including unusual circumstances.

(iii) A late stage meeting will be held after detailed studies but before report completion. Findings of the detailed studies, including the rationale for any proposed solution, and the tentative recommendations of the reporting officer will be presented. In the event that, due to the nature of the study, the formulation stage meeting was, in effect, also a late stage meeting and the proposed plan was a foregone conclusion at that meeting, a late stage meeting may be dispensed with, if approved by the Division Engineer. However, it must be apparent that no residual public meeting requirement is being imposed on the Board of Engineers for Rivers and Harbors. In all cases where no structural improvements or similar investments by the Corps of Engineers are to be recommended, a late stage public meeting will be held only at the discretion of the reporting officers, giving appropriate consideration to public participation concepts, including unusual circumstances.

(iv) An additional late stage meeting will be held for those studies where there have been no recent public meetings and there are indications that public acceptance may have changed materially or that further public views should be sought. Similarly, an additional late stage meeting will be held in those cases where there have been substantive changes in the tentative plan previously presented.

(2) For small planning studies under continuing authorities, the number and timing of the meetings are left to the discretion of the reporting officer due to the simplicity and smallness of such studies, except that at least one public meeting will be held during the course of each study under the authority of "section 103," "107," or "205" if structural improvements or similar investments by the Corps are indicated. Normally, this meeting should be held in the detailed study stages; however, other forms of public participation should be used throughout the study. For studies under other continuing authorities, such as for clearing and snagging, other forms of public participation should be relied upon to the extent practicable, but public meetings may be held if the reporting officer considers them desirable in specific instances.

(3) For studies of lock and dam replacements under section 6 of the River and Harbor Act of March 3, 1909, a formulation stage and a late stage meeting will be held as described in paragraph (f)(1)(ii) and (iii) of this section. However, for relatively small studies the meetings will be held as described for small studies in paragraph (f)(2) of this section.

(4) For fish and wildlife studies under section 2 of the Fish and Wildlife Coordination Act of August 12, 1958, for projects not completed before that date, a public meeting will be held in connection with the consideration of any wildlife management plan proposing the authorization of additional land for wildlife purposes. When appropriate, such meetings will be held jointly with the Fish and Wildlife Service which will present its plan at the meeting.

(5) For other planning studies not included in any of the above paragraphs, such as modification studies of completed projects under authority of section 216 of the 1970 Flood Control Act, mitigation studies of navigation effects under section 111 of the 1968 River and Harbor Act, and Phase I of General Design Memorandums, the number and timing of public meetings will be as considered desirable by the reporting officers, in keeping with the policy and purposes stated herein and giving consideration to similarities with the study categories in the previous subparagraphs. However, at least one public meeting will be held in connection with the preconstruction planning of authorized projects. For all studies, other forms of public participation should be utilized to the extent practicable.

(6) Public meetings may be held by the Board of Engineers for Rivers and Harbors prior to any final action by the Board when non-Federal interests request such meetings in their response to the announcement of the public release of a field report and the Board decides favorably on such requests. Normally, there will be no need for such meetings if adequate meetings have been held by the reporting officers.

(7) Public meetings will be held in connection with proposed actions concerning the uses and control of navigable waters whenever there appears to be sufficient public interest and it is likely that the meeting will develop information that will be of assistance in evaluating the proposed action. Such actions include applications for permits for work in or affecting navigable waters, designation of proposed danger zones and restricted areas, the promulgation of regulations, and proposals for the establishment or revision of harbor lines.

V 38 - 13 JAN 19 73 XUM

(8) A public meeting should be held in any special situation where either the public or the Corps, or both, would benefit by the exchange of views and information. Possibilities include situations of unusual time lapse or unexpected developments since the last public meeting, unusual interest or controversy, and official requests by congressional interests or responsible non-Federal authorities for meetings which would fulfill the policy and purposes stated herein.

(g) *Conduct of public meetings.* All public meetings will be fair and impartial two-way communications. As such, they will be conducted as informally and simply as possible, and make liberal use of uncluttered graphics, slides, and displays. The use of high-quality audiovisual aids may be used when available. Public meetings will normally be chaired by the senior officer or a suitable representative in view of the importance of these meetings. The meetings may be held jointly with other agencies when desirable but will be chaired by the Corps. This does not, however, preclude Corps participation in meetings held by others.

(1) At the beginning of a public meeting, the presiding officer will explain the purpose of the meeting. Subsequently, he will summarize the study, proposed uses of navigable waters, or other situation for which the meeting is being held. In the case of planning studies, this will include, as appropriate, the problems and needs under study; the status of pertinent plans, programs, and improvements; the programs or improvements desired by various interests; the formulation of a plan or solution which considers all appropriate measures and is not limited to considerations of Federal construction measures; participation and coordination in such formulation; plan accomplishments and effects, both advantageous and disadvantageous; and Federal and non-Federal responsibilities. In discussing formulation, national objectives will be cited as well as technical and economic criteria and environmental and social considerations. All plausible alternatives should be mentioned and commented upon, however infeasible in the specific case. In particular, active participation by others in the study and coordination will be explained to clearly demonstrate the cooperative nature of the effort. Supporting presentations will be given by staff members, as appropriate.

(2) Following the presentations, or at suitable points, all interested persons will be given an oportunity to present their views. In the interest of informality and equity, structured orders of presentation should be avoided. For example, officials and private individuals could be given opportunity to speak in random order. All communications received for placement into the meeting record will be read or summarized to the extent practicable.

(h) *Arrangements for public meetings.* Meetings will be held in the locality or localities most convenient to the people of the area under investigation, and local convenience will be recognized in selecting the place, date, and hour. Prior to final selection, however, interested members of Congress should be consulted regarding the schedule and their intent to participate. Individuals and organized groups, including those with conservation and environmental interests, whose local knowledge renders their opinion of value should be encouraged to participate in order to develop a good understanding of diverse views. In the case of public meetings by the Board of Engineers for Rivers and Harbors, such meetings may be held in Washington, D.C., if the Board considers this more advantageous to the purpose of the meeting. When Board public meetings are held in the field, the appropriate field office will act as liaison, make all pertinent arrangements, and carry out such meeting activities as requested by the Board.

(i) *Advice and information to participants.* Good public relations practices will be observed and, to the extent possible, those interested should be advised to organize their case so that all pertinent aspects of their problem may be rapidly and effectively presented. In particular, those interested should be encouraged to submit detailed data on the justification of their requests. Written information suitable to clarify the issues for those interested, assist them in preparing factual material and expressions of views or opinions, and indicate possible alternative courses of action should be supplied to them in advance of a meeting. Without such advance information, participants will often be unable to contribute in full measure to the meeting, and they may feel that their views have not been adequately considered. Insofar as practicable, advice and advance information to those interested should be presented in the announcement or as enclosures thereto. Such enclosures may be brochures or other materials setting forth environmental information, alternatives and their pros and cons, and other information such as listed in paragraph (g)(1) of this section.

(j) *Announcements of public meetings.* Announcements of public meetings will be issued, dated, and signed by the senior officer concerned. In the case of preauthorization studies, they may be similar to the suggested wording in Appendix A, tailored to fit the situation and status of the study. More drastic modification will be needed for special meetings or situations. In any event, the suggested wording should not be unreasonably adhered to. Moreover, the announcements should be written in layman's language and be informative and inviting in format, appearance, and content. Their tone should reflect a sincere intent to produce a mutual exchange of views and information. In this regard, the announcements should in all cases avoid implications that final decisions have been made.

(k) *Distribution of announcements.* Announcements of public meetings will be distributed directly to all interested individuals and agencies, including the press, radio, and television stations, about 1 month in advance of the meeting, preferably longer in the case of deep-draft waterway and harbor studies. Shorter periods may be used for small, simple studies. Advance notification will be given Members of Congress and Governors of the States. The announcements may be inserted as an advertisement subject to the requirements for authority to advertise. Copies will also be supplied to Postmasters and other agencies where they may be posted for public information. An additional notice to newspapers, radio, and television stations should be made about 3 days prior to the meeting. Distribution will be accomplished from a prepared distribution list for which up-to-date records will be kept of individuals or agencies desiring copies of announcements or which may be interested or affected. Special effort will be made to identify those which may be interested or affected in each situation and to develop pertinent distribution lists; outdated or stereotyped lists will be avoided. Distribution of the announcement will include the following:

	Quantity
Members of Congress concerned: (One copy of announcement and mailing list to home address and one copy of each to Washington, D.C., office.) (Members of Congress will be listed under a heading "Congressional," with Senators in order of seniority grouped by States, first, followed by Representatives in same manner. Seniority is based upon latest period of continuous service and can be determined from the Congressional Directory.)	2.
Governor or designated representative of States affected (with mailing list).	1.
Chief of Engineers: HQDA (DAEN-CWP-__) Washington, D.C. 20314 except, in the case of permits, one copy to (DAEN-CWO-N).	2.
Board of Engineers for Rivers and Harbors.	1.
Division Engineer	2 (or as requested).

(l) *Record of meeting.* A complete record of public meetings will be taken stenographically and by electrical transcription, and a written record will be made therefrom. Such records should be reasonably accurate but need not be precise legal documents. Study reports sent by reporting officers to the Board of Engineers for Rivers and Harbors will be accompanied by one copy of the pertinent written record, including the announcement and list of persons notified. The Board will forward these materials to the Chief of Engineers upon completion of Board action on the report. In all other cases, the materials will be supplied to the Chief of Engineers in one copy at the time of submission of a study or permit report or other primary document on the subject for which the meeting was held. Each record will be accompanied by an index and a very simple digest indicating major characteristics such as attendance, reactions, and major concerns. Copies of the record for representatives of other agencies participating in joint meetings will be supplied in accordance with any arrangements made by them with the responsible senior officer. Others will be advised that they may arrange for copies of the record at the cost of reproduction.

(m) *Joint public meetings.* Representatives of other Federal agencies or non-Federal public agencies may actively participate in joint public meetings whenever such organizations have a particular interest and express a desire to participate. Notification of a desire to participate and the subsequent designation of a participant should be accomplished officially by written communications from a responsible level. It should be understood that the agency representative designated should be knowledgeable in the subject of the meeting, that the Corps of Engineers is responsible for arrangements and procedure, that the meeting will be conducted by the Corps presiding officer, and that the meeting will be reasonably limited to Corps purposes for the meeting. If the participating agency's interest requires extension of the meeting or additional meetings, the additional expense will be the responsibility of that agency.

(n) *Funding.* The expense of public meetings will be charged to the pertinent program, project, or study for which they are being held.

APPENDIX A

SUGGESTED WORDING FOR ANNOUNCEMENT OF PUBLIC MEETING ON A PREAUTHORIZATION STUDY

Announcement of public meeting on (For) _____ (indicate purpose, study, and study area).

Meeting to be held at _____ on _____ (Time) _____ (Date) in auditorium of

_____

_____ (Street Address)

_____ (City and State)

The Corps of Engineers is studying the (describe study and its purpose, and identify study area). The study was requested by the U.S. Congress in the (identify and cite or paraphrase appropriate acts or resolutions, or portions thereof).

In order that the study may be responsive to the desires and needs of everyone affected, a public meeting will be held as indicated above. We invite you to attend the meeting and to participate in the exchange of information concerning the study, the water resource and related problems involved, and possible solutions. We are also interested in knowing about ecological and environmental conditions and problems in the study area. A map of the study area is attached.

Generally, the problems and needs that we are aware of (very briefly list problems and needs, status of existing plans and improvements, improvements desired, and possible solutions, tailored to suit the situation and status of the study. An inclosed brochure may be desirable.)

All interested individuals, groups, and agencies are invited and urged to be present or represented at this meeting. Everyone will be given an opportunity to express his views and furnish specific data on all aspects of the study, including technical, economic, social, and ecological and environmental material. Statements should be supported by factual information insofar as practicable. (Identify matters or data on which information is particularly being sought.)

For accuracy of record, all important facts and statements should be submitted in writing. Written statements may be handed to the Chairman at the meeting or may be mailed beforehand to our office. Mailed statements should indicate that they are in response to this announcement. All statements, both oral and written, will become part of the official record on this study and will be made available for public examination.

Full consideration will be given to the views presented prior to making a recommendation to higher authority. However, this cannot be taken as an indication that the Federal Government will undertake any improvements or programs. Although the study may result in recommendations for undertakings by the Federal Government, their accomplishment would depend upon subsequent authorization and funding by the Congress.

Please bring this announcement to the attention of anyone you know who is interested.

(List Inclosures.)

[ER 1105-2-502, Dec. 4, 1972] (Sec. 3012, 70A Stat. 157; 10 U.S.C. 3012)

For the Adjutant General.

E. W. GANNON,
Lieutenant Colonel, U.S. Army,
Chief, Plans Office, TAGO.

Title 39—POSTAL SERVICE

Chapter I—U.S. Postal Service

PART 122—ADDRESSES

Fees for Correcting Mailing Lists for Members of Congress and Federal Agencies

This amendment to § 122.5 of this title requires that Members of Congress and Federal agencies pay the U.S. Postal Service for mailing list correction services at the same rates charged other organizations. It also establishes the collection procedures to be followed by Postmasters when such services are rendered to Members of Congress and Federal agencies.

1. Paragraphs (a) (1) and (4) § 122.5 of this title is amended to read as follows:

§ 122.5 Mailing list services.

(a) *Correction of mailing lists*—(1) *Service available.* Mailing lists submitted by Members of Congress, Federal agencies, departments of State governments, municipalities, religious, fraternal, and recognized charitable organizations and mailing lists used by concerns or persons for the solicitation of business by mail will be corrected as frequently as requested. Postal employees must not compile mailing lists, including occupant lists. Persons other than postal employees may not copy or record by any other means names or addresses from city or rural carrier cases.

• • • • •

(4) *Charges.* (i) The minimum charge for each list corrected is $1. For lists of more than 20 names or addresses, the charge is 5 cents per name or street address including individual apartments. Where rural routes have been consolidated or changed to another post office, no charge will be made for correction if the list contains only names of persons residing on the route or routes involved.

(ii) Except for authorized users of official mail, payment must be made in advance by cash or money order. Lists should not be returned to commercial mailers until charges and postage fees have been collected.

(iii) Payment for correction of lists submitted by Members of Congress and Federal agencies is made under the official mail reimbursement program. Submit a report of the applicable charges and the name of the Member of Congress or Federal Agency for which the list is corrected to:

Postal Revenue Officer, Finance Department,
U.S. Postal Service, Washington, DC 20260.

• • • • •

Effective date. The above amendments are effective on January 19, 1973.

(39 U.S.C. 401, 404)

ROGER P. CRAIG,
Deputy General Counsel.

[FR Doc.73-1269 Filed 1-18-73;8:45 am]

Title 41—PUBLIC CONTRACTS AND PROPERTY MANAGEMENT

Chapter 5A—Federal Supply Service, General Services Administration

BIDDER'S MAILING LIST AND MISCELLANEOUS AMENDMENTS

The following provides updated instructions to Federal Supply Service procurement personnel on the preparation of solicitations for offers, forms to be used, the bidders mailing list system, and related matters.

PART 5A-2—PROCUREMENT BY FORMAL ADVERTISING

Subpart 5A-2.2—Solicitation of Bids

1. Section 5A-2.201 is amended to add paragraph (c) as follows:

§ 5A-2.201 Preparation of invitations for bids.

• • • • • •

(c) *Consideration of printing and mailing costs.* The number of pages in invitations for bids shall be kept to a minimum to save administrative costs. Continuation sheets for especially lengthy invitations should be typed on GSA Form 459, 25 percent Standard Reduction Sheet, and photographically reduced for subsequent printing on regular-sized paper to reduce printing and mailing costs.

2. Section 5A-2.201-70 is amended as follows:

V 38 - 13 JAN 19 73 XUM

§ 5A-2.201-70 Forms to be used.

• • • • • •

(f) • • •

(3) The Centralized Mailing List Service (CMLS) in Region 8 maintains the FSS bidders mailing list (see § 5A-76.306). When a firm is added to the bidders mailing list, a copy of each of the forms listed in (1), above, shall be mailed by CMLS to the firm with an explanatory note stating that the forms will be referenced but not attached to future invitations for bids.

• • • • • •

3. Section 5A-2.203-1 is revised as follows:

§ 5A-2.203-1 Mailing or delivering to prospective bidders.

(a) Invitations for bids shall be distributed not later than the day indicated as the issuance date through use of appropriate bidders mailing lists maintained in accordance with § 5A-76.306.

(b) Avoid the use of envelopes larger than 5¾ by 11½ inches unless absolutely necessary. Specific arrangements to achieve this objective shall be made with the local printing and distribution activity.

(c) A copy of each invitation for bids for direct delivery purchases shall be forwarded to the requisitioning office concerned. (Also, see § 5A-72.105-23(a)(3).)

(d) Procuring activities shall insure that active bidders, i.e., current contractors and bidders that responded to recent similar solicitations, will be provided with new complete bid sets for the same or similar items. After identifying the active bidders (also, see § 5A-76.306(g), Handlists), their names shall be checked against the bidders mailing list printout. If their names are not on the printout, action shall be taken in accordance with § 5A-76.306(i)(2).

4. Section 5A-2.205-1 is revised as follows:

§ 5A-2.205-1 Establishment of lists.

Guidelines concerning the establishment and maintenance of bidders mailing lists are set forth in §§ 1-2.205 and 5A-2.205. Bidders mailing list operational procedures are further described in § 5A-76.306.

5. Section 5A-2.205-2 is revised as follows:

§ 5A-2.205-2 Removal of names from bidders mailing lists.

Concerns which have been debarred or otherwise determined to be ineligible pursuant to Subparts 1-1.6 and 5-1.6 shall be removed from the FSS bidders mailing lists. This action will be taken by the Centralized Mailing List Services in Region 8. Debarred and ineligible concerns shall also be removed from any locally maintained bidders mailing lists (handlists), and this should be accomplished upon receipt of interim notices issued by the Office of Investigations. (See also § 5A-76.306(j).)

6. Section 5A-2.205-3 is revised as follows:

§ 5A-2.205-3 Reinstatement on bidders mailing lists.

The reinstatement of concerns on FSS bidders mailing lists shall be in accordance with the procedures set forth in § 5A-76.306. With reference to § 1-2.205-3, all reinstatements to the FSS bidders mailing list system of previously debarred or suspended firms shall be made only upon filing a new bidders mailing list application on SF 129, Bidders Mailing List Application, and related GSA forms.

PART 5A-16—PROCUREMENT FORMS

The table of contents for Part 5A-16 is amended to add the following:

Sec.	
5A-16.950-1754	GSA Form 1754, Bidders Mailing List Application Code Sheet (Commodities).
5A-16.950-1783	GSA Form 1783, Bidders Mailing List Application Code Sheet (Services).
5A-16.950-2439	GSA Form 2439, Bidders Mailing List Selection Request.
5A-16.950-2440	GSA Form 2440, Request for Addressee Information.
5A-16.950-2459	GSA Form 2459, Bidders Mailing List Instructions.

PART 5A-76—EXHIBITS

The table of contents for Part 5A-76 is amended to include the following:

Sec.	
5A-76.306	Bidders mailing list system.

NOTE: Copies of the forms and exhibit added to Parts 5A-16 and 5A-76 are filed with the original document.

(Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c); 41 CFR 5-1.101(c))

Effective date. These regulations are effective on February 5, 1973, but may be observed earlier.

Dated: January 5, 1973.

M. S. MEEKER,
Commissioner,
Federal Supply Service.

Chapter 60—Office of Federal Contract Compliance, Equal Employment Opportunity, Department of Labor

PART 60-1—OBLIGATIONS OF CONTRACTORS AND SUBCONTRACTORS

State and Local Governments: Affirmative Action Programs

On October 4, 1972, notice of proposed rule making was published in the FEDERAL REGISTER (37 FR 20870) with regard to amending § 60-1.5 of Title 41, Code of Federal Regulations. Interested persons were given 30 days in which to submit written comments, suggestions, or objections regarding the proposal.

Having considered all relevant material submitted, I have decided to, and do hereby amend § 60-1.5 of Chapter 60 of Title 41 of the Code of Federal Regulations as follows:

§ 60-1.5 Exemptions.

(a) *General.* • • •

(4) *Contracts with State or local governments.* The requirements of the equal opportunity clause in any contract or subcontract with a State or local government (or any agency, instrumentality or subdivision thereof) shall not be applicable to any agency, instrumentality or subdivision of such government which does not participate in work on or under the contract or subcontract. In addition, any agency, instrumentality or subdivision of such government, except for educational institutions and medical facilities, are exempt from the requirements of filing the annual compliance report provided for by § 60-1.7(a)(1) and maintaining a written affirmative action compliance program prescribed by § 60-1.40 and Part 60-2 of this chapter.

• • • • • •

Effective date. This amendment is effective on January 19, 1973.

Signed at Washington, D.C., this 15th day of January 1973.

J. D. HODGSON,
Secretary of Labor.

R. J. GRUNEWALD,
Assistant Secretary for Employment Standards.

PHILIP J. DAVIS,
Acting Director, Office of Federal Contract Compliance.

[FR Doc.73-1168 Filed 1-18-73;8:45 am]

PART 60-50—GUIDELINES ON DISCRIMINATION BECAUSE OF RELIGION OR NATIONAL ORIGIN

On December 29, 1971, notice of proposed rule making was published in the FEDERAL REGISTER (36 FR 25165) with regard to amending Chapter 60 of Title 41 of the Code of Federal Regulations by adding a new Part 60-30, establishing guidelines and interpretations of the Office of Federal Contract Compliance as to the requirements of Executive Order 11246, as amended, for promoting and insuring equal employment opportunity for members of various religious and ethnic groups who continue to encounter employment discrimination because of their religion and/or national origin. Interested persons were given 30 days in which to submit written comments regarding the proposal.

After consideration of all comments received, Chapter 60 of Title 41 of the Code of Federal Regulations is amended by adding a new Part 60-50, set forth below. The final version of the Office of Federal Contract Compliance's guidelines regarding religious and national origin discrimination is now issued as 41 CFR Part 60-50, rather than as 41 CFR Part 60-30, as formerly proposed, since the latter part has been reserved for other regulations.

Sec.

60-50.1 Purpose and scope.
60-50.2 Equal employment policy.
60-50.3 Accommodations to religious observance and practice.
60-50.4 Enforcement.
60-50.5 Nondiscrimination.

AUTHORITY: Sec. 201, E.O. 11246, 30 FR 12319, and E.O. 11375, 32 FR 14303.

§ 60-50.1 Purpose and scope.

(a) The purpose of the provisions in this part is to set forth the interpretations and guidelines of the Office of Federal Contract Compliance regarding the implementation of Executive Order 11246, as amended, for promoting and insuring equal employment opportunities for all persons employed or seeking employment with Government contractors and subcontractors under federally tors and subcontractors or with contractors and subcontractors performing under federally assisted construction contracts, without regard to religion or national origin.

(b) Members of various religious and ethnic groups, primarily but not exclusively of Eastern, Middle, and Southern European ancestry, such as Jews, Catholics, Italians, Greeks, and Slavic groups, continue to be excluded from executive, middle-management, and other job levels because of discrimination based upon their religion and/or national origin. These guidelines are intended to remedy such unfair treatment.

(c) These guidelines are also intended to clarify the obligations of employers with respect to accommodating to the religious observances and practices of employees and prospective employees.

(d) The employment problems of blacks, Spanish-surnamed Americans, orientals, and American Indians are treated under Part 60-2 of this chapter and under other regulations and procedures implementing the requirements of Executive Order 11246, as amended. Accordingly, the remedial provisions of § 60-50.2(b) shall not be applicable to the employment problems of these groups.

§ 60-50.2 Equal employment policy.

(a) *General requirements.* Under the equal opportunity clause contained in section 202 of Executive Order 11246, as amended, employers are prohibited from discriminating against employees or applicants for employment because of religion or national origin, and must take affirmative action to insure that applicants are employed, and that employees are treated during employment, without regard to their religion or national origin. Such action includes, but is not limited to the following: Employment, upgrading, demotion, or transfer: recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship.

(b) *Outreach and positive recruitment.* Employers shall review their employment practices to determine whether members of the various religious and/or ethnic groups are receiving fair consideration for job opportunities. Special attention shall be directed toward executive and middle-management levels, where employment problems relating to religion and national origin are most likely to occur. Based upon the findings of such reivews, employers shall undertake appropriate outreach and positive recruitment activities, such as those listed below, in order to remedy existing deficiencies. It is not contemplated that employers necessarily will undertake all of the listed activities. The scope of the employer's efforts shall depend upon all the circumstances, including the nature and extent of the employer's deficiencies and the employer's size and resources.

(1) Internal communication of the employer's obligation to provide equal employment opportunity without regard to religion or national origin in such a manner as to foster understanding, acceptance, and support among the employer's executive, management, supervisory, and all other employees and to encourage such persons to take the necessary action to aid the employer in meeting this obligation.

(2) Development of reasonable internal procedures to insure that the employer's obligation to provide equal employment opportunity without regard to religion or national origin is being fully implemented.

(3) Periodically informing all employees of the employer's commitment to equal employment opportunity for all persons, without regard to religion or national origin.

(4) Enlisting the assistance and support of all recruitment sources (including employment agencies, college placement directors, and business associates) for the employer's commitment to provide equal employment opportunity without regard to religion or national origin.

(5) Reviewing employment records to determine the availability of promotable and transferable members of various religious and ethnic groups.

(6) Establishment of meaningful contacts with religious and ethnic organizations and leaders for such purposes as advice, education, technical assistance, and referral of potential employees.

(7) Engaging in significant recruitment activities at educational institutions with substantial enrollments of students from various religious and ethnic groups.

(8) Use of the religious and ethnic media for institutional and employment advertising.

§ 60-50.3 Accommodations to religious observance and practice.

An employer must accommodate to the religious observances and practices of an employee or prospective employee unless the employer demonstrates that it is unable to reasonably accommodate to an employee's or prospective employee's religious observance or practice without undue hardship on the conduct of the employer's business. As part of this obligation, an employer must make reasonable accommodations to the religious observances and practices of an employee or prospective employee who regularly observes Friday evening and Saturday, or some other day of the week, as his Sabbath and/or who observes certain religious holidays during the year and who is conscientiously opposed to performing work or engaging in similar activity on such days, when such accommodations can be made without undue hardship on the conduct of the employer's business. In determining the extent of an employer's obligations under this section, at least the following factors shall be considered: (a) Business necessity, (b) financial costs and expenses, and (c) resulting personnel problems.

§ 60-50.4 Enforcement.

The provisions of this part are subject to the general enforcement, compliance review, and complaint procedures set forth in Subpart B of Part 60-1 of this chapter.

§ 60-50.5 Nondiscrimination.

The provisions of this part are not intended and shall not be used to discriminate against any qualified employee or applicant for employment because of race, color, religion, sex, or national origin.

Effective date. This part shall become effective on February 20, 1973.

Signed at Washington, D.C., this 17th day of January 1973.

J. D. HODGSON,
Secretary of Labor.

R. J. GRUNEWALD,
Assistant Secretary for Employment Standards.

PHILIP J. DAVIS,
Acting Director, Office of Federal Contract Compliance.

Title 42—PUBLIC HEALTH

Chapter I—Public Health Service, Department of Health, Education, and Welfare

SUBCHAPTER F—QUARANTINE, INSPECTION, LICENSING

PART 78—REGULATIONS FOR THE ADMINISTRATION AND ENFORCEMENT OF THE RADIATION CONTROL FOR HEALTH AND SAFETY ACT OF 1968

Transfer of Regulations

The Bureau of Radiological Health, Environmental Health Service, was assigned to the Food and Drug Administration on May 25, 1971 (36 FR 12803). The

V 38 - 13 JAN 19 73 XUM

formal statement of organization, functions, and delegations of authority for the Bureau of Radiological Health, appearing in the FEDERAL REGISTER of October 3, 1972 (37 FR 20738), establishes the operational framework for the Bureau of Radiological Health, Food and Drug Administration, and the justification for transferring the regulations pertaining to radiological health under Part 78, Title 42 of the Code of Federal Regulations to the newly established Part 278 of Title 21 of the Code of Federal Regulations to reflect the organizational changes.

Therefore, the regulations formerly appearing in Part 78 of Chapter I of Title 42 of the Code of Federal Regulations are hereby transferred to Chapter I of Title 21 and redesignated as Part 278 of that chapter. Accordingly, Part 78 of Title 42 is hereby vacated.

Effective date. This transfer of regulations becomes effective January 19, 1973.

Dated: January 12, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.73-1160 Filed 1-18-73;8:45 am]

Title 49—TRANSPORTATION

Chapter III—Federal Highway Administration, Department of Transportation

SUBCHAPTER B—MOTOR CARRIER SAFETY REGULATIONS

[Docket No. MC-45; Notice 73-3]

PART 395—HOURS OF SERVICE OF DRIVERS

Use of Canadian Driver's Log Form

The Director of the Bureau of Motor Carrier Safety is amending the Motor Carrier Safety Regulations to permit drivers for Canadian-based motor carriers to use the form of driver's daily log prescribed by Canadian law in lieu of the Bureau's Form MCS-59.

The purpose of this amendment is to relieve those drivers, and the carriers by whom they are employed, from the burden of making and preserving two different driver's daily log forms in certain circumstances. At present, a driver for a Canadian motor carrier who operates into the United States from Canada must, under § 395.8 of the Motor Carrier Safety Regulations, make daily logs on Form MCS-59 covering the entire trip, including time spent in Canada. Canadian law also requires the driver to prepare daily logs on a form prescribed in the "Canada Motor Vehicle Operators Hours of Service Regulations" for the entire trip. The two forms are very similar, but they are not identical. As a result, the driver is burdened with filling out, and the carrier is obligated to keep on file, two different sets of forms covering the same operation.

The Director can perceive of no sound reason for continuing to impose this type of burden on motor carriers. The Canadian form provides virtually all of the information provided by Form MCS-59, when it is properly filled out, and differs only slightly in format from the American one. It appears that nothing would be lost, and a considerable amount of useless paperwork would be dispensed with, by permitting drivers and carriers who are based in Canada and who are required to use the Canadian form under the Canadian regulations to use that form as the driver's daily log in lieu of Form MCS-59.

It should be noted that the Canadian regulations apply only to for-hire (common and contract) carriers. Therefore, drivers for Canadian-based private carriers of property who operate in the United States must continue to make daily logs on Form MCS-59.

The amendment to permit use of the Canadian form is being accomplished as a revision of paragraph (t) of § 395.8. Except for the addition of a subparagraph granting permission to use the Canadian form, no substantive change to the existing provisions of that paragraph is being made.

In consideration of the foregoing, § 395.8(t) of the Motor Carrier Safety Regulations (Subchapter B of Chapter III in Title 49, CFR), is revised to read as set forth below.

Effective date. This amendment is effective on March 1, 1973.

Since this amendment relieves a restriction and does not impose any additional substantive burden on any person, the Director finds that notice and public procedure thereon are unnecessary.

This amendment is issued under the authority of section 204 of the Interstate Commerce Act, as amended, 49 U.S.C. 304, section 6 of the Department of Transportation Act, 49 U.S.C. 1655, and the delegations of authority from the Secretary of Transportation and the Federal Highway Administrator at 49 CFR 1.48 and 49 CFR 389.4, respectively.

Issued on January 10, 1973.

ROBERT A. KAYE,
Director, Bureau of Motor Carrier Safety.

§ 395.8 Driver's daily log.

* * * * *

(t) *Exemptions*—(1) *50-mile-radius drivers.* The rules in this section do not apply to a regularly employed driver who drives wholly within a radius of 50 miles of the garage or terminal at which he reports for work, if the motor carrier who employs the driver maintains and retains for a period of 1 year accurate and true records showing the total number of hours the driver is on duty each day and the time at which the driver reports for, and is released from, duty each day.

(2) *Drivers of lightweight vehicles.* The rules in this section do not apply to a driver of a motor vehicle that has not more than 2 axles and a gross weight (as defined in § 390.10 of this chapter) of 10,000 pounds or less, unless that vehicle is either—

(i) Used to transport passengers;

(ii) Used to transport materials of a type or quantity that requires the vehicle to be marked or placarded in accordance with § 177.823 of this title; or

(iii) Operated without cargo under conditions that require the vehicle to be marked or placarded in accordance with § 177.832 of this title.

(3) *Use of Canadian log forms.* In lieu of Form MCS-59, a driver may use, and a motor carrier may accept, the form of driver's daily log prescribed in the "Canada Motor Vehicle Operators Hours of Service Regulations," if—

(i) The driver's home terminal is located in Canada;

(ii) The motor carrier is properly registered with the Canadian authorities in accordance with the "Canada Motor Vehicle Operators Hours of Service Regulations"; and

(iii) All information required by this section is entered on the form.

[FR Doc.73-1211 Filed 1-18-73;8:45 am]

Title 50—WILDLIFE AND FISHERIES

Chapter I—Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior

PART 33—SPORT FISHING

Quivira National Wildlife Refuge, Kans.

The Bureau of Sport Fisheries and Wildlife announces that Quivira National Wildlife Refuge near Stafford, Kans., will be open to public fishing from May 1, 1973, through September 30, 1973. Sport fishing shall be in accordance with all applicable State regulations.

The following special regulation is issued and is effective on January 19, 1973.

§ 33.5 Special Regulations; sport fishing; for individual wildlife refuge areas.

KANSAS

QUIVIRA NATIONAL WILDLIFE REFUGE

Sport fishing on the Quivira National Wildlife Refuge, Stafford, Kans., is permitted only on the areas designated by signs as open to fishing. These open areas, comprising 990 acres, are delineated on maps available at refuge headquarters, Stafford, Kans., and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 10597 West Sixth Avenue, Denver, CO 80215. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) The open season for sport fishing on the refuge extends from May 1, 1973, to September 30, 1973, inclusive.

(2) Fishing will be with closely attended rod(s) and line(s) only.

(3) The use of boats is not permitted. One-man floater tubes may be used.

(4) Overnight camping is not permitted.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 33, and are effective through September 30, 1973.

CHARLES R. DARLING,
Refuge Manager, Quivira National Wildlife Refuge, Stafford, Kans.

[19 CFR Part 4]

VESSELS IN FOREIGN AND DOMESTIC TRADES

Proposed Factors To Be Considered in Determining Whether Primary Object of Voyage is Coastwise Transportation; Extension of Time

JANUARY 12, 1973.

Notice of proposed amendment to § 4.-80a of the Customs regulations, pertaining to factors to be considered in determining whether the primary object of a voyage is coastwise transportation, was published in the FEDERAL REGISTER on Wednesday, December 20, 1972 (37 FR 28060). Thirty days from the date of publication of the notice were given for submission of data, views, or arguments, pertaining to the proposed amendment.

Requests have been received for an extension of the time for the submission of comments. Therefore, the period for submission of data, views, or arguments, relating to the cited amendment is extended to February 19, 1973.

[SEAL] EDWIN F. RAINS,
Acting Commissioner of Customs.

[FR Doc.73-1197 Filed 1-18-73;8:45 am]

[19 CFR Part 10]

METALS EXPORTED FOR PROCESSING

Articles Conditionally Free, Subject to a Reduced Rate, Etc.

Notice is hereby given that under the authority of R.S. 251, as amended, section 624, 46 Stat. 759, 77A Stat. 14; 19 U.S.C. 66, 1202 (Gen. Hdnte. 11, Tariff Schedules of the United States) and 1624, it is proposed to amend § 10.9(a) of the Customs regulations to enable the exporter or owner of metal affected by item 806.30, Tariff Schedules of the United States (19 U.S.C. 1202), in cases where the name and address of the U.S. processor is not known at the time of exportation, to state on the Certificate of Registration (Customs Form 4455), the basis for belief that the metal will be returned for further processing in the United States.

Section 10.9(a), which pertains to articles of metal exported for processing and returned for further processing under item 806.30, Tariff Schedules of the United States (19 U.S.C. 1202) presently provides that the exporter or owner shall furnish on the reverse side of the Certificate of Registration (Customs Form 4455), at the time of exportation, the name and address of the person who will further process the article upon return to the United States. This requirement has adversely affected some members of the metal trade who at the time of exportation have prospective customers in the United States, and who intend to reimport the metal, but do not have at that time specific orders for the merchandise.

Accordingly, it is proposed to amend paragraph (a) of § 10.9 to read as follows:

§ 10.9 **Articles exported for processing.**

(a) Before the exportation of articles subject, on return to the United States, to duty on the value of the processing performed abroad as provided for in item 806.30, a Certificate of Registration (top portion of Customs Form 4455), shall be filed (in an original only), by the owner or exporter with the district director of Customs at a time prior to the departure of the exporting conveyance which will permit an examination of the articles. A statement shall be included on the reverse side of Customs Form 4455 by the exporter or owner substantially as follows:

The articles described in this certificate were manufactured in the United States by
---
(Name and Address)
or, if of foreign origin, were subjected to

(Show processes of manufacture, such as molding, casting, machining, etc.)
in the United States by

(Name and Address)
The articles in their changed conditions will be returned for further processing by
---; or, if further
(Name and Address)
processing of the articles in the United States will be performed by a person not presently known the reasons for believing the articles will be returned for further processing are
---
---
and the reason the person is not presently known is

. . . . . .

(R.S. 251, as amended, sec. 624, 46 Stat. 759, 77A Stat. 14; 19 U.S.C. 66, 1202 (Gen. Hdnte. 11, Tariff Schedules of the United States), 1624)

Consideration will be given to relevant data, views, or arguments, pertaining to the proposed amendment which are submitted to the Commissioner of Customs, Attention: Regulations Division, Washington, D.C. 20226, and received on or before February 20, 1973.

Written material or suggestions submitted will be available for public inspection in accordance with § 103.3(b) of the Customs regulations (19 CFR 103.3(b)), at the Regulations Division, Bureau of Customs, Washington, D.C., during regular business hours.

[SEAL] EDWIN F. RAINS,
Acting Commissioner of Customs.

Approved: January 9, 1973.

EUGENE T. ROSSIDES,
Assistant Secretary of the Treasury.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 12]

CERTAIN LANDS AND WATERS IN McINTOSH COUNTY, GA.

Hunting of Migratory Birds; Designation of Closed Area

Notice is hereby given that it is proposed to designate an area closed to the hunting of migratory birds, as set forth below. The purpose of this designation is to aid administration of the Wolf Island National Wildlife Refuge and to improve the effectiveness of the refuge for the purposes for which it was established by the United States.

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rule making process. Accordingly, interested persons may submit written comments, suggestions, or objections with respect to the proposal to the Director, Bureau of Sport Fisheries and Wildlife, Washington, D.C. 20240, on or before February 20, 1973.

The text of the proposed designation is as follows:

This action is taken by virtue of and pursuant to section 3 of the Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755, as amended; 16 U.S.C. 704), and by virtue of the Reorganization Plan II (53 Stat. 1431) and in accordance with section 4(a) of the Administrative Procedure Act of June 11, 1946 (60 Stat. 238, 5 U.S.C. 1003). Having due regard to the zones of temperature and to the distribution, abundance, economic value, breeding habits, and times and lines of migratory flight of migratory birds included in the terms of the convention between the United States and Great Britain for the protection of migratory birds, concluded August 16, 1916, and the convention between the United States and the United Mexican States for the protection of migratory birds and game mammals, concluded February 7, 1936, I hereby designate as a closed area in or on which pursuing, hunting, taking, capturing, or killing of migratory birds, or attempting to take, capture, or kill migratory birds is not permitted, all the land, marsh, and water areas in McIntosh County, Ga., within the following-described boundary:

An area of land and water in McIntosh County, Ga., comprising Wolf Island National Wildlife Refuge and certain lands and waters adjacent thereto, embraced within the following boundaries:

WOLF ISLAND

Beginning at a point in the low water mark of Wolf Island at the extreme north end of Wolf Island Spit in Doboy Sound; thence with the low water mark of Wolf Island southerly with the Atlantic Ocean, westerly and northwesterly with Altamaha Sound, northerly with Little Mud River and easterly with South River, crossing the mouths of numerous unnamed tidal creeks and guts, approximately 53,000 feet, to a point where the low water mark of the west bank of Wolf Creek intersects the low water mark of South River; thence easterly, crossing Wolf Creek, a distance of approximately 400 feet, to a point in the low water mark of the east bank of Wolf Creek where it intersects the low water mark of South River; thence easterly with the low water mark of Wolf Island, a distance of approximately 3,500 feet, to a point in the low water mark of the west bank of Beacon Creek as it intersects the low water mark of Doboy Sound; thence southeasterly, crossing the mouth of Beacon Creek, a distance of approximately 1,100 feet, to the point of beginning.

EGG ISLAND

Beginning at a point in the low water mark of Egg Island, said point being at the extreme northwest end of said island in Altamaha Sound; thence with the low water mark of Egg Island, easterly, southeasterly, southwesterly, and northwesterly with the waters of Altamaha Sound, crossing the mouths of numerous unnamed tidal creeks and guts, a total distance of approximately 24,000 feet, to the point of beginning.

LITTLE EGG ISLAND

Beginning at a point in the low water mark of Little Egg Island at the extreme west end of said island; thence with the low water mark of Little Egg Island easterly, southerly, westerly, and northerly with the waters of Altamaha Sound, a distance of approximately 1,000 feet, to the place of beginning.

E. V. SCHMIDT,
Deputy Director, Bureau of Sport Fisheries and Wildlife.

JANUARY 12, 1973.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[33 CFR Part 110]

[CGD 73-10P]

CHESTER RIVER, SOUTHEAST OF CHESTERTOWN, MD.

Proposed Special Anchorage Areas

The Coast Guard is considering amending the anchorage regulations by establishing a special anchorage area on the Chester River southeast of Chestertown, Md., off Rolphs, Md. The area is needed since no special anchorage areas presently exist in the Chester River or in the immediate vicinity for use by pleasure boats. The area is located on the northeast side of the Chester River, northeast of the channel. In special anchorage areas, vessels under 65 feet in length, when at anchor, are not required to carry or exhibit anchor lights.

Interested persons may participate in this proposed rule making by submitting written data, views, or arguments, to the Commander (mps), Fifth Coast Guard District, Federal Building, 431 Crawford Street, Portsmouth, VA 23705. Each person submitting comments should include his name, and address, identify the notice (CGD 73-10P), and give any reasons for any recommended change in the proposal. Copies of all submissions received will be available for examination by interested persons at the office of the Commander, Fifth Coast Guard District.

The Commander, Fifth Coast Guard District will forward any comments received before February 23, 1973, and his recommendations to the Chief, Office of Marine Environment and Systems, U.S. Coast Guard Headquarters, who will evaluate all communications received and take final action on this proposal. The proposed regulations may be changed in the light of comments received.

In consideration of the foregoing, it is proposed to amend Part 110 of Title 33 of Code of Federal Regulations by adding a new § 110.72a to read as follows:

§ 110.72a **Chester River, southeast of Chestertown, Md.**

The waters of the Chester River enclosed by a line beginning at a point on the Rolph Marina pier at latitude 39°-10'25'' N., longitude 76°02'17'' W.; thence 327° to a point 400 feet southwest of the entrance to Hambleton Creek at latitude 39°10'55'' N., longitude 76°02'-40'' W.; thence northeasterly to the eastern side of the entrance to Hambleton Creek; thence southerly following the shoreline to the Rolph Point Marina pier; thence southwesterly along the Rolph Point Marina pier to the point of beginning.

(Sec. 1, 30 Stat. 98, as amended, sec. 6(g)(1)(B), 80 Stat. 937; 33 U.S.C. 180, 49 U.S.C. 1655(g)(1)(B), 49 CFR 1.46(c)(2))

Dated: January 15, 1973.

W. M. BENKERT,
Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Environment and Systems.

[CGD 72-229 P]

METAL BORINGS, SHAVINGS, TURNINGS, CUTTINGS

Proposed Transportation, Description and Characterization; Extension of Time for Comments

In the December 6, 1972 issue of the FEDERAL REGISTER (37 FR 25957), the Coast Guard proposed regulations pertaining to the transport of metal borings, shavings, turnings, and cuttings.

The Coast Guard held a public hearing on this proposal on January 11, 1973. In addition, interested persons were given until January 15, 1973 to submit comments.

The Coast Guard has received numerous requests for extension of the comment period to allow for additional time to prepare detailed comments on the proposal. The Coast Guard finds that the request for additional time is appropriate and hereby extends the period for such comments to March 1, 1973. All relative comments received by that time will be considered.

Interested persons may participate in this proposed rule making by submitting written data, views or arguments to the U.S. Coast Guard (GCMC/82), Washington, D.C. 20590. Each person submitting comments should include his name, address, identify the notice (CGD 72-229 PH) and give reasons for any recommendations. Comments received will be available for examination by interested persons in Room 8234, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, DC.

Dated: January 15, 1973.

G. H. READ,
Captain, U.S. Coast Guard, Acting Chief, Office of Merchant Marine Safety.

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 72-RM-3]

CONTROL ZONE

Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations which would alter the description of the Sheridan, Wyo., control zone.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Air Traffic Division, Federal Aviation Administration, Park Hill Station Post Office Box 7213, Denver, CO 80207. All communications received on or before February 20, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the

V 38 - 13 JAN 19 73 XUM

office of the Regional Counsel, Federal Aviation Administration, 10455 East 25th Avenue, Aurora, CO 80010.

The Federal Aviation Administration (FAA) plans to install an instrument landing system (ILS) and implement new instrument approach procedures to take advantage of the new NAVAID serving Sheridan County Airport. These changes require alteration of the Sheridan, Wyo., control zone in order to provide controlled airspace protection for aircraft executing these procedures. The new procedures will become effective concurrently with the designation of the altered control zone.

In consideration of the foregoing, the FAA proposes the following airspace action:

In § 71.171 (38 FR 351) the description of the Sheridan, Wyo., control zone is amended to read as follows:

Within a 5-mile radius of the Sheridan County Airport (latitude 44°46'25" N., longitude 106°58'15" W.); within 4 miles each side of the Sheridan VORTAC 312° and 327° radials, extending from the 5-mile radius zone to 11.5 miles northwest of the VORTAC; and within 4 miles each side of the Sheridan VORTAC 140° radial extending from the 5-mile radius zone to 24½ miles southeast of the VORTAC.

This amendment is proposed under authority of section 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Aurora, Colo., on January 10, 1973.

M. M. MARTIN,
Director,
Rocky Mountain Region.

[14 CFR Part 71]

[Airspace Docket No. 72-NW-28]

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the description of the Twin Falls, Idaho Transition Area.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Operations, Procedures and Airspace Branch, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Wash. 98108. All communications received on or before February 20, 1973 will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Wash. 98108.

A new ILS approach procedure is proposed for the Twin Falls City-County Airport, Twin Falls, Idaho. A review of the airspace requirements for the new procedure reveals that additional 700 feet Transition Area airspace would be required to provide controlled airspace protection for aircraft executing the proposed procedure.

In consideration of the foregoing, the FAA proposes the following airspace action.

In § 71.181 (38 FR 435) the description of the Twin Falls, Idaho Transition Area is amended as follows:

In line two of the text, delete the phrase, "• • • VORTAC to 18.5 miles east • • •" and substitute therefor, "• • • VORTAC to 30 miles east • • •"

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Seattle, Wash., on January 9, 1973.

C. B. WALK, Jr.,
Director, Northwest Region.

[14 CFR Part 71]

[Airspace Docket No. 72-NW-27]

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering an amendment to Part 71 of the Federal Aviation Regulations that would alter the description of the Bellingham, Wash., transition area.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Operations, Procedures, and Airspace Branch, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Wash. 98108. All communications received on or before February 20, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the office of the Regional Counsel, Northwest Region, Federal Aviation Administration, FAA Building, Boeing Field, Seattle, Wash. 98108.

A new instrument approach procedure is proposed for the Bellingham International Airport utilizing Lummi NDB (latitude 48°47'38" N.; longitude 122°32'08" W.), a non-Federal navigational facility, owned and operated by the Washington State Aeronautics Commission. A review of the airspace requirements reveals that additional 700-foot transition area airspace would be required to provide controlled airspace protection for aircraft executing the proposed approach procedure.

In consideration of the foregoing, the FAA proposes the following airspace action.

In § 71.181 (38 FR 435) the description of the Bellingham, Wash., transition area is amended as follows:

To the text add, "and within 3.5 miles north and 8 miles south of the 288° bearing from Lummi NDB (latitude 48°47'38" N.; longitude 122°32'08" W.) extending from the NDB 11.5 miles west of the NDB."

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958, as amended, (49 U.S.C. 1348(a)), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Seattle, Wash., on January 9, 1973.

C. B. WALK, Jr.,
Director, Northwest Region.

TRANSITION AREA

Proposed Designation

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to designate a transition area at Boyne Falls, Mich.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Director, Great Lakes Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018. All communications received on or before February 20, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018.

A new public use instrument approach procedure has been developed for the Boyne Mountain Airport, Boyne Falls, Mich., based on a new non-Federal NDB. Consequently, it is necessary to provide controlled airspace protection for aircraft executing this new approach procedure by designating a transition area at Boyne Falls, Mich. The new approach procedure will become effective concurrently with the designation of the transition area.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.181 (38 FR 435), the following transition area is added:

BOYNE FALLS, MICH.

That airspace extending upward from 700 feet above the surface within a 5-mile radius of Boyne Mountain Airport (latitude 45°-10'03" N., longitude 84°55'30" W.); and within 4½ miles west and 9½ miles east of the 176° bearing from the Boyne Mountain Airport extending from the airport to 24½ miles south of the airport excluding that position which overlies the Gaylord, Mich., Bellaire, Mich., and Grayling, Mich. transition areas.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Des Plaines, Ill., on December 15, 1972.

R. O. ZIEGLER,
Acting Director,
Great Lakes Region.

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to alter the transition area at Champaign, Ill.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Director, Great Lakes Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018. All communications received on or before February 20, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018.

A new public instrument approach procedure has been developed for the Illini Airport, Urbana, Ill. Accordingly, it is necessary to alter the Champaign, Ill., transition area to adequately protect the aircraft executing the new approach procedure.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.181 (38 FR 435), the following transition area is amended to read:

CHAMPAIGN, ILL.

That airspace extending upward from 700 feet above the surface within a 7-mile radius of the University of Illinois-Willard Airport (latitude 40°02'25" N., longitude 88°16'35" W.); within a 5½-mile radius of the Illini Airport, Urbana, Ill. (latitude 40°08'31" N., longitude 88°12'00" W.) and within 8 miles southeast and 5 miles northwest of the Champaign VORTAC 030° radial extending from the VORTAC to 12 miles northeast of the VORTAC.

Section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)) are authoritative in proposing this amendment.

Issued in Des Plaines, Ill., on December 27, 1972.

TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to alter the transition area at Fremont, Mich.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Director, Great Lakes Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018. All communications received on or before February 20, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018.

A new public instrument approach procedure has been developed for the Fremont Municipal Airport, Fremont, Mich. Accordingly, it is necessary to alter the Fremont, Mich., transition area to adequately protect the aircraft executing the new approach procedure.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.181 (38 FR 435), the following transition area is amended to read:

FREMONT, MICH.

That airspace extending upward from 700 feet above the surface within an 8-mile radius of Fremont Municipal Airport, Fremont, Mich. (latitude 43°26'31" N.; longitude 85°59'29" W.).

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Communications should be submitted in triplicate to the Director, Great Lakes Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018. All communications received on or before February 20, 1973, will be considered before

V 38 I 13 JAN 1973 XUM

action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018.

A new public use instrument approach procedure has been developed for the Highland County Airport, Hillsboro, Ohio. Consequently, it is necessary to provide controlled airspace protection for aircraft executing this new approach procedure by designating a transition area at Hillsboro, Ohio. The new procedure will become effective concurrently with the designation of the transition area.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.181 (38 FR 435), the following transition area is added:

HILLSBORO, OHIO

That airspace extending upward from 700 feet above the surface within an 8-mile radius of the Highland County Airport (latitude 39°11'21" N., longitude 83°32'18" W.).

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Des Plaines, Ill., on December 26, 1972.

R. O. ZIEGLER,
Acting Director,
Great Lakes Region.

[FR Doc.73-1147 Filed 1-18-73;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 72-GL-77]

TRANSITION AREA

Proposed Designation

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to designate a transition area at Birmingham, Ohio.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should be submitted in triplicate to the Director, Great Lakes Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018. All communications received on or before February 20, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief.

Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018.

A new public use instrument approach procedure has been developed for the Ortner Airport, Birmingham, Ohio. Consequently, it is necessary to provide controlled airspace protection for aircraft executing this new approach procedure by designating a transition area at Birmingham, Ohio. The new procedure will become effective concurrently with the designation of the transition area.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.181 (38 FR 435), the following transition area is added:

BIRMINGHAM, OHIO

That airspace extending upward from 700 feet above the surface within a 5.5 mile radius of the Ortner Airport (latitude 41°17'35" N., longitude 82°22'15" W.) excluding that portion which overlies the Cleveland, Ohio, transition area.

Section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)) are authoritative in proposing this amendment.

Issued in Des Plaines, Ill., on December 27, 1972.

R. O. ZIEGLER,
Acting Director,
Great Lakes Region.

[14 CFR Part 71]

[Airspace Docket No. 72-GL-78]

CONTROL ZONE AND TRANSITION AREA

Proposed Alteration

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to alter the control zone and transition area at Iron Mountain, Mich.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Great Lakes Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018. All communications received on or before February 20, 1973, will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief.

Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposals contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, IL 60018.

Three new instrument approach procedures have been developed for the Ford Airport, Iron Mountain, Mich. Accordingly, is is necessary to alter the Iron Mountain, Mich., control zone and transition area to adequately protect aircraft executing the new procedures.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.171 (38 FR 351), the following control zone is amended to read:

IRON MOUNTAIN, MICH.

Within a 7-mile radius of Ford Airport (latitude 45°48'57" N., longitude 88°06'56" W.); within 3 miles each side of the Iron Mountain VORTAC 192° radial, extending from the 7-mile-radius zone to 8 miles south of the VORTAC.

This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airman's Information Manual.

In § 71.181 (38 FR 435), the following transition area is amended to read:

IRON MOUNTAIN, MICH.

That airspace extending upward from 700 feet above the surface within a 10-mile radius of Iron Mountain VORTAC; within 6 miles west and 9½ miles east of the Iron Mountain ILS localizer south course extending from the 10-mile-radius area to 24 miles south of the Ford Airport (latitude 45°48'57" N., longitude 88°06'56" W.); within 5 miles each side of the Iron Mountain ILS localizer north course extending from the 10-mile radius to 18 miles north of the airport; and that airspace extending upward from 1,200 feet above the surface within a 15½-mile radius of the Iron Mountain VORTAC; within 4½ miles east and 11½ miles west of the Iron Mountain ILS localizer north course extending from the 15½-mile radius to 25 miles north of the airport.

Section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348), and of section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)) are authoritative in proposing this amendment.

Issued in Des Plaines, Ill., on December 27, 1972.

R. O. ZIEGLER,
Acting Director,
Great Lakes Region.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Parts 2, 74]

[Docket No. 19646]

PUBLIC SAFETY RADIO SERVICES

Reduction of Authorized Bandwidth for Use of Frequencies; Extension of Time for Filing Comments

In the matter of amendment of parts 2 and 74 of the Commission's rules to reduce the authorized bandwidth for the use of the frequencies 166.25 and 170.15 MHz, Docket No. 19646.

1. A petition for an extension of time for filing comments in the above-captioned proceeding has been filed by the National Association of Broadcasters (hereinafter NAB) requesting an extension of the deadline by which comments may be filed from January 12, 1973, to February 12, 1973.

2. According to NAB, its engineering advisory committee was scheduled to meet on January 4 and 5, 1973, to study the effects of the proposed bandwidth reduction. Also, NAB is conducting a survey of broadcast stations utilizing remote pickup broadcast equipment on the two subject frequencies to determine what impact, if any, the proposed action will have on their operations. NAB says that it requires additional time to properly present the information obtained from these studies.

3. The Commission desires to be fully informed of any consequencies which may result because of the proposed bandwidth reduction.[1] It appears that the requested extension would enable NAB to include in its comments relevant information which would not be available prior to the current filing deadline. Also, the Commission understands the difficulty NAB and others may have in completing their filings within the specified time because of the usual slowdowns that occur during the holiday season at end of the calendar year. It does not appear that a 1-month extension would seriously delay this proceeding or prejudice the interests of any interested party.

4. *Accordingly, it is ordered,* Pursuant to authority contained in Section 5(d) of the Communications Act of 1934, as amended, 47 U.S.C. 155(d) and § 0.251 (b) of the Commission's rules 47 CFR 0.251(b), that the date for filing comments in this proceeding is extended from January 12, 1973, to February 12, 1973. Consequently, the date for filing reply comments also is extended from January 22, 1973, to February 22, 1973.

Adopted: January 11, 1973.

Released: January 12, 1973.

FEDERAL COMMUNICATIONS COMMISSION,
DANIEL R. OHLBAUM,
Deputy General Counsel.

[FR Doc.73-1222 Filed 1-18-73;8:45 am]

[1] Notice of proposed rule making in this matter was published at 37 FR 26128, Dec. 8, 1972.

[47 CFR Part 73]

[Docket No. 19653]

FM BROADCAST STATIONS, GREGORY, S. DAK.

Table of Assignments; Extension of Time for Filing Comments

In the matter of amendment of § 73.202(b), *Table of Assignments,* FM Broadcast Stations (Gregory, S. Dak.), Docket No. 19653, RM-1759.

1. On November 29, 1972, the Commission adopted a notice of proposed rule making in the above-captioned proceeding. Publication in the FEDERAL REGISTER was given on December 8, 1972 (37 FR 26134). Comments and reply comments were due to be filed on January 12 and January 22, 1973, respectively.

2. On January 10, 1973, Midwest Radio Corp., licensee of Stations KWYR and KWYR-FM, Winner, S. Dak., filed a petition for extensions of time in which to submit comments to and including February 12, 1973, and reply comments to and including February 22, 1973. Counsel for Midwest states he was recently retained to prepare and file comments on the proposed assignment and needs additional time to consult with the licensee of KWYR-FM and with its engineering consultant.

3. It appears that the requested extension is warranted and would serve the public interest. *Accordingly, it is ordered,* That the time for filing comments and reply comments in Docket No. 19653 is extended to and including February 12, 1973, and February 22, 1973, respectively.

4. This action is taken pursuant to authority found in sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and § 0.281(d)(8) of the Commission's rules.

Adopted: January 11, 1973.

Released: January 11, 1973.

[SEAL] HAROLD L. KASSENS,
Acting Chief,
Broadcast Bureau.

[47 CFR Parts 81, 83]

[Docket No. 19670; FCC 73-31]

USE OF RADIOTELEPRINTER IN MARITIME SERVICES

Proposed Interim Frequencies and Operating Procedures

In the matter of amendment of Parts 81 and 83, to provide on an interim basis frequencies and operating procedures for the use of radioteleprinter in the maritime services, Docket No. 19670.

1. Notice of proposed rule making in the above-entitled matter is hereby given.

2. This proposal is being issued to facilitate the use of radioteleprinter in the maritime services. The Radio Technical Commission for Marine Services (RTCM) has urged the Commission to amend its rules to provide, on an interim basis, frequencies and operating procedures to cover the period prior to adoption of internationally agreed frequencies and operating procedures. There has been an increasing interest by the maritime services over the past few years in the use of radioteleprinter/data systems. This interest has developed to the point where it now appears that radioteleprinter service will be initiated in the near future on a regular basis between one or more coast stations and a number of ship stations.

3. The Radio Technical Commission for Marine Services (RTCM) established Special Committee 64 (SC-64) to study, among other things, use of radioteleprinter systems in the maritime services. SC-64 has studied this matter since February 18, 1970, and has produced much of the material which the United States will recommend be included in the International Radio Regulations at the ITU World Administrative Radio Conference on Marine Matters, to be convened in Geneva, Switzerland, early in 1974. SC-64 has recognized that 3 to 5 years will elapse before appropriate frequencies and operating procedures can be included in the ITU Radio Regulations and those regulations ratified, to provide for the continued development and use of radioteleprinter systems. SC-64 has developed and recommended that an interim procedure be included in the Commission's rules for the Maritime Services. This procedure is set forth below.

4. It is not possible at this early date to forecast details of the operating procedures which will be adopted at the ITU World Administrative Radio Conference on Marine Matters, Geneva, 1974. It is, however, anticipated that those procedures would be acceptable and, therefore, would be applicable to U.S. registry vessels. On this basis, the interim procedures would be deleted from the rules and would be replaced by the internationally agreed procedures.

5. Several aspects of radioteleprinter systems which were considered by SC-64 are not included in the attached appendix. Primary among these are the use of error detecting and/or correcting equipment and the use of selective calling equipment, which are reviewed below.

A. Error detecting and/or correcting equipment. In simple terms, error detecting equipment has as its objective the determination that an error has occurred, where automatic equipment for correcting that error(s) is not provided. Error correction equipment includes means for determining that errors occurred and for automatically correcting such errors.

V 38 - 13 JAN 19 73 XUM

Two such systems have been installed aboard ship, one referred to as "SITOR" and the other as "CODEX." CODEX is an error detection system; SITOP is an error correction system. CODEX has limited installation aboard United States registry vessels; SITOR is installed (number unknown) aboard European registry vessels. Use of the SITOR system has been recommended by the ITU International Radio Consultative Committee (CCIR) in Recommendation No. 476. RTCM has recommended use of the SITOR system. The two systems are not compatible, thus coast stations desiring to communicate with vessels employing one or the other of the two systems would be required to fit with both systems. In view of the foregoing, it is our opinion that it would be premature to take any action at this time with regard to error detection/correction equipment.

B. Selective calling equipment.

(i) Industry representatives in meetings convened by the Commission developed a digital selective calling system intended to operate on either radiotelegraph or radiotelephone communication channels available to the maritime services. That system was approved by RTCM, which recommended its development and testing be effected by the Maritime Administration. The Maritime Administration has made substantial progress towards that objective and the test results are expected to be available during the last quarter of 1973. Further, at a CCIR meeting in 1972, the United States presented a paper and discussed its plans to develop this digital selective calling system. Lastly, the United States has indicated its intent to seek inclusion of this digital system in the ITU Radio Regulations at the ITU World Administrative Radio Conference on Marine Matters, Geneva, 1974. It is anticipated that the future need for selective calling by radioteleprinter in the maritime services will be fulfilled by the above digital system.

(ii) During the interim, however, there is a requirement for a device which on a selective basis will turn on and turn off teletypewriting equipment aboard ship or at coast stations. Such a device is referred to by SC–64 as a "stunt box." The function performed by these "stunt boxes" is substantially simpler than that of the digital selective calling system referred to above. On an interim basis, however, they satisfactorily fulfill the dual requirements of reducing (a) the wear and tear on teletypewriting equipment and (b) the quantity of paper which otherwise would be wasted by printing all traffic transmitted on the receiving channel(s) being monitored. The "stunt box" would respond to the call sign of the ship or coast station, turn on the teletypewriter, print the incoming call, and turn off the teletypewriter at the end of the call. Thus, these functions could be carried out whether watch personnel were on duty or off duty, there would be a record of incoming calls, to which replies could be made upon return to duty. As discussed in SC–64, "stunt boxes" capable of performing these limited functions are readily available. In view of the foregoing, it is our opinion that no action is required at this time to prescribe standard technical requirements for these "stunt boxes."

6. A major objective of the interim procedure is to provide a capability by which a ship station may contact a coast station and vice versa, within the shortest practicable period of time, hopefully within seconds. In developing this procedure, it first appeared that it would be preferable for a coast or ship station to call on its regular working frequencies. This view was dropped after considering the number of frequencies which a coast or ship station would be required to monitor simultaneously, since the cost of such a large number of receivers would be prohibitive. This was further accented when account was taken of the bandwidth and frequency stability required to be provided in the receiver(s). The bandwidth (selectivity) of the receiver should be such that it will reject the adjacent channels, which are positioned at ±500 Hz. Further, considering the frequency shift of the transmitted signal (±85 Hz) and the selectivity of the discriminator (demodulator), the frequency stability of the receiver should be equal to 10 Hz or less for all megacycle orders of received signal.

7. The interim procedure provides that coast stations and ship stations providing a radioteleprinter service will employ six common frequencies (single frequency simplex) for calling. This arrangement requires the fewest number of receivers. It has the disadvantage, of course, that extensive use by any licensee will congest the channel, thus delaying service to others desiring to use the channel(s). To provide partial relief, licensees are required to limit use of the six common channels to calling and to the exchange of information regarding working frequencies to be used for traffic handling. Further, a call on the same frequency may not be repeated within a 15-minute period.

8. The interim procedure provides, by reference to Subpart E (§§ 81.143 and 83.143), for the use of 0.3F1 emission. Transmitter power at coast stations is limited to 1 kilowatt. The limitation is applied in order to minimize the potentiality of interference to ship stations, since the six common frequencies are actually allocated for use by ship stations.

9. With regard to station identification, the interim procedure provides that identification be provided using the same mode by which regular transmissions are made, that is, by emission 0.3F1. This is deemed necessary since many of the vessels which will be initially fitted with radioteleprinter equipment will be radiotelephony fitted vessels, which do not have first or second class radiotelegraph licensed operators on board. Further, the addition of manual Morse identification on the six common channels, at substantially slower speeds, would add to congestion of these channels.

10. The proposed amendments, as set forth below, are issued pursuant to the authority contained in sections 4(i) and 303 of the Communications Act of 1934, as amended.

11. Pursuant to the applicable procedures set forth in § 1.415 of the rules, interested persons may file comments on or before February 23, 1973, and reply comments on or before March 5, 1973. Section 1.419 of the rules requires the original and fourteen (14) copies of comments or reply comments to be filed. Comments and reply comments received in response to this notice of proposed rule making will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

Adopted: January 10, 1973.

Released: January 15, 1973.

FEDERAL COMMUNICATIONS COMMISSION,[1]
[SEAL] BEN F. WAPLE,
Secretary.

A. Part 81, Stations on Land in the Maritime Services and Alaska-Public Fixed Stations is amended as follows:

1. § 81.207, a new paragraph (e) is added to read as follows:

§ 81.207 Frequencies for call and reply.

• • • • •

(e) Pending availability of an internationally agreed plan for establishing two-way communications by radioteleprinter, the interim procedure set forth in this section may be employed.

(1) Frequencies available: 4186.5, 6279.70, 8373.0, 12,559.5, 16,746.0, and 22,262.5 kHz. Transmitter power shall not exceed 1 kilowatt.

(2) Transmission on the frequencies set forth in subparagraph (1) of this section shall be limited to calling necessary to establish communication and, thereafter, to informing the receiving station of the working frequency or frequencies to be used. The frequencies set forth in subparagraph (1) of this section shall not be employed for working.

(3) Unless other arrangements have been made with concerned ship stations, the coast station expecting calls by radioteleprinter should maintain three or more receivers on the frequencies, set forth in subparagraph (1) of this section, most likely to be useable for the propagation path involved.

(4) The radioteleprinter equipment shall conform to the standard technical requirements set forth in Subpart E of this Part.

(5) Since coast radiotelegraph stations and ship stations will share use of the frequencies set forth in subparagraph (1) of this section, station licensees should:

(i) Avoid the creation of interference to transmissions already in progress.

(ii) In initiating calls, transmit the call sign of the station called three times, followed by "DE", followed by the call sign of the calling station, transmitted three times. For example, "WABC WABC WABC DE WLO WLO WLO."

[1] Commissioner Hooks absent.

(iii) When the station called does not reply, the call should not be repeated on the same frequency until after an interval of at least 15 minutes.

(6) Calling and station identification shall be effected by radioteleprinter.

B. Part 83, Stations on Shipboard in the Maritime Services, is amended as follows:

1. In § 83.318, a new paragraph (c) is added to read as follows:

§ 83.318 Ship radiotelegraph calling frequencies.

• • • • •

(c) Pending availability of an internationally agreed plan for establishing two-way communications by radioteleprinter, the interim procedure set forth in this section may be employed.

(1) Frequencies available: 4186.5, 6279.70, 8373.0, 12559.5, 16746.0, and 22262.5 kHz.

(2) Transmission on the frequencies set forth in subparagraph (1) of this section shall be limited to calling necessary to establish communication and, thereafter, to informing the receiving station of the working frequency or frequencies to be used. Ship station working frequencies for radioteleprinter are set forth in section 83.320 of this part. The frequencies set forth in subparagraph (1) of this section shall not be employed for working.

(3) Unless other arrangements have been made with concerned coast stations, the ship station expecting calls by radioteleprinter should maintain a receiver on the frequency or frequencies, set forth in subparagraph (1) of this section, most likely to be usable for the propagation path involved.

(4) The radioteleprinter equipment shall conform to the standard technical requirements set forth in Subpart E of this Part.

(5) Since ship stations and coast radiotelegraph stations will share use of the frequencies set forth in subparagraph (1) of this section, station licensees should:

(i) Avoid the creation of interference to transmissions already in progress.

(ii) In initiating calls, transmit the call sign of the station called three times, followed by "DE", followed by the call sign of the calling station, transmitted three times. For example, "WLO WLO WLO DE WABC WABC WABC."

(iii) When the station called does not reply, the call should not be repeated on the same frequency until after an interval of at least 15 minutes.

(6) Calling and station identification shall be effected by radioteleprinter.

Notices

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

NOTICE OF GRANTING OF RELIEF

Notice is hereby given that pursuant to 18 U.S.C. 925(c) the following named persons have been granted relief from disabilities imposed by Federal laws with respect to the acquisition, transfer, receipt, shipment, or possession of firearms incurred by reason of their convictions of crimes punishable by imprisonment for a term exceeding 1 year.

It has been established to my satisfaction that the circumstances regarding the convictions and each applicant's record and reputation are such that the applicant will not be likely to act in a manner dangerous to public safety, and that the granting of the relief will not be contrary to the public interest.

Ashlock, Ronald R., 1697 175th Street, Hammond, IN, convicted on March 10, 1964, in the Superior Court of Cumberland County, N.C.

Clark, Eugene P., 1328 Augusta Avenue, Augusta, GA, convicted on November 4, 1966 and August 9, 1968 in the Superior Court of Richmond County, Ga.

Cowgill, Eugene H., 663 Oak Lane, Waynesboro, VA, convicted on January 21, 1971, in the Circuit Court of Louisa County, Va.

Crafts, Sandra L., No. 2 Sunshine Street, Box 84, Ruth, NV, convicted on September 13, 1965, in the U.S. District Court, District of Nevada.

Green, Arthur L., 1057 Boynton Avenue, Apt. 1-F, Bronx, NY, convicted on June 19, 1941, in the Criminal Court, County of Martin, Stuart, Fla.

Harper, John, 4½ Sunset Wire Rope, 518 Marine Drive, Port Angeles, WA, convicted on February 10, 1969, in the Superior Court of the State of Washington for Clallam County, and on March 6, 1970, in the U.S. District Court for the Western District of Washington.

Jackson, Clyde J., 3450 West Chicago Boulevard, Detroit, MI, convicted on September 26, 1938, in the Shelby County Criminal Court, Memphis, Tenn.

Leary, Dennis L., 243 Southeast 29th Court, Des Moines, IA, convicted on December 29, 1964, in the District Court of Iowa, Emmet County.

Legrand, John B., 409 North Third, Sapulpa, OK, convicted on November 16, 1959, in the District Court of the Third Judicial District of Nebraska, in and for Lancaster County.

Lynch, John J., Post Office Box 1082, Weston, CT, convicted on October 10, 1952, in the City Court of Norwalk, Norwalk, Conn.

Phillips, Richard E., State Route 607, Crewe, Va., convicted on January 2, 1968 in Nottoway County Virginia Court.

Pruitt, Howard L., Riddle Road (General Delivery), Central Valley, Calif., convicted on August 5, 1963 and December 16, 1963, in the Superior Court of the State of California for the County of Shasta.

Reeb, John R., Route 1, Box 492, Snohomish, WA, convicted on November 6, 1970, in the District Court for Ravalli County, Mont.

Robertson, Blair Z., Rural Delivery 1, Salisbury, Pa., convicted on March 24, 1956, in the Court of Quarter Sessions of Somerset County, Pa.

Schroeder, Daniel D., 1324 L Avenue Northeast, Cedar Rapids, IA, convicted on July 1, 1969, by the Linn County District Court, Cedar Rapids, Iowa.

Smith, Kenny A., 507 Fourth Avenue, Grinnell, IA, convicted on November 9, 1964, in Poweshiek County District Court, Grinnell, Iowa.

Smith, Robert L., 81 Belmont Street, Detroit, MI, convicted on January 31, 1962, in Recorder's Court, Detroit, Mich.

Sparks, William B., 7826 Carrie Street, Detroit, MI, convicted on October 29, 1934, in Macomb County, Michigan Circuit Court, and on May 9, 1935 and July 13, 1943 in Recorder's Court, Detroit, Mich.

Taylor, Vernon S., Jr., 3833 156th Avenue Southeast, Bellevue, WA, convicted on March 17, 1953 in the U.S. District Court Western District of Washington.

Wikle, Earl B., Jr., 700 East 21st Street, Court 29, Topeka, KS, convicted on October 10, 1957, in the District Court of Shawnee County, Kans.

York, Walter R., 206 23d Avenue East, Seattle, WA, convicted on October 30, 1946 by the U.S. District Court in and for the Western District of Washington, Northern Division.

Signed at Washington, D.C., this 9th day of January 1973.

[SEAL] REX D. DAVIS,
Director, Bureau of Alcohol, Tobacco and Firearms.

Bureau of Customs

[T.D. 73-22; Customs Delegation Order 44]

DEPUTY COMMISSIONER OF CUSTOMS ET AL.

Order of Succession to Act as Commissioner of Customs

JANUARY 15, 1973.

By virtue of the authority vested in me by Treasury Department Order No. 129, Revision No. 2, dated April 22, 1955 (20 FR 2875), it is hereby ordered that the following officers of the Bureau of Customs in the order of succession enumerated, shall act as Commissioner of Customs, in the event of an enemy attack or during the absence or disability of the Commissioner of Customs, or when there is a vacancy in such office:

1. The Deputy Commission of Customs.
2. The Assistant Commissioner of Customs, Office of Operations.
3. The Assistant Commissioner of Customs, Office of Regulations and Rulings.
4. The Assistant Commissioner of Customs, Office of Administration.
5. The Assistant Commissioner of Customs, Office of Investigations.
6. The Assistant Commissioner of Customs, Office of Security and Audit.
7. Chief Counsel.
8. The Regional Commissioner of Customs, Region II.

9. If none of the above officials is available, the remaining Regional Commissioners of Customs, in order of their appointment as Regional Commissioners of Customs.

By virtue of authority vested in me by said Treasury Department Order No. 129 (Revision No. 2), and Treasury Department Order No. 165, Revised (T.D. 53654; 19 FR 7241), there is hereby delegated to the regional commissioners of customs, district directors of customs, and port directors of customs, in the event of an enemy attack on the continental United States, authority to perform any function of the Commissioner of Customs which is necessary to insure continuous performance of essential functions otherwise assigned to such officers. This delegation of authority will remain in effect until notice has been received from proper authority that it has been terminated.

This order supersedes Customs Delegation Order No. 32, dated September 28, 1967 (T.D. 67-232; 32 FR 13873), and Customs Delegation Order No. 39, dated November 16, 1970 (T.D. 70-243, 35 FR 17862).

[SEAL] VERNON D. ACREE,
Commissioner of Customs.

[Treasury Department Order 190-1]

DEPUTY ASSISTANT SECRETARY FOR TAX POLICY

Delegation of Authority

By virtue of authority vested in the Secretary of the Treasury, which authority has been delegated to me as Assistant Secretary for Tax Policy by Treasury Department Order No. 190 (Revision 8), I hereby delegate to the Deputy Assistant Secretary for Tax Policy (Tax Legislation) authority to approve regulations relating to the internal revenue laws. This authority may be exercised by him in his own capacity and under his own title, and he shall be responsible for referring to the Assistant Secretary for Tax Policy any regulations on which action should appropriately be taken by him.

Dated: January 8, 1973.

[SEAL] FREDERIC W. HICKMAN,
Assistant Secretary for Tax Policy.

Approved:

GEORGE P. SHULTZ,
Secretary of the Treasury.

IRON POWDER (EXCLUDING ALLOY AND SPONGE POWDERS) FROM CANADA

Antidumping Proceeding Notice

JANUARY 16, 1973.

On December 7, 1972, information was received in proper form pursuant to §§ 153.26 and 153.27, Customs regulations (19 CFR 153.26, 153.27), indicating a possibility that iron powder (excluding alloy and sponge iron powders) from Canada is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.).

There is evidence on record concerning injury to or likelihood of injury to or prevention of establishment of an industry in the United States.

Having conducted a summary investigation as required by § 153.29 of the Customs regulations (19 CFR 153.29) and having determined as a result thereof that there are grounds for so doing, the Bureau of Customs is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value.

A summary of information received from all sources is as follows:

The information received tends to indicate that the prices of merchandise sold for exportation to the United States are less than the prices for home consumption.

This notice is published pursuant to § 153.30 of the Customs regulations (19 CFR 153.30).

[SEAL] EUGENE T. ROSSIDES,
Assistant Secretary of the Treasury.

PAPERMAKING MACHINERY FROM FINLAND AND SWEDEN; SULPHUR FROM CANADA

Notice of Extension of Time for Investigations

JANUARY 17, 1973.

Information was received on June 6, 1971, and January 21, 1972, respectively, that papermaking machinery from Finland and Sweden; and sulphur from Canada were being sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.). This information was the subject of "Antidumping Proceeding Notices," the first two of which were published in the FEDERAL REGISTER of August 14, 1971, on page 15460; and the third on February 24, 1972, on page 3922.

Upon publication of the "Antidumping Proceeding Notices" the Commissioner of Customs initiated full-scale investigations in order to obtain additional information considered necessary to enable the Secretary to reach a determination as provided in § 153.32(a), Customs regulations (19 CFR 153.32(a)).

Notice is hereby given that it has been determined pursuant to § 153.32(c), Customs regulations (19 CFR 153.32(c)), that because of certain complex issues not yet resolved relating to the treatment of possible sales below cost of production, and in order to permit adequate consideration of the possible impact of these issues on the current investigations, it was not possible to have made tentative decisions within the 9-month period contemplated in section 153.32(c), Customs regulations, and that an additional period of time, not to exceed 3 months, will be necessary before the appropriate actions can be taken.

This "Notice of Extension of Time for Investigations" is published pursuant to § 153.32(c) of the Customs regulations.

[SEAL] EUGENE T. ROSSIDES,
Assistant Secretary, of the Treasury.

POLYPROPYLENE STRAPPING FROM JAPAN

Antidumping Proceeding Notice

JANUARY 16, 1973.

On December 20, 1972, information was received in proper form pursuant to §§ 153.26 and 153.27, Customs regulations (19 CFR 153.26, 153.27), indicating a possibility that polypropylene strapping from Japan is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.).

There is evidence on record concerning injury to or likelihood of injury to or prevention of establishment of an industry in the United States.

Having conducted a summary investigation as required by § 153.29 of the Customs regulations (19 CFR 153.29) and having determined as a result thereof that there are grounds for so doing, the Bureau of Customs is instituting an inquiry to verify the information submitted and to obtain the facts necessary to enable the Secretary of the Treasury to reach a determination as to the fact or likelihood of sales at less than fair value.

A summary of information received from all sources is as follows:

The information received tends to indicate that the prices of the merchandise sold for exportation to the United States are less than the prices for home consumption.

This notice is published pursuant to § 153.30 of the Customs regulations (19 CFR 153.30).

[SEAL] EUGENE T. ROSSIDES,
Assistant Secretary of the Treasury.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[INT DES 73-1]

OUTER CONTINENTAL SHELF OFFSHORE TEXAS AND LOUISIANA

Availability of Draft Environmental Impact Statement and Public Hearing Regarding Possible Oil and Gas Lease Sale

JANUARY 18, 1973.

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental impact statement relating to a possible Outer Continental Shelf general oil and gas lease sale of 129 tracts of submerged lands on the Outer Continental Shelf in the Gulf of Mexico offshore Texas and Louisiana.

The draft environmental statement is available for public review in the Office of the Manager, New Orleans Outer Continental Shelf Office, Bureau of Land Management, Suite 3200, The Plaza Tower, 1001 Howard Avenue, New Orleans, LA 70113, and in the Office of Information, Bureau of Land Management (130), Washington, DC 20240. Copies are available for purchase from these offices for $2 per copy.

A composite map of the area of the Gulf of Mexico offshore Texas and Louisiana, upon which tracts being considered for leasing have been depicted and a listing of these tracts may be obtained at no charge from the above-listed offices.

In accordance with 43 CFR 3301.4, a public hearing will be held beginning at 9 a.m. on February 21, 1973, in Room

V38-13 JAN 1973 XUM

114, Albert Thomas Convention and Exhibit Center, 612 Smith Street, Houston, TX for the purpose of receiving comments and suggestions relating to the possible lease sale. The hearing has been scheduled to extend through February 22.

The hearing will provide the Secretary with additional information from both the public and private sectors to help evaluate fully the potential effects of the possible offering of the 129 tracts on the total environment, aquatic resources, aesthetics, recreation, and other resources in the entire area during the exploration, development, and operation phases of the leasing program.

The hearing will also provide the Secretary, under section 102(2)(C) of the National Environmental Policy Act of 1969, with the opportunity to receive additional comments and views of interested State and local agencies.

Interested individuals, representatives of organizations and public officials wishing to testify at the hearing are requested to contact the Manager, New Orleans Outer Continental Shelf Office, Bureau of Land Management, at the above-listed address by 4:15 p.m., February 15, 1973. Written comments from those unable to attend the hearing should be addressed to the Director (Attn: 392), Bureau of Land Management, U.S. Department of the Interior, Washington, D.C. 20240. The Department will accept written testimony and comments on the draft environmental statement until March 5, 1973. This should allow ample time for those unable to testify at the hearing to make their views known and for the submission of supplemental materials by those presenting oral testimony. Time limitations make it necessary to limit the length of oral presentations to 10 minutes. An oral statement may, however, be supplemented by a more complete written statement which may be submitted to the hearing officer at the time of presentation of the oral statement. Written statements presented in person at the hearing will be considered for inclusion in the hearing record. To the extent that time is available after presentation of oral statements by those who have given advance notice, the hearing officer will give others present an opportunity to be heard.

After all testimony and comments have been received and analyzed a final environmental statement will be prepared.

ED HASTEY,
Acting Associate Director,
Bureau of Land Management.

Approved:

W. W. LYON,
Deputy Assistant Secretary of the Interior.

LAGUNA AND JICARILLA INDIAN LANDS IN NEW MEXICO AND SOUTHERN UTE INDIAN LANDS IN COLORADO

Feed Grain Donations

Pursuant to the authority set forth in section 407 of the Agricultural Act of 1949, as amended (7 U.S.C. 1427), and Executive Order 11336, I have determined that:

1. The chronic economic distress of the needy members of the Laguna and Jicarilla Indian lands in New Mexico and the Southern Ute Indian Lands in Colorado has been materially increased and become acute because of severe drought during the 1971 and 1972 growing seasons creating a serious shortage of livestock feeds. These lands are reservation or other lands designated for Indian use and are utilized by members of the Indian tribes for grazing purposes.

2. The use of feed grain or products thereof made available by the Commodity Credit Corporation for livestock feed for such needy members of the tribes will not displace or interfere with normal marketing of agricultural commodities.

Based on the above determinations, I hereby declare the reservations and grazing lands of these tribes to be acute distress areas and authorize the donation of feed grain owned by the Commodity Credit Corporation to livestockmen who are determined by the Bureau of Indian Affairs, Department of the Interior, to be needy members of the tribes utilizing such lands. These donations by the Commodity Credit Corporation may commence upon signature of this notice and shall be made available through the duration of the existing emergency or to such other time as may be stated in a notice issued by the Department of Agriculture.

Signed at Washington, D.C., on January 17, 1973.

EARL L. BUTZ,
Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[DESI 9206; Docket No. FDC-D-414; NDA 10-431]

ABBOTT LABORATORIES

Selinium Sulfide With Hydrocortisone Acetate Ointment; Notice of Withdrawal of Approval of New Drug Application

A notice was published in the FEDERAL REGISTER of March 28, 1972 (37 FR 6343), extending to Abbott Laboratories, 14th and Sheridan Road, North Chicago, IL 60064 and to any interested person, an opportunity for hearing on the proposal of the Commissioner of Food and Drugs to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act withdrawing approval of NDA 10-431 for Selsunef Ointment (selenium sulfide and hydrocortisone acetate). The basis of the proposed action was the lack of substantial evidence that the drug is effective for its labeled indications.

By letter of December 8, 1971, Abbott Laboratories stated that marketing of the drug had been discontinued on May 7, 1969, requested withdrawal of approval of the application, and waived opportunity for a hearing. This request and waiver had been inadvertently overlooked when the said notice was published.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application reviewed and are subject to this notice. See 21 CFR 130.40 (37 FR 23185, October 31, 1972). Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, Md. 20852.

The Commissioner of Food and Drugs pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1053, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to him (21 CFR 2.120), finds that on the basis of new information before him with respect to the drug, evaluated together with the evidence available to him when the application was approved, there is a lack of substantial evidence that the drug will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling thereof.

Therefore, pursuant to the foregoing finding, approval of new drug application No. 10-431 and all amendments and supplements thereto is withdrawn effective on January 19, 1973.

Shipment in interstate commerce of the above-listed drug product or of any identical, related, or similar product, not the subject of an approved new drug application, is henceforth unlawful.

Dated: January 12, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.73-1165 Filed 1-18-73;8:45 am]

[DESI 64; Docket No. FDC-D-574; NDA No. 64, etc.]

CERTAIN BARBITURATE-ANALGESIC COMBINATION DRUGS FOR ORAL USE

Notice of Opportunity for Hearing on Proposal To Withdraw Approval of New-Drug Applications

In a notice (DESI 64) published in the FEDERAL REGISTER of March 14, 1972 (37 FR 5308), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of reports received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the drugs described below stating that the drugs are regarded as possibly effective and lacking substantial evidence of effectiveness for the various labeled indications. The possibly effective indications have been reclassified as lacking substantial evidence of effectiveness in that no new evidence of effectiveness of the drugs have been submitted pursuant to the notice.

NDA 64; Allonal Tablets containing aprobarbital and phenacetin; Roche Laboratories, Division Hoffmann-LaRoche, Inc., Roche Park, 340 Kingsland Street, Nutley, NJ 07110.

NDA 4-296; Pentobarbital-Aspirin Capsules; Cooper Laboratories, Inc. (successor to Tilden-Yates Laboratories, Inc.), 2900 North 17th Street, Philadelphia, PA 19132.

NDA 2-898; Cyclopal and Aspirin Tablets containing cyclopentenylallylbarbituric acid and aspirin; The Upjohn Co., 7171 Portage Road, Kalamazoo, MI 49002.

Therefore, notice is given to the holder(s) of the new drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355 (e)) withdrawing approval of the listed new drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed. See 21 CFR 130.40 (37 FR 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, MD 20852.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn.

On or before February 20, 1973, the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, MD 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within said 30 days will constitute an election by him not to avail himself of the opportunity for a hearing.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, on or before February 20, 1973, a written appearance requesting the hearing, giving the reasons why approval of the new drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be

V 38 I 13 JAN 19 73 XUM

seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: January 12, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.73-1164 Filed 1-18-73;8:45 am]

[DESI 843; Docket No. FDC-D-554; NDA 843]

CIBA PHARMACEUTICAL CO.

Desoxycorticosterone Acetate for Intrabuccal Administration; Notice of Opportunity for Hearing on Proposal To Withdraw Approval of New Drug Application

In a notice (DESI 843) published in the FEDERAL REGISTER of September 19, 1970 (35 FR 14662), the Commissioner of Food and Drugs announced his conclusions pursuant to the evaluation of a report received from the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, on the following drug:

Percorten Acetate Linguets containing desoxycorticosterone acetate; Ciba Pharmaceutical Co., Division of Ciba-Geigy Corp., 556 Morris Avenue, Summit, NJ 07901 (NDA 843).

The notice stated that desoxycorticosterone acetate for intrabuccal administration is probably effective as partial therapy in Addison's disease. On June 22, 1972, Ciba Pharmaceutical Co. informed the Food and Drug Administration that no clinical trials are underway nor are any contemplated. The probable effective indication for the product intended for intrabuccal administration has been reclassified as lacking substantial evidence of effectiveness in that no new evidence of effectiveness of the drug has been submitted pursuant to the notice.

Therefore, notice is given to the holder(s) of the new drug application(s) and to any other interested person that the Commissioner proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of pertinent parts of the listed new drug application(s) and all amendments and supplements thereto on the grounds that new information before him with respect to the drug(s), evaluated together with the evidence available to him at the time of approval of the application(s), shows there is a lack of substantial evidence that the drug(s) will have all the effects purported or represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

All identical, related, or similar products, not the subject of an approved new drug application, are covered by the new drug application(s) reviewed. See 21 CFR 130.40 (37 FR 23185, October 31, 1972). Any manufacturer or distributor of such an identical, related, or similar product is an interested person who may in response to this notice submit data and information, request that the new drug application(s) not be withdrawn, request a hearing, and participate as a party in any hearing. Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, Md. 20852.

In accordance with the provisions of section 505 of the Act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Part 130), the Commissioner hereby gives the applicant(s) and any other interested person an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn.

On or before February 20, 1973, the applicant(s) and any other interested person is required to file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, Md. 20852, a written appearance electing whether or not to avail himself of the opportunity for a hearing. Failure of an applicant or any other interested person to file a written appearance of election within said 30 days will constitute an election by him not to avail himself of the opportunity for a hearing.

If no person elects to avail himself of the opportunity for a hearing, the Commissioner without further notice will enter a final order withdrawing approval of pertinent parts of the application(s).

If an applicant or any other interested person elects to avail himself of the opportunity for a hearing, he must file, on or before February 20, 1973, a written appearance requesting the hearing, giving the reasons why approval of the new drug application(s) should not be withdrawn, together with a well-organized and full-factual analysis of the clinical and other investigational data he is prepared to prove in support of his opposition. A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that a genuine and substantial issue of fact requires a hearing (21 CFR 130.14(b)).

If review of the data submitted by an applicant or any other interested person warrants the conclusion that there exists substantial evidence demonstrating the effectiveness of the product(s) for the labeling claims involved, the Commissioner will rescind this notice of opportunity for hearing.

If review of the data in the application(s) and data submitted by the applicant(s) or any other interested person in a request for a hearing, together with the reasoning and factual analysis in a request for a hearing, warrants the conclusion that no genuine and substantial issue of fact precludes the withdrawal of approval of the application(s), the Commissioner will enter an order of withdrawal making findings and conclusions on such data.

If, upon the request of the new drug applicant(s) or any other interested person, a hearing is justified, the issues will be defined, a hearing examiner will be named, and he shall issue, as soon as practicable after the expiration of such 30 days, a written notice of the time and place at which the hearing will commence. All persons interested in identical, related, or similar products covered by the new drug application(s) will be afforded an opportunity to appear at the hearing, file briefs, present evidence, cross-examine witnesses, submit suggested findings of fact, and otherwise participate as a party. The hearing contemplated by this notice will be open to the public except that any portion of the hearing that concerns a method or process the Commissioner finds entitled to protection as a trade secret will not be open to the public, unless the respondent specifies otherwise in his appearance.

Requests for a hearing and/or elections not to request a hearing may be seen in the Office of the Hearing Clerk (address given above) during regular business hours, Monday through Friday.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–53, as amended; 21 U.S.C. 355), and the Administrative Procedure Act (5 U.S.C. 554), and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: January 11, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

[FR Doc.73-1166 Filed 1-18-73;8:45 am]

[Docket No. FDC-D-533; NADA 11-353V]

WHITMOYER LABORATORIES, INC.

Thera-Tergent; Notice of Withdrawal of Approval of New Animal Drug Application

In the FEDERAL REGISTER of November 11, 1972 (37 FR 24053), the Commissioner of Food and Drugs published a notice proposing to withdraw approval of new animal drug application (NADA) No. 11-353V for Thera-Tergent; marketed by Affiliated Laboratories, Division Whitmoyer Laboratories, Inc., 19 North Railroad Street, Myerstown, PA 17067 (formerly marketed by Warren-Teed Pharmaceuticals).

Neither Whitmoyer Laboratories, Inc. nor any other interested persons have filed a written appearance in response to the above-cited notice. This is construed as an election by said persons not to avail themselves of the opportunity for a hearing.

Based on the grounds set forth in said notice of opportunity for a hearing, the Commissioner concludes that approval of said new animal drug application should be withdrawn. Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512, 82 Stat. 343-351; 21 U.S.C. 360b) and under authority delegated to the Commissioner (21 CFR 2.120), approval of NADA No. 11-353V, including all amendments and supplements thereto, is hereby withdrawn effective on January 19, 1973.

Dated: January 12, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

Office of the Secretary

TUSKEGEE SYPHILIS STUDY AD HOC ADVISORY PANEL

Notice of Subcommittee Meeting

A subcommittee meeting of the Tuskegee Syphilis Study Ad Hoc Advisory Panel is to be held on January 24, 1973. This Panel was established by the Assistant Secretary for Health to provide advice on the circumstances surrounding the Tuskegee, Alabama, Study of Untreated Syphilis in the Male Negro initiated by the U.S. Public Health Service in 1932. The Assistant Secretary for Health requested the Panel to advise him on the following specific aspects of the Tuskegee Syphilis Study:

1. Determine whether the study was justified in 1932 and whether it should have been continued when penicillin became generally available.

2. Recommend whether the study should be continued at this point in time, and if not, how it should be terminated in a way consistent with the rights and health needs of its remaining participants.

3. Determine whether existing policies to protect the rights of patients participating in health research conducted or supported by the Department of Health, Education, and Welfare are adequate and effective and to recommend improvements in these policies, if needed.

This meeting is for the sole purpose of considering and formulating the advice which the Panel will give to the Assistant Secretary for Health on the third charge outlined above, and will involve exclusively the internal expression of views and judgments of its members. Accordingly, under the authority of the Assistant Secretary's notice of determination of January 17, 1973, this meeting is closed to the public. The meeting will begin at 1:30 p.m. at the National Urban League in New York City. A summary of the meeting and a roster of Panel members may be obtained from Mr. John Blamphin (202-962-7906), Room 5614, HEW North Building, 330 Independence Avenue SW., Washington, DC 20201.

Dated: January 17, 1973.

R. C. BACKUS,
Executive Secretary, Tuskegee Syphilis Study Ad Hoc Advisory Panel.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

AIRCRAFT EMISSIONS HEARINGS

Notice of Availability of Draft Tentative Federal Aviation Regulations

On Tuesday, December 12, 1972, the Environmental Protection Agency (EPA) published its proposed Part 87, Aircraft and Aircraft Engines—Proposed Standards for Control of Air Pollution (37 FR 26488). On that date, the Federal Aviation Administration also published a notice of participation in hearings to be held by EPA on its proposed regulations (37 FR 26458). In that notice, it was stated that FAA's regulatory response to EPA proposed Part 87, or at least an early draft, would be made available so that "public commentators will have full knowledge of both the EPA and the probable FAA proposals prior to the hearings."

A working draft of tentative FAA emission control regulations has been prepared and is available in the Office of Environmental Quality, Room 939, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591. Copies will also be available at the hearings. This draft is not a formal notice of proposed rule making, and should not be so regarded. However, it contains detailed regulatory language that represents the kinds of FAA rule making that, under section 232 of the Clean Air Act as amended, would have to follow the final issuance of EPA Part 87 if that part is adopted as proposed. In addition to persons generally concerned with the environmental aspects of FAA rule making, the draft is of particular interest to the following classes of persons within the aviation community:

(1) Applicants for type certificates and changes to type certificates (U.S. and foreign products).

(2) Applicants for standard airworthiness certificates.

(3) Applicants for, and holders of, delegation option authorizations.

(4) Applicants for approval of materials, parts, processes, and appliances (U.S. and foreign).

(5) Applicants for, and holders of, Designated Alteration Station (DAS) authorizations.

(6) Applicants for Technical Standard Order (TSO) Authorizations.

(7) Operators of products for which certain airworthiness directives are issued.

(8) Persons maintaining, rebuilding, altering, or performing preventive maintenance on U.S. and foreign civil air aircraft.

(9) Persons operating U.S. and foreign civil aircraft in the United States.

Issued in Washington, D.C., on January 17, 1973.

RICHARD P. SKULLY,
Director, Office of Environmental Quality.

ATOMIC ENERGY COMMISSION

[Dockets Nos. 50-387, 50-388]

PENNSYLVANIA POWER & LIGHT CO.

Notice of Availability of Applicant's Environmental Report, Amendments to Environmental Reports, and AEC Draft Environmental Statement

Pursuant to the National Environmental Policy Act of 1969 and the Atomic Energy Commission's regulations set forth in Appendix D to 10 CFR Part 50, notice is hereby given that documents entitled: "Applicant's Environmental Report, Revised July 1972," "Amendment No. 1 to Environmental Report," and "Amendment No. 2 to Environmental Report" (collectively known as the Environmental Reports"), submitted by the Pennsylvania Power & Light Co., have been placed in the Commission's Public Document Room at 1717 H Street NW., Washington, DC and with the Economic Development Council of Northeast Pennsylvania, Warm Building, Post Office Box 777, Avoca, PA 18651. The reports are also available at the Luzerne County Planning Commission, Courthouse, Wilkes-Barre, Pa. 18702 and the State Clearing House, 5100 Finance Building, Harrisburg, Pa. 17120.

Notice of availability of the applicant's Environmental Report was published in the FEDERAL REGISTER on August 1, 1972 (37 FR 15393).

The reports have been analyzed by the Commission's Directorate of Licensing, and a Draft Environmental Statement related to the proposed Construction of the Susquehanna Steam Electric Station Units 1 and 2, located near Berwick in Luzerne County, Pa., has been prepared and has been made available for public inspection at the locations designated above. Copies of the Commission's Draft Environmental Statement may be obtained upon request addressed to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

Pursuant to Appendix D to CFR Part 50, interested persons may, on or before March 5, 1973, submit comments for the Commission's consideration on the Environmental Reports and on the Draft Environmental Statement. Appropriate Federal and State agencies are being provided with copies of the Draft Environmental Statement and when comments thereon of the Federal, State, and local officials are received, they will be made available for public inspection at the above designated locations. Comments on the Draft Environmental Statement from interested members of the public should be addressed to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Deputy Director for Reactor Projects, Directorate of Licensing.

V 38 I 13 JAN 19 73 XUM

Dated at Bethesda, Md., this 15th day of January 1973.

For the Atomic Energy Commission.

DANIEL R. MULLER,
Assistant Director for Environmental Projects, Directorate of Licensing.

CIVIL AERONAUTICS BOARD

[Docket No. 25111; Order 73-1-46]

AEROLINEAS PERUANAS, S.A.

Statement of Tentative Findings and Conclusions and Order To Show Cause Regarding Cancellation of Foreign Air Carrier Permit

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 15th day of January 1973.

By Order 70-8-65 dated July 8, 1970, and approved by the President on August 14, 1970, the Board renewed the foreign air carrier permit of Aerolineas Peruanas, S.A. (APSA) which authorized the carrier to engage in foreign air transportation with respect to persons, property, and mail between various foreign points and various points in the United States and to engage in off-route charter trips.[1]

The Board has been advised by the Peruvian Government that on July 19, 1972, APSA was removed from designation under the bilateral agreement between Peru and the United States.

Based upon the foregoing, the Board tentatively finds that the foreign air carrier permit now held by APSA should be canceled, and that, unless objections are received within 20 days from the date of service of this order, the Board should make such tentative findings final and submit to the President for his approval a final order canceling the said permit.

Accordingly, it is ordered: 1. That all interested persons are directed to show cause why the Board should not issue an order which would make final the tentative findings and conclusions herein and which would, subject to the approval of the President, cancel the foreign air carrier permit held by Aerolineas Peruanas, S.A.

2. That any interested person having objections to the issuance of such an order shall file with the Board a statement of objections supported by evidence within 20 days of service of this order; [2]

3. That if timely and properly supported objections are filed, further consideration will be accorded the matters and issues raised by the objections before further action is taken by the Board;

4. That in the event no objections are filed, all further procedural steps will be deemed to have been waived and the Board may proceed to enter an order in accordance with the tentative findings and conclusions set forth herein; and

5. That Aerolineas Peruanas, S.A. and the Ambassador of Peru shall be served copies of this order.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] HARRY J. ZINK,
Secretary.

[FR Doc.73-1206 Filed 1-18-73;8:45 am]

[Docket No. 24488; Order 73-1-48]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Regarding Passenger-Fare Matters

Adopted by the Civil Aeronautics Board at is office in Washington, D.C., on the 15th day of January 1973.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's economic regulations between various air carriers, foreign air carriers and other carriers embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA). The agreement was adopted for expedited January 15, 1973, effectiveness at the Caribbean Area Passenger Traffic Conference held November 1972 at Miami, and has been assigned the above-designated CAB agreement number.

The agreement would amend an existing resolution governing group inclusive tour (GIT) fares from the United States to Venezuela, by establishing peak-season (December through April) fares for groups of at least 20 persons from U.S. points to Caracas. The fares are set at the same level as existing off-peak GIT fares for groups of 15, and are subject to a weekend surcharge of $25 round trip. No stopovers are permitted. Additionally, the agreement would increase existing peak-season GIT fares for groups of 50 by approximately 5 percent, and would specify fares under this category from additional U.S. points. Finally, the agreement adopts a new resolution which would establish 5-day GIT fares from San Juan to Caracas at $95 round trip. The fares would be available year round, be subject to a minimum/maximum stay requirement of 3/5 days, and no stopovers would be permitted.

The resulting structure of GIT fares from the United States to Venezuela is not out of line with other promotional fares in the Caribbean area, and was adopted for limited effectiveness through March 31, 1973 only. We will herein approve the resolution, subject where applicable to conditions previously imposed by the Board in connection with this type of fare. Any extension of effectiveness beyond the agreed expiry date will be considered in light of a complete fares package for the Caribbean.

The Board, acting pursuant to sections 102, 204(a), and 412 of the Act, does not find the following resolutions, incorporated in the agreement as indicated, to be adverse to the public interest or in violation of the Act: *Provided,* That approval is subject to the conditions hereinafter ordered:

Agreement CAB	IATA No.	Title	Application
23448:			
R-1	084j	TC1 14-day group inclusive tour fares—Venezuela (amending)	1
R-2	084jj	TC1 5-day group inclusive tour fares—Venezuela (new)	1

[1] The permit authorizes ASPA (a) to engage in foreign air transportation of persons, property, and mail (1) between a point or points in Peru; the intermediate points Guayaquil, Ecuador; Barranquilla and Bogota, Columbia; Panama City, Panama; Miami, Fla.; and Washington, D.C.; and the terminal point Montreal, Canada, and (2) between a point or points in Peru; the intermediate points Guayaquil, Ecuador, and Mexico City, Mexico; and the terminal point Los Angeles, Calif., and (b) to operate off-route charter trips pursuant to Part 212 of the Board's Economic Regulations.

[2] Since provision is made for a response to this order, petitions for reconsideration of this order will not be entertained.

Accordingly, it is ordered, That:

Agreement CAB 23448, R-1 and R-2, be and hereby is approved, provided that:

1. With respect to Resolution 084j, approval is subject to conditions previously imposed by the Board; and

2. With respect to Resolution 084jj,

(a) The provision which at departure would permit a lesser number of passengers than that prescribed by the resolution to travel shall not be limited to situations caused by circumstances beyond the control of the passengers dropping out of the group and the balance of the group may travel at no added cost;

(b) In the event a passenger discontinues his journey en route for any reason, the amount of the fare paid may be applied as a credit toward the purchase of transportation at the applicable fare calculated from the original point of origin;

(c) Full refund shall be made in the event of death or illness of the passenger or of a member of the passenger's immediate family prior to travel;

(d) The amount of the forfeiture to be imposed in the event of cancellation by the group or member of the group at departure time for any reason shall not exceed 25 percent of the fare paid and after departure the forfeiture shall not exceed 25 percent of the excess of the price of the group-fare ticket over the cost of normal-fare transportation from point of origin to point of cancellation.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] HARRY J. ZINK,
Secretary.

[FR Doc.73-1207 Filed 1-18-73;8:45 am]

[Docket No. 24801]

NORDAIR LTEE—NORDAIR LTD.

Notice of Hearing

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that a hearing in the above-entitled proceeding will be held on February 21, 1973, at 10 a.m., e.s.t., in Room 503, Universal Building, 1825 Connecticut Avenue NW., Washington, DC, before Administrative Law Judge Harry H. Schneider.

For details of the issues involved in this proceeding, interested persons are referred to the Prehearing Conference Report served on December 11, 1972, and other documents which are in the docket of this proceeding on file in the Docket Section of the Civil Aeronautics Board.

Dated at Washington, D.C., January 15, 1973.

[SEAL] HARRY H. SCHNEIDER,
Administrative Law Judge.

[FR Doc.73-1205 Filed 1-18-73;8:45 am]

[Dockets Nos. 24505, 17971; Order 73-1-47]

TEXAS INTERNATIONAL AIRLINES, INC.

Order To Show Cause Regarding Certificate of Public Convenience and Necessity

Application of Texas International Airlines, Inc., requesting route realinement by a show cause order, Docket 24505; application of Texas International Airlines, Inc., for exemption authority and amendments of its certificate of public convenience and necessity for route 82, Dockets 17971, 20607, 22085, 22086.

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 15th day of January 1973.

By application and petition filed on May 26, 1972, Texas International Airlines, Inc. (TXI) requests that the Board issue an order directing interested persons to show cause why TXI's certificate of public convenience and necessity for route 82 should not be amended to the extent necessary to realine TXI's route system by consolidating the existing 14 segments into one segment, and by eliminating certain restrictions.

In support of its request, TXI asserts, inter alia, that its 14-segment route system was "fashioned piecemeal" over a period of years, resulting in arbitrary segment junction point restrictions and other restrictions which no longer serve useful purposes. TXI contends that these restrictions compel the carrier to bear the burden of circuitous routings and unnecessary stops. The carrier claims that consolidation of all points on a single segment would allow TXI to test new services which would by-pass the Houston and Dallas hubs, giving the carrier increased flexibility while at the same time reducing air traffic congestion at Houston and Dallas.[1]

TXI further states that if the proposed relief is granted the carrier will be able to schedule its aircraft in a more economical and efficient manner and thus provide the public with improved transportation services; that there will be a reduction in airport and air traffic congestion by elimination of unnecessary stops at high-density airports; and that significant cost savings will result, providing long-range route strengthening.

Answers were filed by American Airlines, Inc. (American), Braniff Airways, Inc. (Braniff), and Delta Air Lines, Inc. (Delta) in which the carriers indicate that they have no objection to the issuance of a show cause order proposing to amend TXI's certificate as the carrier requests, so long as the order contains a condition precluding the utilization by TXI of the "on-segment procedures" of Subpart M of the Board's Regulations. In addition, an answer was filed by the City and County of Denver, Colo. supporting TXI's requested route realignment subject to the condition that TXI not obtain improved authority in the Denver-Memphis and Denver-Jackson, Miss. markets, both of which markets will be considered in Docket 19314, which contains a request by Denver for improved authority between Denver and certain southeast points. Finally, the City of Clovis, N. Mex., filed an answer in support of TXI's proposal.

As stated in the recent Air West route realignment,[2] it has been Board policy to realign local service carriers' routes in order to provide opportunities for maximum scheduling flexibility and equipment utilization; to conform route authority to traffic flows; and to eliminate or modify certificate conditions which serve no useful purpose, impair meaningful market development, and inhibit significant economic improvement. The ultimate objectives of the Board's route realignment policy are to reduce subsidy payments to local service carriers while at the same time improving air service to the public.

Upon consideration of the pleadings and all the relevant facts, we tentatively find and conclude that TXI's route realignment and certificate amendment proposal is consistent with the Board's policy and objectives and that substantial public service and carrier benefits will derive from the realigned route system.[3]

It is our tentative view that the proposed realinement and certificate amendments offer TXI the potential for significant route strengthening and for a substantial reduction in the carrier's subsidy need and subsidy payments which should be reflected in the carrier's subsidy mail rate for fiscal 1974, assuming that TXI takes full advantage of the operational benefits made available by the realinement and conducts its operations in a manner which produces maximum economic improvements in terms of cost efficiency and traffic development. Thus, consolidating TXI's existing 14-segment route system into one segment and modifying or eliminating unnecessary and burdensome conditions as proposed by the carrier, will allow TXI to provide new or improved service in numerous markets in which such service is presently restricted as a result of either the arbitrary segmentation of the carrier's route or outmoded certificate restrictions. Full implementation of the potential operational and scheduling flexibility offered by the realined system should

[1] According to the carrier, TXI's present route system is effectively divided in two by "a figurative wall" between the terminal points Houston and Dallas/Fort Worth, providing almost no opportunity to fly between the two halves of the system without having to serve these two junction points.

[2] Order 72-4-140, Apr. 26, 1972.

[3] See Orders 72-9-58, Sept. 14, 1972; 72-4-140, Apr. 26, 1972; 71-4-113, Apr. 16, 1971; 71-2-12, Feb. 2, 1971; 68-11-74, Nov. 18, 1968; 68-7-63, July 12, 1968; E-26868, June 4, 1968.

V 38 - 13 JAN 19 73 XUM

also increase the carrier's average length of hop and passenger haul, and thus lower its unit costs and increase the average yield per passenger mile.

TXI has proposed a number of restrictions on its realined system in order to lessen the competitive impact on other carriers. In general, no restrictions have been proposed which would give TXI less authority than it presently possesses. In noncompetitive markets no restrictions have been proposed, and, in competitive markets (a) where the authority and services of TXI and a competitor are comparable, in terms of the number of intermediate stops, TXI has maintained the stop restrictions but has eliminated the requirement to serve specific points; (b) in markets in which a competitor provides single-plane service, TXI's authority will require one intermediate stop more than the competitor's service; (c) where a competitor is authorized but does not provide service in a market, TXI's authority will require one intermediate stop more than the competitor's best authority; and (d) in markets in which TXI presently has a restriction against single-plane service, the restriction has been retained.

The Board tentatively finds and concludes that the conditions contained in TXI's proposed certificate, subject to the modifications discussed below, are sufficient to maintain the regional characteristics of TXI's local service route system, preserve the competitive balance in key markets, and substantially lessen the likelihood of adverse economic impact on competing carriers. In addition, we tentatively find and conclude that elimination and modification of the operating restrictions as proposed by TXI is consistent with the Board's policy of removing or modifying conditions which serve no useful purpose and which are otherwise wasteful and undesirable.[4]

In addition, we have also decided to remove the requirements in TXI's present certificate authorizing mandatory nonstop service between Albuquerque, on the one hand, and Los Angeles and Dallas,[5] on the other hand. These requirements were imposed as pretrial restrictions designed to limit the scope of the "Service to Albuquerque Case." [5a] In view of the present-day conditions in these markets the mandatory service requirements appear to be superfluous, serving no useful purpose.

Finally, the Board tentatively finds and concludes that all new nonstop authority in markets where traffic generation is large enough to support a finding that such operations are economcially feasible, will be made ineligible for subsidy assistance.[6]

With regard to the objections raised by American, Braniff, and Delta, we have tentatively determined not to adopt those carriers' requests that the Board impose a condition in TXI's amended certificate to restrict TXI's utilization of the "on-segment" procedures of Subpart M of the Board's regulations. As we have pointed out in Orders 72-9-58 and 72-12-104, there are no substantive differences between the so-called "on-segment" and "off-segment" procedures of Subpart M. The only difference involves the timing and manner in which the application goes to the preliminary stages (prior to hearing) at which answers and motions to consolidate are due. If the Board fails to stay an application filed under the "on-segment" procedure (14 CFR 302.1305(a)) answers are due within the specified time limitation. Under the "off-segment" procedures (14 CFR 302.1305 (b)) answers are not due until the Board orders further proceedings. Consequently, the availability of "on-segment" procedures merely expedites the prehearing stages of Subpart M. It must be emphasized, however, that no Subpart M application—whether filed pursuant to "on-segment" or "off-segment" procedures—can move forward to the hearing stage in the absence of affirmative action by the Board setting the application for hearing.[7] Furthermore, we do not agree with the suggestion that TXI's future use of the "on-segment" procedures of Subpart M would result in procedural unfairness to opposing parties and would limit the Board's flexibility to such an extent as to require the inclusion of a broad prospective restriction in TXI's certificate. The Board has ample authority, both under Subpart M and under its general power, to issue stays and grant extensions of time to assure procedural fairness to all parties and to safeguard its own ability to exercise its statutory responsibilities. In these circumstances, we see no need for imposing the restriction requested.

Lastly, we have tentatively decided to reject the request of the Denver parties to prohibit improved TXI authority in the Denver-Memphis and Denver-Jackson markets. We are not persuaded that the pendency of Denver's request in Docket 19314 for nonstop authority between Denver and Memphis warrants the imposition of restrictions on TXI's proposed one-stop authority in these markets at this time. Should Denver's application in Docket 19314 be set for hearing, we do not believe that the improvements we propose in TXT's existing one-stop authority[8] in the Denver-Memphis or Denver-Jackson markets will, as a matter of economic fact, preclude the subsequent award of Denver-Memphis nonstop authority to another carrier. As we have previously stated, a potential one-stop operation in a market would not be sufficiently competitive with nonstop service so as to preclude—on that basis—a subsequent award of nonstop authority.[9] In any event, Denver will be given the opportunity, in responding to this order, to state its objections with greater clarity and to demonstrate more precisely the extent to which the proposed realinement will deprive other carriers of a fair and comparative hearing regarding Denver-Memphis nonstop authority.[10]

A specimen certificate is attached. We note that in accordance with TXI's request (application p. 8, n. 18) we have added Monroe, La., El Paso, Tex., and Salt Lake City, Utah, to the list of points which may be overflown after receipt of one daily round trip. El Paso and Salt Lake City are presently terminal points and therefore are not now subject to the two-daily-round-trip-overflight restriction. However, consolidation of those points as intermediates on one segment will make them subject to the two-daily-round-trip-skip-stop proscriptions to which they were not previously subject. Monroe, on the other hand, is presently an intermediate point on segment 7, and is subject to the two-daily-round-trip-overflight restriction. However, TXI operates only one daily round trip to Monroe, and does not operate any flights which overfly the point. Consolidation of TXI's 14 segments would, as a practical matter, terminate TXI's ability to schedule only one round trip to Monroe, since the carrier will necessarily schedule many daily flights which will overfly Monroe. Accordingly, we tentatively find and conclude that grant of authority to overfly Monroe, El Paso, and Salt Lake City after those cities receive one daily round trip is in the public interest.

Interested persons will be given 30 days following service of this order to show cause why the tentative findings and conclusions set forth herein should not be made final. We expect such persons to direct their objections, if any, to specific markets, and to support such objections with detailed economic analysis. If an evidentiary hearing is requested, the objector should state in detail why such a hearing is necessary and what relevant and material facts he would expect to establish through such a hearing. General, vague, or unsupported objections will not be entertained.

During the same period prescribed above, we will expect TXI to file with the Board an estimate, with supporting data, of the annual gross transport revenue increase for the first full year of operations to result from the award proposed herein. This data is necessary for the purpose of computing the license fee pursuant to § 389.25(a)(2) of the Board's regulations.

Accordingly, it is ordered, That:

1. All interested persons are directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated herein and amending Texas International's certificate in the manner set forth in the accompanying specimen certificate;

2. Any interested persons having objection to the issuance of an order making final the proposed findings, conclusions, and certificate amendments and modifications set forth herein shall, within 30 days after service of a copy of this order, file with the Board and serve upon all persons listed in Appendix B attached below a statement of objections together with a summary of testimony, statistical data, and such evidence expected to be relied upon to support the stated objections;

3. If timely and properly supported objections are filed, full consideration will be accorded the matters or issues raised by the objections before further action is taken by the Board.[11]

4. In the event no objections are filed to any part of this order, all further procedural steps relating to such part or parts will be deemed to have been waived, and the case will be submitted to the Board for final action;

5. Dockets 17971, 20607, 22085, and 22086 be and they hereby are consolidated with Docket 24505;

6. A copy of this order shall be served on Texas International which is hereby made a party to this proceeding; and

7. A copy of this order shall be served upon all persons listed in Appendix B attached below.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] HARRY J. ZINK,
Secretary.

SPECIMEN CERTIFICATE TEXAS INTERNATIONAL #82

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY FOR LOCAL OR FEEDER SERVICE

(AS AMENDED)

FOR ROUTE 82

Texas International Airlines, Inc. is hereby authorized, subject to the provisions hereinafter set forth, the provisions of Title IV of the Federal Aviation Act of 1958, and the orders, rules, and regulations issued thereunder, to engage in air transportation with respect to persons, property, and mail, as follows:

1. Between the terminal point Los Angeles-Long Beach, Calif., the intermediate points Albuquerque and Santa Fe, N. Mex., Salt Lake City, Utah, Denver, Colo., Amarillo and Lubbock, Tex., Clovis and Roswell, N. Mex., El Paso, Tex., Carlsbad and Hobbs, N. Mex., Midland-Odessa, Big Spring, San Angelo, Brownwood, Abilene, Wichita Falls, Dallas-Fort Worth, Waco, Temple, Austin, San Antonio, Laredo, Mission-McAllen-Edinburg, Harlingen-San Benito, Corpus Christi, Victoria, Houston, Beaumont-Port Arthur, College Station-Bryan, Dufkin, Tyler and Longview-Kilgore-Gladewater, Tex., Sheveport, La., Texarkana, Tex-Ark., Hot Springs, Little Rock, and Jonesboro, Ark., Memphis, Tenn., Pine Bluff and El Dorado-Camden, Ark., Monroe, Alexandria, Lake Charles, Lafayette, Baton Rouge and New Orleans, La., and the terminal point Jackson, Miss.

The service herein authorized is subject to the following terms, conditions, and limitations:

(1) The holder shall render service to and from each of the points named herein, except as temporary suspensions of service may be authorized by the Board; and may begin or terminate, or begin and terminate, trips at points short of terminal points.

(2) The holder may continue to serve regularly, any point named herein through the airport last regularly used by the holder to serve such point prior to the effective date of this certificate. Upon compliance with such procedure relating thereto as may be prescribed by the Board, the holder may, in addition to the service herein above expressly prescribed, regularly serve a point named herein, other than a point required to be served through a single airport, through any airport convenient thereto.

(3) On each trip operated by the holder over all or part of route 82, the holder shall stop at each point named between the point of origin and point of termination of such trip, except a point or points with respect to which (a) the Board, pursuant to such procedure, as the Board may from time to time prescribe, may by order relieve the holder from the requirements of such condition, (b) the holder is authorized by the Board to suspend service, (c) the holder is unable to render service on such trip because of adverse weather conditions or other conditions which the holder could not reasonably have been expected to foresee or control, or (d) the holder has scheduled at least two daily round trips, in which case the holder may omit such point or points on any additional trip scheduled over all or part of said route, subject to the conditions in paragraphs (4) through (13) below.

(4) The holder shall schedule service to a minimum of one intermediate point between the following pairs of points:

From	*To*
Albuquerque, N. Mex.	Amarillo, Tex. Denver, Colo. El Paso, Tex. Houston, Tex. Memphis, Tenn. San Antonio, Tex.
Alexandria, La.	Baton Rouge, La. Dallas, Tex. Shreveport, La.
Amarillo, Tex.	El Paso, Tex. Hot Springs, Ark. Houston, Tex. Little Rock, Ark. Memphis, Tenn. New Orleans, La. San Antonio, Tex. Santa Fe, N. Mex.
Austin, Tex.	Los Angeles/Long Beach, Calif. New Orleans, La.
Denver, Colo.	Sante Fe, N. Mex.
Baton Rouge, La.	Dallas/Ft. Worth, Tex. Jackson, Miss. Little Rock, Ark. Memphis, Tenn. Monroe, La. Shreveport, La.
Beaumont/Port Arthur, Tex.	Shreveport, La.
Corpus Christi, Tex.	Dallas/Ft. Worth, Tex Denver, Colo. Memphis, Tenn.
Dallas/Ft. Worth, Tex.	El Paso, Tex. Jackson, Miss. Los Angeles/Long Beach, Calif. Lubbock, Tex. Memphis, Tenn. Monroe, La. New Orleans, La. Shreveport, La.
Denver, Colo.	Hot Springs, Ark. Little Rock, Ark. Memphis, Tenn. New Orleans, La.
El Paso, Tex.	Houston, Tex. Little Rock, Ark. Lubbock, Tex. Memphis, Tenn. San Antonio, Tex.
Hot Springs, Ark.	Salt Lake City, Utah.
Houston, Tex.	Little Rock, Ark. Lubbock, Tex. (except on flights which serve Denver, Colo. and Salt Lake City, Utah). Memphis, Tenn. Los Angeles/Long Beach, Calif. Monroe, La. Shreveport, La.
Jackson, Miss.	Salt Lake City, Utah. Lubbock, Tex. Midland/Odessa, Tex. Salt Lake City, Utah. Shreveport, La.
Little Rock, Ark.	Memphis, Tenn.
Los Angeles/Long Beach, Calif.	New Orleans (except on flights which serve Denver, Colo., Albuquerque, N. Mex., or a point west of El Paso, Tex.). San Antonio, Tex. (except on flights which serve Denver, Colo., Albuquerque, N. Mex., or a point west of El Paso, Tex.).
Lubbock, Tex.	

[5] We further find that TXI is a citizen of the United States within the meaning of the Act and is fit, willing, and able properly to perform the transportation proposed herein and to conform to the provisions of the Act and the Board's rules, regulations, and requirements thereunder. In addition, we tentatively find and conclude that the proposed realinement of TXI's route 82 is required by the public convenience and necessity.

[5] Mandatory nonstop service is required between Dallas and Albuquerque by reason of Condition (11), which we propose to eliminate, and between Los Angeles and Albuquerque by reason of the fact that those two points are located on a separate segment.

[5a] Service to Albuquerque Case, Order 69-7-136, July 24, 1969, p. 4, n. 5 and 5a.

[6] Appendix A below contains a revised list of subsidy ineligible operations.

[7] Applicants for the same authority always have a right to a contemporaneous consideration of their applications, and are in no way prejudiced by the Subpart M procedure.

[8] TXI presently has one-stop authority in both the Denver-Jackson and the Denver-Memphis markets, via San Antonio or Houston, which involves extreme circuity. TXI proposes one-stop authority in the Denver-Memphis market with a stop at Abilene or a point south, and one-stop authority in the Denver-Jackson market with a stop at Lubbock or a point south.

[9] Piedmont Aviation, Inc./Eastern Air Lines, Inc. Route Transfer and Certificate Amendments Case, Order 72-11-22, November 7, 1972, pp. 3-4.

[10] We note that TXI was granted exemptions by Orders 71-2-94, effective February 22, 1971 (Docket 17971), and 72-3-14, effective March 7, 1972 (Docket 22086), and has on file certificate amendment applications relating to such exemptions (Dockets 20607 and 22085, respectively) which exemptions and certificate amendment applications will be mooted by realinement of TXI's route as proposed. Accordingly, we intend to terminate these exemptions and dismiss the applications if TXI's certificate is amended as proposed herein. For these purposes, we will consolidate Dockets 17971, 20607, 22086, and 22085 with the instant proceeding. In addition, we have decided not to include Fort Polk in TXI's certificate as the carrier has proposed. Fort Polk is presently served under exemption authority issued pursuant to Order E-20702, April 15, 1964, and the carrier has made no showing to warrant permanent certification of Fort Polk.

[11] All motions and/or petitions for reconsideration shall be filed within the period allowed for filing objections and no further motions, requests, or petitions for reconsideration of this order will be entertained.

V38-13 JAN 19 73 XUM

From	To
Memphis, Tenn.	Monroe, La. Salt Lake City, Utah. Shreveport, La.
Monroe, La.	Shreveport, La.
Midland/Odessa, Tex.	New Orleans, La.
New Orleans, La.	San Antonio, Tex. (except on flights which serve Denver, Colo. or Salt Lake City, Utah).
Salt Lake City, Utah	Santa Fe, N. Mex.

(5) The holder shall schedule service to a minimum of two intermediate points between the following pairs of points:

From	To
Albuquerque, N. Mex.	New Orleans, La.
Alexandria, La.	Los Angeles/Long Beach, Calif.
Amarillo, Tex.	Los Angeles/Long Beach, Calif.
Baton Rouge, La.	Los Angeles/Long Beach, Calif.
Denver, Colo.	El Paso, Tex.
El Paso, Tex.	Los Angeles/Long Beach, Calif. New Orleans, La. Sante Fe, N. Mex. Wichita Falls, Tex.
Houston, Tex.	Los Angeles/Long Beach, Calif.
Jackson, Miss.	Memphis, Tenn. New Orleans, La.
Little Rock, Ark.	Los Angeles/Long Beach, Calif.
Los Angeles/Long Beach, Calif.	Memphis, Tenn. Monroe, La. San Antonio, Tex. Wichita Falls, Tex.
Salt Lake City, Utah	Albuquerque, N. Mex. El Paso, Tex.

(6) The holder shall schedule service to a minimum of three intermediate points between the following pairs of points:

From	To
Denver, Colo.	Los Angeles/Long Beach, Calif. (one point to be Lubbock, Tex. or a point south thereof).
Los Angeles/Long Beach, Calif.	New Orleans, La.
Memphis, Tenn.	New Orleans, La.

(7) Notwithstanding the provisions of paragraphs (3) (a) and (d), (4), (5), and (6) above:

(a) The holder may not schedule service with only one intermediate stop between Monroe, La. and Memphis, Tenn., unless it has scheduled two daily round trips between Little Rock and El Dorado-Camden, Ark., respectively, on the one hand, and Monroe, La., or points south thereof, on the other hand.

(b) The holder shall, on each trip between Amarillo, Tex. and Hot Springs or Little Rock, Ark. or Memphis, Tenn. serve Dallas, Tex. or a point south thereof as an intermediate.

(c) The holder shall on each flight serving Denver, Colo. or Salt Lake City, Utah, also serve Lubbock, Tex., or a point south thereof; *Provided, however*, That on each flight serving Denver, Colo., or Salt Lake City, Utah and Hot Springs or Little Rock, Ark. or Memphis, Tenn., the holder shall serve Abilene, Tex. or a point south thereof as an intermediate, and on flights serving El Paso, Tex. the holder shall serve Abilene, Tex., or a point east thereof as an intermediate; and *Provided further*, That on each flight serving Salt Lake City, Utah which does not also serve Hot Springs or Little Rock, Ark., or Memphis, Tenn., or El Paso, Tex. or Santa Fe or Albuquerque, N. Mex., shall serve Midland/Odessa, Tex. or a point south thereof.

(d) The holder shall on each flight serving Denver, Colo., and Midland/Odessa, Tex., also serve San Antonio or Houston, Tex., or New Orleans, La.

(8) Flights serving Los Angeles, Calif., and Dallas, Tex., with one intermediate point shall serve Albuquerque, N. Mex., as the intermediate, otherwise a minimum of two intermediate points shall be served.

(9) Flights serving both Houston, Tex., and San Antonio, Tex., shall originate or terminate at a point beyond Houston or San Antonio, Tex.

(10) The holder shall not schedule single-plane service between (a) Monroe and New Orleans, La., and (b) between Dallas-Fort Worth, Tex., and Salt Lake City, Utah, or Denver, Colo.

(11) The holder may omit service to El Paso, Tex., Monroe, La., or Salt Lake City, Utah, in excess of one daily round trip.

(12) The holder is authorized to render flag-stop service at any of the above points by omitting physical landing of its aircraft at any intermediate point scheduled to be served on a particular flight: *Provided*, That there are no persons, property or mail on the aircraft destined for such points and no such traffic available at such point for the flight at the scheduled time of departure: *Provided further*, That the Board in its discretion may at any time disapprove the use of such authority with respect to service to any point on any flight or flights.

(13) The holder's authority to engage in the transportation of mail with respect to those operations set forth in Appendix A to order is limited to the carriage of mail on a nonsubsidy basis, i.e., on a service mail rate to be paid entirely by the Postmaster General, and the holder shall not be entitled to any subsidy with respect to such operations.

The exercise of the privileges granted by this certificate shall be subject to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board.

The holder acknowledges and agrees that it is entitled to receive only service mail pay for the mail service rendered or to be rendered solely in connection with the operations specified in paragraph (13) and that it is not authorized to request or receive any compensation for mail service rendered or to be rendered for such operations in excess of the amount payable by the Postmaster General.

The services authorized by this certificate were originally established pursuant to a determination of policy by the Civil Aeronautics Board that in the discharge of its obligation to encourage and develop air transportation under the Civil Aeronautics Act, as amended, it is in the public interest to establish certain air carriers who will be primarily engaged in short-haul air transportation as distinguished from the service rendered by trunkline air carriers. In accepting this certificate the holder acknowledges and agrees that the primary purpose of this certificate is to authorize and require it to offer short-haul, local or feeder, air transportation service of the character described above.

This certificate shall be effective on ——: *Provided, however*, That the effective date of said certificate shall be automatically postponed until further Board order if the appropriate license fee is not paid pursuant to § 389.21(b) of the regulations.

In WITNESS WHEREOF, the Civil Aeronautics Board has caused this certificate to be executed by the Secretary of the Board, and the seal of the Board to be affixed hereto, on the —— day of

[SEAL] HARRY J. ZINK,
Secretary.

APPENDIX A

TEXAS INTERNATIONAL AIRLINES, INC.

List of Certificated Operations Ineligible for Subsidy

1. Flight stages to and from the following points: Baton Rouge, Denver, Wichita Falls, Salt Lake City, all points in Mexico.

2. Operations over segments 11 and 13 as described in Order 71-4-73.

3. Turnaround operations between Alexandria and New Orleans.

4. Nonstop turnaround operations between Little Rock and Memphis.

5. Nonstop operations between the following pairs of points:

From	To
Albuquerque	Dallas/Fort Worth. Los Angeles/Long Beach.
Amarillo	Corpus Christi. Dallas/Fort Worth.
Corpus Christi	Lubbock. New Orleans.
Dallas/Fort Worth	Laredo. Midland/Odessa. San Antonio.
Houston	Laredo. New Orleans. Shreveport. Texarkana.
Jackson	San Antonio.
New Orleans	Shreveport.
Shreveport	Texarkana.

APPENDIX B

This order is being served upon the following cities and persons in interest:

I. Abilene, Tex., Albuquerque, N. Mex., Alexandria, La., Amarillo, Tex., Austin, Tex., Baton Rouge, La., Beaumont, Tex., Big Spring, Tex., Brownwood, Tex., Bryan, Tex., Camden, Ark., Carlsbad, N. Mex., Clovis, N. Mex., College Station, Tex., Corpus Christi, Tex., Dallas, Tex., Denver Colo., Edinburg, Tex., El Dorado, Tex., El Paso, Tex., Fort Polk, La., Fort Worth, Tex., Galveston, Tex., Gladewater, Tex., Harlingen, Tex., Hobbs, N. Mex., Hot Springs, Ark., Houston, Tex., Kilgore, Tex., Jackson, Miss., Jonesboro, Ark., Lafayette, Ark., Lake Charles, La., Laredo, Tex., Little Rock, Ark., Long Beach, Calif., Longview, Tex., Los Angeles, Calif., Lubbock, Tex., Lufkin, Tex., McAllen, Tex., Memphis, Tenn., Midland, Tex., Mission, Tex., Monroe, La., New Orleans, La., Odessa, Tex., Pine Bluff, Ark., Port Arthur, Tex., Rosewell, Tex., Salt Lake City, Utah, San Angelo, Tex., San Antonio, Tex., San Benito, Tex., Santa Fe, N. Mex., Shreveport, La., Temple, Tex., Texarkana, Tex., Texarkana, Ark., Tyler, Tex., Victoria, Tex., Waco, Tex., Wichita, Falls, Tex.

II. Aeronautics Departments or Commissions for the States of: Arkansas, California, Colorado, Louisiana, Mississippi, New Mexico, Texas, Utah.

III. American Airlines, Braniff Airways, Continental Air Lines, Delta Air Lines, Eastern Air Lines, Frontier Airlines, National Airlines, Northwest Airlines, Trans World Airlines, United Air Lines, Western Air Lines, Hughes Airwest, Southern Airlines, North Central Airlines, Ozark Air Lines, Piedmont Aviation, Allegheny Airlines.

COMMISSION ON CIVIL RIGHTS

CALIFORNIA STATE ADVISORY COMMITTEE

Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a meeting of the California State Advisory Committee will convene at 11:30 a.m. on January 22, 1973, at the Madonna Inn, 100 Madonna Road, San Luis Obispo, CA 93401. Persons wishing to attend this meeting should contact the committee chairman, or the Mid-Atlantic Regional Office of the Commission at 2120 L Street NW., Washington, DC 20425. The purpose of this meeting will be to release the California State Committee Report on Educational Neglect of Mexican American Students in the Lucia Mar Unified School District, Pismo Beach, Calif.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

Dated at Washington, D.C., January 15, 1973.

ISAIAH T. CRESWELL, JR.,
Advisory Committee Management Officer.

[FR Doc.73-1302 Filed 1-18-73;8:45 am]

DELAWARE RIVER BASIN COMMISSION

COMPREHENSIVE PLAN AND CERTAIN APPLICATIONS

Notice of Public Hearing

Notice is hereby given that the Delaware River Basin Commission will hold a public hearing on Wednesday, January 24, 1973, in the South Auditorium of the ASTM Building, 1916 Race Street in Philadelphia, beginning at 2 p.m. The subjects of the hearing will be as follows:

I. *Comprehensive Plan amendments.* A proposal to amend the Comprehensive Plan so as to include therein the following water resources projects:

1. *Fred Acierno.* A sewage treatment project to serve the 700-unit mobile home park known as Red Lion Village in New Castle County, Del. Treatment facilities will provide 93 percent removal of BOD_5 from the average sewage flow of 200,000 gallons per day.

2. *Yardley Water Co.* A water treatment plant to serve Yardley Borough and portions of Lower Makefield and Falls Townships, Bucks County, Pa. Initially 1 million gallons per day will be withdrawn and up to 2 million gallons per day has been requested from the Delaware River. A wastewater flow of about 40,000 gallons per day will be discharged to a tributary of Brock Creek after removal of 99 percent of suspended solids.

3. *Oley Township Municipal Authority.* A sewage treatment plant to be constructed by the Municipal Authority of Oley Township, Berks County, Pa. The facility will be designed to treat a sewage flow of 250,000 gallons per day and provide removal of approximately 95 percent of BOD_5. Treated wastewater will discharge to Manatawny Creek.

4. *Basile Corp.* A sewage treatment plant designed to serve an apartment complex known as Painter Crossing located in Birmingham Township, Delaware County, Pa. The treatment plant would provide 97 percent removal of BOD_5 to a sewage flow of 70,000 gallons per day. Treated effluent would discharge to an unnamed tributary to Harvey Run in the Brandywine drainage basin. The project will be phased out when municipal sewerage service becomes available.

5. *Earl Jamison.* Upgrading and expansion of the sewage treatment plant serving the Peddler's Village complex in Solebury Township, Bucks County, Pa. The project will provide 98 percent removal of BOD_5 to a sewage flow of 50,000 gallons per day. Treated effluent will discharge to a tributary of Aquetong Creek.

6. *Chalfont-New Britain Township Joint Sewer Authority.* A project to increase sewage treatment plant capacity at the Authority's existing plant in Doylestown Township, Bucks County, Pa. Capacity will be increased to 2 million gallons per day and will provide removal of 90 percent of BOD_5. Treated effluent will continue to discharge to Neshaminy Creek.

7. *Amity Township Municipal Authority.* A sewage treatment plant in Amity Township, Berks County, Pa. The project would provide treatment to a sewage flow of 800,000 gallons per day and would provide removal of 90 percent of BOD_5 and 95 percent suspended solids. Treated effluent would discharge to the Schuylkill River.

II. *Water pollution abatement schedule.* A proposal to approve the following water pollution abatement schedule as submitted in accordance with § 3-4.2(2) of the Basin Regulations-Water Quality:

1. *Pearsall Corp. (A-71-24 revision).* A violation of the effluent requirements of the Commission's Basin Regulations was determined for this facility located in Harmony Township, N.J., and discharging into Zone 1D of the Delaware River. An abatement schedule for this facility was approved on July 28, 1971, that required compliance by September 30, 1971. The proposed revision permits the company to recycle and concentrate all industrial effluent for marketing purposes and requires the facility to cease the discharge of industrial effluents by May 15, 1973.

III. *Special public hearing.* Applications for review and approval of the electric generating projects noted below have been pending before the Commission since early 1970. The Commission proposes to take partial and limited action under section 3.8 of the Compact with respect to the water supply and demand aspects of each project as summarized. The proposed action is intended to meet procedural requirements of the United States Atomic Energy Commission and the National Environmental Policy Act. The proposed action shall not be deemed to constitute approval of either project pursuant to Article 11 or section 3.8 of the Delaware River Basin Compact.

Philadelphia Electric Co. Limerick Nuclear Generating Station: A nuclear powerplant located on the east bank of the Schuylkill River in Limerick Township, Montgomery County, Pa. Two generating units of 1,100 megawatt capacity each would be constructed. Maximum consumptive and nonconsumptive use of water would be 42 and 14 million gallons per day, respectively, Schuylkill River water would not be used consumptively when the flow at Pottstown falls below 560 cubic feet per second. Perkiomen Creek water would not be used when the flow at Graterford falls below 150 cubic feet per second. Delaware River water would not be used consumptively (via Perkiomen Creek) when the flow at Trenton falls below 3,000 cubic feet per second.

Public Service Electric & Gas Co. Newbold Island Nuclear Generating Station: A nuclear powerplant located on Newbold Island in Bordentown Township, Burlington County, N.J. Two generating units of 1,088 megawatt capacity each would be constructed. Maximum consumptive and nonconsumptive water use would be 41 and 153 million gallons per day respectively. Delaware River water would not be used consumptively when the flow at Trenton falls below 3,000 cubic feet per second.

Draft copies of docket decisions relating to the Limerick and Newbold Island projects to be considered by the Commission are available at the offices of the Commission. Documents relating to other items on this hearing notice may be examined at the Commission offices. All persons wishing to testify are requested to register in advance with the Secretary to the Commission.

W. BRINTON WHITALL,
Secretary.

[FR Doc.73-1172 Filed 1-18-73;8:45 am]

ENVIRONMENTAL PROTECTION AGENCY

ENVIRONMENTAL IMPACT STATEMENTS AND OTHER ACTIONS IMPACTING THE ENVIRONMENT

Availability of Comments

On November 1, 1971, EPA instituted, pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969 and section 309 of the Clean Air Act, as amended, a procedure for the publication of a listing of draft environmental impact statements and other actions affecting the environment that have been reviewed and commented on by the Agency. Twenty (20) such listings have been published since the inception of the procedure. Each listing contained a classification of the nature of EPA's comments on the impact statements and other actions reviewed.

This procedure for making available to the public our comments has been re-evaluated and a revised procedure has been promulgated in EPA Order 1640.1 dated November 30, 1972. From this date, each notice will contain five (5) appendixes.

V 38 - 13 JAN 1973 XUM

Appendix I will contain a listing of draft environmental impact statements reviewed and commented upon in writing during the referenced reviewing period. The listing will include the Federal agency responsible for the statement, the number and title of the statement, the classification of the nature of EPA's comments as defined in Appendix II, and the EPA source for copies of the comments as set forth in Appendix V.

Appendix II will introduce the new definitions of the classifications of EPA's comments. Previously, the Agency comments were set forth in four classifications, which integrated comments on the adequacy of the draft statement with those on the environmental impact of the project. Henceforth, comments on the draft impact statements will be designated by two notations: Categories LO, ER, or EU, will represent a comment on the environmental impact of the proposed project; and categories 1, 2, or 3, will represent a comment on the adequacy of the impact statement. Explanations of the new categories are as follows:

ENVIRONMENTAL IMPACT OF THE ACTION

LO (Lack of Objections)—EPA has no objections to the proposed action as described in the draft impact statement; or suggests only minor changes in the proposed action.

ER (Environmental Reservations)—EPA has reservations concerning the environmental effects of certain aspects of the proposed action. EPA believes that further study of suggested alternatives or modifications is required and has asked the originating Federal agency to reassess these aspects.

EU (Environmentally Unsatisfactory)—EPA believes that the proposed action is unsatisfactory because of its potentially harmful effect on the environment. Furthermore, the Agency believes that the potential safeguards which might be utilized may not adequately protect the environment from hazards arising from this action. The Agency recommends that alternatives to the action be analyzed further (including the possibility of no action at all).

ADEQUACY OF THE IMPACT STATEMENT

Category 1 (Adequate)—The draft impact statement adequately sets forth the environmental impact of the proposed project or action as well as alternatives reasonably available to the project or action.

Category 2 (Insufficient Information)—EPA believes that the draft impact statement does not contain sufficient information to assess fully the environmental impact of the proposed project or action. However, from the information submitted, the Agency is able to make a preliminary determination of the impact on the environment. EPA has requested that the originator provide the information that was not included in the draft statement.

Category 3 (Inadequate)—EPA believes that the draft impact statement does not adequately assess the environmental impact of the proposed project or action, or that the statement inadequately analyzes reasonably available alternatives. The Agency has requested more information and analysis concerning the potential environmental hazards and asked that substantial revision be made to the impact statement.

It is noted that where a draft impact statement is assigned a Category 3, no comment will be forthcoming on the environmental impact of the proposed action.

Appendix III will introduce a new concept by setting forth a listing of final environmental impact statements reviewed and commented upon in writing during the referenced reviewing period. The listing will include the Federal agency responsible for the statement, the number and title of the statement, a summary of the nature of EPA's comments, and the EPA source for copies of the comments as set forth in Appendix V. The summary of the nature of EPA's comments will include a brief abstract of the comments and will designate those projects or actions which have been determined by the Administrator to be unsatisfactory from the standpoint of health, welfare, or environmental quality, and therefore, referred to the Council on Environmental Quality.

Appendix IV will contain a listing of proposed Federal agency regulations, legislation proposed by Federal agencies, and any other proposed actions reviewed and commented upon in writing pursuant to section 309(a) of the Clean Air Act, as amended, during the referenced reviewing period. The listing will include the Federal agency responsible for the proposed action, the title of the action, a summary of the nature of EPA's comments, and the EPA source for copies of the comments as set forth in Appendix V. The summary of the nature of EPA's comments will include a brief abstract of the comments and will designate those proposed actions which have been determined by the Administrator to be unsatisfactory from the standpoint of health, welfare, or environmental quality, and, therefore, referred to the Council on Environmental Quality.

Appendix V will contain a listing of the names and addresses of the sources for copies of EPA comments listed in Appendixes I, III, and IV.

Attached below in Appendixes I through V is a listing of all environmental impact statements and other actions impacting the environment which EPA has reviewed and commented upon in writing during the period from December 1, 1972, to December 29, 1972. Copies of the EPA Order 1640.1, setting forth new policies and procedures for EPA's review of agency actions may be obtained by writing the Public Inquiries Branch, Office of Public Affairs, Environmental Protection Agency, Washington, D.C. 20460. Copies of the draft and final environmental impact statements referagency or from the National Technical originating Federal department or agency or from the National Technical Information Service, U.S. Department of Commerce, Springfield, Va. 22151.

Dated: January 9, 1973.

SHELDON MEYERS,
Director,
Office of Federal Activities.

APPENDIX I—DRAFT ENVIRONMENTAL IMPACT STATEMENTS FOR WHICH COMMENTS WERE ISSUED BETWEEN DECEMBER 1, 1972 AND DECEMBER 29, 1972

Responsible Federal Agency	Title and Identifying Number	General nature of comments	Source for copies of comments
Atomic Energy Commission	D-AEC-00066-CA: Rancho Seco Nuclear Generating Station, Calif.	ER-2	A

V 38 I 13 JAN 19 73 XUM

APPENDIX II—DEFINITION OF CODES FOR THE GENERAL NATURE OF EPA COMMENTS

ENVIRONMENTAL IMPACT OF THE ACTION

LO—Lack of objection. EPA has no objections to the proposed action as described in the draft impact statement; or suggests only minor changes in the proposed action.

ER—Environmental reservations. EPA has reservations concerning the environmental effects of certain aspects of the proposed action. EPA believes that further study of suggested alternatives of modifications is required and has asked the originating Federal agency to reassess these aspects.

EU—Environmentally unsatisfactory. EPA believes that the proposed action is unsatisfactory because of its potentially harmful effect on the environment. Furthermore, the Agency believes that the potential safeguards which might be utilized may not adequately protect the environment from hazards arising from this action. The Agency recommends that alternatives to the action be analyzed further (including the possibility of no action at all).

ADEQUACY OF THE IMPACT STATEMENT

Category 1—Adequate. The draft impact statement adequately sets forth the environmental impact of the proposed project or action as well as alternatives reasonably available to the project or action.

Category 2—Insufficient information. EPA believes that the draft impact statement does not contain sufficient information to assess fully the environmental impact of the proposed project or action. However, from the information submitted, the Agency is able to make a preliminary determination of the impact on the environment. EPA has requested that the originator provide the information that was not included in the draft statement.

Category 3—Inadequate. EPA believes that the draft impact statement does not adequately assess the environmental impact of the proposed project or action, or that the statement inadequately analyzes reasonably available alternatives. The Agency has requested more information and analysis concerning the potential environmental hazards and has asked that substantial revision be made to the impact statement.

If a draft impact statement is assigned a Category 3, no rating will be made of the project or action, since a basis does not generally exist on which to make such a determination.

APPENDIX III—FINAL ENVIRONMENTAL IMPACT STATEMENTS FOR WHICH COMMENTS WERE ISSUED BETWEEN DECEMBER 1, 1972 AND DECEMBER 29, 1972

FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 19419; FCC 73-43]

AMERICAN TELEPHONE & TELEGRAPH CO. AND WESTERN UNION TELEGRAPH CO.

Memorandum Opinion and Order Instituting Investigation

In the matter of American Telephone & Telegraph Co., Long Lines Department (A.T. & T.), Revisions of Wide Area Telephone (WATS) Tariff FCC No. 259 and Private Line Service (PLS) Tariff FCC No. 260 and The Western Union Telegraph Co. (Western Union), Revisions of Tariff FCC No. 254, Docket No. 19419.

A. *Background.* 1. In a memorandum opinion and order released February 7, 1972 in this docket, we suspended and instituted an investigation into the lawfulness of certain tariff revisions filed by A.T. & T. in the above-noted interstate WATS and PLS tariffs (33 FCC 2d 518). These revisions were originally scheduled to go into effect on February 4, 1972. However, we suspended them until May 4, 1972 and A.T. & T. postponed the effective date still further until July 4, 1972.

2. As originally filed these tariffs included (a) substantial reduction in existing interstate charges for A.T. & T.-provided "Dataphone" sets that are offered to customers who wish to connect their own data terminal facilities to the switched telephone network (either through WATS or PLS facilities); (b) establishment of new interstate charges for an A.T. & T.-provided "automatic data access arrangement" that is also offered to customers who wish to connect their own data facilities to the switched telephone network; (c) changes in existing interstate tariff regulations to permit more flexible use of A.T. & T.-provided "multi-channel data station equipment" offered to customers who wish to use such channel-deriving equipment in combination with voice-grade data channels obtained from the telephone company; and (d) establishment of new interstate rates for an additional category of "Dataphone" sets suitable for combined sending and receiving and for handling data at higher speeds. Each of these A.T. & T.-provided facilities are competitive, in varying degrees, with similar equipment or facilities offered by independent manufacturers and suppliers or other common carriers. In its petition IDCMA [1] made a number of allegations (which we summarize in paragraph 3 of our February 7, 1972 action, 33 FCC 2d, at page 519), to the effect that these competitive offerings of the Bell System in its private line services were being subsidized by the monopoly services of Bell, and were anti-competitive vis-a-vis members of IDCMA who supplied similar facilities to the public in competition with Bell. Based upon these allegations, we suspended the original A.T. & T. tariffs for the full 3-month period provided for in section 204 of the Act and we stated that we would consider particularly the question of the lawfulness of these tariff schedules in light of their potentially anti-competitive effects (33 FCC 2d, at page 520).

3. Before the original tariff schedules could go into effect A.T. & T. applied for special permission to file revised tariffs in substitution for the original tariffs. The stated purpose of A.T. & T. was to ameliorate the alleged anti-competitive effects of the original filing and to expedite the resolution of the issues in the

[1] Independent Data Communications Manufacturers Association, Inc.

hearing. Based upon alleged "changed circumstances" subsequent to the filing of the original tariffs, A.T. & T. proposed to establish monthly rates for the "Dataphone" sets and channel-deriving equipment higher than those originally proposed and to establish monthly rates for the automatic data access arrangement lower than those originally proposed.

4. We granted A.T. & T.'s request and the substitute tariffs were filed and became effective July 3, 1972 thereby canceling the originally filed tariffs. By virtue of language in our memorandum opinion and order of February 7, 1972, the substitute tariff pages were automatically set for hearing in this docket in lieu of the original tariffs (33 FCC 2d, p. 520). Inasmuch as it appeared to us that the revised tariffs might possibly ameliorate the alleged anti-competitive features of the original filing, we invited interested parties to submit comments and reply comments on the new submission. Further, by memorandum opinion and order of June 26, 1972 we ordered the deferral of hearings herein until we could consider such comments (36 FCC 2d 498). On about July 26, 1972 IDCMA submitted its comments in the form of a "Petition to Reject or Suspend." Although IDCMA agreed that the revisions made by A.T. & T. in the substitute rates were in the proper direction, IDCMA contended that the revisions were not sufficient in degree at least and that the revised rates continued to be based upon cross-subsidization by the monopoly services of Bell and were anti-competitive as to the independent suppliers of competitive data devices supplied by members of IDCMA. A.T. & T. opposed IDCMA's petition to reject or suspend [2] and urged that this proceeding be terminated. Western Union also filed comments on A.T. & T.'s substitute tariffs contending that A.T. & T.'s revised charges for its data sets and for multi-channel equipment would have a significant impact on Western Union's competitive service offerings and that A.T. & T.'s charges for such services are unduly discriminatory as between A.T. & T.'s own customers.

5. In addition to submitting its comments on the A.T. & T. substitute tariffs, Western Union filed its own tariff schedules effective August 10, 1972 matching the A.T. & T. rates for certain of the data sets offered by A.T. & T. On or about August 29, 1972 IDCMA filed a "Petition to Reject or Suspend" [3] the Western Union tariffs on the same basis as it opposed the revised A.T. & T. rates.

6. On November 24, 1972, A.T. & T. filed further revised PLS tariff schedules to become effective December 24, 1972 establishing a new rate for the first time in its interstate PLS tariffs applicable to a Series 200 Data-Phone Data Set (Type 208). This device provides for combined sending and receiving transmission and is suitable for conditioning signals at a rate of 4,800 bits per second. Competitive data sets are offered by certain members of IDCMA. At our request the effective date of this tariff was postponed from December 24, 1972 until January 14, 1973. A timely petition to suspend was filed by IDCMA on December 29, 1972. An opposition thereto was filed by A.T. & T. on January 9, 1973.

B. *Disscussion.* 7. As indicated in the foregoing, this proceeding was commenced in February 1972 (a) to investigate the lawfulness of the charges of A.T. & T. for providing certain data service facilities that are competitive with similar facilities available from alternative suppliers and (b) to determine whether and to what extent we should prescribe new tariffs if we should find any such unlawfulness (33 FCC 2d 518). However, the proceeding has been temporarily stayed by us pending further order (36 FCC 2d 498).

8. The questions that are now properly before us for decision are (1) whether we should terminate the proceeding herein as A.T. & T. has urged us to do over the opposition of IDCMA; (2) whether, if we do not terminate, we should also set Western Union's matching rates for hearing in this proceeding as requested by IDCMA; and (3) whether we should suspend and set for hearing in this proceeding the recently filed interstate rate of A.T. & T. for the 208 Data set, which IDCMA has requested us to do.

9. With respect to the question of whether we should terminate this proceeding, we are of the opinion that the substitute rates now under investigation continue to raise essentially the same cross-subsidization and anti-competitive questions that were raised by the original tariffs and which we summarized in our original action herein. (See 33 FCC 2d, 518). For example, the fact that the substitute tariff reduces the prior monthly rate for A.T. & T.'s 200 Data set from $72 to $55 a month whereas the original tariff filing would have reduced the rate from $72 to $47 a month does not warrant our finding that the substitute rates are now free of any substantial questions of lawfulness. Accordingly, we conclude that the hearing herein on the original issues of lawfulness under sections 201(b) and 202(a) of the Act should proceed without any further undue delay, particularly in view of IDCMA's claims that its members are being adversely affected by the competitive A.T. & T. rates and that IDCMA is entitled to a prompt hearing and resolution of its contentions. As to the second question, we agree with IDCMA that the matching rates of Western Union also raise substantially the same questions of lawfulness as do the A.T. & T. rates. We shall therefore set the Western Union rates for hearing in this proceeding.

10. With regard to the third question, IDCMA contends in its petition to suspend and investigate the recently filed rate of A.T. & T. for the competitive 208 Data set, that this new filing raises all of the same questions of lawfulness that prompted the Commission to suspend for the full statutory period and set for hearing the original tariffs for the other A.T. & T.-provided data facilities involved in this proceeding; that A.T. & T. expressly admits that its pricing of the competitive 208 Data set is based upon alleged "incremental costs" which the Commission has not as yet approved in principle and which is at issue in pending docket 18128; [3] that, in any event, A.T. & T. has not allocated all of the carriers' costs that should be allocated to this Data set in fixing the rates; and that members of IDCMA that supply competitive Data sets are and will be adversely and unlawfully affected by A.T. & T.'s proposed rates. We believe that IDCMA raises substantial questions of lawfulness that warrant our setting the new 208 Data rates for hearing under the issues herein. Moreover, consistent with our original action on the other competitive rates in issue in this case, we shall suspend the effectiveness of the new charges for the maximum 3-month period specified in section 204 of the Act. However, since A.T. & T., at our request, postponed the original effective date of the tariff from December 24, 1972, to January 14, 1973, we shall suspend the tariff for 3 months from the former, rather than the latter date.

11. IDCMA requests further alternative relief in the form of an order that A.T. & T. be required to give written notification to customers who may order A.T. & T.'s 208 Data set, that questions of lawfulness have been raised as to the rates therefor and that such rates are under investigation in this proceeding and are subject to being changed by the Commission. This is an entirely appropriate request and we shall order A.T. & T. to supply such notice in the form and manner prescribed by the Chief, Common Carrier Bureau.

12. *Accordingly, it is ordered,* That pursuant to sections 201, 202, 203, 204, 205, and 403 of the Communications Act of 1934, as amended, an investigation is instituted herein into the lawfulness of the tariff schedules filed (a) by A.T. & T. with its transmittal No. 11618, effective January 14, 1973, and (b) by Western Union under its transmittal No. 6772; including any cancellations, amendments, or reissues thereto; and that the issues heretofore specified herein shall also apply to such tariff schedules;

13. *It is further ordered,* That pursuant to the provisions of section 204 of the Act, the effectiveness of the tariff schedules filed by A.T. & T. with transmittal No. 11618 are hereby suspended

[2] We have not considered IDCMA's petition insofar as it requests "rejection" or "suspension" of tariffs for the reasons that (a) the pleading violated section 1.44 of our rules prohibiting joinder of requests for action delegated to the staff (rejection of tariffs) and for action by the Commission (suspension of tariffs) and (b) it violated section 1.773 of our rules requiring suspension requests to be filed at least 14 days before the effective date of the tariff in question.

[3] In its reply of Jan. 9, 1973 A.T. & T. also submitted alternative calculations of its costs on the basis of embedded costs which indicates costs slightly less than the "incremental" costs.

V 38 - 13 JAN 19 73 XUM

until March 24, 1973 and that A.T. & T. shall provide the notice to customers as set forth in paragraph 11 hereof;

14. *It is further ordered,* That paragraph 5 of our order herein of June 26, 1972, 36 FCC 2d, at page 449, staying the proceedings herein, is vacated, and the hearing in this proceeding shall commence at the Commission offices in Washington, D.C. at a time to be specified by the presiding Administrative Law Judge; and that such Administrative Law Judge shall certify the record without preparation of an initial or recommended decision, and the Chief of the Common Carrier Bureau shall thereafter issue a recommended decision which shall be subject to the submittal of exceptions and requests for oral argument as provided in 47 CFR 1.276 and 1.277, after which the Commission shall issue its decision as provided in 47 CFR 1.282;

15. *It is further ordered,* That IDCMA's Petition To Suspend is granted;

16. *It is further ordered,* That the Western Union Telegraph Co. is named Party Respondent.

Adopted: January 10, 1973.

Released: January 12, 1973.

FEDERAL COMMUNICATIONS COMMISSION,[4]
[SEAL] BEN F. WAPLE,
Secretary.

[FR Doc.73-1217 Filed 1-18-73;8:45 am]

[Dockets Nos. 18906, 18907; FCC 73R-17]

SOUTHERN BROADCASTING CO. (WGHP-TV) AND FURNITURE CITY TELEVISION CO., INC.

Memorandum Opinion and Order Enlarging Issues

In re applications of Southern Broadcasting Co. (WGHP-TV) High Point, N.C., Docket No. 18906, File No. BRCT-574, for renewal of broadcast license; Furniture City Television Co., Inc., High Point, N.C., Docket No. 18907, File No. BPCT-4302, for construction permit for new television broadcast station.

1. Before the Review Board is a petition to enlarge issues, filed August 3, 1972, by Southern Broadcasting Co., (WGHP-TV) (Southern) seeking the addition of rule 1.65, rule 1.526 and ineptness issues against Furniture City Television Co., Inc. (Furniture City),[1] Each issue will be considered separately.[2]

RULE 1.65 ISSUE

2. In support of its request, Southern alleges that Furniture City failed to amend table II, section II of its application (FCC Form 301) to reflect the interests of two Furniture City principals, J. Harriss Covington and Sidney A. Gayle, Jr., in a travel agency located in High Point, N.C., in contravention of Commission rule 1.65.[3] In a supplement to its petition, Southern further alleges that Furniture City also failed to report that its principals Herman W. Bernard and John W. Thomas, Jr., hold stock in the High Point branch of the North Carolina National Bank. The Broadcast Bureau supports Southern's request; however, the Bureau would consider this matter under the existing rule 1.65 issue against Furniture City.[4] In opposing the request, Furniture City alleges that: although the travel agency was incorporated on February 11, 1972, it did not go into business until May 9, 1972; Covington and Gayle are stockholders and not officers; and the two principals have other full-time occupations. In light of these facts, Furniture City argues that the information was not significant enough to report. Furniture City opposes Southern's petition for leave to file supplemental pleading as untimely filed.

3. The Review Board will grant the request in the initial petition to enlarge issues and will deny the request for leave to supplement. The existing rule 1.65 issue against Furniture City will be considered broadened to encompass the applicant's alleged failure to report Gayle's and Covington's business interests. In a recent Memorandum Opinion and Order, FCC 72R-366, —— FCC 2d ——, released December 8, 1972, in this proceeding, we modified the existing rule 1.65 issue[5] against Furniture City to encompass the applicant's failure to report all the business interests of seven of its principals. For the same reasons advanced in our previous Memorandum Opinion and Order, supra, the Board believes the existing rule 1.65 issue should encompass the alleged failure of Furniture City to report Covington's and Gayle's business interests.

4. With respect to Southern's petition for leave to file a supplemental pleading, the Board stated in its Public Notice No. 90836, released October 11, 1972 (filing of supplemental pleading before the Review Board) that we would closely scrutinize all alleged justifications for the filing of supplemental pleadings. As the court stated in Valley Telecasting Co., Inc. v. FCC, 119 U.S. App. D.C. 169, 338 F. 2d 278 (1964), with respect to late filed petitions before the Commission, it "cripples any decision making process and handicaps the agency in carrying out its functions." Petitioner's request to supplement its initial petition to enlarge issues comes 3 months after the filing of its initial petition and Southern has not presented a persuasive argument for the delay. Southern has not satisfactorily explained why it did not include this material in its initial petition. As the Broadcast Bureau points out, Bernard's interest was reported in the December 31, 1970, Directory of the North Carolina National Bank Corporation Subsidiaries and Thomas' interest was reported in the July 19, 1972, High Point Enterprise.

RULE 1.526 ISSUE

5. Southern requests a Rule 1.526 issue against Furniture City for its failure to maintain and make available for public inspection its file containing a copy of its application and related documents. As alleged in its supporting affidavits, on July 24, 1972, at approximately 10:30 a.m., James H. Hoke and C. T. Leonard, Jr.,[7] requested (of the receptionist-switchboard operator) to see Furniture City's inspection file at the location listed in the notice published in the local newspapers by Furniture City.[8] Southern's representatives were referred to a Mrs. Evelyn Lee who advised them that John Hutchens, who kept the file, was out of town. Mrs. Lee attempted, unsuccessfully, to locate the file and inquired of John Hutchens' brother as to its whereabouts, also without success. She stated that John Hutchens was expected back that day after 3 p.m. and suggested that Southern's representatives return later, first calling to see if John Hutchens had returned to his office. Southern's representatives left at 10:45 a.m. The Bureau supports the petitioner's request.

6. In opposing the request, Furniture City adds the following facts to those recited by Southern: The subject file has always been and still is available at its published location. Mrs. Evelyn Lee, John

---

[4] Commissioners Johnson and Reid dissenting; Commissioner Hooks absent.

[1] Also before the Review Board are the following related pleadings: (a) Opposition, filed Aug. 15, 1972, by Furniture City; (b) Broadcast Bureau's comments, filed Aug. 16, 1972; (c) reply, filed Aug. 25, 1972, by Southern; (d) petition for leave to file supplemental pleading and supplement to petition, filed Oct. 31, 1972, by Southern; (e) Broadcast Bureau's comments to (d), filed Nov. 7, 1972; and (f) opposition to (d), filed Nov. 13, 1972, by Furniture City.

[2] The Review Board will treat petitioner's petition as timely filed. It appears that the rule 1.526 issue request is based on events that occurred on July 24, 1972, and that the ineptness issue is based on a series of events dating from 1969 to the present. It is unclear when Southern came into possession of the information upon which it bases its request for a rule 1.65 issue. The Board, however, in light of a lack of strenuous opposition, will also consider the request for a rule 1.65 issue as timely filed.

[3] According to the Articles of Incorporation attached to Southern's petition, the two principals are directors of Travels Unlimited of High Point, Inc., which was incorporated Feb. 11, 1972.

[4] See 33 FCC 2d 1044, 23 RR 2d 1197 (1972).

[5] The Bureau opposes Southern's petition for leave to file supplementary pleading to its petition to enlarge as untimely filed.

[6] See note 4, supra.

[7] Hoke is vice president and chief engineer of Southern and Leonard is Station WHGP-TV's local counsel.

[8] Rule 1.526(d) specifies:

(d) Location of records. The file shall be maintained at the main studio of the station, or at any other accessible place (such as a public registry for documents or an attorney's office) in the community to which the station is or is proposed to be licensed, and shall be available for public inspection at any time during regular business hours.

Hutchens'[9] secretary, familiar with the file but not its location when Hoke and Leonard made their request, attempted to locate it by asking George Hutchens, John Hutchens' brother and business associate, who informed her that only John Hutchens, away until that afternoon, knew the location of the file. To save Hoke and Leonard any inconvenience, Mrs. Lee suggested that they phone before returning to John Hutchens' office to determine if he was in. At 11:30 a.m. that day, George W. Lyles, Jr., president, director, and 10 percent stockholder of Furniture City, was informed by Mrs. Lee of the Hoke-Leonard visit and, at 11:45 a.m., he attempted to contact representatives of Southern, first by calling the law firm with which Leonard is associated and then, at the suggestion of one of the attorneys, by calling Southern's Station WGHP-TV, to inform them that Furniture City's public inspection file was available. At the above station, he was advised that Leonard was with Philip Lombardo, the station's general manager. When Lyles sought to speak to Leonard, he was advised that Leonard had left. Lyles left a message as to the availability of the files with Lombardo's secretary and, on the same day, so advised Leonard by letter. Further, the regular receptionist who was on vacation that day was informed of the location of the file and was instructed to show the file to anyone who requested to view it if Hutchens was not present. Furniture City submitted supporting affidavits of John Hutchens, Frederica McDowell (the regular receptionist), Lyles and Lee. The statements set forth in these documents are substantially uncontrovered.

7. The Review Board will deny the requested issue. No dispute exists over the fact that during the 15 minutes they were present, Hoke and Leonard were unable to obtain Furniture City's public inspection file at the place where it was supposed to be located and at a time (during regular business hours) when it was supposed to be available. Standing alone, these facts would ordinarily warrant the framing of a 1.526 issue. The Review Board believes, however, that the particular facts here involved obviate the need for the requested issue. Although Hoke and Leonard were unable to obtain the subject file upon request, Southern did not establish that the file was not at Hutchens' office and that had Hoke and Leonard returned that same afternoon, they would not have been able to obtain the file. Compare Jacksonville Broadcasting Co., 26 FCC 2d 929, 20 RR 2d 626 (1970). Further, it appears that Hutchens' secretary made a serious effort to locate the file and Lyles, after being informed of the Hoke-Leonard visit, went to considerable lengths that same day to inform Southern that the files were available (see paragraph 6, supra). Although it appears that Hoke and Leonard had no purpose in seeing the file other than to determine its availability and thereby determine Furniture City's compliance with Rule 1.526(d), their right to see it does not differ from that of any other interested party. While the Hoke-Leonard visit did raise a question as to whether Furniture City, on the day and at the time of the visit, was in technical violation of the rule, we believe that in the circumstances of this case, an issue is not warranted. Ward L. Jones, 7 FCC 2d 831, 9 RR 2d 1962 (1967).

INEPTNESS ISSUE

8. In support of its request, Southern alleges that the following violations of the Commission's rules and regulations by Furniture City establishes a pattern of carelessness and ineptness: (a) The failure to disclose eight business interests of its stockholders in its 1969 application in violation of Rule 1.514(a); (b) the failure to update Question 10(e), Section II of its application (FCC Form 301) to report the antitrust suits brought by the United States of America against the Wachovia Corp. and The Wachovia Bank and Trust Co., N.A. in which several Furniture City principals are stockholders in violation of Rule 1.65; (c) the addition by the Review Board in its memorandum opinion and order, 31 FCC 2d 790, 21 RR 2d 868 (1971), of an abuse of process issue against Furniture City for the manner in which it submitted a list of witnesses to be called at hearing; and (d) the addition by the Review Board of a Rule 1.65 issue in its memorandum opinion and order, 33 FCC 2d 1044, 23 RR 2d 1165 (1972), for failure to report an antitrust suit against a company in which one of its principals held an interest in violation of Commission Rule 1.65. Both the Broadcast Bureau and Southern oppose the request. The Bureau believes that the alleged disqualifying conduct is adequately covered by the existing issues; however, should the Board believe an issue is warranted, the Bureau suggests the matter be considered under the comparative issue.

9. The Review Board will deny Southern's request for an ineptness issue. In our opinion, petitioner's allegations cannot be said to demonstrate a pattern of carlessness, inadvertence, neglect, and indifference to the Commission's rules and regulations, nor does the totality of the allegations reflect adversely upon Furniture City's qualifications to be a Commission licensee. See Media, Inc., 22 FCC 2d 886, 19 RR 2d 2 (1970); compare Beamon Advertising, Inc., FCC 63R-467, 1 RR 2d 285 (1963). While a number of rule violations have been properly raised by Southern, we believe the existing and separate issues previously specified by the Board (see paragraph 8, supra) sufficiently deal with the alleged violations. See Home Service Broadcasting Corp., 22 FCC 2d 464, 18 RR 2d 972 (1970).

10. *Accordingly, it is ordered,* That the petition to enlarge issues, filed August 3, 1972, by Southern Broadcasting Co., is granted to the extent herein indicated, and is denied in all other respects; and

11. *It is further ordered,* That the petition for leave to file supplementary pleading and supplement to petition to enlarge issues, filed October 31, 1972, by Southern Broadcasting Co., is denied; and

12. *It is further ordered,* That the Rule 1.65 issue against Furniture City Television Co., Inc., added by the Review Board by memorandum opinion and order (33 FCC 2d 1044, 23 RR 2d 1197, released Mar. 22, 1972) is broadened to include the matters as indicated above.

Adopted: January 10, 1973.

Released: January 12, 1973.

FEDERAL COMMUNICATIONS COMMISSION,[10]
[SEAL] BEN F. WAPLE,
Secretary.

CHAPMAN RADIO & TELEVISION CO. ET AL.

Memorandum Opinion and Order Enlarging Issues

In re applications of William A. Chapman and George K. Chapman, d/b/a Chapman Radio & Television Co., Homewood, Ala., Docket No. 15461, File No. BPCT-3283; Alabama Television, Inc., Birmingham, Ala., Docket No. 16760, File No. BPCT-3706, Birmingham Broadcasting Co., Birmingham, Ala., Docket No. 16761, File No. BPCT-3707; for construction permit for new television broadcast station, Birmingham Television Corp. (WBMG), Birmingham, Ala., Docket No. 16758, File No. BPCT-3663, for modification of construction permit.

1. The above-captioned mutually exclusive applications were designated for hearing by order, FCC 66-636, released July 20, 1966. Presently before the Review Board is a joint petition to enlarge issues,[1] filed November 28, 1972, by Birmingham Television Corp. (WBMG) and Alabama Television, Inc., requesting an issue to determine whether Birmingham Broadcasting Co. (BBC) possesses the requisite character qualifications to be a Commission licensee.[2]

2. A character qualifications issue will be added. As petitioners note, a final criminal conviction was entered in the U.S. Court of Appeals for the Fifth Circuit against Oscar E. Hyde, a principal of BBC, for multiple violations of Section 1951 of title 18 of the United States

---

[9] John Hutchens, secretary, director, and 10 percent stockholder of Furniture City, "is charged by Furniture City with the responsibility of maintenance of its public inspection file * * *."

[10] Board member Kessler dissenting with respect to the requested Rule 1.526 and the ineptness issues.

[1] Other related pleadings before the Board for consideration are: (a) Opposition, filed Dec. 11, 1972, by BBC; (b) Broadcast Bureau's comments, filed Dec. 12, 1972; and (c) reply, filed Dec. 15, 1972, by WBMG.

[2] The Board notes that the joint petition is untimely and that petitioners have failed to show good cause for their tardiness. However, in view of the serious public interest questions raised by the allegations, the joint petition shall be considered. See Medford Broadcasters, Inc. (KDOV), 18 FCC 2d 699, 16 RR 2d 900 (1969); The Edgefield-Saluda Radio Co., 5 FCC 2d 148, 8 RR 2d 611 (1966).

V38-13 JAN 19 73 XUM

Code.[2] Violation of Federal law, either by an applicant or one of its principals, on its face, raises a sufficient question regarding character to merit careful examination in order to determine whether an applicant is qualified to operate a broadcast station in the public interest.[4] Contrary to BBC's assertions, Hyde's belated attempts to disassociate himself and his unlawful conduct from the corporate applicant do not affect our determination, since he remains a principal of the applicant.[5]

3. *Accordingly, it is ordered,* That joint petition to enlarge issues, filed November 28, 1972, by Birmingham Television Corp. (WBMG) and Alabama Television, Inc., is granted to the extent indicated herein, and is denied in all other respects; and

4. *It is further ordered,* That the issues in this proceeding are enlarged to include the following:

To determine in light of the conviction of Oscar E. Hyde for violations of 18 U.S.C. § 1951, whether Oscar E. Hyde and Birmingham Broadcasting Co. are qualified to own and operate a television broadcast station in Birmingham, Ala.; and

5. *It is further ordered,* That the burden of proceeding with the introduction of evidence shall be on Birmingham Television Corp. (WBMG) and Alabama Television, Inc., and the burden of proof under this issue shall be on Birmingham Broadcasting Co.

Adopted: January 8, 1973.

Released: January 10, 1973.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Secretary.

[FR Doc.73-1219 Filed 1-18-73;8:45 am]

[Docket No. 19325]

ITU WORLD ADMINISTRATIVE RADIO CONFERENCE

Extension of Time for Comments

Order. In the matter of preparation for the ITU World Administrative Radio Conference for Maritime Mobile Telecommunications to be convened at the beginning of 1974, Docket No. 19325.

1. On November 1, 1972, the Commission adopted its Second Notice of Inquiry in this proceeding, preparatory to a World Administrative Radio Conference for Maritime Mobile Telecommunications (WARC–MAR) to be convened by the International Telecommunication Union in Geneva, on April 22, 1974, and requested comments to be filed on or before November 30, 1972, and reply comments on or before December 15, 1972.

2. The aforementioned deadlines were extended by the Commission's Order of November 17, 1972, due to the unavailability until November 28 of copies of the Preliminary Views of the United States for the Conference, from November 30 to December 31 for the filing of comments and from December 15 to January 15 for reply comments.

3. While copies of the preliminary views have been available in limited quantities at the Commission from November 28 onward, it has now become apparent that, because of absences during the holiday season, many interested parties were unable to file comments by the closing date of December 31 (January 2, 1973). In view of the importance of obtaining the greatest number and variety of comments in this proceeding and recognizing the number of late comments expected to be filed, the filing period is being extended to the maximum, but limited by the deadlines necessary to meet international commitments.

4. Accordingly, the date for filing comments in this proceeding is further extended from January 2 to January 15, and reply comments from January 15 to January 31, 1973. Authority for this action is taken pursuant to § 0.251(b) of the Commission's rules.

Adopted: January 11, 1973.

Released: January 11, 1973.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] JOHN W. PETTIT,
General Counsel.

[FR Doc.73-1220 Filed 1-18-73;8:45 am]

FEDERAL POWER COMMISSION

[Docket No. RP71-119]

PANHANDLE EASTERN PIPE LINE CO.

Notice of Motion of Monroe City, Mo. for Extraordinary Relief

JANUARY 16, 1973.

On January 11, 1973, Monroe City, Mo. (Monroe) filed a petition for emergency relief under the Panhandle Eastern Pipe Line Co. (Panhandle) interim curtailment tariff, approved by the Commission on June 20, 1972, in the above proceeding. Monroe seeks an order temporarily waiving or modifying the aforementioned interim curtailment plan in order to obtain additional volumes of natural gas beyond its authorized contract demand and a waiver of the penalty provisions pertaining to excessive takes.

In its petition, Monroe alleges that it is a small town with a population of 2,500, and that it owns and operates the municipal gas and electric utility serving the community's residential and small commercial customers. It purchases its entire natural gas supply from Panhandle under a contract entitling it to firm service up to a maximum demand of 2,600 Mc.f. per day.

Monroe's electric generating plant supplies the city's entire electric requirements and is not interconnected with any other utilities. Hence, it stated it is unable to acquire power from other sources in the event that its plant becomes inoperative as a result of an emergency. It contends that the power generated in its plant is essential to meet human needs requirements throughout the community. Homes in Monroe, which are heated by oil or gas, also require electricity to operate oil- and gas-burning furnaces. Additionally, other essential community services such as water supply, fire protection, and sewage treatment are wholly dependent upon the operation of the city's powerplant.

The Monroe powerplant is a dual-fuel facility capable of burning either natural gas or fuel oil. At offpeak periods gas is normally burned in the powerplant, and oil is burned during periods when its gas allocation is needed to serve its residential and commercial loads. At the present time, the entire daily gas allocation is being used to serve residential and small commercial loads. The powerplant and all interruptible customers have been fully curtailed.

During the recent cold spell, Monroe states it has experienced difficulty in obtaining supplies of No. 2 fuel oil. Its local supplier has indicated that it will provide an additional 6,500 gallons of oil on January 11, 1973, but that no additional supplies would be forthcoming for this winter. Monroe has also sought to obtain additional fuel from other suppliers in the region, and has solicited the assistance of the regional Office of Emergency Preparedness in its efforts to obtain fuel oil.

Monroe contends that in the event further fuel oil supplies are not forthcoming, it will be forced to take up to 600 Mcf per day from Panhandle in excess of its daily contract demand in order to keep the plant running. Hence, it anticipates that it may be required to take 3,200 Mcf per day from Panhandle in order to keep generating electricity.

In its aforementioned petition, Monroe seeks a waiver of the provisions of Article VI(E)(1) of the interim curtailment plan approved by the Commission on June 20, 1972. As it relates to Monroe, this provision enables it to exceed its curtailment allocation without payment of the $10 per Mcf penalty charge as long as it does not add new industrial usage, or exceed its contract demand entitlement. Monroe has been able to fully comply with those conditions until this time. However, it contends that the current emergency situation, which is beyond its control, could require it to exceed its contract demand by up to 600 Mcf per day. Under such circumstances, it would be subjected to daily penalties of up to $6,000. Monroe contends it could not sustain such an economic burden. It points out that if it were to use its contract demand of 2,600 Mcf per day during 29 days of the month and 3,200 Mcf on a single day when completely out of fuel oil that the penalty incurred for such usage could possibly be $64,000. It stresses again that such a penalty incurred for such usage would be beyond the scope of its financial resources.

Hence, Monroe requests that the Commission order Panhandle to deliver to it a quantity of natural gas that would exceed its contract demand by 600 Mcf and further enable it to take such volumes without incurring the penalties provided under Article VI E(1) of Panhandle's interim curtailment plan.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 24, 1973, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 5, 15, and 16 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the request is required by the public convenience and necessity. If a petition for leave to intervene is timely filed or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

KENNETH F. PLUMB,
Secretary.

Secretary.

[FR Doc.73-1300 Filed 1-18-73;8:45 am]

[2] In a previous Memorandum Opinion and Order, 7 FCC 2d 461, 9 RR 2d 727 (1967), the Board held that it was preferable to await the final outcome of the criminal proceeding against Hyde and to impose a condition on a possible grant of BBC's application, rather than to specify issues against the applicant. However, since the conviction has become final, there is no further impediment to specifying a character issue against BBC.

[4] See Report on Uniform Policy as to Violation by Applicants of Laws of the United States, 1 RR pt. 3, 91:495 (1951).

[5] In this connection, the Board notes that the BBC amendments reflecting Hyde's resignation as officer and director of BBC, and the divestiture and transfer of his 26.7 percent stock interest in the applicant were refused by the presiding judge by Memorandum Opinions and Orders, FCC 67M–122, released Jan. 24, 1967, and FCC 70M–1411, released Oct. 14, 1970. The Board also notes its agreement with the Broadcast Bureau that the issue need not encompass a determination of all the facts and circumstances surrounding the conviction since they have already been adjudicated by an appropriate court.

PATAGONIA CORP.

Proposed Acquisition of Creditel Corporation of Nebraska Nos. 1, 2 and 4

Patagonia Corp., Tucson, Ariz., has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y, for permission to acquire through its subsidiary, Model Finance Co., voting shares of Creditel Corporation of Nebraska No. 1, Omaha; Creditel Corporation of Nebraska No. 2, Omaha; and Creditel Corporation of Nebraska No. 4, Columbus, all located in the State of Nebraska and each of which is a wholly owned subsidiary of Creditel Corp., Omaha, Nebr. Notice of the application was published on November 17, 1972, in the Omaha World-Herald, a newspaper circulated in Omaha, Nebr.

Applicant states that the proposed subsidiary would engage in the activities of making, acquiring, or servicing loans or other extensions of credit for personal, family, or household purposes, and acting as insurance agent or broker in selling insurance to borrowers from such finance subsidiaries, to include credit life insurance, accident and health insurance, and property damage insurance for collateral supporting loans made by such finance subsidiaries. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than February 8, 1973.

Board of Governors of the Federal Reserve System, January 12, 1973.

[SEAL] TYNAN SMITH,
Secretary of the Board.

FEDERAL TRADE COMMISSION

CORPORATE PATTERNS SURVEY

Authorization of Collection of Economic Reports

Notice is hereby given that the Federal Trade Commission pursuant to section 6(f) of the Federal Trade Commission Act (15 U.S.C. 46(f)) has approved, adopted, and entered of record the following resolution:

Whereas, the Federal Trade Commission is authorized by section 6 of the Federal Trade Commission Act to gather and compile information concerning, and to investigate from time to time the organization, business, conduct, practices, and management of corporations (as specified in the Federal Trade Commission Act) engaged in commerce, and their relation to other corporations and to individuals, associations, and partnerships; and

Whereas, the Federal Trade Commission may require that such corporations file annual or special reports, or both, furnishing to the Commission such information as may be needed as to their organization, business, conduct, practices, management, and their relation to other corporations, partnerships, and individuals; and

Whereas, it is deemed necessary in the public interest for the Federal Trade Commission to gather information as to the nature of business and the relation of such corporations to other corporations, individuals, associations, and partnerships, as to the ownership of such corporations, as to various financial characteristics of such corporations, and as to the value of sales or output by product class and other category of such corporations which are interrelated in varying degrees with other corporations, individuals, associations, and partnerships within the various industries and lines of commerce in the United States and outside the United States, for the purpose of making the reports authorized under section 6(f) of the Federal Trade Commission Act and aiding in the enforcement and administration of statutes committed to the Commission.

Now, therefore, it is hereby resolved that the Federal Trade Commission, in the exercise of the powers vested in it by section 6 of the Federal Trade Commission Act, and with the aid of any and all powers conferred upon it by law and any and all compulsory processes available to it, do forthwith proceed to investigate and collect information, including information in the form of reports, of the nature and for the purposes hereinabove stated, from such corporations engaged in commerce as may be designated by the Commission pursuant to general or special orders.

By direction of the Commission dated September 28, 1972.

[SEAL] CHARLES A. TOBIN,
Secretary.

LAUNDERING PROCEDURES FOR CARPETS AND RUGS

Extension of Requirement

The Commission by notice published in the FEDERAL REGISTER on May 19, 1972 (37 FR 10104), announced that it had determined to suspend temporarily the present washing requirement under DOC FF 1-70 for carpets containing alumina trihydrate in the backing until September 15, 1972, during which time public hearings would be held for the purpose of (1) considering the possible need for an alternative washing procedure, (2) considering the adoption of specified alternative procedures proposed in the course of the hearings, and (3) obtaining information concerning alumina trihydrate and other substances possessing flame retardant properties and their utilization and characterization as fire retardant treatments. (The suspension of washing procedures did not apply to carpets that are subject to DOC FF 2-70.) Such suspension was subsequently extended to November 3, 1972, by notice published in the FEDERAL REGISTER on September 21, 1972 (37 FR 19674), and further extended to January 2, 1973, by notice published in the FEDERAL REGISTER on November 22, 1972 (37 FR 24853).

In view of unavoidable complications which arose during the analysis of the proposed alternative laundering procedure by the National Bureau of Standards and the Laboratory of the Federal Trade Commission, which prevented a final determination of this matter by January 2, 1973, the Commission has determined to extend its suspension of the present washing requirement under DOC FF 1-70 for carpets containing alumina trihydrate in the backing until March 6, 1973.

By direction of the Commission dated January 9, 1973.

[SEAL] CHARLES A. TOBIN,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[File No. 500-1]

SPENCE & GREEN CHEMICAL CO.

Order Suspending Trading

JANUARY 11, 1973.

It appearing to the Securities and Exchange Commission that the summary suspension of trading in the common stock, $0.50 par value, and all other securities of Spence & Green Chemical Co., being traded otherwise than on a national securities exchange, is required in the public interest and for the protection of investors:

It is ordered, Pursuant to section 15(c)(5) of the Securities Exchange Act of 1934, that trading in such securities otherwise than on a national securities exchange be summarily suspended, this order to be effective for the period from 10 a.m. e.s.t., on January 12, 1973, through January 21, 1973.

INTERSTATE COMMERCE COMMISSION

[Rev. S.O. 994; I.C.C. Order 81]

ANN ARBOR RAILROAD CO.

Rerouting or Diversion of Traffic

In the opinion of R. D. Pfahler, Agent, the Ann Arbor Railroad Co. is unable to transport traffic over its car ferry between Frankfort, Mich., and Manitowoc, Wis., because of damage to its boat *Arthur K. Atkinson*.

It is ordered, That:

(a) The Ann Arbor Railroad Co. being unable to transport traffic over its car ferry between Frankfort, Mich., and Manitowoc, Wis., because of damage to its boat *Arthur K. Atkinson*, that line is hereby authorized to reroute or divert such traffic via any available route to expedite the movement. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) *Concurrence of receiving roads to be obtained.* The railroad desiring to divert or reroute traffic under this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 5 p.m., January 11, 1973.

V 38 - 13 JAN 19 73 XUM

(g) *Expiration date.* This order shall expire at 11:59 p.m., January 31, 1973, unless otherwise modified, changed, or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., January 11, 1973.

[Notice 159]

ASSIGNMENT OF HEARINGS

JANUARY 16, 1973.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the official docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC 97904 Sub 13, Knoxville-Maryville Motor Express, Inc., now assigned January 30, 1973, at Nashville, Tenn., is postponed indefinitely.

MC-117943 Sub 1, Joseph M. Booth, doing business as J. M. Booth Trucking, now assigned hearing January 24, 1973, at Miami, Fla., will be held in room 208, Federal Building, 51 Southwest First Avenue, Miami, Fla.

MC 134082 Sub 6, K. H. Transport, Inc., now assigned January 17, 1973, at Washington, D.C., is cancelled and transferred to modified procedure.

MC 83539 Sub 353, C. & H. Transportation Co., Inc., now assigned February 13, 1973, at Washington, D.C., is cancelled and application dismissed.

MC 106274 Sub 17, Raeford Trucking Co., now assigned January 23, 1973, at Raleigh, N.C., will be held in room 342, Federal Building, 310 New Bern Avenue.

AB 52, New Mexico Central Railway Co., and The Atchison, Topeka and Santa Fe Railway Co., Abandonment Between Willard and Calvert, Torrance County, N. Mex., now being assigned February 28, 1973, at Estancia, N. Mex., in a hearing room to be later designated.

MC-134599 Sub 46, Interstate Contract Carrier Corp., now assigned February 15, 1973, at Washington, D.C., is cancelled and application dismissed.

MC 100666 Sub 219, Melton Truck Lines, Inc., now being assigned March 5, 1973 (3 days), at Albuquerque, N. Mex., in a hearing room to be later designated.

MC 1334 Sub 11, Riteway Transport, Inc., now being assigned March 12, 1973 (1 week), at Cortez, Colo., in a hearing room to be later designated.

MC-116113 Sub 30, Iowa Packers, Xpress, Inc., now assigned January 31, 1973, at Omaha, Nebr., is cancelled and transferred to modified procedure.

[Rev. S.O. 994; ICC Order 80]

BEAVER, MEADE, AND ENGLEWOOD RAILROAD CO. AND MISSOURI-KANSAS-TEXAS RAILROAD CO.

Rerouting or Diversion of Traffic

In the opinion of R. D. Pfahler, agent, because of track conditions, the Beaver, Meade and Englewood Railroad Co. is unable to transport traffic over its entire line, and the Missouri-Kansas-Texas Railroad Co. is unable to transport traffic over its line between Altus, and Forgan, Okla., in time to clear these lines prior to January 15, 1973, the effective date of their abandonments.

It is ordered, That:

(a) Because of track conditions, the Beaver, Meade and Englewood Railroad Co., being unable to transport traffic over its entire line, and the Missouri-Kansas-Texas Railroad Co. being unable to transport traffic over its line between Altus and Forgan, Okla., in time to clear these lines prior to January 15, 1973, the effective date of their abandonments, these carriers are hereby authorized to reroute or divert such traffic via any available route to expedite the movement. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) *Concurrence of receiving roads to be obtained.* The railroad desiring to divert or reroute traffic under this order shall receive the concurrence of other railroads to which such traffic is to be diverted or rerouted, before the rerouting or diversion is ordered.

(c) *Notification to shippers.* Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic is deemed to be due to carrier disability, the rates applicable to traffic diverted or rerouted by said agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic. Divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) *Effective date.* This order shall become effective at 11 a.m., January 10, 1973.

(g) *Expiration date.* This order shall expire at 11:59 p.m., January 26, 1973, unless otherwise modified, changed, or suspended.

It is further ordered, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that it be filed with the Director, Office of the Federal Register.

Issued at Washington, D.C., January 10, 1973.

[Ex Parte No. 241; Rule 19, Third Rev. Exemption 22]

CHICAGO, ROCK ISLAND & PACIFIC RAILROAD CO., ET AL.

Exemption Under Mandatory Car Service Rules

It appearing, That there are substantial movements of grain and grain products moving in plain, 40-foot, narrow-door boxcars between points on the following railroads:

Chicago, Rock Island and Pacific Railroad Co.
Missouri Pacific Railroad Co.
St. Louis-San Francisco Railway Co.
Union Pacific Railroad Co.

and that unlimited exchange of such cars among these railroads will increase car utilization by reductions in switching and other movements of empty cars.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, plain boxcars described in the Official Railway Equipment Register, ICC R.E.R. No. 386, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation XM, with inside length 44 feet 6 inches or less and equipped with doors less than 9-feet wide owned by any of the aforementioned railroads and located empty on such lines, may be loaded with grain or grain products, as defined herein, to stations located on any of the aforementioned railroads. When so loaded, such cars shall be exempt from the provisions of Car Service Rules 1 and 2.

The term "grain and grain products" shall comprise the commodities specifically named in lists 1, 2, 5, 6, 7, and 8 published in Western Trunk Lines Freight Tariff 330-U, ICC A-4797, issued by Fred Ofcky, supplements thereto, or consecutive issues thereof.

Effective: January 15, 1973.

Expires: April 30, 1973.

Issued at Washington, D.C., January 12, 1973.

[1] Findings and conclusions filed as part of the original document.

[Ex Parte No. 241; Rule 19, Rev. Exemption 16]

PITTSBURGH AND LAKE ERIE RAILROAD CO.

Exemption Under Mandatory Car Service Rules

It appearing, that the Pittsburgh & Lake Erie Railroad Co. (P&LE) owns numerous open hoppers; that, under present conditions, there is virtually no demand for these cars on the P&LE; that return of these cars to the P&LE has resulted in their being stored idle on that line; that such accumulation of idle cars has resulted in excessive congestion on the lines of the P&LE and storage of cars on main and auxiliary tracks, greatly interfering with service to shippers served by that line and with normal train and switching operations; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the P&LE; and that compliance with Car Service Rules 1 and 2 prevents such use of open hoppers owned by the P&LE, resulting in unnecessary loss of utilization of such cars.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, open hoppers described in the Official Railway Equipment Register, I.C.C. R.E.R. No. 386, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation HK, HT, or HM and bearing reporting marks assigned to the Pittsburgh & Lake Erie Railroad Co., shall be exempt from the provisions of Car Service rules 1, 2(a), and 2(b).

Effective: January 10, 1973.

Expires: April 30, 1973.

Issued at Washington, D.C., on January 10, 1973.

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

Synopses of orders entered by the Motor Carrier Board of the Commission pursuant to sections 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 1132), appear below:

Each application (except as otherwise specifically noted) filed after March 27, 1972, contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application. As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings on or before February 8, 1973. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding

V 38 - 13 JAN 19 73 XUM

pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC-74012. By order of January 10, 1972, the Motor Carrier Board approved the transfer to Charles L. Bartleson, doing business as W. C. Leasing, Pedricktown, N.J., of Permits Nos. MC-125826 Subs 2, 5, 6 and 8, issued March 28, 1968, June 5, 1969, May 31, 1972, and November 29, 1971, respectively, to Bartleson Brothers, Inc., Penns Grove, N.J., authorizing the transportation of: Liquefied and solidified carbon dioxide from and to points in New York, New Jersey, Connecticut, Massachusetts, Pennsylvania, Rhode Island, Virginia, Maryland, Ohio, West Virginia, and the District of Columbia. Morton E. Kiel, 140 Cedar Street, New York, NY 10006, applicants' representative.

No. MC-FC-74150. By order of January 3, 1973, the Motor Carrier Board approved the transfer to Blue & White Towing & Wrecker Service, Inc., Indianapolis, Ind., of the operating rights in Certificates No. MC-111773 and MC-111773 (Sub-No. 1) issued March 31, 1952, and April 24, 1963, respectively to Blue & White Service, Inc., Indianapolis, Ind., authorizing the transportation of wrecked and disabled motor vehicles between points in Indiana and Ohio, with exceptions, Ohio, the Lower Peninsula of Michigan, Illinois, Missouri, Tennessee, Kentucky, West Virginia, Wisconsin, Minnesota, and portions of New York, Pennsylvania, Maryland, Virginia, and North Carolina. Pete A. Pappas, 120 East Market Street, Indianapolis, IN 46204, attorney for transferee. Kirkwood Yockey, 300 Union Federal Building, Indianapolis, Ind. 46204, attorney for transferor.

[SEAL] ROBERT L. OSWALD, *Secretary.*

[Ex Parte No. 241; Rule 19, Exemption 29, Amdt. 1]

WESTERN MARYLAND RAILWAY CO.

Exemption Under Mandatory Car Service Rules

Upon further consideration of Exemption No. 29 issued December 19, 1972 (37 FR 28668).

It is ordered, That, under authority vested in me by Car Service Rule 19, Exemption No. 29 to the Mandatory Car Service Rules ordered in Ex Parte No. 241, be, and it is hereby, amended to expire January 19, 1973.

This amendment shall become effective January 5, 1973.

Issued at Washington, D.C., January 5, 1973.

INTERSTATE COMMERCE COMMISSION,
[SEAL] R. D. PFAHLER, *Agent.*

■

Minimum Wages for Federal and Federally Assisted Construction

Area Wage Determination Decisions, Modifications, and Supersedeas Decisions

V 38 - 13 JAN 19 73 XUM

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

Modifications and Supersedeas Decisions to Area Wage Determination Decisions

Area wage determination decisions. Area Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determinations by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 USC 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

Area Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR, Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and supersedeas decisions to area wage determination decisions. Modifications and Supersedeas Decisions to Area Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing Area Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original Area Wage Determination Decision.

Set forth below in this document are the following. A new Area Wage Determination Decision number AP–605 for Minnesota.

Modifications to Area Wage Determination Decisions for the following States (the numbers of the decisions being modified and their dates of publication in the FEDERAL REGISTER are listed with each State):

Arizona	AP–221; AP–222, Aug. 18, 1972.

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTES:
a. Employer contributes 4% of basic hourly rate for over 5 years' service and 2% basic hourly rate for 6 months to 5 years' service as Vacation Pay Credit. 6 Paid Holidays: A through F.
b. Out-of-town contractors will pay the rate of $8.40 per hour with no fringe benefits payments.
c. Employer shall contribute $25.00 per month for each employee into the Health & Welfare Fund.
d. Employees with at least 1,700 hours service during the current year & one year's service, one week vacation with pay; three years' service, two weeks' vacation with pay; fifteen years' service, three weeks' vacation with pay.

Title 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

PART 1—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT AND THE FAIR PACKAGING AND LABELING ACT

Food Label Information Panel

In the FEDERAL REGISTER of March 30, 1972 (37 FR 6493), the Commissioner of Food and Drugs proposed under Title 21 a new § 1.8d, relating to establishment of a food label information panel, in conjunction with the related proposal for nutrition labeling. The Commissioner's decision with respect to nutrition labeling appears in this issue of the FEDERAL REGISTER (38 FR 2125). Because the food label information panel regulation would apply to all mandatory label requirements, in addition to nutrition labeling, it is considered separately in this final order. A total of 83 comments were received from consumers, consumer organizations, industry representatives, trade associations, and other interested persons, specifically related to the food label information panel proposal.

1. Nineteen comments questioned the legality of the proposal. Most of these stated generally that there does not seem to be any statutory authority for some of the proposed provisions in either the Federal Food, Drug, and Cosmetic Act or the Fair Packaging and Labeling Act. The comments argued that neither act gives the Food and Drug Administration the authority to require an information panel or to regulate its exact location and the size of the type to be used. It was also asserted that there is nothing in the legislative history of either act to indicate that Congress intended to delegate to the Food and Drug Administration the power to prescribe the specific location of any label declaration.

The Commissioner concludes that sections 201, 403, and 701 of the Federal Food, Drug, and Cosmetic Act contain sufficient authority for the promulgation of this regulation. Section 403(a) provides that a food shall be deemed to be misbranded if its labeling is false or misleading in any particular, and section 201(n) states that the failure to include material information may be as misleading as the inclusion of false information. Section 403(f) further provides that a food shall be deemed to be misbranded if any of the information required by law to appear on the label or labeling is not prominently placed thereon with such conspicuousness and in such terms as to render it likely to be read and understood by the ordinary individual under customary conditions of purchase and use. The Commissioner has concluded that the information required to appear on the label or labeling would be misleading and lack sufficient prominence and conspicuousness to render it likely to be read and understood unless it appears in compliance with the requirements of new § 1.8d. Section 701(a) of the act provides that regulations may be issued for the efficient enforcement of the act, and accordingly this new regulation is fully authorized.

2. Three nutritionists commented in favor of a uniform location for nutrition information. The Society for Nutrition Education objected to nutrition information being restricted to either the principal display panel or the information panel, but recommended it be located in one area. The Massachusetts Consumer Council agreed with an information panel but recommended that the panel be defined in more detail concerning different package shapes and sizes. The Council on Children, Media and Merchandising objected to the defined restriction of the placement of the information panel. Forty-five members of industry and 33 trade associations, including one foreign association, also submitted comments. Some objected to the concept of an information panel as being impracticable, or recommended that the proposal concerning information panels be withdrawn. Virtually all comments from industry and trade associations objected to the requirement for placement of the information panel immediately to the right of the principal display panel as being too restrictive or as not being amenable to some products.

The Commissioner has considered all these comments. Information panels on food packages will contribute organization to labeling that will reduce confusion and promote better understanding, in the interest of consumers. In consideration of the impracticability of placing the information panel immediately to the right of the principal display panel in all cases, the revised regulation provides for variations in package shapes and sizes. If there is an impracticable panel "immediately to the right" or if the package is designed so that there is no such panel, the information panel will be permitted to appear on the next panel to the right. For example, cyclindrical containers with a principal display panel oriented along the horizontal (end-to-end) axis will be permitted to use some other part of the cylindrical surface for the required information panel rather than the container end. In cases where there are two or more alternate principal display panels, only one information panel is required, and any one of the two or more alternate principal display panels may bear the required information. Areas of space not used, e.g., between spot labels are not part of the label or information panel.

3. Several firms objected to the inclusion of certain mandatory information under § 1.8d, or objected to the requirement that this information appear either on the principal display panel or on the information panel. The Commissioner believes that this information should be easily and readily available to consumers and the requirement for placement on one of these panels is the most appropriate means of assuring this availability. Therefore, this requirement remains unchanged.

4. Concerning the minimum type size requirement of 1/16 inch there were comments that this provision is unnecessarily rigid and impractical, particularly with respect to small labels. Lesser minimum type sizes were suggested. Several comments expressed concern that certain existing labels, e.g., a milk bottle or soda pop bottle cap provide insufficient space to accommodate the information that would be required in view of the new nutrition labeling requirements under § 1.17. The Commissioner agrees that type size is only one of the elements which determines conspicuousness; however, type size is an important element that can be readily measured. Therefore, the final regulation retains a uniform type size and placement requirement, but provides that any interested person may petition the Commissioner to establish, where justified, a smaller type size or an alternative means of disseminating such information to consumers.

5. Exemptions were requested from the requirements of § 1.8d for random food packages, margarine, and salt on the basis of conflict with existing regulations. Section 1.1c (21 CFR 1.1c) exempts random food packages from certain requirements for declaration of quantity of contents. The standard of identity for margarine § 45.1 (21 CFR 45.1) requires ingredients to be stated on the principal display panel immediately preceding or following the name of the food. Section 3.87 (21 CFR 3.87) requires labels of salt and iodized salt to bear statements concerning iodide to appear on the principal display panel. The Commissioner concludes that existing regulations concerning random food packages, salt, and margarine do not conflict with the requirements of § 1.8d, and that there is no reason for exempting these products from the requirements. Those existing regulations remain effective and are not changed by § 1.8d.

6. In response to other concerns expressed in the comments, the Commissioner advises that:

(a) The term "label" is defined in section 201(k) of the Federal Food, Drug, and Cosmetic Act to mean "a display of written, printed, or graphic matter upon the immediate container of any article * * *."

(b) Information required by the regulation may be repeated in whole or in part elsewhere on the label, provided it is not misleading.

(c) Information not required to appear on the principal display panel or information panel is not subject to the type size restrictions.

The Commissioner concludes, having considered the comments received and other relevant material, that the proposed regulation with changes, should be adopted as set forth below.

Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201, 403, 701(a), 52 Stat. 1040–1042 as amended, 1047–1048 as amended, 1055; 21 U.S.C. 321, 343, 371(a)), and under authority delegated to him (21 CFR 2.120), Part 1 is amended by adding a new § 1.8d, as follows:

§ 1.8d Food labeling; information panel.

(a) The term "information panel" as it applies to packaged food means that part of the label immediately to the right of the principal display panel as observed by an individual facing the principal display panel with the following exceptions:

(1) If the part of the label immediately to the right of the principal display panel is too small to accommodate the necessary information or is otherwise unuseable label space, e.g., folded flaps or can ends, the panel immediately to the right of this part of the label may be used.

(2) If the package has one or more alternate principal display panels, the information panel is immediately to the right of any principal display panel.

(3) If the top of the container is the principal display panel and the package has no alternate principal display panel, the information panel is any panel adjacent to the principal display panel.

(b) All information required to appear on the label of any package of food pursuant to §§ 1.8a, 1.8c, 1.10, 1.17, 1.18, and Parts 80 and 125 of this chapter shall appear either on the principal display panel or on the information panel unless otherwise specified by regulations in this chapter.

(c) All information appearing on the principal display panel or the information panel pursuant to this section shall appear prominently and conspicuously, but in no case may the letters and/or numbers be less than 1/16 inch in height unless an exemption pursuant to paragraph (e) of this section is established. The requirements for conspicuousness and legibility shall include the specifications of §§ 1.8b(h) (1) and (2) and 1.9.

(d) All information appearing on the principal display panel or on the information panel pursuant to this section shall appear on the same panel unless there is insufficient space. If there is insufficient space for all of this information to appear on a single panel it may be divided between these two panels except that the information required pursuant to any given section or part shall all appear on the same panel.

(e) If the label of any package of food is too small to accommodate all of the information required by §§ 1.8a, 1.8c, 1.10, 1.17, 1.18, and Parts 80 and 125, the Commissioner may establish by regulation an acceptable alternative method of disseminating such information to the public, e.g., a type size smaller than 1/16 inch in height, or labeling attached to or inserted in the package or available at the point of purchase. A petition requesting such a regulation, as an amendment to this paragraph, shall be submitted to the Hearing Clerk in the form established in § 2.65 of this chapter.

Effective date. All labeling ordered after December 31, 1973, and all labeling used for products shipped in interstate commerce after December 31, 1974 shall comply with this regulation.

(Secs. 201, 403, 701(a), 52 Stat. 1040–1042 as amended, 1047–1048 as amended, 1055; 21 U.S.C. 321, 343, 371(a))

Dated: January 12, 1973.

CHARLES C. EDWARDS,
Commissioner of Food and Drugs.

[FR Doc.73-987 Filed 1-18-73;8:45 am]

PART 1—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT AND THE FAIR PACKAGING AND LABELING ACT

Nutrition Labeling

In the FEDERAL REGISTER of March 30, 1972 (37 FR 6493), the Commissioner of Food and Drugs proposed a new section on nutrition labeling under Title 21. Individuals and organizations submitted 3,140 comments on the proposal. These included 2,863 comments from individual consumers, 71 from consumer groups and dietetic associations, 57 from professionals, 24 from representatives of governmental agencies including State and local groups, 84 from food manufacturers and distributors, and 41 from trade associations. Comments received from all of these groups and individuals strongly favored nutrition labeling, with the exception of 23 replies which contained negative views of the basic concepts of the proposal.

Mandatory nutrition labeling. Some 290 consumers and 15 consumer groups believe that nutrition labeling should be mandatory for all foods. The Commissioner has concluded that insufficient information is known about the nutrient content and variability of some foods, and that the analytical methodology and capability of some food manufacturers, processors, and distributors is inadequate to permit adoption of a requirement at this time that all foods bear nutrition labeling. Experience under this new regulation is required before expansion to all foods on a mandatory basis can be considered.

Percentage labeling. Some 17 consumer groups requested percentage labeling of at least major food ingredients, e.g., the percentage of fruit juice and fruit drinks. The Commissioner has proposed a separate regulation dealing with this subject in the FEDERAL REGISTER of June 22, 1972 (37 FR 12327), and a final order will be issued on it in the near future.

Applicability of nutrition labeling. Numerous comments requested clarification of the circumstances under which nutrition labeling will and will not be applicable, and particularly the relationship between nutrition labeling and special dietary food labeling under 21 CFR Part 125. The final regulation clarifies both of these points.

Except for some standardized foods, the decision to add a vitamin or mineral to, or make a nutritional claim for, a food is entirely voluntary. The Commissioner has therefore concluded that, where a nutrient is added to a food, e.g., the addition of vitamin C to a breakfast drink, or a claim or information with respect to nutritional properties of a food is included in labeling or advertising, e.g., the amount of vitamin C in orange juice, or the fact that orange juice is a good source of vitamin C, or a general or specific reference to the caloric or fat content of a food, or any other representation that a food is useful in the daily diet because of any of the nutrient qualities covered in this regulation, the full nutrition labeling established in this regulation must be utilized. Only by having available this full nutrition labeling for a food to which such a nutrient is added or for which such claim or information is provided can such claim or information be evaluated and understood, and the food properly used in the diet. Without full nutrition labeling such claims or information would be confusing and misleading for lack of completeness, and could deceive consumers about the true nutritional value of the food, its overall nutritional contribution to the daily diet, and its nutritional weaknesses as well as strengths. Since addition of nutrients and use of nutrition claims or information is voluntary in most cases, the application of this new regulation on nutrition labeling is also voluntary. A manufacturer who does not wish to use nutrition labeling need not add nutrients to his products or refer to their nutritional properties in labeling or advertising.

All food standards providing for addition of nutrients or labeling of nutritional qualities have been reviewed. For most food standards, the addition of nutrients is optional and nutrition labeling is therefore entirely appropriate because the manufacturer is not required to add nutrients or to label nutritional properties. For those few food standards where the addition of nutrients and/or the labeling of nutritional properties is mandatory, the Commissioner has concluded that no hardship will be imposed by the application of nutrition labeling. Accordingly, none of these standardized foods is exempted from nutrition labeling. The Commissioner will consider requests for such exemptions on an ad hoc basis, based upon a showing of undue hardship.

Several food standards for enriched foods require labeling under 21 CFR Part 125. The addition of a nutrient or the use of a nutrition claim or information has in the past uniformly required the use of labeling under 21 CFR Part 125. The Commissioner has therefore reviewed the relationship of 21 CFR Part 125 to nutrition labeling and has reconciled them in a way designed to provide the maximum useful information to consumers.

In the past, the term "special dietary food" has been defined to include any food to which a nutrient has been added or for which nutrition claims or informa-

V38-13 JAN 19 73 XUM

tion have been used. This approach was adopted to assure that such foods would contain specific label information about the particular nutrient(s) involved, pursuant to regulations promulgated in 21 CFR Part 125, because until now general nutrition labeling for such foods was not considered feasible or appropriate. In fact, virtually all of the foods categorized as special dietary foods for purposes of requiring nutrient labeling have been intended for consumption by the general population and not by any particular small segment.

The development of general nutrition labeling, applicable to all foods, obviates continuation of nutrient labeling of these general purpose foods under 21 CFR Part 125, and permits replacement of this approach with broad nutrition labeling under new § 1.17 (21 CFR 1.17) as set forth below.

For some products, general nutrition labeling under § 1.17 is inappropriate and very specific special dietary food labeling under 21 CFR Part 125 is retained. These foods are exempted from § 1.17 in this final regulation. Such exempted foods include certain infant foods (for which separate labeling has been promulgated in 21 CFR 125.5); dietary supplements of vitamins and minerals (subject to a standard of identity promulgated elsewhere in this issue of the FEDERAL REGISTER as § 80.1 (21 CFR 80.1) and for which specific special dietary food labeling under 21 CFR Part 125 is appropriate); any food intended for use as the sole item of the diet (for which specific special dietary food labeling, including in some cases amino acid composition, is appropriate under 21 CFR Part 125); and foods represented for use solely under medical supervision in the dietary management of specific diseases and disorders (such as foods for the dietary management of inborn errors of metabolism, for which specific special dietary food labeling is also more appropriate under 21 CFR Part 125). In each of these instances, the broad approach adopted for nutrition labeling, which is clearly desirable for general consumer use, is inappropriate because of the need for more detailed and specific information and because the type of product involved is more readily susceptible to precise quality control of the nutrient levels.

To correct the present references in several food standards to labeling under 21 CFR Part 125, the Commissioner is proposing elsewhere in this issue of the FEDERAL REGISTER to amend all such standards to provide that the reference be changed to new § 1.17, 21 CFR Part 125, which is the subject of a separate order published elsewhere in this issue of the FEDERAL REGISTER, also clarifies the intended application of § 1.17 by providing that the term "special dietary use" as applied to food used by man means a particular use for which an article purports or is represented to be used, including supplying a vitamin, mineral, or other dietary property for use by man to supplement his diet by increasing the total dietary intake, except for foods for which nutrition labeling is used as required pursuant to § 1.17.

The revision of 21 CFR Part 125 published elsewhere in this issue of the FEDERAL REGISTER relates only to §§ 125.1–125.3, and does not deal with § 125.6 (relating to food used in control of body weight or in dietary management with respect to disease). Although a revision of § 125.6 has been proposed and was included as part of the 1968–70 Special Dietary Food Hearings, the Commissioner has not yet acted upon this aspect of those hearings.

As already explained, any reference in labeling or advertising to protein, fat, carbohydrates, or calories will result in a requirement that the food bear full nutrition labeling pursuant to new § 1.17. Under § 125.6, which is more limited in its application than § 1.17, specific claims relating to weight control or dietary management of disease result in a requirement that the product bear a statement of the percent by weight of protein, fat, and carbohydrates, and the number of calories. In view of the wording of new § 1.17, there will be no situation in which § 125.6 will be applicable and § 1.17 will not be applicable. Moreover, § 1.17 requires that the information set out in § 125.6 be included in nutrition labeling in the format established in § 1.17. Thus, these two regulations are entirely consistent, and there is no need to amend § 125.6 to accommodate nutrition labeling at this time. The Commissioner intends to review the need for § 125.6, and to act upon the related issue of claims based upon caloric content of a food, in the context of the proposals which were the subject of the Special Dietary Food Hearings, in the near future.

Sodium declaration. Several authorities indicated the value of continuing to list sodium content of foods, without listing other nutrients, for those on a sodium-controlled diet. This need has been met by permitting the listing of sodium in milligrams per serving, without subjecting the label to the requirements of nutrition labeling. Any such label declaration must be in compliance with § 125.9. However, § 1.17 provides for the inclusion of sodium content within nutritional labeling when the manufacturer so chooses. When a sodium content declaration is included in full nutrition labeling, the sodium content declaration shall appear immediately following the statement on fat content.

Cholesterol declaration. Because of the interest of many individuals and medical authorities, the Commissioner has concluded that it is in the best interest of the consumer to permit listing of cholesterol content without subjecting the label to the requirement of full nutrition labeling. Any such label must be in compliance with § 1.18, which is published in this issue of the FEDERAL REGISTER. However, § 1.17 provides for the inclusion of cholesterol content when the manufacturer chooses. When a cholesterol declaration is included in full nutrition labeling, the declaration shall appear immediately following the fat statement.

Infant, baby, and junior food. Manufacturers of strained conventional foods for infants and children asked that they be permitted to use a standard for nutrition labeling applicable to children under 4 years of age. This has been provided for in the final order by permitting these products to utilize the recommended daily allowances for children under 4 years of age as set forth in new 21 CFR 125.1(b), which is published elsewhere in this issue of the FEDERAL REGISTER, and a corresponding average serving size.

Reference standard. The problem of selecting a proper reference standard for nutrient levels drew considerable comment. The change from use of the outdated Food and Drug Administration Minimum Daily Requirement (MDR) values to use of a standard derived from the National Academy of Sciences-National Research Council (NAS–NRC) Recommended Dietary Allowance (RDA) values was approved by all who commented. Several specialists in the area of human nutritional needs commented on the selection of the proper reference standard and its nomenclature. Most of these specialists agreed that, to be useful for labeling, the table of the NAS–NRC report "Recommended Dietary Allowances" needs simplification. Suggestions included calculating a weighted mean Recommended Dietary Allowance (RDA) value, omitting or including infants and pregnant women, and using one specific RDA group, such as the 22-to-35-year-old male or female. An NAS–NRC ad hoc Conference on Nutritional Labeling held July 24–26, 1972, in Washington, D.C., recommended use of the adult male standard, adding an allowance for vitamin D.

The need was recognized for the development of a single set of standard nutrient requirements applicable to nutritional labeling and other regulations with nutrition components. After consideration of the comments on the nutrition labeling proposal and other available information, a standard set of values, to be known as the U.S. Recommended Daily Allowances (U.S. RDA), was developed. The designation "U.S. RDA" will distinguish this set of values from any single set of NAS–NRC RDA values. These U.S. RDA values were derived from the highest value for each nutrient given in the NAS–NRC tables for males and nonpregnant, nonlactating females 4 or more years of age, except for calcium, phosphorous, biotin, pantothenic acid, copper, and zinc.

The highest values were selected to assist all segments of the population. Further, the differences between the highest values and some specific set of values for a single sex or sex group or a median or mean for the group are generally minor. The U.S. RDA values for calcium and phosphorous (both 1 gram) are not the highest values in the above-cited NAS–NRC tables for these nutrients; both (1 gram), because of their physiological

and solubility, the wide variability in requirements depending on age (0.8 to 1.4 grams), the human requirements of approximately 1 gram generally accepted in the United States, and the lower values generally advocated by international nutrition groups, e.g., the FAO/WHO Expert Group on Calcium Requirements.

Two members of the National Advisory Food Committee to the Food and Drug Administration pointed out that the National Academy of Sciences has not tabulated RDA values for biotin, pantothenic acid, copper, and zinc, although these nutrients are now recognized as essential in human nutrition. While biotin, pantothenic acid, copper, and zinc are so widely distributed in conventional foods that it would be difficult to select a diet in which they would be deficient, they are essential nutrients and are included as optional nutrients in dietary supplements in 21 CFR 80.1. Therefore, the Commissioner has concluded that it is appropriate to include biotin, pantothenic acid, copper, and zinc, in nutrition labeling at this time. In addition, evidence of zinc deficiency in some segments of the population also supports the conclusion that zinc should be included in nutrition labeling.

It is anticipated that the U.S. RDA values will be amended periodically to concur with major changes that may be made in the National Academy of Sciences-National Research Council RDA values.

Standardized format. The Food and Drug Administration proposed a standardized format for listing seven commonly analyzed nutrients. This proposal was well received by consumers, consumer groups, and most professionals and teachers. The intense interest of consumer groups in inclusion of all seven nutrients in the standardized format has been reiterated several times. Industry, however, strongly opposed listing nutrients that were not present, emphasizing that this is a negative approach to nutrition labeling and referring to it as "negative labeling." Recognizing the validity of both views, the Commissioner has concluded that it is reasonable to require a standard seven-nutrient format unless a food contains less than 2 percent of the U.S. RDA for four or more of the seven nutrients. In the latter case, the manufacturer or distributor may list no more than three nutrients without listing the seven required by the standard format. Where the standard seven-nutrient format is not used, it is necessary to add the statement "contains less than 2 percent of the U.S. RDA of ------" listing whichever of the seven nutrients for which specific levels have not been declared.

The original proposal indicated that quantities of nutrients at levels less than 5 percent of the RDA would be considered insignificant and would have to be labeled to show consumers this fact. Suggestions were made that levels of nutrients less than the lowest increment be designated by an asterisk opposite the given nutrient or nutrients in the standard seven-nutrient format with a reference statement "less than ------ percent of the RDA." After careful consideration of these comments, the regulation has been changed to provide that nutrients present in amounts less than 2 percent of the U.S. RDA may be indicated by a zero, or by an asterisk referring to another asterisk placed at the bottom of the table and followed by the statement "contains less than 2 percent of the U.S. RDA of this (these) nutrient (nutrients)."

Labeling increments. The question of "negative labeling" is linked to the labeling increments used. Many of the objections to a standardized format disappear when the lower limit for a serving is decreased from the proposed 5 percent of the reference standard of a nutrient to 2 percent of that standard. Such small increments appear to be approaching the limits of accuracy of the analytical methods. However, practicing nutritionists pointed out that nutritionally acceptable diets could be assembled with foods that had nutrient contents that are virtually all below the proposed 5 percent cutoff value. Nutrition labeling is voluntary, and manufacturers need positive reasons for using nutrition labeling if it is to be widely accepted and of optimum value to the consumer. In recognition of these views, the regulation includes use of a standard format, but with reduction of the increments to 2 percent for levels up to and including 10 percent of the reference standard and to 5 percent for levels above 10 percent and up to and including 50 percent of the reference standard. As originally proposed, 10 percent increments of the U.S. RDA will be used for content above 50 percent.

Combination packaging. Comments were received from manufacturers asking if foods commonly combined with other ingredients could have nutrition labeling which stated nutrition information for the food plus the ingredients, e.g., a dry cake mix plus the eggs and milk required for producing a finished cake, or dry ready-to-eat breakfast cereal plus milk. Although combined values provide the consumer with a better view of the nutritional value of the food, the consumer will not realize the nutritional value of the specific product purchased if only such combined values are provided. It appears reasonable to require that the label state separately the nutrition information for the specific food product and, if the manufacturer desires, to give the nutrition information for the product plus the other ingredients in a second column of values. The manufacturer must clearly identify the other ingredients, and the quantity used as part of one serving of the final food as consumed, e.g., ½ cup of vitamin D milk, or 1 tablespoon of butter.

It was pointed out that a number of food products are comprised of two or more separately packaged ingredients enclosed in an outer container, and if nutrition information were placed on the labels of the individual packaged ingredients, the consumer would be unable to use the information at point of purchase. It is reasonable to require the manufacturer to place nutrition information on the outer container for the combination of the individual ingredients and the total product. However, when two or more food products are simply combined together in such a manner that no outer container is used, or no outer label is available, each product shall have its own nutrition information statement, e.g., two boxes taped together or two cans combined in a clear plastic overwrap.

Fortification guidelines and nutritional claims. The subject of labeling increments and "negative labeling" is inextricably involved with the problem of "nutrient races" and promiscuous fortification. Several educators and professionals cautioned that guidelines for adding nutrients were needed. Nutrition labeling is designed to provide consumers with a means for identifying the nutrition properties of a food, and is not intended to encourage or suggest that foods with apparently low nutrient content should be fortified in order to give an improved nutrition label statement. In addition to existing regulations pertaining to nutrition fortification, the Food and Drug Administration intends to publish regulations that will govern nutrient additions. These regulations will include nutritional quality guidelines for specific classes of foods and standards of identity. Also governing nutrient additions are the regulations dealing with special dietary foods (1 CFR 125.1–125.3) and a standard of identity for dietary supplements of vitamins and minerals (21 CFR 80.1), published elsewhere in this issue of the FEDERAL REGISTER. Until the new regulations dealing with fortification become effective, the Food and Drug Administration will conduct frequent reviews of label practices of food manufacturers to prevent inappropriate and irrational addition of nutrients. Unwarranted claims or emphasis based on fortification constitute misbranding in violation of section 403(a) of the act.

Some foods currently available to consumers have added nutrients at levels of 50 percent or more of the U.S. RDA per serving and are promoted as a form of dietary supplement. The Commissioner has concluded that such products are dietary supplements of vitamins and minerals. Thus, if vitamins and/or minerals are added to a food so that a single serving provides 50 percent or more of the U.S. RDA of any one of the added vitamins and/or minerals, unless such addition is permitted or required in other regulations, e.g., standards of identity or nutritional quality guidelines, such food is a dietary supplement that is subject to and must conform to the standard of identity set forth in 21 CFR 80.1 as related to vitamins and minerals, as well as conforming to the requirements of nutrition labeling relating to nutrients other than vitamins and minerals.

With the selection of smaller increments (2 percent) below the 10 percent level, there is concern that claims of nutrient superiority of one food over another based solely on small differences could become a problem. The smaller in-

V 38 - 13 JAN 19 73 XUM

crements were selected in order to provide more useful nutrition labeling for consumers, because otherwise the cumulative amounts of low nutrient levels would not be known (e.g., it is estimated that 20 percent to 40 percent of the daily nutrient supply is obtained from foods containing less than 5 percent of the U.S. RDA in a serving); the small increments are not intended to suggest that a 2 percent or 5 percent difference in one food is itself significant. When making claims of nutrient superiority of one food over another, a difference of less than 10 percent of the U.S. RDA is not considered significant. Thus, any label claims for nutritional superiority, or claims that a product makes a significant contribution to the daily allowances of a nutrient(s), will be evaluated by this 10 percent standard.

Comments were received calling attention to the possible abuse of nutrition labeling by the use of labeling claims for specific properties of a food in the prevention or treatment of diseases or disorders, or suggesting that conventional foods in the U.S. diet, as usually prepared, are inadequate to meet nutritional needs or that "natural" sources of vitamins are different and better than vitamins chemically produced or in isolated form. These problems were also pointed out during the 1968–70 Special Dietary Hearings as reflected in the findings of fact and conclusions of law in 21 CFR Part 125 published elsewhere in this issue of the FEDERAL REGISTER. Based upon the foregoing, the Commissioner concludes that a food labeled under the provisions of this section shall not be considered to be in conformity with the requirements of sections 201(n) and 403(a) of the act if its labeling represents, suggests, or implies:

1. That the food, because of the presence or absence of certain dietary properties, is adequate or effective in the prevention, cure, mitigation, or treatment of any disease or symptom.

2. That a diet of ordinary foods cannot supply adequate amounts of nutrients.

3. That the lack of optimum nutritive quality of a food, by reason of the soil on which that food was grown, is or may be responsible for an inadequacy or deficiency in the quality of the daily diet.

4. That the storage, transportation, processing, or cooking of a food is or may be responsible for an inadequacy or deficiency in the quality of diets.

5. That the food has dietary properties when such properties are of no significant value or need in human nutrition. Over the years there have been a number of ingredients or products marketed as nutrients and nutritional supplements which have not been shown to be essential in human nutrition. This point was discussed in considerable detail during the 1968–70 Special Dietary Food Hearings. Among ingredients or products of this type are rutin, other bioflavonoids, para-aminobenzoic acid, inositol, and similar ingredients or products. These ingredients or products have frequently been combined with vitamins and minerals or otherwise represented as a type of nutritional supplement. In these situations, there is a false representation that these ingredients or products have nutritional value. The Commissioner has concluded that for ingredients or products of this type there may not properly be made direct or implied nutritional claims, and that in no instances can these ingredients or products be represented in any way that suggests a nutritional value. Combining these ingredients or products with added vitamins and/or minerals in any food, or adding these ingredients to any food for which nutrition labeling is used, or calling attention to these ingredients or products in a manner which would be considered to imply some nutritional benefit, is inherently misleading. Labeling of such ingredients or products may not state that their usefulness in human nutrition has not been established or otherwise disclaim dietary or therapeutic value since such statements are also misleading. The Commissioner recognizes that there are individuals who desire to purchase ingredients or products of this type for various reasons. These individuals have a right to obtain these ingredients or products as long as they are truthfully labeled. Thus, ingredients or products of this type may properly be marketed as individual ingredients or products or mixtures thereof, provided that no nutritional or dietary supplement claims or disclaimers are made.

6. That a natural vitamin in a food is superior to an added vitamin, or to differentiate in any way between vitamins naturally present from those added.

Protein quality. Wide divergence of opinions and views appears regarding the need to have a measure of protein quality. Suggestions for rating protein quality ranged from comprehensive scaling factors to simple delineation of vegetable and animal protein sources. Measures of protein quality are complex and expensive and commonly are related to use of the given protein as a unique source during the test. Despite the difficulty of selecting a standard, consumers should be protected against indiscriminate use of various low-quality sources of protein.

The 65-gram figure cited in the proposal is the value listed in the NAS–NRC report, "Recommended Dietary Allowances," 1968. This figure presumes consumption of a mixture of protein sources, and is therefore a reasonable value for proteins in general. The above report further lists 45.5 grams of "ideal" protein as the RDA. For this reason, 45.5 grams, or the integral value of 45 grams, is a reasonable figure for high-quality protein.

Extensive subdivision of protein types or qualities does not appear justified at this time in view of the current state of scientific knowledge in this area. The common measure of the quality of all the protein in a food is the Protein Efficiency Ratio (PER), an expensive and time-consuming biological feeding study that uses test animals. This is not an ideal measure for this purpose, even though it is the best currently available. A simplified approach to the designation of protein quality has therefore been devised.

A value of 45 grams of total protein has been selected as the U.S. RDA for protein having a PER value equal to or greater than that of casein. A value of 65 grams of total protein has been selected as the U.S. RDA for protein having a PER value less than that of casein. This gross separation of protein types reduces the need for extensive PER determinations. Total protein having a PER value less than 20 percent of the PER of casein shall not be stated on the label in terms of percent U.S. RDA, and shall be designated as "not a significant source of protein." This approach will be revised if further research provides a better answer to this difficult problem.

Compliance levels. The setting of practical limits of variation in nutrient levels for compliance purposes was the subject of extensive comments by some trade associations and manufacturers. Some 26 manufacturers and 16 trade associations opposed the compliance limits as listed in the proposal. However, none suggested a viable alternative. A few consumer groups and professionals spoke directly to this point; they were in favor of tighter compliance limits than those proposed. These views illustrate the complicated and interrelated problems involved in setting compliance limits for nutrition labeling.

The Commissioner is aware that there is natural variation in the nutrient content of food products. In developing a nutrition labeling system, it is therefore important that the manufacturer be permitted a sufficient tolerance so that he may provide useful nutrition information on the label without incurring excessive control costs, which would result in a significant price increase to the consumer. However, consumers have a right to expect that nutrition labeling honestly represent the products they buy. The change from the proposed label increments of 5 percent to increments of 2 percent permits more accurate representation of nutient levels and increases the necessity of a compliance mechanism. This regulation has as its objective assuring compliance with requirements for average nutrient levels for units in a lot, with only as much variability among individual units as is inherent in the nutrients when foods are processed under good manufacturing practices.

The Commissioner realizes that manufacturers can exert varying degrees of control over the nutrient content of food products. Considerable control can be exerted over the nutrient levels when individual nutrients are added as specific substances. When discrete nutrients consisting of vitamins, minerals, and/or protein are added for the purposes of increasing the nutrient claims as a percent of the U.S. RDA, it is reasonable to require that compliance procedures be rigid. The compliance procedures set forth below for foods to which nutrients are so added require relatively exact nutrient levels in relation to label claims. Less variation in nutrient level is expected in a nutrient that is added to a

food than in a naturally occurring (indigenous) nutrient in a food. When any ingredient which contains a naturally occurring (indigenous) nutrient is added to a food it is not considered an addition for purposes of classification and such food shall be evaluated for compliance purposes in terms of naturally occurring (indigenous) nutrients unless the same nutrient is also added.

Therefore, nutrients in foods will be divided generally into two classes for compliance purposes. These two classes are:

Class I. Added nutrients in fortified or fabricated foods.

Class II. Naturally occurring (indigenous) nutrients.

If a vitamin, mineral, or protein, or an ingredient containing such an added nutrient, is added to a food, the total amount of each such nutrient in the final food product is subject to Class I requirements with certain exceptions.

For either Class I or Class II nutrients, the compliance procedures must be applied to a definitive grouping of product units. Depending on the outcome of the compliance evaluation by the Food and Drug Administration, this grouping will either be considered as correctly labeled and therefore satisfactory for retail sale, or as mislabeled and subject to a regulatory action. Conventionally, such a grouping is a convenient collection of primary containers or units of the same size, type, and style, produced under conditions as nearly uniform as possible, e.g., production from a single shift or day, and designated by a common container code or marking. A collection of products defined in this way is termed a "lot" and is the basic unit to which the compliance procedures shall be applied.

Complete assurance that a lot is or is not in compliance with the labeled nutrient values would of course require destructive analysis of the entire lot. Therefore, a statistical approach involving analysis of a representative sample from the lot is required. Any such approach entailing examination of only a portion of the lot is subject to the possibility of an incorrect compliance decision. However, the differentiation between Class I and Class II nutrients, linked to a valid sampling plan, permits the derivation of a logical compliance procedure, which reduces the chance of an incorrect decision to a tolerable level.

In order to select a representative sample from a lot, the sampling must be accomplished while the lot is still reasonably intact. At the same time, the concern in nutrition labeling is that the label accurately reflect the nutrient level available to the consumer at the point of purchase. Both of these objectives will be satisfied by sampling the product at the manufacturer, wholesaler, or chain store warehouse.

Sample units are customarily combined to form a composite for nutrient analysis. Therefore, compliance procedures will be based on composite analysis. Such a composite must be formed from 12 consumer units chosen in a random fashion so as to be representative of the lot. The composites will be analyzed by the Association of Official Analytical Chemists (A.O.A.C.) methods where available or by appropriate analytical procedures the agency considers reliable.

The agency is prepared to provide guidance to manufacturers in relation to analytical procedures which will be used by the agency for compliance. For those cases in which an A.O.A.C. method is not available for a labeled nutrient, alternative methods of analysis may be submitted to the Food and Drug Administration to determine their acceptability.

In order to assure that the average nutrient level of a lot meets the label declaration for that nutrient, according to statistical projection, the following criteria shall be met:

Class I. The nutrient content of the composite shall be at least equal to the value for that nutrient declared on the label.

Class II. The nutrient content of the composite shall equal at least 80 percent of the value for that nutrient declared on the label.

Although the greater variability of Class II nutrients requires a different statistical approach, the average nutrient content of the lot will nonetheless be the same as for a Class I nutrient.

The above minimum composite values, together with suitable measures of variation among individual units in a lot, are sufficient to describe the compliance limits statistically, and to protect both the consumer and the manufacturer. The degree of flexibility permitted for composites in the case of Class II nutrients reflects both the degree of fluctuation in nutrient levels and the present lack of sufficient detailed data on nutrient variability. As data are accumulated through experience with nutrition labeling, it is anticipated that a lesser degree of flexibility may be needed.

The effectiveness of this compliance approach stems from the following considerations. Lots with different average nutrient levels will yield composites with different nutrient values. However, even for lots with the same average nutrient level, different composite values will result. Some composite values will be less than, some equal to, and some greater than the average nutrient level in the lot depending on the nutrient contents of the individual containers composited. Therefore, the actual composite value obtained depends not only on the average lot nutrient level but also on the variation in nutrient contents among individual containers in the lot. In general, the higher the lot average the higher the composite value, and the less variation among individual containers the closer the composite values will be to the lot average. The flexibility noted above for Class II nutrients reflects this dependence on variability.

With these compliance procedures, the chance of a lot being considered acceptable depends not only on the average nutrient level of individual units in the lot but also on their variability with respect to the average. It is assumed that Class I nutrient levels in individual containers will vary in such a way that they will have a standard deviation no larger than 10 percent of the lot average, and that Class II nutrients will have a standard deviation no larger than 25 percent of the lot average. For these variability assumptions, the stated compliance procedures will assure maintenance of average nutrient levels in the lot at or slightly above the label values. At the same time, these compliance procedures will provide reasonable protection against appreciable numbers of individual containers having nutrient levels below the label values. At the assumed level of variability in nutrient levels, the above compliance procedures afford reasonable protection to both producer and consumer.

The above discussion presumes that excesses of nutrients over labeled amounts in accord with good manufacturing practices are acceptable. However, many consumers are particularly interested in the caloric or fat content of foods for purposes of control of caloric or fat intake. The compliance methods that apply to other nutrients are therefore also made applicable to labeled caloric or fat values, with the composite sample values being required to be no more than 20 percent above the value appearing in the label.

The compliance procedures cited have been statistically evaluated and judged to be adequate. Additional information in this regard may be obtained from the Food and Drug Administration statistical staff. Should additional information become available that justifies any change in these compliance provisions, the provisions will be amended.

Representative values. Some 22 companies and 21 trade associations felt that "representative" values based upon averages of surveys made over the years, rather than actual analytical values based on current testing of lots of the manufacturer's product, should be permitted as a basis for labeling for many foods. The consumer groups generally favored use of current analytical values.

The Commissioner is aware of current efforts of the U.S. Department of Agriculture and industry to provide data and programing for a nutrient-data bank. The Food and Drug Administration applauds these efforts and encourages the groups involved to submit for such a bank data which will provide valuable information for industry, consumers, and governmental agencies. At the present time, however, the data available from survey averages are incomplete, and thus unsuitable as a basis for labeling claims. Moreover, processes of various manufacturers differ enough that comprehensive data may never provide a single representative "industry average" for processed foods. The consumer has a right to expect that nutrition labeling will honestly represent the food in the package. It is therefore essential that "representative" data be checked at this time by analysis of sufficient individual lots to give assurance that the labeled value adequately represents the product offered, at least until accurate and complete data are available on an industry-wide, regional, and manufacturer basis.

V 38 - 13 JAN 19 73 XUM

Comprehensive data obtained over a period of time for an individual product will undoubtedly yield more information on nutrient variability, and thus provide greater certainty with fewer product analyses. Proper statistical sampling by a manufacturer can also reduce the number of analyses to provide the required level of certainty.

Raw agricultural commodities. Some trade associations state that raw agricultural commodities, and particularly fresh fruits and vegetables, cannot be accurately labeled from a nutritional standpoint. They emphasize the natural variation of nutrients in various types of produce due to climate, species, growing conditions, and other factors.

The Commissioner is aware that certain of the problems inherent in nutrition labeling are increased in fresh fruits and vegetables. The answer to these problems lies not in exempting these products from nutrition labeling or in permitting inaccurate labeling, but in obtaining the information necessary for complete and accurate nutrition labeling.

For the reasons already given above, "representative" data for these products from handbooks and literature references do not presently provide an adequate basis for labeling. It is essential to establish accurate and complete analytical values for each product, and perhaps for each variety in each region. There is a steady increase in valid nutrient composition data on raw and fresh foods from State departments of agriculture, industry, universities, and Federal laboratories. The Commissioner believes that promulgation of this regulation will encourage such research, since the data obtained will serve as the basis for the expansion of nutrition labeling for fresh produce.

Serving size. Eighteen consumer groups and some professionals recommended that the Food and Drug Administration establish standard serving sizes. Some 13 manufacturers and five trade associations also requested such standardization. Standardization of serving sizes for foods requires close coordination of consumer representatives and members of the particular industry involved. Use of an overly large serving gives an inflated idea of nutrient content, but reduces the number of servings per package. The advent of nutrition labeling thus provides additional incentive for proper standardization of serving sizes. The term "serving" means that reasonable quantity of food suited for or practicable of consumption as part of a meal by an adult male engaged in light physical activity. A label statement regarding a serving shall be in terms of a convenient unit of such food or a convenient unit of measure that can be easily identified as an average or usual serving and can be readily understood by purchasers of such food (e.g., a serving may be expressed in slices, cookies, or wafers; or in terms of ounces, fluid ounces, teaspoonfuls, tablespoonfuls, or cupfuls). A teaspoonful shall be considered to mean 5 milliliters (approximately ⅙ fluid oz.) in volume; a tablespoonful shall be considered to mean 15 milliliters (approximately ½ fluid oz.) in volume; and a cupful shall be considered to mean 240 milliliters (approximately 8 fluid oz.) in volume. Where there are no established reasonable standard serving sizes, the Commissioner intends to develop a procedure for establishing such reasonable standard serving sizes.

The Commissioner has therefore concluded, on the basis of currently available information, that nutrition labeling shall be based on the following general criteria:

1. Vitamins and minerals shall be expressed as a percentage of the U.S. Recommended Daily Allowances (U.S. RDA).

2. The nutrient content shall be related to a serving of the food expressed in common household terms or easily identifiable units.

3. The labeling shall indicate the caloric content and the amounts (in grams) of protein, carbohydrate, and fat in the product.

4. A complete listing of the seven commonly analyzed vitamins and minerals shall appear on the label of the product in a standard format, unless a food contains less than 2 percent of the U.S. RDA for each of four or more of the seven nutrients, in which case the manufacturer may choose to list only those nutrients present at 2 percent or more of the U.S. RDA with appropriate disclaimer for the nutrients not listed.

5. A listing of protein content shall appear on all products unless the product contains no substantial amount of protein. A method has been devised to protect the consumer against misrepresentation of low-quality proteins.

6. Nutrition information provided for by other regulations shall also appear in the same single panel on the label.

It is recognized that experience under this approach, as well as new information, may lead to desirable modifications. The Commissioner will review the regulation periodically, on his own initiative and at the request of others, and will propose and adopt whatever changes are shown to be in the public interest.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201, 403, 701(a), 52 Stat. 1040–1042 as amended, 1047, 1055; 21 U.S.C. 321, 343, 371(a)) and under authority delegated to him (21 CFR 2.120), the Commissioner hereby adds the following new section to Part 1 of title 21:

§ 1.17 Food; nutrition labeling.

(a) Nutrition information relating to food may be included on the label and in the labeling of a product: *Provided*, That it conforms to the requirements of this section. Except as provided in paragraph (h) of this section, inclusion of any added nutrient in a product or of any nutrition claim or information, other than sodium and/or cholesterol content, on a label or in advertising for a food subjects the label to the requirements of this section, and in labeling for a food subjects the label and that labeling to the requirements of this section except that the label of a food will not be subject to the requirements of this section solely because of a manufacturer's or distributor's direct written reply to an unsolicited request for information on cholesterol or fatty acid content of such a food. If vitamins and/or minerals are added to a food so that a single serving provides 50 percent or more of the U.S. Recommended Daily Allowance (U.S. RDA) for adults and children 4 years or more of age, as specified in § 125.1 of this chapter, of any one of the added vitamins and/or minerals, unless such addition is permitted or required in other regulations, e.g., a standard of identity or nutritional quality guideline, or is otherwise exempted by the Commissioner, the food shall conform to the standard of identity set forth in § 80.1 (21 CFR 80.1), but shall also conform to the labeling established in § 80.1, except that the labeling established in pargaraph (c) of this section, including the order for listing vitamins and minerals established in paragraph (c)(7)(iv), shall be used in lieu of the labeling established in 21 CFR 80.1(i)(1).

(b) All nutrient quantities (including vitamins, minerals, calories, protein, carbohydrate, and fat) shall be declared in relation to the average or usual serving. The term "serving" means that reasonable quantity of food suited for or practicable of consumption as part of a meal by an adult male engaged in light physical activity, or by an infant or child under 4 years of age when the article purports or is represented to be for consumption by an infant or child under 4 years of age. A label statement regarding a serving shall be in terms of a convenient unit of such food or a convenient unit of measure that can be easily identified as an average or usual serving and can be readily understood by purchasers of such food (e.g., a serving may be expressed in slices, cookies, or wafers; or in terms of ounces, fluid ounces, teaspoonfuls, tablespoonfuls, or cupfuls). A teaspoonful shall be considered to mean 5 milliliters (approximately ⅙ fluid oz.) in volume; a tablespoonful shall be considered to mean 15 milliliters (approximately ½ fluid oz.) in volume; and a cupful shall be considered to mean 240 milliliters approximately 8 fluid oz.) in volume. The weight of the serving may also be expressed in grams.

(c) The declaration of nutrition information on the label and in labeling shall contain the following information in the following order, using the headings specified, under the overall heading of "Nutrition Information":

(1) "Serving size": A statement of the serving size.

(2) "Servings per container": The number of servings per container.

(3) "Caloric content": A statement of the caloric content per serving, expressed to the nearest 10-calorie increment. Caloric content shall be determined by the Atwater method as described in A. L. Merrill and B. K. Watt, "Energy Value

of Foods—Basis and Derivation", USDA Handbook 74 (1955).[1]

(4) "Protein content": A statement of the number of grams of protein in a serving expressed to the nearest gram.

(5) "Carbohydrate content": A statement of the number of grams of carbohydrate in a serving, expressed to the nearest gram.

(6) "Fat content": A statement of the number of grams of fat in a serving, expressed to the nearest gram. Fatty acid composition, cholesterol content, and sodium content may also be declared in compliance with §§ 1.18 and 125.9 of this chapter.

(i) When fatty acid composition is declared, the information on fatty acids required by § 1.18 shall be placed on the label immediatly adjacent to the statement of fat content. The declaratory information statement required by § 1.18(e) shall be placed either immediately following the statement on fat and fatty acids or shall be appropriately referenced by symbol and placed immediately following the completed nutrition information statement.

(ii) When cholesterol content is declared, the information on cholesterol required by § 1.18(c) shall immediately follow the statement on fat content (and fatty acids, if stated). The declaratory information statement required by § 1.18(i) shall be placed either immediately following the statement on cholesterol or shall be appropriately referenced by symbol and placed immediately following the completed nutrition information statement.

(iii) When both fatty acid and cholesterol information are provided, the declaratory information statement may be combined as permitted by § 1.18(i).

(iv) When sodium is declared, the information on sodium required by § 125.9 of this chapter shall be placed on the label immediately following the statement on fat content (and fatty acid and/or cholesterol, if stated).

(7) "Percentage of U.S. Recommended Daily Allowances of protein, vitamins, and minerals": A statement of the amount per serving of the protein, vitamins, and minerals, as described in this subparagraph, expressed in percentage of the U.S. Recommended Daily Allowance (U.S. RDA).

(i) The percentages shall be expressed in 10 percent increments, except that 2 percent increments shall be used up to and including the 10 percent level, 5 percent increments above 10 percent and up to and including the 50 percent level, and 10 percent increments above the 50 percent level. Nutrients present in amounts less than 2 percent of the U.S. RDA may be indicated by a zero, or by an asterisk referring to another asterisk placed at the bottom of the table and followed by the statement "contains less than 2 percent of the U.S. RDA of this (these) nutrients (nutrients)." However, when a product contains less than 2 percent of the U.S. RDA for each of four or more of the seven nutrients specified in paragraph (c)(7)(iii) of this section, the manufacturer or distributor may choose to declare no more than three of those nutrients and none of the remainder listed in paragraph (c)(7)(iv) of this section. The statement "contains less than 2 percent of the U.S. RDA of _____", listing whichever of the seven nutrients are present at less than 2 percent of the U.S. RDA and have not been declared, shall directly follow the declared nutrients in the same type size. Any nurtient declared shall always appear in the order established in paragraph (c)(7)(iv) of this section.

(ii) The declaration of protein, which shall come first, shall be a statement of the amount per serving of protein, expressed as a percentage of the U.S. Recommended Daily Allowance (U.S. RDA).

(*a*) The U.S. RDA of the protein in a food product is 45 grams if the Protein Efficiency Ratio (PER) of the total protein in the product is equal to or greater than that of casein, and 65 grams if the PER of the total protein in the product is less than that of casein. The percentage of the U.S. RDA shall be declared as described in paragraph (c)(7)(i) of this section.

(*b*) Total protein with a PER less than 20 percent of the PER of casein may not be stated on the label in terms of percentage U.S. RDA, and the statement of protein content in grams per serving under paragraph (c)(4) of this section shall be modified by the statement "not a significant source of protein" immediately adjacent to the protein content statement regardless of the actual amount of protein present.

(iii) The declaration of vitamins and minerals, which shall follow the protein declaration, shall include vitamin A, vitamin C, thiamine, riboflavin, niacin, calcium, and iron, in that order, and may include any of the other vitamins and minerals listed in paragraph (c)(7)(iv) of this section in the order listed therein.

(iv) The following U.S. Recommended Daily Allowances (U.S. RDA) and nomenclature are established for these vitamins and minerals, essential in human nutrition:

Vitamin A, 5,000 International Units.
Vitamin C, 60 milligrams.[1]
Thiamine, 1.5 milligrams.[1]
Riboflavin, 1.7 milligrams.[1]
Niacin, 20 milligrams.
Calcium, 1.0 gram.
Iron, 18 milligrams.
Vitamin D, 400 International Units.
Vitamin E, 30 International Units.
Vitamin B_6, 2.0 milligrams.
Folic acid, 0.4 milligram.[1]
Vitamin B_{12}, 6 micrograms.
Phosphorus, 1.0 gram.
Iodine, 150 micrograms.
Magnesium, 400 milligrams.
Zinc, 15 milligrams.
Copper, 2 milligrams.
Biotin, 0.3 milligram.
Pantothenic acid, 10 milligrams.

These nutrients and levels have been derived by the Food and Drug Administration from the "Recommended Dietary Allowances," published by the Food and Nutrition Board, National Academy of Sciences-National Research Council, and are subject to amendment from time to time as more information on human nutrition becomes available.

(v) No claim may be made that a food is a significant source of a nutrient unless that nutrient is present in the food at a level equal to or in excess of 10 percent of the U.S. RDA in a serving. No claim may be made that a food is nutritionally superior to another food unless it contains at least 10 percent more of the U.S. RDA of the claimed nutrient per serving.

(d) Products with separately packaged ingredients or to which other ingredients are added by the user may be labeled as follows:

(1) If a product is comprised of two or more separately packaged ingredients enclosed in an outer container, nutrition labeling of the total product shall be located on the outer container to provide information for the consumer at the point of purchase. However, when two or more food products are simply combined together in such a manner that no outer container is used, or no outer label is available, each product shall have its own nutrition information statement, e.g., two boxes taped together or two cans combined in a clear plastic overwrap.

(2) If a food is commonly combined with another ingredient(s) before eating and directions for such combination are provided, a second column of figures may be used to provide a list of the nutrient contents for the final combination (e.g., a dry ready-to-eat cereal may be described with one set of percentage U.S. RDA values for the cereal as sold (per ounce), and another set for the cereal and milk as suggested in the label (per ounce of cereal and ½ cup of vitamin D fortified whole milk); and a cake mix may be labeled with one set of percentage U.S. RDA values for the dry mix (per serving), and another set for a serving of the final cake when prepared). The type and quantity of the other ingredient(s) to be added by the user to the product shall be specified.

(e) Compliance with this section shall be determined as follows:

(1) A collection of primary containers or units of the same size, type, and style produced under conditions as nearly uniform as possible, designated by a common container code or marking, constitutes a "lot".

(2) The sample for nutrient analysis shall consist of a composite of 12 subsamples (consumer units), taken one from each of 12 different randomly chosen shipping cases, to be representative of a lot. Composites shall be analyzed by Association of Official Analytical Chemists (A.O.A.C.) methods where

[1] Copies may be obtained from: Division of Nutrition (BF-124), Bureau of Foods, Food and Drug Administration, 200 C Street SW., Washington, DC 20204.

[1] The following synonyms may be added in parentheses immediately following the name of the vitamin:

Vitamin	*Synonym*
Vitamin C	Ascorbic acid.
Folic acid	Folacin.
Riboflavin	Vitamin B_2.
Thiamine	Vitamin B_1.

V 38 - 13 JAN 19 73 XUM

available, or, if no A.O.A.C method is available, by reliable and appropriate analytical procedures. Methods of analysis may be submitted to the Food and Drug Administration to determine their acceptability.

(3) Two classes of nutrients are defined for purposes of compliance:

Class I. Added nutrients in fortified or fabricated foods.
Class II. Naturally occurring (indigenous) nutrients.

If any ingredient which contains a naturally occurring (indigenous) nutrient is added to a food the total amount of such nutrient in the final food product is subject to Class II requirements unless the same nutrient is also added

(4) A food with a label declaration of a vitamin, mineral, or protein shall be deemed to be misbranded under section 403(a) of the act unless it meets the following requirements:

(i) *Class I vitamin, mineral, or protein.* The nutrient content of the composite is at least equal to the value for that nutrient declared on the label.

(ii) *Class II vitamin, mineral, or protein.* The nutrient content of the composite is at least equal to 80 percent of the value for that nutrient declared on the label.

(5) A food with a label declaration of calories, carbohydrate, or fat shall be deemed to be misbranded under section 403(a) of the act unless the nutrient content of the composite is no greater than 20 percent in excess of the value for that nutrient declared on the label.

(6) Reasonable excesses of a vitamin, mineral, or protein over labeled amounts are acceptable within good manufacturing practices. Reasonable deficiencies of calories or fat under labeled amounts are acceptable within good manufacturing practices.

(f) A statement may be included on the label or in labeling offering additional nutrition information upon written request to a specified address. Any additional labeling furnished to consumers or professionals shall comply with all applicable requirements of this chapter.

(g) The location of nutrition information on a label shall be in compliance with § 1.8d.

(h) The following foods are exempt from this section or are subject to special labeling requirements:

(1) Except where expressly covered by § 125.5 of this chapter, infant, baby, and junior-type foods marketed and promoted for children under 4 years of age shall be labeled in compliance with this section except that the term "serving" shall mean that reasonable quantity of food suited for or practicable of consumption by an infant or child under 4 years of age and that the U.S. RDA levels for infants and children under 4 years of age contained in § 125.1(b) shall be used in lieu of the U.S. RDA levels contained in paragraph (c)(7)(iv) of this section.

(2) Dietary supplements, the nutrients of which consist solely of vitamins and/or minerals, shall be labeled in compliance with §§ 80.1 and 125.3 of this chapter, except that the labeling of a dietary supplement in food form, e.g., a breakfast cereal, shall conform to the labeling established in paragraph (c) of this section, including the order for listing vitamins and minerals established in paragraph (c)(7)(iv) of this section, in lieu of the labeling established in § 80.1(i)(1).

(3) Any food represented for use as the sole item of the diet shall be labeled in compliance with Part 125 of this chapter.

(4) Foods represented for use solely under medical supervision in the dietary management of specific diseases and disorders shall be labeled in compliance with Part 125 of this chapter.

(5) Iodized salt shall be labeled in compliance with § 3.87 of this chapter.

(6) A nutrient(s) included in food solely for technological purposes may be declared solely in the ingredient statement, without complying with this section, if the nutrient(s) is otherwise not referred to on the label or in labeling or in advertising.

(7) A standardized food containing an added nutrient(s), e.g., enriched flour, and included in another food as a component may be declared in the ingredient statement by its standardized name, without compliance with this section, if neither the nutrient(s) nor the component is otherwise referred to on the label or in labeling or in advertising.

(i) A food labeled under the provisions of this section shall be deemed to be misbranded under sections 201(n) and 403(a) of the act if its labeling represents, suggests, or implies:

(1) That the food, because of the presence or absence of certain dietary properties, is adequate or effective in the prevention, cure, mitigation, or treatment of any disease or symptom.

(2) That a diet of ordinary foods cannot supply adequate amounts of nutrients.

(3) That the lack of optimum nutritive quality of a food, by reason of the soil on which that food was grown, is or may be responsible for an inadequacy or deficiency in the quality of the daily diet.

(4) That the storage, transportation, processing, or cooking of a food is or may be responsible for an inadequacy or deficiency in the quality of diets.

(5) That the food has dietary properties when such properties are of no significant value or need in human nutrition. Ingredients or products such as rutin, other bioflavonoids, para-aminobenzoic acid, inositol, and similar substances which have in the past been represented as having nutritional properties but which have not been shown to be essential in human nutrition may not be combined with vitamins and/or minerals, added to food labeled in accordance with this section, or otherwise used or represented in any way which states or implies nutritional benefit. Ingredients or products of this type may be marketed as individual products or mixtures thereof provided that the possibility of nutritional, dietary, or therapeutic value is not stated or implied (e.g., their labeling does not state that their usefulness in human nutrition has not been established and does not otherwise disclaim nutritional, dietary, or therapeutic value).

(6) That a natural vitamin in a food is superior to an added or synthetic vitamin, or to differentiate in any way between vitamins naturally present from those added.

Effective date. All labeling ordered after December 31, 1973, and all labeling used for products shipped in interstate commerce after December 31, 1974, shall comply with this regulation.

(Secs. 201, 403, 701(a), 52 Stat. 1040–1042 as amended, 1047, 1055; 21 U.S.C. 321, 343, 371(a))

Dated: January 12, 1973.

CHARLES C. EDWARDS,
Commissioner of Food and Drugs.

NOTE: Incorporation by reference provisions approved by the Director of the Federal Register, January 15, 1973.

[FR Doc.73-988 Filed 1-18-73;8:45 am]

PART 1—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT AND THE FAIR PACKAGING AND LABELING ACT

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

Labeling of Foods With Information on Cholesterol and Fat and Fatty Acid Composition

In the FEDERAL REGISTER of June 15, 1971 (36 FR 11521), the Commissioner of Food and Drugs proposed a series of three proposals relating to labeling of foods with information on cholesterol, fat, and fatty acid composition.

The first proposal concerned a proposed statement of policy on ingredient statements regarding fats and oils in food for human consumption. This proposal is still under consideration.

The second proposal was that there be an amendment to § 3.41 (21 CFR 3.41), the statement of policy on the status under the Federal Food, Drug, and Cosmetic Act of articles offered to the general public for the control or reduction of blood cholesterol levels and for the prevention and treatment of heart and artery disease. It was proposed that there be added to this statement of policy two new paragraphs (d) and (e) which would declare misleading under the act, any statement in the labeling which represents or suggests that the article contains less or no cholesterol and for any use of the terms "polyunsaturated," "monounsaturated," or "saturated" in relation to the fat content of foods except when expressly stated in accordance with 21 CFR 125.12 as proposed in the same issue of the FEDERAL REGISTER.

The third proposal was a new regulation (21 CFR 125.12) on the requirements for label statements relating to oils, fats, and fatty acids used as a means of regulating intake of fatty acids. This proposal established labeling requirements for foods represented for special dietary use containing 10 percent or more fat on a dry weight basis and no less than 3 grams of fat in an average serving.

Ninety days were originally provided for filing of comments on these proposals; this comment period was extended to November 12, 1971, by notices published in the FEDERAL REGISTER of September 9, 1971 (36 FR 18098).

The Commissioner received 502 letters commenting on one or more of the proposals that were published simultaneously on June 15, 1971 (36 FR 11521).

The Commissioner has carefully reviewed the comments concerning the labeling of cholesterol, fat, and fatty acids, and has concluded that these two issues should be considered in a uniform manner as both deal with the consumers' need to have informative labeling on foods which make up the usual diet of those individuals on modified diets on the advice of their physician. In the opinion of the Commissioner such labeling would markedly assist individuals in their attempts to adhere to a modified diet. Thus, the two proposals published as an amendment to 21 CFR 3.41 and as a proposed new section (21 CFR 125.12) have been combined into a single new regulation (21 CFR 1.18).

I. CHOLESTEROL LABELING

Many consumers expressed an interest in having cholesterol values given on all food labels. Individuals who asked that cholesterol values be allowed on food labels supported their view by saying they were on a low or moderate cholesterol diet on instruction of their physicians in an effort to reduce one of the risk factors, i.e., high blood cholesterol levels. They felt that unless foods are labeled with cholesterol content it would be difficult to follow their doctors' orders. Some respondents asserted that the Commissioner was making a less than objective appraisal of the current status or knowledge about the etiology of heart and artery disease by not changing paragraphs (a) and (b) of 21 CFR 3.41 which were factual in 1959 when the statements were made, but which do not now address the subject candidly.

Manufacturers and their spokesmen felt that labeling food with information about fatty acids as required under the proposed § 125.12 together with the application of the constraints of § 3.41 would prevent them from labeling general purpose foods with important composition information which, in the context of the scientific controversy over the etiology of heart and artery disease, may be important for some physicians, paramedical personnel, and patients. These respondents felt that cholesterol, food fat, and calorie composition information on food labels should not, by itself, constitute a representation that the food is for special dietary use.

Many respondents, viewing what they regarded as an apparent dichotomy between the recognition of the greater importance of fatty acid composition compared with the cholesterol composition of foods, felt that the Food and Drug Administration was not being objective and fair. They did not disagree with the position reflected in the proposed amendment to § 3.41 that in many instances it might be improper or frivolous to make label declarations of cholesterol content, but they argued that there does not appear to be a reasonable basis for prohibiting truthful label statements about cholesterol content while at the same time allowing the presence of label statements relating to fatty acid content.

The Commissioner has considered the question of cholesterol labeling of food in relation to the sources of cholesterol in the diet of Americans. The ordinary intake of cholesterol by adults in this country ranges from between 300 to 1,000 milligrams per day and is significantly affected by the cholesterol level of the particular foods chosen by the individual for his daily diet. The Commissioner believes that consumers who have been properly instructed by their physicians understand the physicians' requests that they curtail their intake of certain foods. All foods from vegetable sources and many fabricated foods which contain, as a minor ingredient, an item from a food with high cholesterol content, are not important contributors of cholesterol; however, this information itself may be useful label information for consumers if it is presented in a factual and nonmisleading manner.

The Commissioner recognizes that products can be specially manufactured or formulated to be in simulation of a food in one of the major cholesterol-contributing foods in such a way that these products contain either no cholesterol or significantly less cholesterol than their regular counterpart foods. The manufacturers of products of this kind believe that consumers will benefit from knowing the cholesterol content of these products. Consumers should not be misled, however, into believing that these products are equivalent to their regular counterpart foods in all important respects, especially nutritional, if they are not. The criterion, therefore, for labeling products of this kind should be that the product (analogue) be nutritionally equivalent to the food which it obviously simulates. When requested, the Food and Drug Administration will render opinions on the nutritional equivalency of new products as compared with conventional products. The Commissioner is publishing elsewhere in this issue of the FEDERAL REGISTER a proposed new § 1.8(e) governing the labeling of such substitute foods.

In light of all the available information, the Commissioner has concluded that new § 1.18 should include provisions regulating the labeling of cholesterol content. Labeling permitted by this new section may voluntarily be used by any manufacturer to show the cholesterol content of a food. The use of any claim or information concerning cholesterol on a label or in labeling or advertising for a food also subjects the label to the requirements of this section. The label statement shall provide the following information in the following order:

1. A statement of the serving size.

2. The number of milligrams of cholesterol per serving.

3. The number of milligrams of cholesterol per 100 grams of the food.

4. The statement "Information on cholesterol content is provided for individuals who, on the advice of a physician, wish to modify their total dietary intake of cholesterol."

This information on cholesterol content shall appear on the label in accordance with new § 1.8d, which is published elsewhere in this issue of the FEDERAL REGISTER. In order to avoid giving the information undue prominence, in no event may it appear on the labeling in more than the minimum type size required for the declaration of net quantity of contents by § 1.8b of this chapter.

If the food is labeled in compliance with § 1.17 (nutrition labeling), which is also published elsewhere in this issue of the FEDERAL REGISTER, and the manufacturer chooses to include the cholesterol content, the above information shall be included as provided in § 1.17(c)(6)(ii), except that the serving size need not be repeated. Section 1.17(a) specifically provides, however, that inclusion only of cholesterol content on a food label does not require full nutrition labeling in compliance with § 1.17.

II. FAT AND FATTY ACID LABELING

In relation to the proposal on the labeling of foods for fat and fatty acid, 229 comments were received from a number of sources. Consumers as a whole favored the proposal. Comments from the scientific community, trade associations, and manufacturers expressed reservations about specific portions of the proposal but indicated that these groups would accept a revised regulation that was reasonable and enforceable.

A suggested alternative to the proposed § 125.12 would move the requirements of the proposed §§ 125.12 to 3.41 (21 U.S.C. 3.41) by revising the proposed § 3.41(e). Under this alternative the label statements would not constitute representations for special dietary use, but would provide labeling in a meaningful and uniform way on fat and fatty acid composition regardless whether the product's composition is fixed by nature or formulated by the food technologist. There were a number of other comments, some in opposition to the proposal and others containing proposed alternative action of several types:

1. Leave label declaration as it is presently constituted.

2. Survey the U.S. population to see what the consumer really wants on a label.

3. Require a label disclaimer statement which would tell the consumer that the information on fat content does not represent the product for treatment or prevention of disease.

4. Liberalize criteria for labeling by lowering minimum values for amount of fat in foods.

5. State more clearly the definitions for polyunsaturated and saturated fatty acids, and for special dietary food.

V 38 I 13 J AN 19 73 XUM

6. Make provision for including the monosaturated fatty acid values on the label.

7. State clearly the conditions which influence whether the application of the section is optional or mandatory.

8. Withdraw proposal § 125.12.

9. Proposed regulation does not delineate the criteria for determining whether a fat is for special dietary use or for general use.

10. List any polyunsaturate not as the glyceryl ester but as P/S (polyunsaturated to saturated) ratio, e.g., P/S ratio of 2.5 or more.

11. Change term "glyceryl ester" to "glyceryl triester."

12. Provide for including the percentage of trans-fatty acid value on the label.

13. Make the regulation mandatory for all foods containing fats.

14. Establish the range of variation to be allowed in fatty acid composition information.

15. "Average serving" should be defined.

16. Canadian Food and Drug Directorate FA–59 method for cis-methylene-interrupted fatty acids is not reliable.

Each of these have been considered, and where applicable changes or modifications have been made in the proposal. They are included in the following discussion. However, in regard to the comments suggesting delay in action, the Commissioner is of the opinion that further delay on providing consumers with information on the fat and fatty acid content of foods would serve no purpose, and accordingly new § 1.18 provides for such labeling.

Some comments indicated that the correspondents wanted the provisions of the proposed section to be voluntary; others argued for mandatory labeling requirements. Some questions of clarity of language regarding voluntary use were asked. The use of labeling as provided by the final regulation shall be on a voluntary basis for all foods, and will be mandatory if claims are made with respect to fatty acid composition but not if claims are made with respect to general fat content. There are many general purpose foods that could be used for dietary regulation of fat and/or fatty acid intake, and there is no reason why the option to label these foods should not be exercised by a manufacturer, as long as he complies with the labeling requirements contained in new § 1.18 and does not make medical claims.

New § 1.17 (nutrition labeling) and new § 1.18 (fat and fatty acid labeling) are closely related. Section 1.17(c)(6) provides that nutrition labeling shall include the number of grams of fat per serving of a food. Any claim or information with respect to any nutrient covered by § 1.17, e.g., protein, fat, calories, vitamins, automatically requires full nutrition labeling under § 1.17. Thus, any claim or information relating to the fat content, e.g., the percentage of fat in the product, automatically makes § 1.17 applicable.

New § 1.18 (fat and fatty acid labeling) is far more narrow, and is applicable only when a claim or information is included on the label or in labeling or advertising specifically related to the fatty acid composition of a food. Thus, information about fat content does not make § 1.18 applicable unless that information includes a reference to fatty acid composition. When § 1.18 is applicable, on the other hand, the information required under its provisions with respect to fat and fatty acids automatically also makes § 1.17 applicable. Section 1.17(c)(6)(i) specifically provides for the inclusion of the labeling required by § 1.18 in the standard nutrition labeling format. In short, § 1.17 does not require labeling under § 1.18, but § 1.18 labeling automatically requires labeling under § 1.17 and must be included within the § 1.17 format.

While comments were received suggesting that the polyunsaturated fatty acid to saturated fatty acid ratio (P/S) be included on the label, the majority of comments stressed the current interest in actual amounts of fatty acids in the diet. For those desiring to determine the P/S ratio, the information required to be furnished by the regulation will be sufficient to enable the consumer to calculate it by dividing the amount in grams of polyunsaturated fatty acid by the amount in grams of saturated fatty acids.

Adverse comments were submitted relating to the proposed limiting of fatty acid labeling to foods containing a minimum of 10 percent total fat on a dry-matter basis and of 3 grams total fat per serving. A majority of comments were concerned with the 10-percent figure on a dry weight basis. Suggestions were made to change this to another value; some believed that it should be less than 3 percent, and others believed it should be more than 10 percent. Based upon an analysis of the foods which contribute fat to the diet, the Commissioner concludes that it is reasonable to limit fatty acid labeling to foods containing a minimum of 10 percent total fat on a dry matter basis. This will prevent manufacturers from placing fatty acid information on products which are insignificant sources of fatty acid in the diet.

One respondent suggested that the fat-per-serving figure should be lowered from 3 to 2 grams because the larger figure would exclude some foods such as coffee whiteners used in the daily diet of some individuals which affects their total fat intake. This change is reflected in the final order.

Considerable industrial and trade organization concern over the fatty acid categories or groups that should appear on the label was evident from the wide variety of comments and suggestions received. Several possible combinations of fatty acid categories or groups for label purposes emerged from the comments; these are:

1. Polyunsaturated fatty acids, monounsaturated fatty acids, saturated fatty acids (C–1 through C–22).

2. *Cis*-polyunsaturated fatty acids, *trans*-unsaturated fatty acids, monounsaturated fatty acids, saturated fatty acids (C–1 through C–22).

3. *Cis*-polyunsaturated fatty acids, *trans*-unsaturated fatty acids, conjugated polyunsaturated fatty acids, monounsaturated fatty acids, saturated fatty acids (C–1 through C–22).

4. Polyunsaturated fatty acids, monounsaturated fatty acids, saturated fatty acids (C–14 through C–22).

5. (Same as Categories 1 to 4 above except that saturated fatty acids would encompass C–12 through C–18).

6. *Cis*-polyunsaturated fatty acids, saturated fatty acids (C–12 through C–18), other fatty acids (total amount of fatty acids minus sum of amounts in first two categories).

All those who expressed an opinion concerning this matter felt that it would be informative to include the amount of polyunsaturated fatty acids present to be declared as one category. The other categories to be declared was the point of controversy.

In the comments received, reference was made to scientific reports which suggest that any fatty acid category may contain a quality or factor which tends to elevate blood cholesterol levels in controlled experiments. However, the most widely accepted opinion at this time is that long-chain saturated fatty acids and polyunsaturated fatty acids may have some relationship to changes in serum cholesterol levels. Most saturated fatty acids in conventional foods are long-chain fatty acids; they contain 12 carbons or more. Saturated fatty acids containing eight and 10 carbons (referred to as medium-chain fatty acids) and those containing four and seven carbons (referred to as short-chain fatty acids) are absorbed and utilized in a much different manner than are long-chain fatty acids. Their metabolic effects on plasma lipids and cholesterol appear to be different than those of the long-chain saturated fatty acids.

Since the label statements should be both suitably informative and simple to understand, approximately three categories is the limit that can be expected to be tolerated by consumers and industry alike. The classification outlined below will provide adequate useful information for persons on a fat-modified diet. In view of the fact that most people expect the sum of percentage values in a complete statement of total fatty acid content to be 100, it is appropriate to subtract from 100 the sum of the percentages of polyunsaturated and saturated fatty acids; the remainder being the third category "other fatty acids."

For the purpose of labeling, therefore, saturated fatty acids containing less than 12 carbons will not be considered in the category of "saturated fatty acids", but shall be included in the category "other fatty acids". Based on practicality, ability to carry out rapid analysis, and consequently the ability to enforce for regulation, the long-chain saturated fatty acid range of C–12 through C–18 (lauric, myristic, palmitic, and stearic acids) have been defined as "saturated fatty acids."

Several comments suggested that the *trans*-unsaturated fatty acids present in hydrogenated fats, and conjugated polyunsaturated fatty acids should be listed

on the labels. *Trans*-unsaturated fatty acids generally constitute a small portion of the total fatty acids in marketed fats and oils. This situation is similar to that of the conjugated polyunsaturated fatty acids, although very little information on the content of these two fatty acid subgroups in foods is available. Some fat and oil manufacturers do make periodic checks on the content of these subgroups in their products, but to require such monitoring by industry and government is unreasonable at this time. If new evidence suggests that it is necessary to require label information on either one or both of these subgroups, the appropriate section(s) of the regulations will be amended.

The original proposal on fatty acid labeling required the quantities of fatty acids to be listed as a percentage of the total fat content. Comments were received from nutritionists who advise patients on modifying their diet suggesting that the actual quantity in terms of grams of fat and fatty acids is more useful than percentages as this nomenclature is used in advising patients on the modification of fat and fatty acid content of their diet. Since the purpose of the fatty acid labeling is to assist those individuals seeking to modify the fat and fatty acid content of their diet and those professionals seeking to help these individuals, it is reasonable to provide the fatty acid information in grams per serving.

The Commissioner has concluded that claims or information about fatty acid content should require inclusion on the label of the following fat and fatty acid information in addition to full nutrition labeling.

1. The amounts of fatty acids expressed in grams calculated as triglycerides, in the following three categories with the headings as listed, and in the following order:

(i) *cis, cis*-methylene-interrupted polyunsaturated fatty acids, stated as "Polyunsaturated fatty acids";

(ii) The sum of lauric, myristic, palmitic, and stearic acids, stated as "Saturated fatty acids"; and

(iii) The difference, stated as "Other fatty acids", between the total amount of fatty acids and the sum of fatty acids in (i) and (ii).

2. The total fat content in terms of the percent of the total calories provided by fat with the heading, Percent of calories from fat.

Several comments were received concerning the analytical methods and compliance procedures to be used in regulating products with fat and fatty acid, and/or cholesterol labeling. The Commissioner is aware that there is natural variation in the fat and cholesterol content of food products. In developing a labeling system it is therefore important that the manufacturer be permitted a tolerance so that he may provide useful information on the label without incurring excessive control costs, which will result in a significant price increase to the consumer. However, consumers have a right to expect that labeling honestly represents the products they buy.

Section 1.17, governing nutrition labeling, contains a detailed statistically valid compliance mechanism. Basically the same compliance provisions are included in this regulation for determining cholesterol, fat, and fatty acids as are included in new § 1.17 for determining fat. For the purposes of compliance a food with a label declaration of cholesterol content shall be deemed to be misbranded under section 403(a) of the Act if the content of a 12-sample composite is greater than 20 percent in excess of the value for the cholesterol content declared on the label. A food with a label declaration of fatty acids content shall be deemed to be misbranded under section 403(a) of the Act if the composite is greater than 20 percent in excess of the value or less than 80 percent of the value for the fatty acids declared on the label.

Comments on methods for analysis asked that the specific methods to be used for compliance be identified. The methods for fat, fatty acids, and cholesterol will be those of the Association of Official Analytical Chemists (AOAC), or other reliable and appropriate methods. Methods of analysis may be submitted to the Food and Drug Administration to determine their acceptability. The determination of *cis, cis*-methylene-interrupted polyunsaturated fatty acids of fats, and oils will be carried out by the Canadian Food and Drug Directorate FA–59 method entitled "Enzymatic Determination of Polyunsaturated Fatty" published during December 1967 as modified by the Division of Nutrition, Food and Drug Administration. The FA–59 method is a modification of the MacGee method (Analytical Chemistry 31, 298 [1959]).

The problem of defining the serving size was raised. Each manufacturer should define the serving size appropriate for his specific product and state the serving size on the label. Where there are no established reasonable standard serving sizes, or if there is an unreasonable variance among manufacturers, the Commissioner intends to develop a procedure for establishing such reasonable standard serving sizes.

For the purposes of this regulation, the same basic definitions shall apply as in §§ 1.17 and 125.1. An average serving shall be expressed in terms of a convenient unit of measure that can be readily understood and utilized by purchasers of such food. For example, a serving may be expressed in terms of slices, cookies, wafers, ounces, fluid ounces, teaspoonfuls, tablespoonfuls, or cupfuls. A teaspoonful shall be considered to mean 5 milliliters (approximately ⅙ fluid ounce) in volume; a tablespoonful shall be considered to mean 15 milliliters (approximately ½ fluid ounce) in volume; and a cupful shall be considered to mean 240 milliliters (approximately 8 fluid ounces) in volume.

It was pointed out in many comments that it would be in the best interest of consumers to have a declaratory statement that would appear in the labeling of products to accompany the information permitted in this section. Such statement would state to the purchaser that the product may be useful to those persons who are advised by a physician to modify their fat intake as part of a total dietary plan. There may be no statement or implication, however, that the product per se will be sufficient to modify fat intake, or will help to prevent coronary heart disease or its adjunctive conditions. This is reasonable in light of the fact that the Food and Drug Administration is neither recommending any dietary regimens nor taking a position in the dietary fat/coronary heart disease controversy. The regulation is being issued in response to public and medical requests that such information be placed on food product labels. The regulation is designed simply to provide fat and fatty acid label information that will be useful to consumers, physicians, dietitians, and other health professionals who are involved directly or indirectly in regulating an individual's dietary intake of total fat and/or fatty acids. Thus, the statement "Information on fat content is provided for individuals who, on the advice of a physician, are modifying their total dietary intake of fat" would immediately follow the required statements on fat and fatty acid content, as required in 21 CFR 1.17.

There was an oversight in the published proposal, in that it lacked any reference to the kind of information which must appear in product literature sent by the manufacturer on request of a consumer. Such material is labeling. In some cases, it is possible that a manufacturer may not have a product labeled with fat and fatty acid information, but will provide information about the product in labeling if the customer writes the company. A declaration of cholesterol or fatty acid content on the label or in advertising of a food subjects the label to the requirements of this section. A declaration of cholesterol or fatty acid content in labeling of a food subjects the label and that labeling to the requirements of this section except that the label of a food will not be subject to the requirements of this section solely because of a manufacturer's or distributor's direct written reply to an unsolicited request for information on cholesterol or fatty acid content of such food.

The cholesterol and fat and fatty acid labeling as set forth below incorporates the more useful principles presented in the comments received on the published proposal. The Commissioner has concluded in relation to the labeling of the cholesterol, fat, and fatty acid content of foods that:

1. A restatement of the policy regarding labeling of foods possibly of value in diets for the control of fatty acid and cholesterol consumption is appropriate.

2. Information associated with the cholesterol, fat, and fatty acid composition of foods should be combined in a single regulation as set forth below.

3. It is necessary to call consumers' attention, by means of a label statement, to the fact that information being

V 38 - 13 JAN 19 73 XUM

permitted by promulgation of this regulation should be used with the understanding that it is useful only when the total dietary intake of fat and/or cholesterol is being controlled and then only when this is done on the initial and continuing advice of a physician familiar with the patient's condition.

4. The cholesterol content should be allowed to be stated on the label of any food in succinct terms.

5. The fatty acid content should be allowed to be stated on the label of foods with at least 10 percent total fat on a dry weight basis and/or containing at least 2 grams of fat in a serving. When the manufacturer voluntarily elects to provide information under § 1.18 it is reasonable to require complete nutrition information as provided for in § 1.17 and in the format required by § 1.17(c)(6)(i).

6. When a manufacturer elects to declare cholesterol content it is reasonable not to require complete nutrition labeling. When a manufacturer elects to provide chlosterol and nutrition labeling on a product it is reasonable that the labeling be in compliance with 21 CFR 1.17(c)(6)(ii).

7. Statements of cholesterol and fat content, both by themselves and when accompanied by an informational statement indicated in conclusion 3 above, are not misleading; however, direct claims that a product will prevent, mitigate, or cure atherosclerotic cardiovascular disease or any attendant condition are false and misleading.

Accordingly, having considered the comments received and other relevant information, and after further study on the impact of his proposal on current medical practice, the Commissioner concludes that a new § 1.18 *Labeling of foods in relation to fat and fatty acid, and cholesterol content* should be established, combining the provisions of the existing and proposed § 3.41 and the proposed § 125.12 (36 FR 11521), to provide for more informative labeling of foods containing cholesterol and fat and fatty acids.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201, 403, 701(a), 52 Stat. 1047–1048 as amended, 1055; 21 U.S.C. 321, 343, 371(a)) and under authority delegated to the Commissioner (21 CFR 2.120), Parts 1 and 3 are amended as follows:

1. In Part 1 a new § 1.18 is added to read as follows:

§ 1.18 Labeling of foods in relation to fat and fatty acid, and cholesterol content.

(a) Implicit or explicit claims for the value of food in preventing or treating heart or artery disease can be misleading to consumers. However, a significant segment of the medical community is recommending that individuals modify their total diet by eliminating certain foods or by replacing certain foods with others in order to effect changes in the levels of blood components. Although there have been no definitive studies which have demonstrated beyond doubt that extensive changes in the consumption of fat and cholesterol by the general public are desirable, it is nevertheless appropriate to provide for informative labeling which will help individuals to identify foods for inclusion in fat-modified diets recommended by physicans. It is also appropriate to prohibit label statements which misrepresent specific foods as being, of themselves, of value in the control of the levels of these blood components or in the control of heart or artery disease.

(b) A label statement regarding a serving shall be expressed in terms of a convenient unit of measure that can be readily understood and utilized by purchasers of such food. For example, a serving may be expressed in terms of slices, cookies, wafers, ounces, fluid ounces, teaspoonfuls, tablespoonfuls, or cupfuls. A teaspoonful shall be considered to mean 5 milliliters (approximately one-sixth fluid ounce) in volume; a tablespoonful shall be considered to mean 15 milliliters (approximately one-half fluid ounce) in volume, and a cupful shall be considered to mean 240 milliliters (approximately 8 fluid ounces) in volume.

(c) A food label or labeling may include a statement of the cholesterol content of the food, provided that it is stated both in terms of the number of milligrams per serving and in terms of the number of milligrams per 100 grams of the food. This listing shall follow a statement of the serving size, which shall be determined in accordance with § 1.17 and shall appear as provided in § 1.8d, but in no case in a type size larger than the minimum type size required for the declaration of net quantity of contents by § 1.8b of this chapter. No other statement may be made relating to cholesterol. When the cholesterol content is stated on the label of a food which is also labeled in accordance with § 1.17, the statement of the cholesterol content shall conform to the requirements of § 1.17(c)(6)(ii).

(d) A food label or labeling may include information on the fatty acid content of the food: *Provided*, That it meets the following conditions.

(1) The food contains 10 percent or more fat on a dry weight basis and not less than 2 grams of fat in an average serving. Any food containing less than 10 percent total fat on a dry weight basis and/or containing less than 2 grams of fat in a serving is not suitable for use by man as a means of regulating the intake of fatty acids.

(2) The food is labeled in compliance with § 1.17 and the following information is included in the folowing order in accordance with § 1.17(c)(6)(ii).

(i) The amounts of fatty acids, calculated as the triglycerides, shall be stated in grams per serving in the following three categories, stated with the following headings, in the following order, and displayed in equal prominence:

(*a*) *cis, cis* - methylene - interrupted polyunsaturated fatty acids, stated as 'Polyunsaturated fatty acids";

(*b*) The sum of lauric, myristic, palmitic, and steric acids, stated as "Saturated fatty acids"; and

(*c*) The difference, stated as other" fatty acids," between the total amount of fatty acids and the sum of fatty acids in paragraph (d)(1)(i) (*a*) and (*b*) of this section.

(ii) The total fat content in terms of the percentage of the total calories in the food, provided by fat with the heading "Percent of calories from fat:".

(iii) The statement required by paragraph (e) of this section.

(iv) No other statement may be made relating to fatty acid content.

(e) A food labeled in accordance with paragraph (c) or (d) of this section shall display the folowing statement on the label: "Information on fat (and/or cholesterol, where appropriate) content is provided for individuals who, on the advice of a physician, are modifying their total dietary intake of fat (and/or cholesterol, where appropriate.)" If the food is not labeled in accordance with § 1.17 and is labeled only in accordance with paragraph (c) of this section, the statement shall appear in the same label panel and in proximity to the statements prescribed in paragraph (c) of this section and in the same type size. In the event the cholesterol content is included under nutritional labeling, the statement shall be in compliance with § 1.17(c)(6)(ii).

(f) A declaration of cholesterol or fatty acid content on the label or in advertising of a food subjects the label to the requirements of this section. A declaration of cholesterol or fatty acid content in the labeling of a food subjects the label and that labeling to the requirements of this section except that the label of a food will not be subject to the requirements of this section solely because of a manufacturer's or distributor's direct written reply to an unsolicited request for information on cholesterol or fatty acid content of such food.

(g) Compliance with this section shall be determined as follows:

(1) A collection of primary containers or units of the same size, type, and style produced under conditions as nearly uniform as possible, designated by a common container code or marking constitutes a "lot."

(2) The sample for analysis shall consist of a composite of 12 subsamples (consumer units), taken one from each of 12 different randomly chosen shipping cases, to be representative of a lot.

(3) Composites shall be analyzed for fat and saturated fatty acids by the methods of the Association of Official Analytical Chemists (AOAC). The methods for fat, fatty acids, and cholesterol will be those of the Association of Official Analytical Chemists (AOAC), or other reliable and appropriate methods. Alternative methods of analysis may be submitted to the Food and Drug Administration to determine their acceptability. The determination of cis, cis-methylene-interrupted polyunsaturated fatty acids will be the Canadian Food and Drug Directorate Method FA–59[1] for cis-methylene-interrupted fatty acid.

(4) A food with a label declaration of cholesterol content shall be deemed to be misbranded under section 403(a) of the Act if the content of the composite is greater than 20 percent in excess of the value for the cholesterol content declared on the label.

(5) A food with a label declaration of fat content shall be deemed to be misbranded under section 403(a) of the Act if the content of the composite is greater than 20 percent in excess of the value for the fat content declared on the label.

(6) A food with a label declaration of fatty acid content shall be deemed to be misbranded under section 403(a) of the Act if the content of the composite is greater than 20 percent in excess of the value, or less than 80 percent of the value, for the fatty acid content declared on the label.

(h) Label statements made in accordance with paragraphs (c), (d), or (e) of this section shall comply with the requirements of § 1.8d, but in no case may it be printed in larger than the minimum size type required for the declaration of net quantity of contents by § 1.8b.

(i) No label or labeling may contain a claim indicating, suggesting, or implying that the product will prevent, mitigate, or cure heart or artery disease or any attendant condition.

(j) Any label or labeling containing a statement on cholesterol and fatty acid content not in conformity with this section shall be deemed to be misbranded under sections 201(n) and 403(a) of the Act.

§ 3.41 [Revoked]

2. In Part 3 existing § 3.41 is hereby revoked.

Effective date. All labeling ordered after December 31, 1973, and all labeling used for products shipped in interstate commerce after December 31, 1974, shall comply with this regulation.

(Secs. 201, 403, 701(a), 52 Stat. 1047–1048, as amended, 1055; 21 U.S.C. 321, 343, 371(a))

Dated: January 12, 1973.

CHARLES C. EDWARDS,
Commissioner of Food and Drugs.

[1] Copies of the method may be obtained by writing to Division of Nutrition BF–124, Bureau of Foods, Food and Drug Administration, 200 C Street SW., Washington, DC 20204.

NOTE: Incorporation by reference provisions approved by the Director of the Federal Register, January 15, 1973.

[FR Doc.73–969 Filed 1–18–73;8:45 am]

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

Label Designation of Ingredients for Standardized Foods

A statement of policy, § 3.88 *Label designation of ingredients for standardized foods*, was published in the FEDERAL REGISTER of March 10, 1972 (37 FR 5120). On the basis of questions raised regarding the exemption granted by § 3.88(d), the Commissioner of Food and Drugs has concluded that the exemption should be clarified so that the intent of the regulation, to provide more informative labeling for the consumer, can be achieved with a minimum of confusion and misunderstanding.

In many food standards the name of the principal mandatory ingredient appears in the name of the food, e.g., peaches. Where the standard also provides an option to the variety and form of the unit, e.g., yellow clingstone, yellow freestone—unpeeled whole, peeled slices, a statement designating the optional variety and optional form of the unit used is required to appear in close proximity to the name of the food, e.g., whole yellow cling peaches, sliced yellow freestone peaches. It was not the intention of the Commissioner in promulgating § 3.88(d) to change the requirement that statements that significantly qualify or explain the name of the principal mandatory ingredient should appear prominently and conspicuously in close proximity to the name of the food.

In addition, where certain optional ingredients are used, such as the packing media of canned fruits and canned tuna, smoke flavoring in the case of cheese, or hot dried red peppers in the case of canned corn, statements informing consumers of such use should continue to be placed conspicuously on the principal display panel to facilitate the consumer's choice between the same food containing or not containing such ingredients.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 701(a), 52 Stat. 1055; 21 U.S.C. 371(a)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120), § 3.88 is revised to read as follows:

§ 3.88 Label designation of ingredients for standardized foods.

(a) There is significant consumer interest that the labels of standardized foods bear complete information of the ingredients contained in the food. In the absence of legal authority to require that the label bear such information, the Food and Drug Administration encourages all manufacturers, packers, and distributors to voluntarily make such disclosure.

(b) The Food and Drug Administration intends to amend the definitions and standards of identity of food by setting into motion as rapidly as possible the provisions of section 401 of the act to require label declaration of all optional ingredients with the exception of optional spices, flavorings, and colorings which may continue to be designated as such without specific ingredient declaration.

(c) Statutory authority does not exist to require the declaration of mandatory ingredients on the label of standardized foods.

(d) The requirement (set forth in some of the definitions and standards of identity for food) that designated optional ingredients such as spices, flavorings, colorings, emulsifiers, flavor enhancers, stabilizers, preservatives, and sweeteners be declared in a specified manner on the label wherever the name of the standardized food appears on the label so conspicuously as to be easily seen under customary conditions of purchase shall not apply to any manufacturer, packer, or distributor of a standardized food who voluntarily labels such food in the manner indicated by section 403(i) of the act (21 U.S.C. 343(i)), and the regulations promulgated thereunder, and who otherwise complies with such definition and standard. Words and statements that significantly differentiate between several foods complying with the same standard by describing the optional forms or varieties, the packing medium, and significant characterizing ingredients present in the food, shall continue to be declared in the manner as required by the particular standard.

Since this amendment is for the purpose of clarifying an already existing regulation notice and public procedure are not necessary prerequisites to the promulgation of this order.

Effective date. This order shall be effective on January 19, 1973.

(Sec. 701(a); 52 Stat. 1055; 21 U.S.C. 371(a))

Dated: January 12, 1973.

CHARLES C. EDWARDS,
Commissioner of Food and Drugs.

V 38 - 13 JAN 19 73 XUM

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 1]

IMITATION FOODS

Application of Term "Imitation"

Section 403(c) of the Federal Food, Drug, and Cosmetic Act provides that a food shall be deemed to be misbranded "If it is an imitation of another food, unless its label bears, in type of uniform size and prominence, the word 'imitation' and, immediately thereafter, the name of the food imitated."

When section 403(c) of the act was adopted in 1938, Congress was seeking to protect the consumer from uninformed purchase of an inferior substitute product, which could be mistaken for a traditional food product.

The courts have long recognized that the term "imitation" suggests an inferior product. In 62 Cases * * * Jam v. United States, 340 U.S. 593, 600 (1951), the U.S. Supreme Court observed that the term "imitation" as applied to jam connotes "a different, an inferior preserve * * *" In United States v. 651 Cases * * * Chocolate Chil-Zert, 114 F. Supp. 430, 432 (N.D.N.Y. 1953), the court stated "[T]he word [imitation] connotes inferiority * * * in the sense that it is cheapened by the substitution of ingredients."

Vast strides in food technology have taken place since section 403(c) of the act was enacted, and there are now on the market many new wholesome and nutritious food products, some of which resemble and are substitutes for other, traditional foods. Significantly, it is no longer the case that such products are necessarily inferior to the traditional foods for which they may be substituted.

There has been some uncertainty as to the proper scope of the term "imitation" in this modern context. The term clearly fails to inform the public of the actual characteristics and properties of a new food product. In its "Report to the President," the White House Conference on Food, Nutrition, and Health held in November and December 1969 recommended that "[o]versimplified and inaccurate terms as 'imitation' should be abandoned as uninformative to the public."

To apply automatically the term "imitation" to new substitute food products which are not nutritionally inferior would be a disservice to consumers and would be contrary to the common understanding that the word "imitation" connotes inferiority. Section 403(c) of the act would then present a serious obstacle to the development and marketing of modified products with improved nutritional content. Indeed, because of the traditional connotation of inferiority, application of the term "imitation" to a substitute food product which is not inferior could be misleading to the consumer, in violation of section 403(a) of the act.

Accordingly, the Commissioner of Food and Drugs has concluded that it is in the interest of consumers and consistent with the general intent of Congress to restrict required application of the term "imitation" to a substitute food which is nutritionally inferior to the food for which it is a substitute.

The consumer, however, must be protected from unwitting purchase of a product which is different, although not inferior, from what he may reasonably expect. The Commissioner concurs with the further recommendation of the White House Conference that the "name of a food should accurately describe, in as simple and direct terms as possible, the basic nature of the food or its characterizing properties or ingredients." Accordingly, in order to avoid "imitation" status, a substitute food product which is not nutritionally inferior must also bear a label which clearly states the common or usual name of the product and which is not false or misleading.

The Commissioner has paid particular attention to the definition of "nutritional inferiority". Section 1.17, nutrition labeling, which is published in this issue of the FEDERAL REGISTER provides that a difference of less than 10 percent of the U.S. Recommended Daily Allowance (U.S. RDA) of any vitamin, mineral, or protein is not properly regarded as significant. Accordingly, nutritional inferiority is defined as a reduction in the content of an essential vitamin or mineral or of protein that amounts to 10 percent or more of the U.S. RDA. Any lesser difference is regarded as nutritional equivalence, even though small differences may exist.

The Commissioner has also concluded that, since a reduction in fat content or caloric content may well be desirable, such a reduction should not be regarded as nutritional inferiority as long as the product is labeled pursuant to the provisions of § 1.17, and any labeling with respect to a reduction in caloric content complies with the regulations applicable to caloric content in Part 125. The proper declaration of a reduction in caloric content was included as part of the revision of Part 125 and the resulting 1968–1970 Special Dietary Food Hearings. The Commissioner anticipates that a tentative order on that aspect of the hearings will be issued in the near future. When effective, those regulations will be appropriately referenced in this regulation.

Finally, the Commissioner recognizes that it is impossible to set out in general language in any regulation the precise parameters of nutritional inferiority. Accordingly, it must be recognized that the criteria for nutritional inferiority proposed in this regulation are not all-inclusive, and that the Commissioner reserves the right to make a determination of nutritional inferiority on an ad hoc basis, depending upon the facts of the specific situation. Any such determination falling outside the general proposed criteria in this regulation will be made in writing and sent to the manufacturer or distributor of the food, and an opportunity will be given for changes in the labeling and/or formulation before regulatory action is undertaken.

The Commissioner has considered whether there may be basis for imitation labeling other than nutritional inferiority. In reviewing this matter, it appears that nutritional inferiority is the only type of inferiority that is quantifiable on an objective basis. All other potential aspects of inferiority involve essentially subjective judgment which may vary from person to person. Some individuals may prefer a new food to a traditional food, whereas others may prefer the traditional food. The Commissioner has concluded that it is not the function of the Food and Drug Administration to attempt to arbitrate between the likes and dislikes of different individuals or between the different economic considerations that motivate different producers of agricultural commodities or different manufacturers and distributors of foods. The function of the Food and Drug Administration is solely to assure the safety of all foods and to prevent misleading labeling. This new regulation, which cross-references the proposal previously published in the FEDERAL REGISTER of June 22, 1972 (37 FR 12327) requiring the establishment and use of truthful and accurate descriptive names for all food, will make certain that no food is labeled in a false or misleading way and thus fully implements the mandate given by Congress.

Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 403, 701(a), 52 Stat. 1047–48 as amended, 1055; 21 U.S.C. 343, 371(a)) and under authority delegated to him (21 CFR 2.120), the Commissioner proposes to amend Part 1 in § 1.8 by adding the following new paragraph:

§ 1.8 Food in package form, labeling; identity.

* * * * *

(e) Under the provisions of section 403(c) of the Federal Food, Drug, and Cosmetic Act, a food shall be deemed to be misbranded if it is an imitation of another food unless its label bears, in type of uniform size and prominence, the word "imitation" and, immediately thereafter, the name of the food imitated.

(1) A food shall be deemed to be an imitation and consequently subject to the requirements of section 403(c) of the act if it is a substitute for and resembles another food but is nutritionally inferior to the food imitated.

(2) A food that is a substitute for and resembles another food shall not be deemed to be an imitation provided it meets each of the following requirements:

(i) It is not nutritionally inferior to the food for which it substitutes and which it resembles.

(ii) Its label bears a common or usual name that complies with the provisions of § 102.1(a) of this chapter and that is not false or misleading.

(3) The label of a food that is a substitute for and resembles another food shall bear a common or usual name or

an appropriately descriptive term in addition to any fanciful name. Petitions to establish a common or usual name shall be submitted in accordance with the provisions of § 102.1(c) of this chapter.

(4) Nutritional inferiority includes a reduction in the content of an essential vitamin or mineral or of protein that amounts to 10 percent or more of the U.S. Recommended Daily Allowance established under § 1.17(c)(7)(iv), but does not include a reduction in the caloric or fat content provided the food is labeled pursuant to the provisions of § 1.17, and provided that the labeling with respect to any reduction in caloric content complies with the provisions applicable to caloric content in Part 125 of this chapter. If the Commissioner concludes that a food falls within this paragraph in that it is a substitute for and resembles another food but is nutritionally inferior to the food imitated, for reasons other than those set out in this subparagraph, he shall so inform the manufacturer or distributor in writing of his conclusions and shall offer a reasonable time period within which labeling and/or formulation changes may be made prior to the institution of regulatory action.

(5) The provisions of this paragraph do not affect the required declarations of identity under definitions and standards of identity for foods promulgated pursuant to section 401 of the act.

Interested persons may, on or before March 20, 1973, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: January 12, 1973.

CHARLES C. EDWARDS,
Commissioner of Food and Drugs.

[FR Doc.73-991 Filed 1-18-73;8:45 am]

[21 CFR Part 1]

FLAVOR, SPICES, AND FOOD CONTAINING ADDED FLAVOR

Proposed Labeling

Section 403(i)(2) of the Federal Food, Drug, and Cosmetic Act authorizes the declaration of "spices," "flavorings," and "colorings" when these are used as food ingredients, except in the case of foods sold as spices, flavoring, or colorings.

There is some confusion as to the precise classification of certain substances as spices and flavorings. Artificial flavor is defined by § 1.12(a)(1) (21 CFR 1.12(a)(1)), but definitions for spices and natural flavors have not been established by regulation. Advisory standards were issued in 1918 as Food Inspection Decision (FID) 172, covering the collective term spices, and a number of specific foods were classified as spices. Since that time, this FID and its subsequent revisions have been used within the agency as guides for rendering decisions concerning the classification of selected substances as spices.

Some confusion also exists concerning the classification of certain newer flavors, because certain of their constituent parts are foods per se or are regulated chemicals. Diverse opinions have been offered over the years concerning labeling requirements of new flavors, causing uncertainty in the food industry.

There are at present also no regulations establishing a consistent pattern either for labeling bulk flavors shipped to a food manufacturer for use in making a finished food, or for designating the type of flavor on the label of the finished food.

The Food and Drug Administration is aware that the composition of a proprietary flavor compound marketed by a flavor manufacturer to a food manufacturer is a valuable trade secret. At the same time, the food manufacturer and the public require assurance that the ingredients used in such compounds meet the safety requirements of the law. Accordingly, it is proposed that, in lieu of declaring each separate ingredient on such compounds, a statement will suffice that each ingredient is contained in one of the three Food and Drug Administration flavor regulations, § 121.101, § 121.1163, or § 121.1164 (21 CFR 121.101, 121.1163, or 121.1164); it is also proposed that any ingredient not contained in one of those regulations shall be listed separately on the label.

Recent legal actions demonstrate that incorrect labeling is often used and that a uniform labeling policy for flavor designation should be established. The Food and Drug Administration adopted, in the ice cream standard, § 20.1 (21 CFR 20.1), a labeling pattern for flavor that has been proven to be very clear and informative to consumers. It is therefore proposed that this pattern, with appropriate modification, be extended to all foods.

When a flavor or spice is used as an ingredient in fabricated foods, the flavor or spice is covered by the labeling exemptions in section 403(i)(2) of the act and may be designated as "spices," "flavorings," or "artificial flavorings." There is uncertainty, however, as to the extent the other components of these manufactured flavors or seasonings, e.g., carriers, preservatives, emulsifiers, and enhancers, are exempt from specific ingredient declaration in the finished food.

Historically, the Food and Drug Administration has handled problems related to labeling of ingredients contained in flavors on a case-by-case basis. Specific inquiries from manufacturers and other interested individuals concerning the label declaration of certain nonflavors as ingredients in processed foods have resulted in the issuance of the following advisory opinions:

1. Anticaking agents need not be declared, provided the levels used are so low that they have no functional effect in the food itself.

2. Preservatives need not be declared if they are not intended to, and do not in fact, have any preservative effect on the finished food.

3. Ingredients ordinarily used as vehicles or emulsifiers need not be declared, but unusual solvents or vehicles must be declared.

4. Emulsifiers need not be declared on the label of the finished food if they do not function as such in the finished food.

5. It is necessary to declare the base used, such as sugar, dextrose, or salt.

The inclusion of most nonflavor components of flavor ingredients on the label of the finished food product would be impractical and even misleading to the ultimate consumer, and it is therefore proposed that such label declaration not be required where the nonflavor component(s) has no function in the finished food.

In order to clarify the policy of the Food and Drug Administration on these issues, the Commissioner of Food and Drugs proposes to issue regulations which: (1) Accurately define materials which may be considered flavors and spices; (2) describe specific conditions under which nonflavor ingredients of manufactured flavors are and are not exempt from the requirement of specific label declaration in finished food; (3) list those substances which are considered foods regardless of conditions of use and therefore require a declaration on the label of the finished food; (4) establish specific conditions under which bulk flavors are and are not exempt from the requirement of specific ingredient labeling; (5) establish a uniform pattern for label declaration of flavoring in finished food; and (6) consolidate in one regulation provisions relating to flavor labeling contained in statements of policy (21 CFR 3.10, 3.23(b), and 3.201).

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 403, 701(a), 52 Stat. 1047, 1055; 21 U.S.C. 343, 371(a)) and under authority delegated to him (21 CFR 2.120), the Commissioner of Food and Drugs proposes to revoke §§ 3.10, 3.23(b), and 3.201 (21 CFR 3.10, 3.23(b), and 3.201), and to amend § 1.12 (21 CFR 1.12) by revising the section title, by revising paragraph (a)(1), by redesignating existing paragraphs (a)(2) and (a)(3) as new paragraphs (a)(4) and (a)(5), by adding new paragraphs (a)(2) and (a)(3), and by adding new paragraphs (g), (h), and (i), as follows:

§ 1.12 Food; labeling: flavoring, spices, or coloring, chemical preservatives.

(a) (1) The term "artificial flavor" or "artificial flavoring" means any substance, the function of which is to impart flavor, which is not derived from a spice, fruit or fruit juice, vegetable or vegetable juice, edible yeast, herb, bark, bud, root, leaf, or similar plant material, meat, fish, or poultry. Artificial flavor includes the substances listed in §§ 121.101(g) and 121.1164(b) of this chapter.

(2) The term "spice" means any aromatic vegetable substance in the whole, broken, or ground form; whose signifi-

V38-13 JAN 1973 XUM

cant function in food is seasoning rather than nutritional; that is true to name; and from which no portion of any volatile oil or other flavoring principle has been removed. Spices include the spices listed in § 121.101(e) of this chapter, such as the following:

Allspice.	Marjoram.
Anise.	Mustard flour.
Basil.	Nutmeg.
Bay leaves.	Oregano.
Caraway seed.	Paprika.
Cardamon.	Parsley leaves.
Celery seed.	Pepper, black.
Chervil.	Pepper, white.
Cinnamon.	Pepper, red.
Cloves.	Rosemary.
Coriander.	Saffron.
Cumin seed.	Sage.
Dill seed.	Savory.
Fennel seed.	Star aniseed.
Fenugreek.	Tarragon.
Ginger.	Thyme.
Horseradish.	Turmeric.
Mace.	

Paprika, turmeric, and saffron are also colors which, under § 1.10(c), shall be declared as "spice and coloring," unless declared by their common or usual name.

(3) The term "natural flavor" or "natural flavoring" means the essential oil, oleoresin, essence or extractive, hydrolysate, distillate, or other reaction product, each of which contains the vital flavoring constituents derived from a spice, fruit or fruit juice, vegetable or vegetable juice, edible yeast, herb, bark, bud, root, leaf or similar plant material, meat, fish, or poultry, whose significant function in food is flavoring rather than nutritional. Natural flavors include the natural extractives obtained from plants listed in § 121.101(e) and the substances listed in § 121.1163 of this chapter.

(4) The term "artificial color" or "artificial coloring" means a coloring containing any dye or pigment, which dye or pigment was manufactured by a process of synthesis or other similar artifice, or a coloring which was manufactured by extracting a natural dye or natural pigment from a plant or other material in which such dye or pigment was naturally produced.

(5) The term "chemical preservative" means any chemical that, when added to food, tends to prevent or retard deterioration thereof, but does not include common salt, sugars, vinegars, spices, or oils extracted from spices, substances added to food by direct exposure thereof to wood smoke, or chemicals applied for their insecticidal or herbicidal properties.

* * * * *

(g) A flavor shall be labeled in the following way when shipped to a food manufacturer or processor (but not a consumer) for use in a food that will subsequently be sold at retail.

(1) If the flavor consists of one ingredient, it shall be declared by its common or usual name.

(2) If the flavor consists of two or more ingredients, the label either may declare each ingredient by its common or usual name or may state "All flavor ingredients contained in this product are listed in §§ 121.101, 121.1163, or § 121.1164 of the Food and Drug Administration Regulations" of this chapter in lieu of declaring each such ingredient. Any flavor ingredient not contained in one of these regulations, and any nonflavor ingredient, shall be separately listed on the label.

(3) If the flavor is, or bears or contains, any flavor subject to Part 22 of this chapter, it shall be so labeled.

(4) In cases where the flavor contains solely natural flavor(s), the flavor shall be so labeled. In cases where the flavor contains both a natural characterizing flavor and an artificial flavor simulating it and the natural flavor predominates, the flavor shall be so labeled. In cases where the flavor contains solely artificial flavor(s) or in cases where the flavor contains both a natural characterizing flavor and an artificial flavor simulating it and the artificial flavor predominates, the flavor shall be so labeled.

(h) The label of a food to which flavor is added shall declare the flavor in the statement of ingredients in the following way:

(1) Spice, natural flavor, and artificial flavor may be declared as "spice," "natural flavor," or "artificial flavor," or any combination thereof, as the case may be.

(2) A substance which is not spice or flavor, but which is used in the manufacture of spice or flavor for a functional purpose, e.g., a carrier, emulsifier, preservative, enhancer, or potentiator, is an incidental additive and exempt from the requirement of label declaration if each of the following criteria is met:

(i) It is present in the flavor in a quantity not exceeding the amount necessary to produce the intended effect.

(ii) It is present in only trace quantities in the finished food.

(iii) It has no significant nutritive effect in the finished food.

(iv) It has no functional effect in the finished food.

(v) It is not specifically required to be declared by other regulations.

(vi) It is not a food additive as defined in section 201(s) of the act; or if it is a food additive as so defined, it is used in conformity with regulations established pursuant to section 409 of the act.

(3) Substances obtained by cutting, grinding, drying, pulping, or similar processing of tissues derived from fruit, vegetable, meat, fish, or poultry, e.g., powdered or granulated onions, garlic powder, and celery powder, are commonly understood by consumers to be food rather than flavor and shall be declared by their common or usual name.

(4) Any salt (sodium chloride) used as an ingredient in flavor shall be declared by its common or usual name "salt".

(5) Any monosodium glutamate used as an ingredient in flavor shall be declared by its common or usual name "monosodium glutamate".

(6) Any pyroligneous acid (artificial smoke flavor) used as an ingredient in flavor or in a food shall be declared by a phrase such as "pyroligneous acid, an artificial flavor", "pyroligneous acid, an artificial smoke flavor", or "artificially flavored with pyroligneous acid". No representation may be made, either directly or implied, that a food flavored with pyroligneous acid has been smoked or has a true smoked flavor, or that a seasoning sauce or similar product containing pyroligneous acid and used to season or flavor other foods will result in a smoked product or one having a true smoked flavor.

(i) If the label, labeling, or advertising of a food makes any direct or indirect representations with respect to flavor, by word, vignette, e.g., depiction of a fruit, or other means, or if for any other reason the manufacturer or distributor of a food wishes to designate the type of flavor in the food other than through the statement of ingredients, the flavor of the product shall be declared in the following way:

(1) If the food contains no artificial flavor, the name of the food on the principal display panel or panels for the label shall be accompanied by the common or usual name of the characterizing flavor, e.g., "vanilla", in letters not less than one-half the height of the letters used in the name of the food, except that if the food is one that is commonly expected to contain a characterizing ingredient, e.g., strawberries in "strawberry shortcake", and the food contains no such ingredient or contains natural flavor in addition to such ingredient, the name of the characterizing flavor shall be immediately followed by the word "flavored" in letters not less than one-half the height of the letters in the name of the characterizing flavor.

(2) In cases where the food contains both a natural characterizing flavor and an artificial flavor simulating it and the natural flavor predominates, the name of the food on the principal display panel or panels of the label shall be accompanied by the common or usual name of the characterizing flavor, in letters not less than one-half of the height of the letters used in the name of the food, followed by the word "flavored", in letters not less than one-half of the height of the letters in the name of the characterizing flavor, e.g., "vanilla flavored", "peach flavored", or "vanilla flavored and strawberry flavored".

(3) In cases where an artificial flavor is used alone, or in cases where the food contains both a natural characterizing flavor and an artificial flavor simulating it and the artificial flavor predominates, the name of the food on the principal display panel or panels of the label shall be accompanied by the common or usual name of the characterizing flavor, in letters not less than one-half of the height of the letters used in the name of the food, preceded by the word(s) "artificial" or "artificially flavored", in letters not less than one-half of the height of the letters in the name of the characterizing flavor, e.g., "artificial vanilla", or "artificially flavored strawberry" or "artificially flavored vanilla and artificially flavored strawberry".

(4) If the food is labeled in accordance with paragraph (i)(2) of this section or if it contains any artificial flavor not simulating the characterizing flavor, the label shall also bear the words "artificial flavor added" or "artificial _____ flavor added" or "and artificial _____ flavor", the blank being filled with the common or usual name of the flavor simulated by the artificial flavor in letters of the same size and prominence as the words that precede and follow it.

(5) Wherever the name of the characterizing flavor appears on the label (other than in the statement of ingredients) so conspicuously as to be easily seen under customary conditions of purchase, the words prescribed by this paragraph shall immediately and conspicuously precede or follow such name, except:

(i) Where the characterizing flavor and a trademark or brand are presented together, other written, printed, or graphic matter that is a part or is associated with the trademark or brand may intervene if the required words are in such relationship with the trademark or brand as to be clearly related to the characterizing flavor; and

(ii) If the finished product contains more than one flavor subject to the requirements of this paragraph, the statements required by this paragraph need appear only once in each statement of characterizing flavors present in such food, e.g., "vanilla flavored, or chocolate and strawberry flavored, artificial flavors added".

(6) If the food contains both a natural characterizing flavor and an artificial flavor simulating the characterizing flavor, any reference to the natural characterizing flavor shall, except as otherwise authorized by this paragraph, be accompanied by a reference to the artificial flavor, displayed with substantially equal prominence, e.g., "strawberry and artificial strawberry flavor", or "strawberry, artificial strawberry flavor added".

Interested persons may, on or before March 20, 1973, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Comments received will be available for public inspection at the above office during regular business hours, Monday through Friday.

Dated: January 12, 1973.

CHARLES C. EDWARDS,
Commissioner of Food and Drugs.

[FR Doc.73-992 Filed 1-18-73;8:45 am]

[21 CFR Parts 1, 3, 5]

EXEMPTIONS FROM FOOD LABELING REQUIREMENTS

Notice of Proposed Rule Making

A fabricated food containing two or more ingredients is required by section 403(i)(2) of the Federal Food, Drug, and Cosmetic Act to bear on its label the common or usual name of each ingredient (other than spices, flavorings, and colorings); *Provided*, That, to the extent that such listing of ingredients is impracticable or results in deception or unfair competition, exemptions shall be established by regulations promulgated by the Secretary.

The Food and Drug Administration has promulgated a limited number of regulations exempting specific incidental food additives from the requirements of section 403(i)(2) of the act. The Commissioner proposes to clarify the Agency's policy with regard to the label declaration of incidental additives and to consolidate in one place the regulations concerning label exemptions currently found in 21 CFR Parts 1, 3, and 5.

The Commissioner proposes to revoke § 5.5, which was stayed at 31 FR 15730 on December 14, 1966, on the ground that 21 CFR 121.4001 (37 FR 2437) established the type of restrictions contained in § 5.5 for saccharin, the only artificial sweetener known to the Commissioner to be in use at the present time. Any other artificial sweetener will also be subject to a regulation promulgated under section 409 of the act, and will similarly include the type of restrictions contemplated by § 5.5. Accordingly, the provisions of § 5.5 are entirely obsolete. The Commissioner also proposes to revoke §§ 5.9 and 5.10, and to transfer the remainder of Part 5 and § 3.26 to a new § 1.10a. It is proposed to include in new § 1.10a provisions defining incidental additives and exempting them from the labeling requirements of section 403(i)(2) of the act, which cover the substance of former §§ 5.9 and 5.10, and to transfer exemptions from the labeling requirements of section 403(i)(2) of the act found in § 1.10 to the new § 1.10a. In addition, it is proposed that the termination of old exemptions, published as § 3.1 in 1961, be revoked as obsolete since manufacturers are now fully aware that these foods are no longer exempt from section 403(i)(2) of the act.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 403, 701(a), 52 Stat. 1048, 1055; 21 U.S.C. 343, 371(a)) and under authority delegated to him (21 CFR 2.120), the Commissioner proposes that Parts 1, 3, and 5 be amended as follows:

PART 1—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT AND THE FAIR PACKAGING AND LABELING ACT

§ 1.10 [Amended]

1. In § 1.10 paragraphs (e), (f), and (g) are hereby revoked, and paragraph (h) is redesignated as paragraph (e).

2. A new § 1.10a is added to Part 1, incorporating the substance of § 1.10 (e), (f), and (g), § 3.26, §§ 5.1 through 5.4 and §§ 5.6 through 5.8 with additional new provisions, and reading as follows:

§ 1.10a Food; labeling; exemptions from labeling requirements.

(a) The following foods are exempt from compliance with the requirements of section 403(i)(2) of the act (requiring a declaration on the label of the common or usual name of each ingredient when the food is fabricated from two or more ingredients).

(1) An assortment of different items of food, when variations in the items that make up different packages packed from such assortment normally occur in good packing practice and when such variations result in variations in the ingredients in different packages, with respect to any ingredient that is not common to all packages. Such exemption, however, shall be on the condition that the label shall bear, in conjunction with the names of such ingredients as are common to all packages, a statement (in terms that are as informative as practicable and that are not misleading) indicating that other ingredients may be present.

(2) A food having been received in bulk containers at a retail establishment, if displayed to the purchaser with either (i) the labeling of the bulk container plainly in view or (ii) a counter card, sign, or other appropriate device bearing prominently and conspicuously the information required to be stated on the label pursuant to section 403(i)(2) of the act.

(3) Propylene glycol or glycerin present in quiescently frozen confections because of use as a carrier for food-grade emulsifiers and stabilizers.

(4) Incidental additives that are present in a food at insignificant levels and do not have any technical or functional effect in that food. For the purposes of this subparagraph, incidental additives are:

(i) Substances that have no technical or functional effect but are present in a food by reason of having been incorporated into the food as an ingredient of another food, in which the substance did have a functional or technical effect.

(ii) Processing aids, which are as follows:

(*a*) Substances that are added to a food during the processing of such food but are removed in some manner from the food before it is packaged in its finished form.

(*b*) Substances that are added to a food during processing, are converted into constituents normally present in the food, and do not significantly increase the amount of the constituents naturally found in the food.

(*c*) Substances that are added to a food for their technical or functional effect in the processing but are present in the finished food at insignificant levels and do not have any technical or functional effect in that food.

(iii) Substances migrating to food from equipment or packaging or otherwise affecting food that are not food additives as defined in section 201(s) of the act; or if they are food additives as so defined, they are used in conformity with regulations established pursuant to section 409 of the act.

(b) A food repackaged in a retail establishment is exempt from the following provisions of the act if the conditions specified are met.

(1) Section 403(e)(1) of the act (requiring a statement on the label of the

V 38 I 13 JAN 19 73 XUM

name and place of business of the manufacturer, packer, or distributor).

(2) Section 403(g)(2) of the act (requiring the label of a food which purports to be or is represented as one for which a definition and standard of identity has been prescribed to bear the name of the food specified in the definition and standard and, insofar as may be required by the regulation establishing the standard the common names of the optional ingredients present in the food), if the food is displayed to the purchaser with its interstate labeling clearly in view, or with a counter card, sign, or other appropriate device bearing prominently and conspicuously the information required by these provisions.

(3) Section 403(i)(1) of the act (requiring the label to bear the common or usual name of the food), if the food is displayed to the purchaser with its interstate labeling clearly in view, or with a counter card, sign, or other appropriate device bearing prominently and conspicuously the common or usual name of the food, or if the common or usual name of the food is clearly revealed by its appearance.

(c) An open container (a container of rigid or semirigid construction, which is not closed by lid, wrapper, or otherwise) of a fresh fruit or fresh vegetable, the quantity of contents of which is not more than 1 dry quart, shall be exempt from the labeling requirements of sections 403(e), (g)(2) (with respect to the name of the food specified in the definition and standard), and (i)(1) of the act; but such exemption shall be on the condition that if two or more such containers are enclosed in a crate or other shipping package, such crate or package shall bear labeling showing the number of such containers enclosed therein and the quantity of the contents of each.

(d) Except as provided by paragraphs (e) and (f) of this section, a shipment or other delivery of a food which is, in accordance with the practice of the trade, to be processed, labeled, or repacked in substantial quantity at an establishment other than that where originally processed or packed, shall be exempt, during the time of introduction into and movement in interstate commerce and the time of holding in such establishment, from compliance with the labeling requirements of section 403 (c), (e), (g), (h), (i), (j), and (k) of the act if:

(1) The person who introduced such shipment or delivery into interstate commerce is the operator of the establishment where such food is to be processed, labeled, or repacked; or

(2) In case such person is not such operator, such shipment or delivery is made to such establishment under a written agreement, signed by and containing the post office addresses of such person and such operator, and containing such specifications for the processing, labeling, or repacking, as the case may be, of such food in such establishment as will insure, if such specifications are followed, that such food will not be adulterated or misbranded within the meaning of the act upon completion of such processing, labeling, or repacking. Such person and such operator shall each keep a copy of such agreement until 2 years after the final shipment or delivery of such food from such establishment, and shall make such copies available for inspection at any reasonable hour to any officer or employee of the Department who requests them.

(3) The article is an egg product subject to a standard of identity promulgated in Part 42 of this chapter, is to be shipped under the conditions specified in paragraph (a) or (b) of this section and for the purpose of pasteurization or other treatment as required in such standard, and each container of such egg product bears a conspicuous tag or label reading "Caution—This egg product has not been pasteurized or otherwise treated to destroy viable Salmonella micro-organisms." In addition to safe and suitable bactericidal processes designed specifically for Salmonella destruction in egg products, the term "other treatment" in the first sentence of this paragraph shall include use in acidic dressings in the processing of which the pH is not above 4.1 and the acidity of the aqueous phase, expressed as acetic acid, is not less than 1.4 percent, subject also to the conditions that:

(i) The agreement required in paragraph (b) of this section shall also state that the operator agrees to utilize such unpasteurized egg products in the processing of acidic dressings according to the specifications for pH and acidity set forth in this paragraph, agrees not to deliver the acidic dressing to a user until at least 72 hours after such egg product is incorporated in such acidic dressing, and agrees to maintain for inspection adequate records covering such processing for 2 years after such processing.

(ii) In addition to the caution statement referred to above, the container of such egg product shall also bear the statement "Unpasteurized ——— for use in acidic dressings only," the blank being filled in with the applicable name of the eggs or egg product.

(e) Conditions affecting expiration of exemptions. (1) An exemption of a shipment or other delivery of a food under paragraph (d) (1) or (3) of this section shall, at the beginning of the act of removing such shipment or delivery, or any part thereof, from such establishment become void ab initio if the food comprising such shipment, delivery, or part is adulterated or misbranded within the meaning of the act when so removed.

(2) An exemption of a shipment or other delivery of a food under paragraph (d) (2) or (3) of this section shall become void ab initio with respect to the person who introduced such shipment or delivery into interstate commerce upon refusal by such person to make available for inspection a copy of the agreement, as required by paragraph (d) (2) or (3) of this section.

(3) An exemption of a shipment or other delivery of a food under paragraph (d)(2) or (3) of this section shall expire:

(i) At the beginning of the act of removing such shipment or delivery, or any part thereof, from such establishment if the food comprising such shipment, delivery, or part is adulterated or misbranded within the meaning of the act when so removed; or

(ii) Upon refusal by the operator of the establishment where such food is to be processed, labeled, or repacked, to make available for inspection a copy of the agreement, as required by such paragraph.

(f) The word "processed" as used in this paragraph shall include the holding of cheese in a suitable warehouse at a temperature of not less than 35° F. for the purpose of aging or curing to bring the cheese into compliance with requirements of an applicable definition and standard of identity. The exemptions provided for in paragraph (d) of this section shall apply to cheese which is, in accordance with the practice of the trade, shipped to a warehouse for aging or curing, on condition that the cheese is identified in the manner set forth in one of the applicable following paragraphs, and in such case the provisions of paragraph (e) of this section shall also apply:

(1) In the case of varieties of cheese for which definitions and standards of identity require a period of aging whether or not they are made from pasteurized milk, each such cheese shall bear on the cheese a legible mark showing the date at which the preliminary manufacturing process as been completed and at which date curing commences, and to each cheese, on its wrapper or immediate container, shall be affixed a removable tag bearing the statement "Uncured ——— cheese for completion of curing and proper labeling," the blank being filled in with the applicable name of the variety of cheese. In the case of swiss cheese, the date at which the preliminary manufacturing process had been completed and at which date curing commences is the date on which the shaped curd is removed from immersion in saturated salt solution as provided in the definition and standard of identity for swiss cheese, and such cheese shall bear a removable tag reading, "To be cured and labeled as 'swiss cheese,' but if eyes do not form to be labeled as 'swiss cheese for manufacturing.'"

(2) In the case of varieties of cheeses which when made from unpasteurized milk are required to be aged for not less than 60 days, each such cheese shall bear a legible mark on the cheese showing the date at which the preliminary manufacturing process has been completed and at which date curing commences, and to each such cheese or its wrapper or immediate container shall be affixed a removable tag reading, "——— cheese made from unpasteurized milk. For completion of curing and proper labeling," the blank being filled in with the applicable name of the variety of cheese.

(3) In the case of cheddar cheese, washed curd cheese, colby cheese, granular cheese, and brick cheese made from unpasteurized milk, each such cheese shall bear a legible mark on the cheese showing the date at which the preliminary manufacturing process has been completed and at which date curing commences, and to each such cheese or its wrapper or immediate container shall be affixed a removable tag reading "——— cheese made from unpasteurized milk. For completion of curing and proper labeling, or for labeling as ——— cheese for manufacturing," the blank being filled in with the applicable name of the variety of cheese.

(g) The label declaration of a harmless marker used to identify a particular manufacturer's product may result in unfair competition through revealing a trade secret. Exemption from the label declaration of such a marker is granted, therefore, provided that the following conditions are met:

(1) The person desiring to use the marker without label declaration of its presence has submitted to the Commissioner of Food and Drugs full information concerning the proposed usage and the reasons why he believes label declaration of the marker should be subject to this exemption; and

(2) The person requesting the exemption has received from the Commissioner of Food and Drugs a finding that the marker is harmless and that the exemption has been granted.

(h) Wrapped fish fillets of nonuniform weight intended to be unpacked and marked with the correct weight at the point of retail sale in an establishment other than that were originally packed shall be exempt from the requirement of section 403(e)(2) of the act during introduction and movement in interstate commerce and while held for sale prior to weighing and marking:

(1) *Provided*, That:

(i) The outside container bears a label declaration of the total net weight; and

(ii) The individual packages bear a conspicuous statement "To be weighed at time of sale" and a correct statement setting forth the weight of the wrapper: *And*

(2) *Provided further*, That it is the practice of the retail establishment to weigh and mark the individual packages with a correct net-weight statement prior to or at the point of retail sale. A statement of the weight of the wrapper shall be set forth so as to be readily read and understood, using such term as "wrapper tare — ounce," the blank being filled in with the correct average weight of the wrapper used.

(3) The act of delivering the wrapped fish fillets during the retail sale without the correct net-weight statement shall be deemed an act which results in the product's being misbranded while held for sale. Nothing in this paragraph shall be construed as requiring net-weight statements for wrapped fish fillets delivered into institutional trade provided the outside container bears the required information.

(i) Wrapped clusters (consumer units) of bananas of nonuniform weight intended to be unpacked from a master carton or container and weighed at the point of retail sale in an establishment other than that where originally packed shall be exempt from the requirements of section 403(e)(2) of the act during introduction and movement in interstate commerce and while held for sale prior to weighing:

(1) *Provided*, That:

(i) The master carton or container bears a label declaration of the total net weight; and

(ii) The individual packages bear a conspicuous statement "To be weighed at the time of sale" and a correct statement setting forth the weight of the wrapper:

(2) *And provided, further*, That it is the practice of the retail establishment to weigh the individual packages either prior to or at the time of retail sale.

(3) The act of delivering the wrapped clusters (consumer units) during the retail sale without an accurate net weight statement or alternatively without weighing at the time of sale shall be deemed an act which results in the product's being misbranded while held for sale. Nothing in this paragraph shall be construed as requiring net-weight statements for clusters (consumer units) delivered into institutional trade, provided that the master container or carton bears the required information.

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

§ 3.1 [Revoked]

3. The provisions of § 3.1 are hereby revoked.

§ 3.26 [Revoked]

4. The provisions of § 3.26 are hereby revoked.

PART 5—[REVOKED]

5. The provisions of Part 5 are hereby revoked.

Interested persons may, on or before March 20, 1973, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-86, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: January 12, 1973.

CHARLES C. EDWARDS,
Commissioner of Food and Drugs.

[21 CFR Parts 1, 3, 125]

SPECIAL DIETARY FOODS

Label Statements; Proposed Findings of Fact, Conclusions, and Tentative Order Following Public Hearing

In the matter of revising regulations for food for special dietary uses:

HISTORY

1. On the initiative of the Commissioner of Food and Drugs, a notice of proposed rule making in the above-identified matter was published in the FEDERAL REGISTER of June 20, 1962 (27 FR 5815), and numerous comments were received in response thereto. Subsequently, orders were published in the FEDERAL REGISTER of June 18, 1966 (31 FR 8521 et seq.), to become effective December 15, 1966, deleting § 1.11 (21 CFR 1.11), excepting from labeling requirements certain artificially sweetened foods (21 CFR 5.5), establishing definitions and standards of identity for dietary supplements of vitamins and minerals and for vitamin and mineral-fortified foods (21 CFR Part 80), and revising the regulations for the labeling of food for special dietary uses (21 CFR Part 125).

2. During the 30-day period provided by the orders of June 18, 1966, objections and requests for a public hearing were filed. Consequently, an order was published in the FEDERAL REGISTER of December 14, 1966 (31 FR 15730), staying the effective date of § 5.5, Part 80, and Part 125, and staying the effective date of the deletion of § 1.11, as published June 18, 1966. The order of December 14, 1966, gave notice that a public hearing would be held on the basis of the objections received, and set forth the issues to be decided at the hearing. Since the order also contained amendments to the provisions of Parts 80 and 125 published in the FEDERAL REGISTER of June 18, 1966, an additional period of 30 days was provided for the filing of objections by persons adversely affected. Numerous letters objecting to the amendments and requesting a public hearing were received; however, no substantive issues not already stated in the order of December 14, 1966, were raised by these objections. A correction of a printer's error in the order of December 14, 1966, was published in the FEDERAL REGISTER of December 21, 1966 (31 FR 16312).

3. Also published in the FEDERAL REGISTER of December 14, 1966 (31 FR 15748), was a notice proposing that § 80.2, the definition and standard of identity for vitamin- and mineral-fortified foods, which was established by the order of June 18, 1966, and amended and stayed by the order of December 14, 1966, be amended by adding to the table in paragraph (c) the following classes of food: (1) Frozen dessert products (containing vegetable fat in lieu of butter fat) made in semblance of ice cream or ice milk; (2) milk fortifiers; (3) and meal substitutes.

4. The comments received in response to the proposal of December 14, 1966, were considered and an order was subsequently published in the FEDERAL REGISTER of April 8, 1967 (32 FR 5736), amending § 80.2 to add the additional classes of food. In response to that order, several objections and requests for a public hearing were received; however, no substantive issues were raised that were not already set forth in the order of December 14, 1966.

5. A notice was published in the FEDERAL REGISTER of April 2, 1968 (33 FR 5268), scheduling a hearing to begin May 21, 1968, and a prehearing confer-

V 38 I 13 JAN 19 73 XUM

ence to begin May 7, 1968. The notice also designated Mr. David H. Harris as the Hearing Examiner for these proceedings, and notice that he was appointed a hearing examiner was published in the FEDERAL REGISTER of May 4, 1968 (33 FR 6828).

6. The hearing was convened as scheduled May 21, 1968, and recessed the same day to permit continuation of prehearing conferences. Notice was given in the FEDERAL REGISTER of June 13, 1968 (33 FR 8679), that the hearing was being reconvened June 20, 1968. The hearing was reconvened as scheduled and continued for almost 2 years, closing on May 14, 1970.

7. The taking of evidence with reference to infant foods was closed October 14, 1969. Pursuant to 21 CFR 2.96, and limited to the infant food portion of the proceedings, the Hearing Examiner submitted his report and certified the record together with his report to the Commissioner of Food and Drugs. This Hearing Examiner's report, dated August 26, 1970, is part of the public record (Docket No. FDC–79) on file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, MD 20852.

8. The Hearing Examiner subsequently submitted his report of the entire proceedings, except for the previously submitted portion on infant foods, and certified the associated record together with his report to the Commissioner of Food and Drugs. This Hearing Examiner's report, dated January 25, 1971, is part of the public record (Docket No. FDC–78) and is also on file with the Hearing Clerk.

9. After review of the Hearing Examiner's report and related material on the infant foods portion of the proceedings, the Commissioner published in the FEDERAL REGISTER October 29, 1970 (35 FR 16737), proposed findings of fact, proposed conclusions, and a tentative order on label statements relating to infant foods, and provided a 30-day period for the filing of written exceptions. After review of comments received, and further review of the Hearing Examiner's report and related material, several changes were made in the tentative order, and the final order on label statements relating to infant foods (21 CFR 125.5) was published in the FEDERAL REGISTER of December 10, 1971 (36 FR 23553), with an effective date 90 days from the date of publication.

10. After review of the Hearing Examiner's report and related material on the portion of the proceedings concerning vitamin- and mineral-fortified foods, the Commissioner concluded that it would be in the public interest to develop regulations for such foods utilizing the approach of establishing nutritional quality guidelines for certain classes of foods, including those to which vitamins and/or minerals may be added. These guidelines may replace the approach of developing standards of identity for these foods as originally proposed in the form of 21 CFR 80.2. A notice of proposed rule making on nutritional quality guidelines was published in the FEDERAL REGISTER of December 23, 1971 (36 FR 24822). In that notice, the Commissioner proposed to amend Chapter I by adding a new Part 100 for nutritional quality guidelines for foods, defined general principles (proposed 21 CFR 100.1), and proposed the first nutritional quality guideline, in this case for precooked frozen convenience "heat and serve" dinners (proposed 21 CFR 100.20). The Commissioner is deferring final action on 21 CFR 80.2 until experience is gained under 21 CFR Part 100. In a notice of proposed rule making, published elsewhere in this issue of the FEDERAL REGISTER, the Commissioner proposes to establish a new 21 CFR 1.10a (Exemptions From Food Labeling Requirements) which would revoke 21 CFR 5.5, which was stayed at 31 FR 15730 on December 14, 1966, on the ground that 21 CFR 121.4001 (37 FR 2437) established the type of restrictions contained in 21 CFR 5.5 for saccharin (the only artificial sweetener known to the Commissioner to be used at the present time). Any other artificial sweetener will also be subject to a regulation promulgated under section 409 of the Federal Food, Drug, and Cosmetic Act and will similarly include the type or restrictions contemplated by 21 CFR 5.5.

11. In the past, the term "special dietary food" has been defined to include any food to which a nutrient has been added or for which nutrition claims or information have been used. This assured that such foods would have labeling information about the nutrient(s) added, pursuant to regulations promulgated in 21 CFR Part 125. The Commissioner has reviewed the history of this use of the "special dietary" designation, and has concluded that because of the complexity of the conventional food supply that it is necessary to develop general nutrition labeling available for use on all foods. Nutrition labeling is the required form of labeling for foods with added nutrients or for which the manufacturer makes nutrition claims. A notice of proposed rule making on nutrition labeling under title 21 was published in the FEDERAL REGISTER of March 30, 1972 (37 FR 6493).

12. In this issue of the FEDERAL REGISTER, the Commissioner has published the following proposals, tentative orders, and regulations that relate to other sections of special dietary labeling and nutrition labeling as follows:

(a) Nutrition labeling. (§ 1.17)
(b) Food label information panel. (§ 1.8d)
(c) Food fat labeling. (§ 1.18)
(d) Standard of identity for vitamin-mineral supplements. (§ 80.1)
(e) Food standard labeling changes.
(f) Uniform effective date for food labeling changes.

13. Beginning with the enactment of the Federal Food, Drug, and Cosmetic Act of 1938 (52 Stat. 1040), the Food and Drug Administration rendered informal opinions on many problems that arose under the act. These opinions, issued as Trade Correspondence (TC), represented the policy of the Food and Drug Administration based on specific problems and the application of the statute thereto. To avoid confusion as to the status of those TC issuances which will be superseded by the amendments to 21 CFR Part 125 as contained herein and new § 80.1 published elsewhere in this issue of the FEDERAL REGISTER, the Commissioner concludes that such TC issuances should be formally rescinded. Therefore, notice is given that the following TC issuances are rescinded effective on the effective date of the amendments to 21 CFR Part 125 set forth below:

(a) TC–93: Vitamins.
(b) TC–315: Vitamin-carrying oil—labeling.
(c) TC–363: "Vitamin B complex".
(d) TC–379: Wheat germ oil—vitamin E.
(e) TC–387: Vitamin capsules and tablets.
(f) TC–407: Vitamin B_1 tablets for use in enriching bread.
(g) TC–408: Pyridoxine and pantothenic acid in yeast tablets.
(h) TC–411: Bakery products containing thiamine, riboflavin, niacin, and iron.

LIMITED SCOPE OF THIS ACTION

14. This document pertains only to regulations concerning certain limited matters relating to labeling foods for special dietary use (21 CFR 125.1–125.3).

15. A final order was published in the FEDERAL REGISTER of December 10, 1971, on label statements relating to infant foods (§ 125.5). The order of December 10, 1971, and the present action reflect the continuing intent of the Commissioner of Food and Drugs to promulgate revised individual sections of this Part 125 as soon as the records of the hearing can be reviewed, analyzed, and the findings implemented.

16. The document of December 14, 1966, listed the issues for the contemplated hearing, including Nos. III–A, III–B, and III–C, as follows:

III. Issues concerning Part 125. A. With respect to § 125.1 *Definitions and interpretations of terms:*

1. Whether it is necessary and reasonable, in order fully to inform purchasers of the value of foods for special dietary uses, to define "special dietary use" as set forth in § 125.1(a).

2. Whether it is necessary and reasonable, in order fully to inform purchasers of the value of foods for special dietary uses, to establish "recommended dietary allowances" for essential nutrients.

3. Whether the "recommended dietary allowances" as set forth in §125.1(b), and amended by this order, are reasonable.

4. Whether the definition of "artificial sweetener" in § 125.1(c) is reasonable.

B. With respect to § 125.2 *General label statements; dietary properties; value; placement,* whether it is necessary and reasonable, in order fully to inform purchasers of the value of foods for special dietary uses, to require that the labels of such foods bear a statement as required and limited by that section, as amended by this order.

C. With respect to § 125.3 *Label statements relating to vitamins and minerals,* whether it is necessary and reasonable, in order fully to inform purchasers of the value of foods for special dietary uses, to require that the labels of such foods by reason of their vitamin or mineral content bear a statement of the percentages of the recommended dietary allowances of such vitamins and minerals contained in such food, with the limitation that vitamin and mineral supplements and foods fortified with vitamins and/or minerals may not bear on their labels a declaration of any quantity of added vitamins or minerals in the supplements or fortified foods which supply more than 100 percent of the recommended dietary allowance for any nutrient.

17. The public hearing in the overall matter was closed May 14, 1970, Pursuant to 21 CFR 2.96, the Hearing Examiner, Mr. David H. Harris, submitted his report in this matter and certified the record together with this report to the Commissioner of Food and Drugs. The report is part of the public record (Docket No. FDC–78) on file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, MD 20852.

18. The Commissioner realizes that legal challenge may be brought against the new approach to nutrition labeling in 21 CFR 1.17. If 21 CFR 1.17 is found invalid for any reason it will be necessary to resume the labeling of foods with added nutrients, or for which nutritional claims are made, under 21 CFR Part 125. The Commissioner is therefore keeping the record on this portion of the hearing open, for this limited purpose, in the event that it becomes necessary to amend this tentative order or to issue a supplemental tentative order to provide for labeling of this type pursuant to 21 CFR Part 125 in lieu of 21 CFR 1.17.

OTHER REGULATIONS AND POLICIES AFFECTED

The publication of this tentative order requires changes in certain existing food additive regulations and formal statements of policy under Parts 1 and 3 of Title 21 of the Code of Federal Regulations. These additional actions are as follows:

1. Since it is no longer appropriate § 1.11 *Special dietary uses* is being revoked.

2. Since the Food and Nutrition Board, National Academy of Sciences-National Research Council (NAS/NRC), has now established a set of Recommended Daily Dietary Allowances for vitamin E, and since there now is scientific evidence that the vitamin E content of the diet may not always be adequate to meet requirements, the formal statement of policy under § 3.9 *Label declaration of vitamin E in food for special delivery use* is being revoked.

3. Since appropriate and useful levels of vitamin B_{12} and folic acid have been determined, the formal statement of policy under § 3.32 *Label declarations of vitamin B_{12} and folic acid in foods for special dietary uses* is being revoked.

4. Since it is no longer appropriate, the formal statement of policy under § 3.46 *Interpretations of orders relating to dietary supplements; vitamin and mineral-fortified foods; foods for special dietary use* is being revoked.

5. Concerning folic acid (folacin), the Food and Nutrition Board, NAS/NRC, recommends daily intakes of 0.4 milligram for older children and adults, and 0.8 milligram during pregnancy. The Council on Foods and Nutrition, American Medical Association (AMA), recently reviewed the subject of desirable levels of folic acid in dietary supplements, and communicated their conclusions to the Food and Drug Administration by their letter of October 13, 1971. The Council recommended increasing the allowable maximum amount to that recommended by the Food and Nutrition Board on the basis of recent evidence of inadequate intakes in significant segments of the population, the absence of ill-effects in normal individuals from such intakes, and the lack of evidence that such intakes aggravate or mask pernicious anemia or interfere with the diagnosis or treatment of the disease. The Commissioner considers these positions of the NAS/NRC and the AMA to be nutritionally sound. Therefore, the formal statement of policy under § 3.42 *Status of pteroylglutamic acid (folic acid) in foods for special dietary use and as a drug* will be revised at a later date to reflect these quantitative changes relative to folic acid. Also, the limitation of 0.1 milligram provided for in the food additive regulation under § 121.1134 *Pteroylglutamic acid* will be revised to permit larger amounts of folic acid in dietary supplements consistent with the recommendations of the Food and Nutrition Board.

6. Since it has now been established that 0.3 milligram of iodine per day is safe in humans, including during pregnancy and lactation, since iodine deficiency goiter continues to persist in the United States, and since 0.3 milligram is a reasonable maximum daily intake to be provided by a dietary supplement for pregnancy and lactation, § 121.1073 *Potassium iodide* and § 121.1149 *Kelp* will be revised at a later date to increase the maximum daily intake of the additives to a level not to exceed 0.3 milligram of iodine.

Having considered the evidence pertaining to the issues concerning §§ 125.1, 125.2, and 125.3 received at the hearing and the Hearing Examiner's Report of January 25, 1971, and having considered the comments from the National Food Advisory Committee, the Commissioner, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 403(j), 701(e), 52 Stat. 1046, 1048, 1055–1056, as amended by 70 Stat. 919; 21 U.S.C. 341, 343(j), 371(e)) and under authority delegated to him (21 CFR 2.120), proposes the following findings of fact, conclusions of law, and tentative final order:

PROPOSED FINDINGS OF FACT[1]

1. Since enactment, in 1941, of the currently effective regulations concerning foods for special dietary uses, the definition of special dietary use contained therein (21 CFR 1.11) has proved inadequate, in certain respects, to meet the needs of the Food and Drug Administration in its regulatory activity. (Swain, Tr. 115, 116, 125–127, 153–155, 168, 169)

2. The term "special dietary use," as applied to food including dietary supplements used by man, means a particular use for which a product purports or is represented to be used, including but not limited to the following uses:

(a) Supplying a special dietary need that exists by reason of a physical, physiological, or other condition, including but not limited to the conditions of convalescence, pregnancy, lactation, infancy, allergic hypersensitivity to food, underweight, overweight, diabetes mellitus, or the need to control the intake of sodium;

(b) Supplying a vitamin, mineral, or other dietary property for use by man to supplement his diet by increasing the total dietary intake.

(c) Supplying a special dietary need by reason of being a food for use as the sole item of the diet. (Mickelsen, Tr. 2508; WD–G–Ross, Q&A 55, 56; WD–G–Moses, Q&A 17–19)

3. To fully inform the purchaser of the product's value for such use, the label of a food for a special dietary use should bear a statement of usefulness consisting of a list of the dietary properties upon which the special use is based. (Grollman, Tr. 1766; Hodges, Tr. 2969–70; Mickelsen, Tr. 2518–19; WD–G–Moses, Q&A 33) Many dietary supplements include named ingredients which are of no value as supplements to the human diet. (Grollman, Tr. 1628, 1675–77, 1707, Exhibit P–125, Mickelsen, Tr. 2464–65, Exhibit P–172, 2469, Exhibit P–173, Hodges, Tr. 2933, Exhibit P–179, 2936, Exhibit P–180, Herbert, Tr. 9891, Exhibit P–113, 9899, Exhibit P–468, Swain, Tr. 185–191, 213, 220, 221, 223, 229–231, 255, 264, 269, 336, 397, 442, 447, 455, 469, 475, 476, 487, Weissenberg, Tr. 8761, 6402, 5949, Exhibit P–576, P–591) However, many consumers will purchase such products with long lists of ingredients, believing them to be of better value than products with a lesser number of ingredients. (WD–G–Perloff, Q&A 38–41; Exhibit P–1151, page B9). Such consumers believe that if an ingredient is listed, it must significantly contribute to the value of the product as a dietary supplement. (WD–G–Perloff, Q&A 18, 19; Exhibit P–737) The label of a dietary supplement, as a food for special dietary use, should bear a statement of usefulness consisting of a list of the nutrient ingredients which provide the special use characteristics. The list of such ingredients should be limited to those which are of significant value and need in human nutrition as components of dietary supplements. (Grollman, Tr. 1766; Hodges, Tr. 2969–2970; Mickelsen, Tr. 2518–2520; WD–G–Moses, Q&A 33; WD–C–Ross, Q&A 59–61)

4. It is scientifically inaccurate to list a dietary property of a food for special dietary use that is of no significance in

[1] The abbreviations in the citations are:

WD–3A—For written direct testimony by a witness for the designated opponent (e.g., "3A").
Q. & A.—Question and answer.

V 38 I 13 JAN 19 73 XUM

human nutrition, and listing of dietary properties should be limited to ingredients of significant value and need in human nutrition. (WD–G–Ross, Q&A 59–61; Grollman, Tr. 1766; Mickelsen, Tr. 2518–19; Hodges, Tr. 2969–70)

5. In addition to statements on the container label of a food for special dietary use it is necessary to consider the label in its entire setting including statements made in the labeling, promotional material, and advertising for such food, to determine whether the label bears a statement concerning properties of the food which are of no significance in human nutition. (WD–G–Perloff, Q&A 10, 16, 17; WD–G–Swanson, Q&A 50; WD–G–Ross, Q&A 61; Section 201(n), FDCA)

6. The term "minimum daily requirement" was adopted by the Food and Drug Administration in 1940 as a means of fully informing consumers about vitamins and minerals in food for special dietary uses. (Boehne, Tr. 2702–03; Swain, Tr. 170) The term "minimum daily requirements," as it has been used since 1940, in the labeling and promotional material for foods with special dietary uses has led to some confusion among consumers. Consumers believe that the "minimum" requirements may be, or may nearly be, inadequate in terms of the nutrient content provided. (Boehne, Tr. 2704; Weissenberg, Tr. 5891, 7734, 8783; WD–G–Gullberg, Q&A 20; WD–G–Perloff, Q&A 35, 37; Exhibit P–737) The continued existence of the term "minimum daily requirement" has led to the production, promotion, and sale of a variety of dietary supplements, that contain large multiples of the minimum daily requirements for vitamins and minerals, and by far exceed the adequate human total daily dietary requirements for these nutrients. (Boehne, Tr. 2739; Grollman, Tr. 1682 (Exhibit P–84), 1685 (Exhibit P–85); Hodges, Tr. 2933–37 (Exhibit P–181), 2939–40; Herbert, Tr. 9898 (Exhibit P–232), 9899–9901 (Exhibit P–468); Mickelsen, Tr. 2448 (Exhibit P–167); Hodges, Tr. 2942 (Exhibit P–183); Swain, Tr. 171–175, 180–182; Weissenberg, Tr. 8760 (Exhibit P–575, P–583))

7. It will prove beneficial to consumers and simplify the task of consumer education to provide for use of the term "recommended daily allowance" (RDA) as a substitute for "minimum daily requirement" (MDR). (Sebrell, Tr. 26181; WD–G–Gullberg, Q&A 21)

8. The "Recommended Dietary Allowances," revised periodically by the Food and Nutrition Board of the National Research Council, National Academy of Sciences, represent established nutrient levels that are quantitatively high enough to provide for the adequate intake of essential nutrients under the wide variety of conditions that exist in this country for essentially all of the normal healthy persons in the United States. Furthermore, these levels are reviewed, discussed, and accepted by numerous scientists and, therefore, are considered to be extremely reliable. (Hodges, Tr. 2880, 2919, 2964–65; Grollman, Tr. 1670, 1763; Mickelsen, Tr. 2438–39; Herbert Tr. 9865–67; WD–G–Harrison, Q&A 23; Schweigert, Tr. 8257, 8260; WD–G–Gullberg, Q&A 19; Exhibit P–651; Sebrell, Tr. 26, 181)

9. Publication No. 1694 of the National Academy of Sciences entitled "Recommended Dietary Allowances, Seventh Revised Edition, 1968, A Report of the Food and Nutrition Board, National Research Council," and subsequent editions, should be used as the source of authentic and reliable information on which to base recommended daily allowances of nutrients. (WD–3A–Sebrell, Q&A 9, 10, 18, 19, Tr. 26181; Hodges, Tr. 2917; Herbert, Tr. 9865; WD–G–Harrison, Q&A 14, 23, 26, 27; WD–G–Ross, Q&A 65)

10. Recommended dietary allowances adapted from publication No. 1694 of the National Academy of Sciences are sufficiently above the average requirement for particular nutrients to cover the needs of between 95 percent and 99 percent of the normal healthy population. (Hodges, Tr. 7083; WD–46–Olsen, page 7, Tr. 29466–67; Jukes, Tr. 28688; Briggs, Tr. 28761; Mayer, Tr. 28865–66; Stokstad, Tr. 26742; Goodhart, Tr. 30169–70; Stare, Tr. 29280; WD–G–Ross P–5)

11. The essential vitamins are: Vitamins A, C (ascorbic acid), D, E, K, B_1 (thiamine), B_2 (riboflavin), niacin vitamin B_6, folic acid (folacin), pantothenic acid, vitamin B_{12}, and biotin. (WD–3A–Sebrell, Q&A 4, WD–G–Harrison, Q&A 20)

12. The essential mineral nutrients are: Calcium, chlorine, iron, magnesium, phosphorus, potassium, sodium, sulfur, copper, fluorine, iodine, manganese, and zinc. (WD–3A–Sebrell, Q&A 4)

13. The values for vitamins and minerals in the table entitled "Recommended Daily Dietary Allowances," in publication No. 1694 of the National Academy of Sciences, and values for essential nutrients derived from sections in the text when no values are given in the aforementioned table, may be used as a basis for fully informing the purchaser of the nutrient value of a food for special dietary use. A reasonable and scientifically accurate adaptation of the table and text referred to above reads as follows:

Vitamins and minerals	Unit of measurement	Infants and children under 4 years of age	Adults and children 4 or more years of age	Pregnant or lactating women
Vitamin A	International units	2,500	5,000	8,000
Vitamin D	do	400	400	400
Vitamin E	do	10	30	30
Vitamin C	Milligrams	40	60	60
Folic acid	do	0.2	0.4	0.8
Thiamine	do	0.7	1.5	1.7
Riboflavin	do	0.8	1.7	2.0
Niacin	do	9.0	20	20
Vitamin B_6	do	0.7	2.0	2.5
Vitamin B_{12}	Micrograms	3	6	8
Biotin	Milligrams	0.15	0.3	0.3
Pantothenic Acid	do	5.0	10	10
Calcium	Grams	0.8	1.0	1.3
Phosphorus	do	0.8	1.0	1.3
Iodine	Micrograms	70	150	150
Iron	Milligrams	10	18	18
Magnesium	do	200	400	450
Copper	do	1.0	2.0	2.0
Zinc	do	8.0	15	15

14. There are scientific and medical justifications for selecting an age separation at under 4 years of age for the purpose of establishing a basis for dietary supplements. (WD–33–Krehl, pages 5–8; WD–33–Emerson, pages 4–5; WD–43–Filer, page 21) The recommended daily dietary allowance of the Food and Nutrition Board, NAS–NRC, for 2- to 3-year olds can safely be used by infants and 1- to 2-year olds, and the maximum values for the under-4-years-old group can be used for all infants and children under 4 years of age. (WD–33–Krehl, pages 6–7; Tr. 2, 877–8, Hodges; WD–43–Graham; and WD–43–Filer, page 21)

15. There are demonstrable distinctions among the nutritional requirements of infants and young children, and pregnant or lactating women, as compared to the nutritional requirements of adults. (Michelsen, Tr. 2424–2427; Grollman, Tr. 1665; Hodges, Tr. 2877–2878; Herbert, Tr. 9944; WD–3A–Sebrell, Q&A 15, 16, 19, and 28; WD–G–Ross, Q&A 23, Boehne, Tr. 2741–2759)

16. The label of a food purported or represented to be for special dietary use by reason of its vitamin or mineral properties, should bear a statement revealing the proportion or percentage of the recommended daily allowance of the particular vitamins or minerals contained in a specified quantity of the product when consumed during a period of 1 day. This is both reasonable and necessary for an intelligent scientific evaluation of the article. (Herbert, Tr. 9944–5; Grollman, Tr. 1762; Hodges, Tr. 2964–6; WD–G–Ross, Q&A 63; Michelsen, Tr. 2635–7)

17. When a food is purported or represented to be for special dietary use because of certain vitamin or mineral properties, and is offered for use by more than one of the groups for which the recommended daily allowances for the vitamins and minerals are set, it then becomes necessary to state the percent or proportion of the recommended daily allowances for each group separately. (Herbert, Tr. 9945–6; WD–G–Gullberg, Q&A 17; Hodges, Tr. 2966–7)

18. It makes no difference from a scientific point of view when the proportion of the recommended daily allowance amounts to a whole number and a fraction, if the fraction is discarded. (Herbert, Tr. 9946)

19. The term "artificial sweetener" means a sweetening substance not used

in normal metabolism as a source of calories. (WD–G–Levine, Q&A 75–77, 81; WD–G–Ricketts, Q&A 34–35, 39)

20. Occasionally, in the manufacturing of foods not intended for special dietary uses, it is possible to achieve certain food characteristics only through the use of an artificial sweetener as a constituent of the food. When this situation exists, it is reasonable to consider the use of the artificial sweetener in such a food not to be for the purpose of reducing or maintaining body weight, or for use in the diet of diabetics: *Provided*, That no label reference is made to the caloric reduction or presence of the artificial sweetener in the food, other than the simple listing of the artificial sweetener as an ingredient. (WD–G–Moses, Q&A 21, 23–31; WD–G–Levine, Q&A 213, 214)

21. For the purposes of dietary evaluation and nutritional characteristics an infant should be considered to be a person 12 months of age or less. (Mickelsen, Tr. 2511; Lowe, Tr. 12, 568–70)

22. The term "serving" means that reasonable quantity of food suitable for or practicable of consumption as a part of a meal by an adult male engaged in light physical activity, or by an infant or child when the article purports or is represented to be for infant feeding or child consumption. (WD–G–Dawson, Q&A 17–20; Mickelsen, Tr. 2514, Exhibit P–718, P–723; WD–G–Gullberg, Q&A 42, 43; WD–G–Ross, Q&A 57)

23. Among dietitians and nutritionists it is customary to describe quantities of foods in units of measure thought to be readily understood by consumers such as teaspoonfuls, tablespoonfuls, cupfuls, and slices. (WD–G–Dawson, Q&A 21; WD–G–Gullberg, Q&A 42; WD–G–Ross, Q&A 58; Mickelsen, Tr. 2514)

24. The standard measuring cup is 8 fluid ounces or approximately 240 milliliters. A tablespoonful is the equivalent of 3 teaspoonfuls, approximately one-half fluid ounce, or about 15 milliliters. A teaspoon holds one-sixth fluid ounce or about 5 milliliters. (WD–G–Dawson, Q&A 22–25; WD–G–Gullberg, Q&A 44–47, 49)

25. Persons suffering from diabetes mellitus are known as "diabetics." (WD–G–Ricketts, Q&A 85; WD–G–Levine, Q&A 171; Exhibit P–1082)

26. There is no nutritional difference between a vitamin provided by a synthetic source and the same vitamin provided by a natural source, but the natural source may contain other ingredients which may limit the absorbability of the vitamin provided by the natural source. (Herbert, Tr. 9937–38, 9984, 10050)

27. A large number of dietary supplements on our domestic market advertise or otherwise call attention to the claim that their ingredients are "natural" or derived from "natural sources." (Swain, Tr. 234–477; Weissenberg, Tr. 6554–56, 8757–58; Exhibit P–35, P–40–43, P–54, P–66–68, P–70, P–74)

28. More than half of the people in the United States are likely to choose foods for special dietary uses that contain ingredients described as "natural" or derived from "natural sources" in the belief that "natural" foods are superior to "synthetic foods." (P–1151, pages B10–11, Q 16, Q 16a, Q 16b; WD–G–Perloff, A 44, 45, 46, 49)

29. For a considerable time, the labeling, promotion, and advertising of various foods offered for special dietary uses have contained statements claiming or suggesting that these products were adequate or effective, by virtue of their vitamin or mineral content, for the treatment, prevention, or mitigation of a large variety of diseases and symptoms. (Swain, Tr. 153, 157–8, 192–3, 199–200, 212–3, 224–5, 239, 254, 255, 264–72, 276–7, 286, 288–9, 314, 352, 354–6, 379, 385, 394, 396, 443–6, 453, 469–71, 478, 487–9; Weissenberg, Tr. 5819, 5980, 6017, 6027, 6049, 6152, 6193, 6347, 6416, 6436, 6443, 6450)

30. There is no rationale for allowing or encouraging the promotion and sale of dietary supplements of vitamins and/or minerals to the general American population for the purpose of treating, preventing, or curing diseases or symptoms. To the contrary, there is ample reason to discourage such methods of promoting foods for special dietary use. (Grollman, Tr. 1771–2; Mickelsen, Tr. 2520; Schweigert, Tr. 8233–4; Herbert, Tr. 9961; WD–G–Ross, Q&A 62; Hodges, Tr. 2994–5; Thiessen, Tr. 26,755–6; Briggs, Tr. 28,750–1; Unglaub, Tr. 28,942–3; Wallerstein, Tr. 28,986–90; Mayer, Tr. 28,868, 28,892–8; Gershoff, Tr. 29,108–9)

31. Lay persons are incapable of determining, by themselves, whether they have, or are likely to develop, vitamin or mineral deficiencies. (Grollman, Tr. 1771–2, 1782; Herbert, Tr. 9961, 9979–80, 10,029; Unglaub, Tr. 28,942; Wallerstein, Tr. 28,989; Hodges, Tr. 2994–5; Mickelsen, Tr. 2520; Mayer, Tr. 28,892–3)

32. Since there are persons in the United States who are receptive to the suggestions that human ailments, to a great degree, can be prevented, treated, and cured by using vitamins and minerals, it is clear that representations or suggestions that certain symptoms, ailments, or diseases result from failure to ingest adequate amounts of vitamins and minerals will lead substantial numbers of the population to conclude that they must buy dietary supplements or other foods promoted for their vitamin or mineral qualities in order to prevent, cure, or treat certain diseases or symptoms. (WD–G–Perloff, Q&A 23–5; Weissenberg, Tr. 7738–9, 8474–7; WD–G–Gullberg; Q&A 14)

33. Literally true and scientifically accurate statements concerning the ultimate physiological result of vitamin or mineral deficiencies can mislead when made in connection with foods offered for special dietary use based upon their vitamin or mineral content. (Mayer, Tr. 28892–3; Gershoff, Tr. 29120)

34. Vitamin or mineral deficiencies are unrelated to the great majority of symptoms like tiredness, nervousness, and run-down condition. (Herbert, Tr. 10029)

35. When consumers read a label, promotional material, or advertising wherein a literally true statement is made, e.g., "Night blindness is caused by a lack of vitamin A," they may frequently conclude that the symptom will appear in them unless they use the product being promoted, or, on the basis that, even though they may not suffer from the specific symptoms described, the product will be generally good for improving their vision. (WD–G–Perloff, Q&A 30–31)

36. Vitamin and mineral deficiency are considered to be abnormal conditions resulting from inadequate consumption, absorption, transport, or utilization of one or more essential vitamins or minerals. The conditions are characterized by specific clinical signs, symptoms, and/or abnormalities observed in biochemical tests, and used together by physicians to establish the diagnosis. The term "subclinical" and similar ill-defined terms when used to refer to vitamin or mineral deficiencies, in the labeling of foods for special dietary use, are neither informative nor meaningful to consumers. (Mickelsen, Tr. 2537–9; WD–G–Schaefer, Q&A 23, 32–7; Herbert, Tr. 9880–5, 9984–5; Hodges, Tr. 2993–4, 3025; Grollman, Tr. 2023, 2252)

37. Scientifically it is inaccurate to state that the quality of soil in the United States causes abnormally low concentrations of vitamins or minerals in the food supply produced in this country. (Allaway, Tr. 12, 109; Herbert, Tr. 10,003)

38. There is no relationship between the vitamin content of foods and the chemical composition of the soil in which they are grown. (Allaway, Tr. 12,061, 10–063; Mickelsen, Tr. 2620)

39. Mineral nutrients in foods are not significantly affected by storage, transportation, cooking, and other processing. (Schweigert, Tr. 8200, 8223–4; Mickelsen, Tr. 2621)

40. While some vitamins are susceptible to partial destruction through the effects of heat, light, oxidation, and other physical and chemical reactions (Schweigert, Tr. 8200–8223), loss of nutrients from the ordinary effects of cooking, processing, transportation, and storage have not significantly impaired the nutritional qualities of food in the United States. There is no need or scientific justification for recommending, for example, the routine use of dietary supplements of vitamins and minerals to offset losses that occur as a result of these processes. (Schweigert, Tr. 8227–8, 8231; Mickelsen, Tr. 2527, 2642; Herbert, Tr. 9869–70)

41. It is reasonable to prohibit representation or suggestions in labeling, promotional material, or advertising of foods offered for special dietary use based on vitamin and mineral qualities, that imply that a dietary deficiency of vitamins or minerals exists or is threatened in the United States by virtue of loss of nutrients which occur from processing, transportation, storage, and cooking. (Schweigert, Tr. 8233–4)

42. Table salt has been fortified with iodine in the United States for many years. The usual level of fortification with potassium iodide is 0.01 percent by weight, which is equivalent to 0.0076 percent iodine (or about 0.01 percent iodine). This is commonly known as iodized salt. (Boehne, Tr. 2777–8; Herbert, Tr. 9948)

V 38 I 13 J AN 19 73 XUM

43. There is no necessity for iodized salt to contain on its label a statement of the percent or proportion of the recommended daily allowance for iodine provided in a specified serving, particularly since there is no specific serving size for salt and it is used in widely varying quantities. (Herbert, Tr. 9948; WD–G–Dawson, Q&A 29)

44. The use of dietary supplements of vitamins and minerals to ensure against a specific inadequacy of intake of these nutrients is a function clearly distinguished from the use of vitamin and mineral preparations for therapeutic purposes by the administration of large amounts of specific nutrients for the correction of disorders in humans, and the same product should not be used for both functions. (Grollman, Tr. 1680–82; Herbert, Tr. 9896; Hodges, Tr. 2937–40, 2970–71; WD–G–Harrison, Q&A 22; WD–3A–Sebrell, Q&A 44; WD–G–Schaefer, Q&A 36, 37).

45. It is often impractical to supply the iron needs of adult women with conventional foods, and iron supplementation is often advisable. (WD–3A–Sebrell, p. 17, Tr. 26088–89; Hodges, Tr. 3068–69; WD–46–Olson, pp. 10–11; WD–46–Wallerstein, pp. 12–13; WD–46–White, pp. 13–14; WD–46–Schwartz, pp. 6–7; WD–46–Margen, p. 7, Tr. 28713–14; Exhibit P–651, p. 59). Many women of childbearing age, particularly including those who are pregnant, ingest inadequate amounts of iron in the diets which they consume (WD–46–Mayer, pp. 14–17; Hodges, Tr. 6738; WD–65–Vitale, p. 5, Tr. 31914; WD–46–Unglaub, p–30; WD–46–Schwartz, pp. 6–10; WD–46–Wallerstein, pp. 9, 11–12, Tr. 28976; WD–46–Olson, p. 11; WD–46–Margen, p. 10; Goodhart, Tr. 30179; WD–46–Briggs, p. 27; WD–46–White, pp. 12–14; Krehl, Tr. 27218–19; Exhibit P–651, pp. 58–59). The iron intake of many adolescent girls and menstruating women is 10 milligrams or less each day. This value is consistent with the 1,500 to 2,000 calorie diet of sedentary women. In addition, the iron requirements of infancy and of the latter half of pregnancy are clearly in excess of what may be obtained from a conventional unfortified diet. (Exhibit 0–612–46, pp. 120–121).

PROPOSED CONCLUSIONS OF LAW

A. With respect to § 125.1 *Definitions and interpretations of terms:*

The Commissioner has carefully reviewed the history of the "special dietary" designation for foods to which nutrients have been added. At the time the original regulations relating to "special dietary" foods were being developed, it appeared reasonable, on the basis of nutrition knowledge, to classify fortified foods as special, and to require labeling under 21 CFR Part 125. Over the years the science of nutrition has moved forward, and the general requirement for nutrients, on a daily basis, have been better established. In addition, foods of all kinds are recognized as the preferred source of nutrients. The majority of those foods categorized as "special dietary foods" in the past for purposes of requiring nutrient labeling are in fact intended for consumption by the general population as conventional foods.

The development of general nutrition labeling regulations, available for use on all foods, has become of primary concern to all consumers, because of the ever increasing complexity of the conventional food supply. The use of the special dietary labeling under 21 CFR Part 125 for conventional foods with added nutrients can no longer be considered adequate to provide the consumer with a complete understanding of proper use of such foods in the diet. The Commissioner has, therefore, established that nutrition labeling (21 CFR 1.17) is the required form of labeling for foods with added nutrients, or for which the manufacturer makes nutritional claims or provides nutrition information on the label or in the labeling or advertising.

It is recognized that high levels of nutrient additions may occur for which labeling for special dietary uses is appropriate. Thus, a relationship between nutrition labeling (21 CFR 1.17) and the standard of identity for dietary supplements (21 CFR 80.1) has been established, providing that food with nutrients added up to levels of 50 percent of the U.S. Recommended Daily Allowance (U.S. RDA) will be labeled under 21 CFR 1.17, and that food with nutrients added at levels between 50 percent and 150 percent of the U.S. RDA or greater will be subject to the provisions of 21 CFR 80.1 and labeled under 21 CFR 1.17.

Within 3 broadly defined groups (infants and children under 4 years of age, adults and children 4 or more years of age, and pregnant or lactating women) values can be selected from the almost 390 RDA values, as well as information on the needs of each group for 4 nutrients for which there are no RDA's. In order to provide the consumer meaningful labeling it is necessary to provide a single level of RDA values for each of the above groups.

Selection of reasonable values for labeling purposes was done primarily by choosing the highest RDA value for each of the three groups. This was done so that the needs of all individuals in the age group would be included, recognizing that the needs of many would be surpassed by the selected value. Since there is no danger to health inherent in this approach, and it does not significantly affect the traditional concept of teaching consumers about the nutrient contribution of specific foods, the selection which is made is reasonable for the purpose stated.

The Commissioner realizes that legal challenge may be brought against the new approach to nutrition labeling in 21 CFR 1.17. If 21 CFR 1.17 is found invalid for any reason it will be necessary to resume the labeling of foods with added nutrients, or for which nutritional claims are made, under 21 CFR Part 125. The Commissioner is therefore keeping the record on this portion of the hearing open, for this limited purpose, in the event that it becomes necessary to amend this tentative order or to issue a supplemental tentative order to provide for labeling of this type pursuant to 21 CFR Part 125 in lieu of 21 CFR 1.17.

Accordingly, the Commissioner concludes, based on the foregoing statement in conjunction with the findings of facts herein published, that:

1. It is reasonable and necessary, in order to fully inform purchasers of the value of foods for special dietary uses, to define "special dietary use" as set forth in § 125.1(a).

2. It is reasonable and necessary, in order to fully inform purchasers of the value of foods for special dietary uses, to establish "recommended daily allowances" for essential nutrients as set forth in § 125.1(b).

3. The "recommended daily allowances" as set forth in § 125.1(b) are reasonable.

4. The definition of "artificial sweetener," as set forth in § 125.1(c), is reasonable.

B. With respect to § 125.2 *General label statements; dietary properties; value; placement:*

Over the years there have been a number of ingredients or products marketed as nutrients and nutritional supplements, which have not been shown to be essential in human nutrition. This point was discussed in considerable detail during the 1968–70 special dietary hearings held by the Food and Drug Administration. Among ingredients or products of this type are rutin, other bioflavonoids, paraaminobenzoic acid, inositol, and similar ingredients, products, and compounds. These ingredients or products have frequently been combined with vitamins and minerals or otherwise represented as a type of nutritional supplement. In these situations there is a false representation that these ingredients or products have nutritional value. The Commissioner has concluded that ingredients or products of this type may not properly make direct or implied nutritional claims, and that in no instances can these be represented in any way that suggests a nutritional value. Combining these products with added vitamins and/or minerals in any food, or adding these ingredients to any food for which nutrition labeling is used, or calling attention to these products in any manner which would be considered to imply some nutritional benefit, is inherently misleading. Labeling of such ingredients or products may not state that their usefulness in human nutrition has not been established, or otherwise disclaim dietary or therapeutic value, since such statements are also misleading. The Commissioner recognizes that there are individuals who desire to purchase ingredients or products of this type for various reasons. These individuals have a right to obtain these ingredients or products as long as they are truthfully labeled. Thus, ingredients or products of this type may properly be marketed as individual ingredients, or products, or mixtures thereof, provided no nutritional or dietary supplement claims are made.

Accordingly, the Commissioner further concludes, based on the foregoing statement in conjunction with the finding of facts herein published, that it is reasonform and necessary, in order to fully inform purchasers of the value of foods for special dietary uses, to require that the labels of such foods bear a statement as required and limited by § 125.2 as set forth in this tentative order.

C. With respect to § 125.3 *Label statements relating to vitamins and minerals*:

With the development of nutrition labeling (21 CFR 1.17) the use of special dietary labeling under 21 CFR Part 125 will be for all practical purposes limited to those articles which purport or are represented to supply a special dietary need that exists by reason of a physical or physiological condition, food represented for use as the sole item of the daily diet, and dietary supplements as provided for in 21 CFR 80.1.

The Commissioner recognizes there are foods which by their nature may contain nutrients in excess of 100 percent of the U.S. RDA per serving or reasonable daily intake. The Commissioner further recognizes the need for reasonable ranges for individual nutrients in dietary supplements above and below the U.S. RDA. The Commissioner further recognizes that departures from the U.S. RDA are appropriate for certain types or classes of foods for special dietary uses, e.g., chemically defined diets used in the dietary management of critically ill patients.

Accordingly, the Commissioner concludes, having considered the findings of fact and other relevant information, that it is reasonable and necessary, in order to fully inform purchasers of the value of foods for special dietary uses, to require that the labels of such foods, by reason of their vitamin or mineral content, bear a statement of the percentages of the recommended daily allowances for such vitamins and minerals. Nutrition labeling under 21 CFR 1.17 is not sufficiently precise for these special types of food.

TENTATIVE ORDER

Therefore, on the basis of the foregoing findings of fact and conclusions of law drawn therefrom: *It is ordered*, That the stay of effective date of §§ 125.1 through 125.3, promulgated December 14, 1966 (31 FR 15730), be ended, and that Parts 1, 3, and 125 of Title 21 of the Code of Federal Regulations be amended as follows:

PART 1—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT AND THE FAIR PACKAGING AND LABELING ACT

§ 1.11 [Revoked]

1. The provisions of § 1.11 *Special dietary uses* are hereby revoked.

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

§ 3.9 [Revoked]

2. The provisions of § 3.9 *Label declaration of vitamin E in food for special dietary use* is hereby revoked.

§ 3.32 [Revoked]

3. The provisions of § 3.32 *Label declaration of vitamin B_{12} and folic acid in food for special dietary uses* is hereby revoked.

§ 3.46 [Revoked]

4. The provisions of § 3.46 *Interpretations of orders relating to dietary supplements; vitamin and mineral-fortified foods; foods for special dietary use* are hereby revoked.

PART 125—LABEL STATEMENTS CONCERNING DIETARY PROPERTIES OF FOOD PURPORTING TO BE OR REPRESENTED FOR SPECIAL DIETARY USES

5. The provisions of §§ 125.1, 125.2, and 125.3 are revised to read as follows:

§ 125.1 Definitions and interpretations of terms.

The definitions and interpretations of terms contained in section 201 of the Federal Food, Drug, and Cosmetic Act shall be applicable with the following additions:

(a) The term "special dietary use" as applied to food (including dietary supplements) used by man means a particular use for which an article purports or is represented to be used, including but not limited to the following:

(1) Supply a special dietary need that exists by reason of a physical, physiological, or other condition, including but not limited to the conditions of convalescence, pregnancy, lactation, infancy, allergic hypersensitivity to food, underweight, overweight, diabetes mellitus, or the need to control the intake of sodium. The use of an artificial sweetener in a food, except when specifically and solely used for achieving a physical characteristic in the food which cannot be achieved with sugar or other nutritive sweetener, shall be considered a use for regulation of the intake of calories and available carbohydrate, or for use in the diets of diabetics.

(2) Supplying a vitamin, mineral, or other dietary property for use by man to supplement his diet by increasing the total dietary intake, except for foods for which nutrition labeling is used as required pursuant to § 1.17 of this chapter.

(3) Supplying a special dietary need by reason of being a food for use as the sole item of the diet.

(b) The term "U.S. Recommended Daily Allowance (U.S. RDA)" means the following daily amounts of the following vitamins and minerals:

Vitamins and minerals[1]	Unit of measurement	Infants and children under 4 years of age	Adults and children 4 or more years of age	Pregnant or lactating women
Vitamin A	International units	2,500	5,000	8,000
Vitamin D	do	400	400	400
Vitamin E	do	10	30	30
Vitamin C	Milligrams	40	60	60
Folic acid	do	0.2	0.4	0.8
Thiamine	do	0.7	1.5	1.7
Riboflavin	do	0.8	1.7	2.0
Niacin	do	9.0	20	20
Vitamin B_6	do	0.7	2.0	2.5
Vitamin B_{12}	Micrograms	3	6	8
Biotin	Milligrams	.15	0.3	0.3
Panthothenic Acid	do	5.0	10	10
Calcium	Grams	0.8	1.0	1.3
Phosphorus	do	0.8	1.0	1.3
Iodine	Micrograms	70	150	150
Iron	Milligrams	10	18	18
Magnesium	do	200	400	450
Copper	do	1.0	2.0	2.0
Zinc	do	8.0	15	15

[1] The following synonyms may be added in parentheses immediately following the name of the vitamin:

Vitamin	*Synonym*
Vitamin C	Ascorbic acid.
Folic acid	folacin.
Riboflavin	vitamin B_2.
Thiamine	vitamin B_1.

(c) In addition to the vitamins and minerals listed in paragraph (b) of this section, vitamin K and the minerals chlorine, potassium, sodium, sulfur, fluorine, and manganese are recognized as essential in human nutrition, but no U.S. Recommended Daily Allowance (U.S. RDA) has been established for these nutrients.

(d) The term "artificial sweetener" means a sweetening substance not used in normal metabolism as a source of calories.

(e) The term "infant" means a person not more than 12 months of age.

(f) The term "serving" means that reasonable quantity of food suited for or practicable of consumption as part of a

V 38 I 13 JAN 19 73 XUM

meal either by an adult male engaged in light physical activity, or by an infant or child when the article purports or is represented to be for infant feeding or child consumption. A label statement regarding a serving, as used in this part, shall be in terms of a convenient unit of such food or a convenient unit of measure that can be readily understood by purchasers of such food, e.g., a serving may be expressed in terms of slices, cookies, or wafers, or in terms of ounces, fluid ounces, teaspoonfuls, tablespoonfuls, or cupfuls. A teaspoonful shall be considered to mean 5 milliliters (approximately ⅙ fluid ounce) in volume; a tablespoonful shall be considered to mean 15 milliliters (approximately ½ fluid ounce) in volume; and a cupful shall be considered to mean 240 milliliters (approximately 8 fluid ounces) in volume.

(g) The term "diabetic" means a person having diabetes mellitus.

(h) Any product containing more than the upper limit of the U.S. RDA of a vitamin or mineral is a drug, except for a food represented for use solely under medical supervision in the dietary management of specific diseases and disorders.

§ 125.2 General label statements; dietary properties; value; placement.

(a) If a food purports or is represented to be for any special dietary use, unless covered by other regulations, the principle display panel of its label shall bear a conspicuous statement of the usefulness of the food, limited to a listing of the dietary properties upon which such use is based: *Provided, however*, That if insufficient space is available on the principle display panel, the information panel may be used (21 CFR 1.8d), if such use is consistent with § 1.9 of this chapter. Such statement shall show the presence or absence of any substance, any alteration of the quantity or character of any constituent, and any other special dietary property of such food upon which such use is based.

(b) A food which purports or is represented to be a food for special dietary use shall be deemed to be misbranded under sections 201(n) and 403 (a) and (j) of the act (21 U.S.C. 321(n), 343 (a) and (j)), if its labeling bears any statement, vignette, or other printed or graphic matter that represents, suggests, or implies:

(1) That the food, because of the presence or absence of certain vitamins and/or minerals, is adequate or effective in the prevention, cure, mitigation, or treatment of any disease or symptom, except that the label may state that the food is a source of an essential nutrient and that this nutrient is important for good nutrition and health, and except that this provision shall not apply to foods represented for use solely under medical supervision in the dietary management of specific diseases and disorders.

(2) That a diet of ordinary foods cannot supply adequate amounts of nutrients.

(3) That the lack of optimum nutritive quality of a food, by reason of the soil on which that food is grown, is or may be responsible for an inadequacy or deficiency in the daily diet.

(4) That the storage, transportation, processing, or cooking of a food is or may be responsible for an inadequacy or deficiency in the quality of diets.

(5) That the food has dietary properties when such properties are of no significant value or need in human nutrition. Ingredients of products such as rutin, other bioflavonoids, para-aminobenzoic acid, inositol, and similar substances which have in the past been represented as having nutritional properties but which have not been shown to be essential in human nutrition may not be combined with vitamins and/or minerals, added to food labeled in accordance with this section, or otherwise used or represented in any way which states or implies nutritional benefit. Ingredients or products of this type may be marketed as individual products or mixtures thereof: *Provided*, That the possibility of nutritional, dietary, or therapeutic value is not stated or implied, e.g., their labeling does not state that their usefulness in human nutrition has not been established and does not otherwise disclaim nutritional, dietary, or therapeutic value.

(6) That a natural vitamin in a food is superior to an added or synthetic vitamin, or that there is a difference between vitamins naturally present and those that have been added.

§ 125.3 Label statements relating to vitamins and minerals.

(a) If a food purports or is represented to be for special dietary use because of vitamin or mineral properties, the label shall bear a statement of the percentage of the U.S. RDA of such vitamins and minerals, as set forth in § 125.1(b), suplied by such food when consumed in a specified quantity during a period of 1 day. The quantity specified shall be a reasonable quantity suitable for and practicable of consumption within 1 day. The order in which the nutrients appear on the label shall be in the order listed in § 125.1(b), except when other regulations indicate otherwise. Immediately preceding the declaration of vitamin and mineral content, the following heading shall be stated, "Percentage of U.S. Recommended Daily Allowances (U.S. RDA)". If such purported or represented special dietary use is for persons within one or more groups for which the recommended daily allowance is set, such statement shall include the percentage for each age group. When such proportion or percentage is a whole number and a fraction or a whole number and a decimal, it may be expressed as the whole number disregarding the fraction or decimal. The total quantity of vitamins or minerals in a food shall be no less than the amount declared, and no more than a reasonable amount above the declared quantity. Reasonable variations caused by heat, light, oxidation, storage, transportation, or unavoidable deviations in good manufacturing practice are recognized.

(b) The requirements of this section shall not apply to iodized salt, when the declared content of the iodine compound in the salt is equivalent to 0.01 percent by weight iodine.

Any interested person whose appearance was filed at the hearing may, on or before March 20, 1973, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, MD 20852, written exceptions thereto. Exceptions shall point out with particularity the alleged errors in the proposed findings of fact and tentative order, and shall contain specific references to the pages of the transcript of testimony and to the exhibits on which the exceptions are based. Exceptions and accompanying briefs should be submitted in quintuplicate.

Dated: January 12, 1973.

CHARLES C. EDWARDS,
Commissioner of Food and Drugs.

[FR Doc.73-997 Filed 1-18-73;8:45 am]

[21 CFR Parts 3, 20]

FROZEN DESSERTS

Mellorine, Parevine; Proposal To Establish Standards of Identity

The White House Conference on Food, Nutrition, and Health was held in December 1969. The final report of the conference made many recommendations regarding food standards promulgated under Section 401 of the Federal Food, Drug, and Cosmetic Act. Among these were recommendations:

1. That a standard of characterization for food should specify the characterizing properties or ingredients of the food, and perhaps establish a required minimum level for them, but should not specify other ingredients that may be used by chemical name.

2. That a complete statement of ingredients be required on every food label, including labels of food covered by Government standards.

3. That technical chemical designations be simplified to make the statement of ingredients more meaningful and understandable to consumers.

4. That informative generic names should be considered in place of the over simplified "imitation" label. The term "imitation" on product labels has erroneously been applied not only to new products that are inferior to the traditional foods they resemble, but also to new products that are equal or superior to traditional foods.

A vegetable fat frozen dessert resembling ice cream and known as "mellorine" was first marketed in Texas in 1942. Since that time 25 States have either established regulations for or in some other way allowed distribution of such frozen dessert products resembling ice cream. Included in this group of frozen desserts is the product known as "parevine," which is similar to mellorine but contains no milk or meat or milk or meat derived ingredients. Federal definitions and standards of identity have been established for frozen desserts which do not permit fat or oil ingredients other than milkfat, and a formal statement of policy or interpretation (21 CFR 3.39) has been issued to require the name "imitation ice cream" on vegetable fat products made in semblance of ice cream. The conflicting provisions of regulations promulgated pursuant to the Federal Food, Drug, and Cosmetic Act with the various State regulations have had the effect of inhibiting the movement of these products in interstate commerce. Since mellorine and parevine now appear to be the common or usual names of these products, the Commissioner proposes to revoke § 3.39, and establish identity standards for these foods.

Other products which resemble ice cream, and which do not conform to either of the standards set forth below for mellorine and parevine, are theoretically possible. It is not the intention of the Commissioner of Food and Drugs, in proposing identity standards for mellorine and parevine, to preclude the manufacture of such frozen desserts under appropriately descriptive names. However, standards of identity for such products are not proposed at this time because the products do not yet appear to be significant items of commerce, as are mellorine and parevine.

Accordingly, it is proposed that:

§ 3.39 [Revoked]

1. Part 3 be amended by revoking § 3.39.

2. Part 20 be amended by adding two new sections to provide for standards of identity for mellorine and parevine, as set forth below:

§ 20.— Mellorine; identity.

(a) *Description.* Mellorine is the frozen food produced by freezing, while stirring, a pasteurized mix consisting of safe and suitable ingredients, including but not limited to nonfat milk solids and animal or vegetable fat, only part or which may be milkfat. Mellorine contains not less than 6.0 percent by weight of fat, and nonfat milk solids from milk, skim milk or buttermilk in such quantity that the milk protein contributed thereby is not less than 3 percent by weight of the finished food. Mellorine is sweetened with nutritive sweetener and is flavored. Mellorine contains not less than 1.6 pounds of total solids to the gallon and weighs not less than 4.5 pounds to the gallon.

(b) *Fortification.* Vitamin A is present in a quantity which will insure that 40 International Units (I.U.) are available for each gram of fat in mellorine. This requirement will be deemed to have been met if reasonable overages, within limits of good manufacturing practice, are added to insure that the required vitamin level is maintained throughout the expected shelf life of the food under customary conditions of distribution.

(c) *Definitions.* For the purposes of this section:

(1) A pasteurized mix is one which has been heated uniformly to one of the temperatures specified in the table below, and held continuously at or above that temperature for the specified time.

Temperature	*Time*
155° F	30 minutes
175° F	25 seconds

(2) Safe and suitable ingredients are functionally suitable substances that are not food additives or color additives within the meaning of section 201 (s) or (t) of the Federal Food, Drug, and Cosmetic Act, or if they are addivites as so defined, they are used in conformity with regulations established pursuant to section 409 or 706 of the act. They are used only in such amounts as are reasonably necessary to accomplish their intended effect.

(d) *Methods of Analysis.* Fat content shall be determined by the method contained in the "Official Methods of Analysis of the Association of Official Analytical Chemists," 11th Ed., 1970—"Fat, Roese-Gottlieb Method—Official Final Action," section 16.228.[1]

(e) *Nomenclature.* The name of the food is "mellorine." The food shall be labeled in compliance with Part 1 of this chapter. For the purposes of § 1.12 of this chapter: (1) An artificial flavor simulating the characterizing flavor shall be deemed to predominate:

(i) In the case of vanilla beans or vanilla extract used in combination with vanillin if the amount of vanillin used is greater than 1 ounce per unit of vanilla constituent, as that term is defined in § 22.1(c) of this chapter.

(ii) In the case of fruit or fruit juice used in combination with artificial fruit flavor, if the quantity of the fruit or fruit juice used is such that, in relation to the weight of the finished mellorine, the weight of the fruit or fruit juice, as the case may be (including water necessary to reconstitute partially or wholly dried fruits or fruit juices to their original moisture content) is less than 2 percent in the case of citrus mellorine, 6 percent in the case of berry or cherry mellorine, and 10 percent in the case of mellorine prepared with other fruits.

(iii) In the case of nut meats used in combination with artificial nut flavor, if the quantity of nut meats used is such that, in relation to the finished mellorine, the weight of the nut meats is less than 2 percent.

(iv) In the case of two or more fruits or fruit juices, or nut meats, or both, used in combination with artificial flavors simulating the natural flavors and dispersed throughout the food, if the quantity of any fruit or fruit juice or nut meat is less than one-half the applicable percentage specified in paragraph (e) (ii) or (iii) of this section. For example, if a combination mellorine contains less than 5 percent of bananas and less than 1 percent of almonds it would be "Artificially flavored banana-almond mellorine." However, if it contains more than 5 percent of bananas and more than 1 percent of almonds it would be "Banana-almond flavored mellorine."

(2) If two or more flavors of mellorine are distinctively combined in one package, e.g., "Neapolitan" mellorine, the applicable provisions of this paragraph shall govern each flavor of mellorine comprising the combination.

(f) *Label declaration.* The common name of each of the ingredients used shall be declared on the label as required by the applicable sections of Part 1 of this chapter and nutrition labeling shall be presented in conformity with the requirements prescribed in § 1.17 of this chapter, except that:

(1) Concentrated skim milk, nonfat dry milk, and reconstituted skim milk prepared by addition of water to concentrated skim milk or nonfat dry milk may be declared as "skim milk."

(2) Concentrated milk, dried milk, and reconstituted milk prepared by addition of water to milk or dried milk may be declared as "milk."

(3) Sweetcream buttermilk, concentrated sweetcream buttermilk, and dried sweetcream buttermilk may be declared as "buttermilk."

(4) Cheese whey, concentrated cheese whey, and dried cheese whey may be declared as "whey."

(5) Cream, dried cream, plastic cream (sometimes known as concentrated milkfat), and anhydrous milkfat may be declared as "cream."

§ 20.— Parevine.

(a) *Description.* Parevine is the frozen food produced by freezing, while stirring, a pasteurized mix consisting of safe and suitable ingredients including, but not limited to, vegetable fat and sources of egg or vegetable protein; but excluding milk, meat, and any milk or meat derived ingredients. Parevine contains not less than 6 percent by weight of fat and not less than 3 percent by weight of protein. Parevine is sweetened with nutritive sweetener and is flavored. Parevine contains not less than 1.6 pounds of total solids to the gallon and weighs not less than 4.5 pounds to the gallon.

(b) *Fortification.* Vitamin A is present in a quantity which will insure that 40 International Units (I.U.) are available for each gram of fat in parevine. This requirement will be deemed to have been met if reasonable overages, within limits of good manufacturing practice, are added to insure that the required vitamin level is maintained throughout the expected shelf life of the food under customary conditions of distribution.

(c) *Definitions.* For the purposes of this section:

(1) A pasteurized mix is one which has been heated uniformly to one of the temperatures specified in the table below, and held continuously at or above that temperature for the specified time.

Temperature	*Time*
155° F	30 minutes
175° F	25 seconds

(2) Safe and suitable ingredients are functionally suitable substances that are not food additives or color additives

V 38 - 13 JAN 19 73 XUM

within the meaning of section 201(s) or (t) of the Federal Food, Drug, and Cosmetic Act, or if they are additives as so defined, they are used in conformity with regulations established pursuant to section 409 or 706 of the act. They are used only in such amounts as are reasonably necessary to accomplish their intended effect.

(d) *Methods of analysis.* Referenced methods are from "Official Methods of Analysis of the Association of Official Analytical Chemists," 11th Ed., 1970.[1]

(1) Fat content—"Fat, Roese-Gottlieb Method—Official Final Action," section 16.228.

(2) Protein content—"Nitrogen—Official Final Action, Kjeldhl Method," section 16.226.

(e) *Nomenclature.* The name of the food is "parevine." The food shall be labeled in compliance with Part 1 of this chapter. For the purposes of § 1.12 of this chapter:

(1) An artificial flavor simulating the characterizing flavor shall be deemed to predominate:

(i) In the case of vanilla beans or vanilla extract used in combination with vanillin if the amount of vanillin used is greater than 1 ounce per unit of vanilla constituent, as that term is defined in § 22.1(c) of this chapter.

(ii) In the case of fruit or fruit juice used in combination with artificial fruit flavor, if the quantity of the fruit or fruit juice used is such that, in relation to the weight of the finished parevine, the weight of the fruit or fruit juice, as the case may be (including water necessary to reconstitute partially or wholly dried fruits or fruit juices to their original moisture content) is less than 2 percent in the case of citrus parevine, 6 percent in the case of berry or cherry parevine, and 10 percent in the case of parevine prepared with other fruits.

(iii) In the case of nut meats used in combination with artificial nut flavor, if the quantity of nut meats used is such that, in relation to the finished parevine, the weight of the nut meats is less than 2 percent.

(iv) In the case of two or more fruits or fruit juices, or nut meats, or both, used in combination with artificial flavors simulating the natural flavors and dispersed throughout the food, if the quantity of any fruit or fruit juice or nut meat is less than one-half the applicable percentage specified in paragraph (e) (ii) or (iii) of this section. For example, if a combination parevine contains less than 5 percent of bananas and less than 1 percent of almonds it would be "Artificially flavored banana-almond parevine." However, if it contains more than 5 percent of bananas and more than 1 percent of almonds it would be "Banana-almond flavored parevine."

(2) If two or more flavors of parevine are distinctively combined in one package, e.g., "Neapolitan" parevine, the applicable provisions of this paragraph shall govern each flavor of parevine comprising the combination.

[1] Copies may be obtained from Association of Official Analytical Chemists, Post Office Box 540, Benjamin Franklin Station, Washington, DC 20044.

(f) *Label declaration.* The common name of each of the ingredients used shall be declared on the label as required by the applicable sections of Part 1 of this chapter and nutrition labeling shall be presented in conformity with the requirements prescribed in § 1.17 of this chapter.

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 403, 701, 52 Stat. 1046, as amended, 1047, as amended, 1055–1056, as amended by 70 Stat. 919 and 72 Stat. 948; 21 U.S.C. 341, 343, 371) and in accordance with authority delegated to the Commissioner (21 CFR 2.120), interested persons are invited to submit their views in writing (preferably in quintuplicate) regarding this proposal on or before March 20, 1973. Such views and comments should be addressed to the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, MD 20852, and may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: January 12, 1973.

CHARLES C. EDWARDS,
Commissioner of Food and Drugs.

NOTE: Incorporation by reference provisions approved by the Director of the Federal Register, January 15, 1973.

[FR Doc.73–995 Filed 1–18–73;8:45 am]

[21 CFR Parts 18, 19, 20, 27, 45]

CERTAIN STANDARDIZED FOODS

Nutrition Labeling

The Commissioner of Food and Drugs is promulgating elsewhere in this issue of the FEDERAL REGISTER a new § 1.17, establishing nutrition labeling for all foods to which vitamins or minerals are added or for which the manufacturer wishes to include information about nutrient content in labeling or advertising. The Commissioner has concluded that standardized foods, to which the addition of nutrients is optional or mandatory, should be labeled to comply with the new § 1.17 rather than the provisions of 21 CFR Part 125, which has been the case in the past. The new regulation automatically has this effect.

Some existing standards for enriched foods specifically require labeling in compliance with 21 CFR Part 125. To clarify the situation, the Commissioner has concluded that these standards should themselves be amended to refer directly to the new § 1.17 so that no confusion can arise.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201, 401, 403, 701(a), 52 Stat. 1040–1042, 1046–1048, and 1055; 48, 21 U.S.C. 321, 341, 343, 371(a)) and under authority delegated to him (21 CFR 2.120), the Commissioner proposes to amend the following listed provisions in existing standards of identity for foods by replacing each reference to 21 CFR Part 125 with a reference to 21 CFR 1.17, e.g., the reference in § 27.127(e)(1) to "for foods which purport to be or are represented for special dietary uses by regulations promulgated pursuant to section 403(j) of the Federal Food, Drug, and Cosmetic Act" will be changed to read "in § 1.17":

STANDARDS NOW IN EFFECT

21 CFR citation	Subject matter
1. § 18.545(d)	Nonfat dry milk fortified with vitamins A and D.
2. § 19.513(f)	Low sodium colby cheese.
3. § 27.54(c)(2)	Canned pineapple juice.
4. § 27.60(c)(2)(iv)	Canned prune juice.
5. § 27.80(d)(7)	Canned applesauce.
6. § 45.1(b)(2)(v)	Oleomargarine, margarine.

FINAL ORDERS NOT YET CONFIRMED

21 CFR citation	Subject matter	FR citation
1. § 27.158(e)	Orange juice drink	(37 FR 5224)

PROPOSED STANDARDS

1. § 18.2(f)	Milk	(37 FR 18392)
2. § 18.520(f)	Evaporated milk	(37 FR 18392)
3. § 18.525(f)	Concentrated milk	(37 FR 18392)

STANDARDS THAT HAVE BEEN STAYED

1. § 27.120(f)	Orange juice-drink	(33 FR 10713)
2. § 27.125(f)	Canned pineapple-grapefruit juice-drink.	(33 FR 10713)
3. § 27.126(g)	Canned fruit nectars	(33 FR 10713)
4. § 27.127(e)	Cranberry juice cocktail.	(33 FR 10088)
5. § 27.128(e)	Artificially sweetened cranberry juice cocktail.	(33 FR 10088)

In those food standards in which there is presently no reference to 21 CFR Part 125, although enrichment is provided and special dietary food labeling has uniformly been required, e.g., enriched bread and enriched flour, 21 CFR 17.2 and 15.10, it is unnecessary to make any change because the terms of the new § 1.17 automatically make it applicable to such products.

Interested persons may, on or before February 20, 1973, file with the Hearing Clerk, Department of Health, Education, and Welfare, room 6–88, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: January 12, 1973.

CHARLES C. EDWARDS,
Commissioner of Food and Drugs.

[21 CFR Part 80]

DIETARY SUPPLEMENTS OF VITAMINS AND MINERALS

Definition, Identity, and Label Statements; Proposed Findings of Fact, Conclusions, and Tentative Order Following a Public Hearing

In the matter of establishing a definition and standard of identity for dietary supplements of vitamins and minerals:

HISTORY

1. On the initiative of the Commissioner of Food and Drugs, a notice of proposed rule making in the above-identified matter was published in the FEDERAL REGISTER of June 20, 1962 (27 FR 5815), and numerous comments were received in response thereto. Subsequently, orders were published in the FEDERAL REGISTER of June 18, 1966 (31 FR 8521 et seq.), to become effective December 15, 1966, deleting § 1.11 (21 CFR 1.11), exempting from labeling requirements certain artificially sweetened foods (21 CFR 5.5), establishing definitions and standards of identity for dietary supplements of vitamins and minerals and for vitamin- and mineral-fortified foods (21 CFR Part 80), and revising the regulations for the labeling of food for special dietary uses (21 CFR Part 125).

2. During the 30-day period provided by the order of June 18, 1966, objections and requests for a public hearing were filed. Consequently, an order was published in the FEDERAL REGISTER of December 14, 1966 (31 FR 15730), staying the effective date of § 5.5, Part 80, and Part 125, as published in the FEDERAL REGISTER of June 18, 1966, and staying the effective date of the deletion of § 1.11. The order published in the FEDERAL REGISTER of December 14, 1966, gave notice that a public hearing would be held on the basis of the objections received and set forth the issues to be decided at the hearing. Since the order also contained amendments to the provisions of Parts 80 and 125 published in the FEDERAL REGISTER of June 18, 1966, an additional period of 30 days was provided for the filing of objections by persons adversely affected. Numerous letters objecting to the amendments and requesting a public hearing were received; however, no substantive issues not already stated in the order of December 14, 1966, were raised by these objections. A correction of a printer's error in the order of December 14, 1966, was published in the FEDERAL REGISTER of December 21, 1966 (31 FR 16312).

3. Also published December 14, 1966 (31 FR 15746), was a notice proposing that § 80.2, the definition and standard of identity for vitamin- and mineral-fortified foods, which was established by the order of June 18, 1966, and amended and stayed by the order of December 14, 1966, be amended by adding to the table in paragraph (c) the following classes of food: (1) Frozen dessert products (containing vegetable fat in lieu of butter fat) made in semblance of ice cream or ice milk; (2) milk fortifiers; (3) and meal substitutes.

4. The comments received in response to the proposal of December 14, 1966, were considered and an order was subsequently published in the FEDERAL REGISTER of April 8, 1967 (32 FR 5736), amending § 80.2 to add the additional classes of food. In response to that order, several objections and requests for a public hearing were received; however, no substantive issues were raised that were not already set forth in the order of December 14, 1966.

5. A notice was published in the FEDERAL REGISTER of April 2, 1968 (33 FR 5268), scheduling a hearing to begin May 21, 1968, and a prehearing conference to begin May 7, 1968. The notice also designated Mr. David H. Harris as the Hearing Examiner for these proceedings, and notice that he was appointed a hearing examiner was published in the FEDERAL REGISTER of May 4, 1968 (33 FR 6828).

6. The hearing was convened as scheduled May 21, 1968, and recessed the same day to permit continuation of prehearing conferences. Notice was given in the FEDERAL REGISTER of June 13, 1968 (33 FR 8679), that the hearing was being reconvened June 20, 1968. The hearing was reconvened as scheduled and continued for almost 2 years, closing on May 14, 1970.

7. The taking of evidence with reference to infant foods was closed October 14, 1969. Pursuant to 21 CFR 2.96, and limited to the infant food portion of the proceedings, the Hearing Examiner submitted his report and certified the record together with his report to the Commissioner of Food and Drugs. This Hearing Examiner's Report, dated August 26, 1970, is part of the public record (Docket No. FDC–78) on file with the Hearing Clerk, Department of Health, Education, and Welfare, room 6–88, 5600 Fishers Lane, Rockville, MD 20852.

8. The Hearing Examiner sbsequently submitted his report of the entire proceedings, except for the previously submitted portion on infant foods, and certified the associated record together with his report to the Commissioner of Food and Drugs. This Hearing Examiner's Report, dated January 25, 1971, is part of the public record (Docket No. FDC–78) and is also on file with the Hearing Clerk.

9. After review of the Hearing Examiner's report and related material on the infant food portion of the proceedings, the Commissioner published in the FEDERAL REGISTER of October 29, 1970 (35 FR 16737), proposed findings of fact, proposed conclusions, and a tentative order on label statements relating to infant foods, and provided a 30-day period for filing of written exceptions. After review of comments received, and further review of the Hearing Examiner's Report and related material, several changes were made in the tentative order, and the final order on label statements relating to infant foods (21 CFR 125.5) was published in the FEDERAL REGISTER of December 10, 1971 (36 FR 23553), with an effective date 90 days from the date of publication.

10. After review of the Hearing Examiner's report and related material on the portion of the proceedings concerning vitamin- and mineral-fortified foods, the Commissioner concluded that it would be in the public interest to develop regulations for such foods utilizing the approach of establishing nutritional quality guidelines for certain classes of foods, including those to which vitamins and/or minerals may be added. These guidelines may replace the approach of developing standards of identity for these foods as originally proposed in the form of 21 CFR 80.2. A notice of proposed rule making on nutritional quality guidelines was published in the FEDERAL REGISTER of December 23, 1971 (36 FR 24822). In that notice, the Commissioner proposed to amend Chapter I by adding a new Part 100 for nutritional quality guidelines for foods, defined general principles (proposed 21 CFR 100.1), and proposed the first nutritional quality guideline, in this case for pre-cooked frozen convenience "heat and serve" dinners (proposed 21 CFR 100.20). The Commissioner is deferring final action on 21 CFR 80.2 until experience is gained under 21 CFR Part 100.

11. In this issue of the FEDERAL REGISTER, the Commissioner has published the following proposals, tentative orders, and regulations that relate to other sections of special dietary labeling and nutrition labeling as follows:

(a) Nutrition labeling. (§ 1.17)

(b) Food label information panel. (§ 1.8d)

(c) Food fat labeling. (§ 1.18)

(d) Special dietary food labeling. (§§ 125.1, 125.2, and 125.3)

(e) Food standard labeling changes.

(f) Uniform effective date for food labeling changes.

LIMITED SCOPE OF THIS ACTION

12. This document pertains only to that portion of this matter concerning the definition, standard of identity, and label statements of dietary supplements of vitamins and minerals. The content of this document reflects the following needs as developed by the public hearing and related historical events:

(a) That dietary supplements as defined should be based on modern human nutrition knowledge.

(b) That potentially toxic quantities of individual nutrients, insignificant quantities of individual nutrients, and gross nutrient imbalances and omissions should be avoided in dietary supplements.

(c) That a fully informative labeling system is required.

(d) That expiration dating is required.

13. To further clarify the limited scope of this action a number of additional points require comment:

(a) The purpose of dietary supplements of vitamins and minerals is to provide reasonable assurance that the total daily intakes of essential vitamins and/or minerals are adequate when doubt of adequacy may exist on the basis of the diet alone. Dietary supplements are for general supplementation of the diet. They are not designed for the treatment or clinical management of nutritional diseases or disorders.

(b) This action does not apply to natural substances, which by their nature are good sources of specific vitamins and/or minerals, except when used as a source of specific vitamins and/or minerals in dietary supplements. Although not marketable as dietary supplements except as indicated, such natural sub-

V38-13 JAN 19 73 XUM

stances may be marketed as conventional foods, subject to nutritional labeling (21 CFR CFR 1.17) pertaining thereto. Other foods to which this action does not apply are described in the tentative order contained in this document.

(c) This document establishes lower and upper limits for each individual vitamin and mineral which may be present in the specified daily quantities of dietary supplements of vitamins and minerals. All of the provisions of this document are in turn subject to the provisions of 21 CFR Part 125, which define the term "special dietary use", establish the U.S. Recommended Daily Allowances (U.S. RDA's) specified by the U.S. Government in terms of nutrients and quantities of nutrients, and provide specific instructions on the general label statements permitted on foods for special dietary use under § 125.1 *Definitions and interpretations of terms;* § 125.2 *General label statements; dietary properties; value; placement;* and § 125.3 *Label statements relating to vitamins and minerals.*

(d) The tentative order contained in this document requires that the individual nutrients in dietary supplements be listed on the label in a specific order. Placing a specific nutrient or nutrients in a prominent position in a list of nutrient components can imply to the consumer a degree of relative importance for the specific nutrient or nutrients so placed. Such a prominent position for any specific nutrient is not scientifically sound in a dietary supplement of vitamins and/or minerals.

Having considered the evidence received at the hearings, the hearing examiner's report, and all the exceptions and written arguments which were filed, the Commissioner, pursuant to the Federal Food, Drug and Cosmetic Act (secs. 401, 403(j), 701(e), 52 Stat. 1046 as amended, 1048, 1055 as amended; 21 U.S.C. 341, 343(j), 371(e)) and under authority delegated to him (21 CFR 2.120), proposes the following findings of fact, conclusions of law, and tentative final order:

PROPOSED FINDINGS OF FACT [1]

1. The hearings have shown that there is a need to establish a definition for dietary supplements, and to describe what is a rational composition for dietary supplements in terms of the vitamins and minerals present, and the quantities allowed.

2. The apparent appeal to consumers which results from the addition of vitamins and minerals to food articles, with concurrent promotion calling attention to this fact, has resulted in ever increasing amounts, qualitatively and quantitatively, of these nutrients being added to various foods (Weissenburg, Tr. 8569–8570; Exhibit P–1151, page C1). In many cases, foods, particularly some cereal products, have become the equivalent of multivitamin/multimineral dietary supplements in terms of their added nutrient contents (Weissenberg, Tr. 8584; WD–G–Gullberg, Q&A 35).

3. The establishment of a standard of identity and quantitative limits for the nutrient ingredients in dietary supplements will reduce consumer confusion concerning choice of dietary supplements by insuring a basically rational formula for all products (Mayer, Tr. 28868; WD–G–Gullberg, Q&A 31).

4. Dietary supplements are articles purporting to be or represented for special dietary use by man to supplement his diet by increasing the total dietary intake of vitamins and/or minerals. They may be prepared as tablets, capsules, pills, wafers, or similar uniform units, and/or in powder, granular, flake or liquid form (Grollman, Tr. 1660; Mickelsen, Tr. 2421–2424; Hodges, Tr. 2874; Herbert, Tr. 9859; Garrett, Tr. 10943; WD–G–Ross, Q&A 14). The proper use of dietary supplements of vitamins and/or minerals is for short-term correction of specific inadequacy of intake (Hodges, Tr. 2874–2875; Herbert, Tr. 9860, 9922–9923). They are not intended for therapeutic use for the correction of disorders in humans by the administration of large amounts of specific nutrients (Grollman, Tr. 1680–1682; Herbert, Tr. 9896; Hodges, Tr. 2937–2940, 2970–2971; WD–G–Harrison, Q&A 22; WD–3A–Sebrell, Q&A 44; WD–G–Schaefer, Q&A 36, 37).

5. Vitamins are organic substances, present in foods, which are essential for the maintenance of human life and the activity of the cells of the body (Grollman, Tr. 1624–1625; WD–3A–Sebrell, Q&A 4). These include vitamins A, D, E, K, C (ascorbic acid), B_1 (thiamine), B_2 (riboflavin), B_6, and B_{12}, niacin, folic acid (folacin), biotin, and pantothenic acid (Exh. P–651; Grollman, Tr. 1625–1627).

6. Essential mineral nutrients include the inorganic elements calcium, phosphorus, iodine, iron, magnesium, copper, zinc, sodium, potassium, and manganese. They are needed by the human body in varying amounts, and are utilized in a variety of metabolic processes (WD–3A–Sebrell, Q&A 4).

7. The sale and use of vitamin/mineral preparations in the United States are extensive, running into hundreds of millions of dollars annually in wholesale bulk value, and involve three-fourths of American households (Exh. P–735; Exh. P–1151, pages B1 and B2). The majority of such preparations differ qualitatively and quantitatively from each other, presenting a bewildering variety to the consumer (Weissenberg, Tr. 5998, 6551–6552, 8752–8756; WD–G–Gullberg, Q&A 14, 26; Exhibits P–2, P–3, P–8, P–9, P–40–42, P–47, P–51–54, P–57–59, P–61–70, P–72–74, P–76–78, P–80–153, P–156–163, P–165–174, P–188, P–194–349, P–398, P–399, P–400, P–402–404, P–468, P–471, P–564, P–567, P–575–579, P–582–594, P–596–597, P–599, P–600, P–613).

8. Many dietary supplements are nutritionally irrational, in that they provide quantitative levels and qualitative combinations of nutrients for which no human individual need could possibly exist, if the products are used only as dietary supplements (Grollman, Tr. 1683 (Exhibit P–84), 1686 (Exhibit P–89), 1688 (Exhibit P–94), 1691 (Exhibit P–95), 1696 (Exhibit P–102), 1699 (Exhibit P–113), 1701–1702 (Exhibit P–113), 1707–1709 (Exhibit P–124), 1713 (Exhibit P–157), 1714 (Exhibit P–158); Mickelsen, Tr. 2447–2447A (Exhibit P–166), 2448–2450 (Exhibit P–168), 2451–2452 (Exhibit P–169), 2455–2457 (Exhibit P–171); Hodges, Tr. 2942 (Exhibit P–183); Herbert, Tr. 9898–9899 (Exhibit P–232); Weissenberg, Tr. 6553–6554; WD–G–Gullberg, Q&A 26; Exhibits P–588, P–595). Lay persons are incapable of determining, by themselves, whether they have or are likely to develop vitamin or mineral deficiencies (Grollman, Tr. 1771–2, 1782; Herbert, Tr. 9961, 9979–80, 10,029; Unglaub, Tr. 28,942; Wallerstein, Tr. 28,989; Hodges, Tr. 2994–5; Mickelsen, Tr. 2520; Mayer, Tr. 28,892–3).

9. Although approximately 20 percent of the users of dietary supplements of vitamins and minerals actually use those articles to supplement or balance their diet, more than 40 percent of those persons admit they have no idea which vitamins or minerals, if any, are not sufficiently supplied by their diet (Exhibit P–1151, page B4, Q&A 4b).

10. Certain basic vitamins and/or minerals should be included in all articles offered as multivitamin and/or multimineral supplements. The remaining group of appropriate vitamins and/or minerals are considered to be scientifically optional for inclusion (Herbert, Tr. 9880–9882). The mandatory group of vitamins and/or minerals found in multivitamin and/or multimineral supplements should include all those listed in the table entitled "Recommended Daily Dietary Allowances, Revised 1968" in publication 1694 of the National Academy of Sciences (WD–43–Filer, pp. 19–20; WD–33–Coursin, p. 23; WD–33–Emerson, p. 9; WD–33–Brin, pp. 23–24; WD–33–Krehl, pp. 8–9, Tr. 27216–27217, 27255–27256; WD–33–Horwitt, pp. 12–14; Hodges, Tr. 2878–2879, 2945–2946, 6813, 7007).

11. Many dietary supplements contain such high amounts of nutrients that they are appropriate only for therapeutic use, for persons already in a deficiency state (Hodges, Tr. 2939–40). Some of these contain potentially toxic amounts of certain vitamins (Herbert, Tr. 9891; Grollman, Tr. 1711; Exhs. P–113, P–183, P–594). There is a sound scientific basis for establishing quantitative maximums on the nutrient ingredients in a dietary supplement (Herbert, Tr. 9900–9904; WD–G–Ross, Q. & A. 17, 18; WD–G–Harrison, Q. & A. 22). This is based on the rapid excretion of excesses of certain nutrients without benefit to the consumer, as well as on the potential problems of toxicity or nutritional imbalances due to excessive ingestion of certain nutrients (Grollman, Tr. 1666–1669; Herbert, Tr. 9861–9862; Mickelsen, Tr. 2433–2434; WD–3A–Sebrell, Q. & A. 24, 25; Polack, Tr. 4954–4955; Exh. P–1142).

12. Some dietary supplements contain so little of a named nutrient as to be insignificant in human nutrition (Swain, Tr. 233, 488; Grollman, Tr. 1695–1696 (Exh. P–102); Mickelsen, Tr. 2448 (Exh. P–167), 2451 (Exh. P–169), 2456 (Exh. P–171), 2469 (Exh. P–173); Hodges, Tr. 2935 (Exh. P–180); WD–G–Gullberg, Q&A 26). There is a sound scientific basis for establishing quantitative minimums on the nutrient ingredients for dietary supplements since only substantial amounts of nutrients should be represented for purposes of dietary supplementation (Herbert, Tr. 9867; WD–G–Harrison, Q&A 24; Boehne, Tr. 2764; WD–3A–Sebrell, Q&A 26, 27, 39).

13. Certain dietary supplements are objectionable because they must be taken in large numbers of units for the user to get the designated amounts of the nutrients involved (Grollman, Tr. 1685 (Exhibit P–89); Hodges, Tr. 2936 (Exhibit P–180); Exhibits P–179, P–359, P–368, P–383, P–395). In establishing a standard of identity for dietary supplements it is medically and pharmacologically sound to establish a standard of identity for dietary supplements on the basis of units suitable for and practical of consumption in one day (Grollman, Tr. 1661; Hodges, Tr. 2956).

14. There are demonstrable distinctions among the nutritional requirements of infants and young children, and pregnant or lactating women, as compared to the nutritional requirements of adults (Michelsen, Tr. 2424–2427; Grollman, Tr. 1665; Hodges, Tr. 2877–2878; Herbert, Tr. 9944; WD–3A–Sebrell, Q&A 15, 16, 19 and 28; WD–G–Ross, Q&A 23; Boehne, Tr. 2741–2759).

15. There is scientific or medical justification for selecting an age separation at 4 years of age for the purpose of establishing a basis for dietary supplements (WD–33–Krehl, pp. 5–8; WD–33–Emerson, pp. 4–5; WD–43–Filer, p. 21). The recommended daily dietary allowances of the Food and Nutrition Board, NAS–NRC, for 2- to 3-year-olds can safely be used by infants and 1- to 2-year-olds, and the maximum values for the under 4-year-old group can be used for all infants and children under 4 years of age (WD–33–Krehl, pp. 6–7; Hodges, Tr. 2, 877–8; WD–43–Graham; and WD–43–Filer, p. 21).

16. The "Recommended Dietary Allowances," revised periodically by the Food and Nutrition Board of the National Research Council, National Academy of Sciences, represent established nutrient levels that are quantitatively high enough to provide for the adequate intake of essential nutrients under the wide variety of conditions that exist in this country for essentially all of the normal healthy persons in the United States. Furthermore, these levels are reviewed, discussed, and accepted by numerous scientists and, therefore, are considered to be extremely reliable. (Hodges, Tr. 2880, 2919, 2964–65; Grollman, Tr. 1670, 1763; Mickelsen, Tr. 2438–39; Herbert, Tr. 9865–67; WD–G–Harrison, Q&A 23; Schweigert, Tr. 8257, 8260; WD–G–Gullberg, Q&A 19; Exhibit P–651; Sebrell, Tr. 26, 181).

17. Publication No. 1694 of the National Academy of Sciences entitled "Recommended Dietary Allowances, Seventh Revised Edition, 1968, A Report of the Food and Nutrition Board, National Research Council," and subsequent editions, should be used as the source of authentic and reliable information on which to base recommended daily allowances of nutrients (WD–3A–Semrell, Q&A 9, 10, 18, 19, Tr. 26181; Hodges, Tr. 2917; Herbert, Tr. 9865; WD–G–Harrison, Q&A 14, 23, 26, 27; WD–G–Ross, Q&A 65).

18. Recommended dietary allowances adapted from publication 1694 of the National Academy of Sciences are sufficiently above the average requirement for particular nutrients to cover the needs of between 95 percent and 99 percent of the normal healthy population (Hodges, Tr. 7083; WD–46–Olsen, page 7, Tr. 29466–67; Jukes, Tr. 28688; Briggs, Tr. 28761; Mayer, Tr. 28865–66; Stokstad, Tr. 26742; Goodhart, Tr. 30169–70; Stare, Tr. 29280; WD–G–Ross p. 5).

19. The identity and levels of nutrients in the NAS–NRC Recommended Dietary Allowances are extremely reliable since they are reviewed and discussed by large numbers of scientists and brought up for revision approximately every 5 years (Mickelsen, Tr. 2438–2439); Hodges, Tr. 2880; Sebrell, Tr. 26181). They are the best basis on which to establish a standard of identity for dietary supplements of vitamins and minerals in the United States (Grollman, Tr. 1670; Mickelsen, Tr. 2438; Herbert, Tr. 9864–9865; WD–3A–Sebrell, Q&A 5–7; Sebrell, Tr. 26181; WD–G–Ross, Q&A 19). Publication 1694 of the National Academy of Sciences, entitled "Recommended Dietary Allowances, Seventh Revised Edition, 1968, A Report of the Food and Nutrition Board, National Research Council" should be used as the source of authentic and reliable information on which to base a standard of identity for dietary supplements of vitamins and minerals (Exhibit P–651). Values for essential nutrients (to be designated as "U.S. Recommended Daily Allowances (U.S. RDA's)") may reasonably be derived from the table and sections in the text of this publication (WD–3A–Sebrell, Q&A 15).

20. The human body has the capacity to store varying amounts of almost all vitamins as reserves to be drawn upon when needed (Mickelsen, Tr. 2436). Fat-soluble vitamins, particularly vitamins A and D, are readily stored for relatively long periods of time, while excesses of the water-soluble vitamins are excreted more rapidly (Grollman, Tr. 1628–1629; Mickelsen, Tr. 2645; WD–3A–Sebrell, Q&A 4). The excessive ingestion of the fat-soluble vitamins A and D, because of their relatively high retention by the human body, poses a potential danger of toxicity (Mickelsen, Tr. 2644–2645; Hodges, Tr. 2956; WD–G–Ross, Q&A 18; WD–G–Harrison, Q&A 22; Herbert, Tr. 9891).

21. The nutrients which are scientifically appropriate for inclusion in dietary supplements in the United States are (1) the vitamins A, C, D, E, folic acid, niacin, riboflavin, thiamine, B_6, B_{12}, biotin, and pantothenic acid; and (2) the minerals calcium, phosphorus, iodine, iron, magnesium, copper, and zinc (Hodges Tr. 2879; Grollman, Tr. 1662; Mickelsen, Tr. 2427–2430; Herbert, Tr. 9861, 9868, 9881; Krehl, Tr. 27, 216–27, WD–G–Ross, Q. & A. 15, 16; WD–G–Harrison, Q. & A. 20; Exhibit P–651).

22. The establishment of qualitative and quantitative limits on the composition of dietary supplements will reduce consumer confusion concerning choice of dietary supplements by ensuring a basically rational formula for all products (WD–G–Gullberg, Q. & A. 31, Weissenberg, Tr. 7737).

23. From among these nutrients, appropriate for inclusion in dietary supplements, certain basic vitamins and/or minerals should be included in all articles offered as multivitamin and/or multimineral supplements (Herbert, Tr. 9880–81). Conversely, certain vitamins and minerals are, scientifically, optional in terms of whether or not they should be included in a multivitamin and/or multimineral supplement (Herbert, Tr. 9882).

24. A gross excess of folic acid intake on the part of human beings can interfere with the diagnosis of pernicious anemia as it masks the hematological manifestations of vitamin B_{12} deficiencies. (Herbert, Tr. 9872–73.)

25. While people in the United States appear to have some understanding of the comparatively greater requirements for iron experienced by many women during their child-bearing years, this appears to have affected opinion about other nutrients, since well over a third of the population believes that women need more vitamins than men (Exhibit P–1151, page B13, questions 20, 20a, 21, 21a). However, when iron is not named, only 16 percent of the population expresses an opinion that there is any difference in the mineral requirements of men and women (Exhibit P–1151, page B14, question 22).

26. All vitamins are specific chemical compounds. Each has the same composition and effect whether it is synthetically produced or derived from natural sources. (Grollman, Tr. 1758–1759; Mickelsen, Tr. 2471; Hodges, Tr. 2958–2959, 2962; Herbert, Tr. 9937–9938; WD–G–Harrison, Q&A 36).

27. It is pharmacologically necessary to allow, in a standard of identity for dietary supplements, for the inclusion of preservatives, stabilizers, colors, sweeteners, seasoning, carriers, bases, vehicles, and other substances which facilitate preparation of the product. However, no greater quantity of any such substances should be allowed to be included than is necessary to establish the desired physical or technical effect. Furthermore, the biological availability of the nutrients in the dietary supplement should not be impaired by the presence of such substances. (Grollman, Tr. 1752; Garrett, Tr. 11039).

28. Lack of a common language for identifying nutrients in dietary supplements has resulted in use of highly in-

V 38 - 13 JAN 19 73 XUM

appropriate names, having no or imprecise scientific meaning. The resultant wide variation in the manner of qualitatively naming and quantitatively declaring the nutrients in a dietary supplement on its label also extends to artificial colors, artificial flavors, and preservatives used in producing the supplement. (Grollman, Tr. 1698–1699, 1724; Herbert, Tr. 9891, 9896–9897; Weissenberg, Tr. 6623–6626, 8763–8764, 8789–8791; Exhs. P–113, P–161, P–311, P–95, P–152).

29. The use of standardized common names for various forms of dietary supplements will aid in more fully informing purchasers of the nature and value of these articles. The following common names are scientifically meaningful and accurate designations for the various supplements involved:

(a) "Multivitamin and multimineral supplement", for a dietary supplement which contains all of the mandatory vitamins and mandatory minerals listed in the table under § 80.1(f).

(b) "Multivitamin supplement", for a dietary supplement which contains all of the mandatory vitamins listed in the table under § 80.1(f).

(c) "Multimineral supplement", for a dietary supplement which contains all of the mandatory minerals listed in the table under § 80.1(f).

(d) "Multivitamin and iron supplement" or "multivitamin supplement with iron", for a dietary supplement which contains all of the mandatory vitamins listed in the table under § 80.1(f) plus the mineral iron.

(e) "---------- supplement", for a dietary supplement which contains a single vitamin or mineral listed in the table under § 80.1(f), the blank to be filled in with the name of the vitamin or mineral which the supplement purports or is represented to contain. (Grollman, Tr. 1753; Hodges, Tr. 2945–54; Mickelsen, Tr. 2487; Herbert, Tr. 9882, 9884–91; WD–G–Ross, Q&A 28–33; WD–G–Harrison, Q&A 30–33.

30. It is scientifically correct and necessary for the purpose of determining the value of a dietary supplement as a food which is purported to be or is represented for a special dietary use that the label thereof bear a statement stating the amount and percentage of the recommended daily allowance of each vitamin and/or mineral which the supplement contains in a specified daily quantity, such a statement being given for each consumer group for which the supplement is offered (Herbert, Tr. 9944–9946; Grollman, Tr. 1762; Hodges, Tr. 2964–2967; WD–G–Ross, Q&A 63; Mickelsen, Tr. 2685–2687). It is also necessary that clear directions for frequency of ingestion be stated on the label (Grollman, Tr. 1758; Hodges, Tr. 2955–2956; Herbert, Tr. 9937).

31. Reasons for a consumer desiring to know the sources of the nutrients in a dietary supplement include: (1) A medical need to have exact knowledge of all potential allergens encountered by a patient (WD–23–Kallin, Q&A 22; Lowe, Tr. 12579); and (2) religious or philosophical needs to know the components of one's total diet (WD–58–Morgan; WD–58–Prazenka; WD–58–Pietz; WD–23–Desmond; WD–23–Singer; WD–58–Pelc; WD–58–Curtis; WD–58–Taylor; WD–32–Hill).

32. Many dietary supplements include named ingredients which are of no value as supplements to the human diet (Grollman, Tr. 1626, 1675–77, 1707, Exhibit P–125; Mickelsen, Tr. 2464–65 (Exhibit P–172), 2469 (Exhibit P–173); Hodges, Tr. 2933 (Exhibit P–179), 2936, (Exhibit P–180); Herbert, Tr. 9891 (Exhibit P–113), 9899 (Exhibit P–468; Swain, Tr. 185–191, 213, 220, 221, 223, 229–231, 255, 264, 269, 336, 397, 442, 447, 455, 469, 475, 476, 487; Weissenberg, Tr. 8761, 6402, 5949, Exhibits P–576, P–591). However, many consumers will purchase such products with long lists of ingredients, believing them to be of better value than products with a lesser number of ingredients (WD–G–Perloff, Q&A 38–41; Exh. P–1151, page B9, questions 13, 14). Such consumers believe that if an ingredient is listed, it must significantly contribute to the value of the product as a dietary supplement (WD–G–Perloff, Q&A 18, 19; Exh. P–737). The label of a dietary supplement, as a food for special dietary use, should bear a statement of usefulness consisting of a list of the nutrient ingredients which provide the special use characteristics. The list of such ingredients should be limited to those which are of significant value and need in human nutrition as components of dietary supplements (Grollman, Tr. 1766; Hodges, Tr. 2969–2970; Mickelsen, Tr. 2518–2520; WD–G–Moses, Q&A–33; WD–G–Ross, Q&A 59–61).

33. A large proportion of the population of the United States is likely to choose dietary supplements, the ingredients of which are described as "natural" or from "natural sources", on the basis that "natural" constituents are superior to "synthetic" constituents (WD–G–Perloff, Q&A 44–46; Exhibit P–1151, pages B–10 and B–11, questions 16, 16a, 16b). There are many dietary supplements on the market which stress the "natural" source of their constituents (Swain, Tr. 234, 477; Weissenberg, Tr. 6554–6556, 8757–8758; Exhibits P–6, P–35, P–40–43, P–54, P–66–68, P–70, P–74), although this fact is of no nutritional significance (Grollman, Tr. 1758–1759; Mickelsen, Tr. 2471; Hodges, Tr. 2933, 2958–2959, 2962; Herbert, Tr. 9937–9938; WD–G–Harrison, Q&A 36).

34. It is medically and nutritionally appropriate to identify, on the label, chemical preservatives used in a dietary supplement, as well as to indicate on the label that artificial sweetener, artificial coloring, or artificial flavoring has been added to the article, if such is the case. In addition to these and the identification of the nutrients in the supplement, there is also the necessity for identifying alcohol, if present (Grollman, Tr. 1758; Hodges, Tr. 2956–2957; Herbert, Tr. 9941–9942). When alcohol is included as an ingredient in a dietary supplement, it is necessary, from a medical point of view, that the amount of alcohol contained in the dietary supplement by expressed on the label as a percent by volume (Grollman, Tr. 1705, 1760–1761; Hodges, Tr. 2956; Herbert, Tr. 9942).

35. Dietary supplements have been found on the market containing levels of vitamins below declared strength (Weissenberg, Tr. 8769–8770; Deutsch, Tr. 11147–11151; Garrett, Tr. 10986). Under certain ordinary and usual conditions of shipment, storage, and shelf-life, some vitamins and minerals in dietary supplements deteriorate, affecting the nutritional quality of the supplement (Grollman, Tr. 1761; Mickelsen, Tr. 2489; Hodges, Tr. 2963–2964; Herbert, Tr. 9942–9943; Garrett, Tr. 10943 et seq.). Based upon known rates of deterioration, it is technologically feasible to determine an appropriate expiration date for dietary supplements beyond which they should not be sold in the event deterioration actually occurs (Garrett, Tr. 10981 et seq.; Exhs. P–659, P–660). In the interest of consumers, it is reasonable and necessary to require that a manufacturer, packer, or distributor of dietary supplements containing vitamins and/or minerals determine an appropriate expiration date for his product, based on deterioration data under specified or customary conditions of handling and storage as indicated on the label, and that the expiration date be indicated when the supplement is offered for sale. (Garrett, Tr. 10978–10981, 11013–11015; Grollman, Tr. 1762; Hodges, Tr. 2963–2964; Mickelson, Tr. 2489–2490; Herbert, Tr. 9943; WD–G–Gullberg, Q&A 17, 33; WD–G–Ross, Q&A 40–42; WD–G–Harrison, Q&A 34, 35).

36. The following table represents a reasonable and scientifically accurate adaptation of the 1968 Recommended Dietary Allowances as published by the Food and Nutrition Board of the National Academy of Sciences-National Research Council (WD–3A–Sebrell, Q&A 15). Upper and lower limits for the listed nutrients are appropriate for dietary supplements of vitamins and minerals (Herbert, Tr. 9900–04, 9867; WD–G–Ross, Q&A 17, 18; WD–G–Harrison, Q&A 22, 24; Boehne, Tr. 2764; WD–3A–Sebrell, Q&A 26, 27, 39).

U.S. GOVERNMENT RECOMMENDED DAILY ALLOWANCES (U.S. RDA's) AND PERMISSIBLY COMPOSITIONAL RANGES FOR DIETARY SUPPLEMENTS OF VITAMINS AND MINERALS

	Unit of measurement	Infants and children under 4 years of age, U.S. RDA		Adults and children 4 or more years of age, U.S. RDA		Pregnant or lactating Women, U.S. RDA	
		Lower limit	Upper limit	Lower limit	Upper limit	Lower limit	Upper limit
Vitamins, mandatory:							
Vitamin A	International units	1,250	2,500	2,500	5,000	5,000	8,000

Zinc	do	4.0	8.0	12	7.5	15	22.5

[1] Optional for adults and children 4 or more years of age.
[2] Optional for liquid products.
[3] Optional for pregnant or lactating women.

DISCUSSION OF PROPOSED FINDINGS

The standard of identity established in this document is closely related to the requirements for special dietary foods, for nutrition labeling, and for over-the-counter drugs. It is therefore important that the interrelationship of these various regulatory provisions, and the rationale behind their development, be fully understood.

The evidence at the 1968–70 Special Dietary Food Hearings strongly supported the position that all requirements for vitamins and minerals can be obtained from a well-planned diet of conventional foods, and thus that conventional foods always have been, and will continue to be, the principal source of nutrients in the daily diet. For this reason, 10 percent of the U.S. RDA of a nutrient is regarded as significant for purposes of labeling under § 1.17, and indeed the presence of even 2 percent of the U.S. RDA of a nutrient is permitted to be labeled because of the cumulative impact of these small amounts when ingested in several foods in the course of the day. These relatively small amounts of nutrients may not be significant in and of themselves, but when added together they are quite sufficient to provide the full complement of daily nutrition.

A dietary supplement product, on the other hand, is not intended to be eaten like any other constituent of the normal daily diet, but rather is intended, as the name states, to be taken to supplement the diet as insurance in the event that an individual's diet may not include a full complement of essential vitamins and minerals (e.g., it is often impractical to supply the iron needs of adult women with conventional foods). It would therefore be quite inappropriate for a dietary supplement to contain the relatively small amount of nutrients found in many foods; and conversely, it would be equally inappropriate to provide for fortification of conventional foods at substantial levels which would result in gross over consumption of vitamins and minerals in the diet. Therefore, with certain exceptions, a dietary supplement must contain at least 50 percent of the U.S. RDA of the nutrients involved, and any conventional food fortified in a way that any nutrient achieves a level of greater than 50 percent of the U.S. RDA will similarly be regarded as a dietary supplement subject to all of the requirements of the standard of identity. In short, the regulations provide a sensible and reasonable distinction between the customary way of obtaining nutrients in relatively small amounts in individual food items through the daily food supply, and the insurance provided by a dietary supplement containing relatively large amounts of those nutrients.

Substantial consideration was given to the appropriate ceiling for the nutrient levels in a dietary supplement. Evidence presented at the Hearings would have justified as low as 100 percent of the U.S. RDA. The Commissioner has concluded, however, with certain exceptions, that the additional assurance provided by permitting 150 percent of the U.S. RDA in a dietary supplement is warranted. This level will cover all known nutritional needs of normal individuals.

The Commissioner has also recognized that there are a number of products comprised of nutrients, intended to provide daily nutrition in a variety of medical conditions, which are represented for use solely under medical supervision in the dietary management of specific diseases and disorders or as the sole item of a meal or in the daily diet. Many of these foods are in a state of development, and standardization is not possible on the basis of the Hearings. Accordingly, although such products are required to be labeled in compliance with §§ 125.1–125.3, they are exempt from the requirements of § 80.1. Separate regulations will be promulgated when appropriate to control the composition or labeling of these foods.

The status of meal replacements has received special consideration. The Commissioner has concluded that it is appropriate to exempt them from labeling under § 125.3 and instead to require that they be labeled under § 1.17, unless they fall within the category of "medical foods" just described above. They have also been exempted from the requirements of § 80.1, since they are properly regarded as complete replacements for a meal and not as a dietary supplement, and since the nutrient levels established for dietary supplements would be too high for a product intended as a replacement for a single meal. The Commissioner is considering a nutrition guideline limiting the nutrient levels in meal replacements to no higher than 50 percent of the U.S. RDA for adults and children 4 or more years of age.

The Commissioner has also reviewed the question whether some products containing nutrients should be classified as drugs rather than as foods under the act. As already noted, the ceiling for nutrient content provided by § 80.1 will cover all known nutritional needs for normal individuals. Dietary supplementation at any higher level is clearly unwarranted. Accordingly, any vitamin-mineral product containing more than the upper limit of the U.S. RDA must be regarded as appropriate only for the treatment of vitamin-mineral deficiencies, or for some other medical purpose, and is properly classified as a drug. The Commissioner has previously announced in the FEDERAL REGISTER of May 11, 1972 (37 FR 9464, paragraph 94) that vitamin-mineral products which are drugs would be subject to the procedures for review of over-the-counter (OTC) drugs established in 21 CFR 130.301. The advisory review panel which considers these products will be provided all pertinent evidence and information relating to such products presented at the Special Dietary Food Hearings in addition to any other data and information submitted to it. That panel will be requested to provide its advice on safe and effective formulations and labeling of such products, and on the dividing line between OTC and prescription vitamin-mineral drug products.

The Commissioner also recognizes that foods represented solely for use under medical supervision in the dietary management of specific diseases and disorders (e.g., chemically defined diets for the nutritional support of individuals suffering from inborn errors of metabolism) represent an exception to the rule that nutrients included in products at levels greater than the upper limit of the U.S. RDA are drugs. At this time such "medical foods" should not be the subject of specific restrictions. Accordingly, the Commissioner has classified these

V 38 - 13 JAN 19 73 XUM

products as foods regardless of the nutrient levels they contain.

The lower and upper limits for any given nutrient in a dietary supplement have been, in general, set at 50 percent and 150 percent, respectively, of the U.S. RDA values (with 6 exceptions, discussed below). It is reasonable to allow for some variation in the amount of a nutrient in such a product, and the U.S. RDA is a good central point for the variation because it is an estimate of a pattern of daily nutrient needs for the U.S. population as established by scientific experts. Establishing 50 percent as the lower permissible limit provides protection for the consumer from inadequate amounts of nutrients for supplementation purposes. Establishing 150 percent as the upper permissible limit provides protection of the consumer from excessive amounts of nutrients for supplementation purposes. The upper permissible limits for vitamin A and vitamin D equal the specified U.S. RDA's for these nutrients to minimize their toxicological potential (see 37 FR 26818, December 14, 1972). For dietary supplements for pregnant or lactating women, the general principle establishing lower and upper permissible limits of composition is the specified U.S. RDA's for adults and children 4 or more years of age and twice these amounts respectively, with specific exceptions as discussed below.

In defining nutrient needs the Food and Nutrition Board of the National Academy of Sciences-National Research Council has recognized differences of opinion among experts as well as the paucity of information for some nutrients on which to base an opinion about dietary needs for humans. These facts, coupled with the need to offer the product technologist a degree of freedom in compounding dietary supplements, establish the reasonableness of having permissible ranges.

In considering dietary supplements it is reasonable to recognize two categories of products which consumers should have available to them. One is a product containing all the vitamins and/or minerals for which RDA's have been established because of the stated inability of the consumer to determine precisely what nutrients he needs (with or without the optional nutrients). The other is a product which contains only one nutrient for which RDA's have been established. The usefulness of this kind of product derives from the recognition of the need for the availability of single nutrients which may be recommended for dietary supplementation in any combination, and the inherent right of consumers to decide, on their own, what particular nutrient they may need to round out a "balanced diet." These decisions may be based on a complex set of information, knowledge, or biases, but benefit can be derived from such a choice and it should not be denied.

At the same time, the enormous variety of products possible as a result of the number of essential vitamins and minerals needs some simplification. A consumer cannot make a rational choice, for example, between one supplement with 10 vitamins and minerals versus another supplement containing a different combination of seven vitamins and minerals, and a third with only three or four vitamins present, but in substantially greater amounts. Section 80.1 thus permits full personal choice but reduces substantially the confusing array of combination products.

The recently completed study "The Ten-State Nutrition Survey, 1968–1970," Department of Health, Education, and Welfare, Health Services and Mental Health Administration, Center for Disease Control, Atlanta, Georgia, emphasizes widespread iron deficiency anemia. The Committee on Maternal Nutrition, NAS–NRC report, "Maternal Nutrition and the Course of Pregnancy: Summary Report" National Academy of Sciences, 1970, concludes that the widespread incidence of nutritional anemia and the increased iron requirements of pregnancy and lactation provide a need for iron supplementation in amounts up to 60 milligrams per day. This information justifies both this considerable increase in the upper limit for supplementation over the NAS–NRC RDA values for iron for pregnant or lactating women (18 milligrams) as reasonable in view of the more recent deliberations of the NAS–NRC, and the permitted combinations of vitamins and the mineral iron, under § 80.1 (21 CFR 80.1).

The Commissioner recognizes that there are currently on the market combinations of vitamins and minerals which do not contain all of the nutrients which are scientifically and medically appropriate for a dietary supplement, and/or do not contain the nutrients at adequate levels. Some of these products are used by consumers as a food component of their daily diet intake, in a way that is no different in principle than the use of fortified food. By establishing a standard of identity for dietary supplement (e.g., multivitamin and/or multimineral supplements), those products either containing more than one but less than all of the nutrients appropriate for inclusion in a dietary supplement, or containing any of these nutrients below the established dietary supplement range can no longer be marketed as dietary supplements.

The Commissioner has concluded that it is reasonable to permit the continued marketing of products containing less than all of the nutrients required as a dietary supplement, at levels appropriate for foods, when such products are properly labeled as foods. To maintain the right of consumers to obtain such truthfully labeled food products if they so desire, the regulations provide that such products will remain available, labeled pursuant to § 1.17 (21 CFR 1.17) (nutrition labeling). No labeling will be permitted that could be confused with dietary supplements.

Thus, the regulations provide that combinations of vitamins and minerals not meeting the requirements of the standard of identity in § 80.1 (21 CFR 80.1) can be marketed as foods if they do not contain in a single serving any of the permitted vitamins or minerals at levels greater than the lower limit established for dietary supplements in this section. Like any other food, such a product may not be labeled as a "dietary supplement" or use any terms which suggest to the consumer that the product can serve as a dietary supplement, and such product shall provide the information required under § 1.17.

Proprietary names, including those presently used, may be included on the label provided they do not infer in any manner that the product is a dietary supplement. If such a product is in other than conventional food form (e.g., a tablet or capsule), the common or usual name of the product must, in order to meet the requirements of § 1.8 (21 CFR 1.8), include a listing of the names of each of the vitamins and/or minerals present.

In addition to those combinations of vitamins and minerals containing levels less than the lower limits of nutrients required by § 80.1 (21 CFR 80.1), there are products which contain more than one, but not all, of the vitamins and minerals provided for in § 80.1, at levels within the upper and lower limits established therein. These products do not meet the requirements of dietary supplements as defined in this tentative order.

The Commissioner has carefully reviewed the record of the hearing in considering whether there is any medical or scientific justification for such combinations of vitamins and minerals other than those in this tentative order. No persuasive justification for additional combinations was presented at the hearing. The evidence strongly supported inclusion of all vitamins and/or minerals in a dietary supplement, thus eliminating the many bewildering combinations now found in the marketplace, for which there is neither medical support nor consumer understanding. Nor is the Commissioner aware of more recent scientific data supporting additional combinations as dietary supplements.

Nevertheless, it is recognized that, as scientific and medical information changes, some justification for a vitamin and/or mineral combination not permitted by this standard of identity may be brought forward. Accordingly, the Commissioner has concluded that it is reasonable to include in the standard a specific petition mechanism whereby requests may be made for inclusion of additional combinations. Such a petition would include scientific data of nutritional and technological nature to support the particular combination involved, together with the proposed name of the product and with labeling designed to differentiate the product from other dietary supplements and to be fully informative to the public.

The Commissioner will provide sufficient time to allow manufacturers to develop petitions for vitamin and mineral products currently marketed which do not comply with the requirements set forth in § 80.1. Such petitions must be submitted by December 31, 1973, unless the Commissioner extends this time. This

time period is sufficient for manufacturers to determine if there is adequate scientific and technological justification to submit a petition. Where the manufacturer can show good cause, a further extension of time will be permitted to develop the necessary information and to submit a petition. During any consideration of or proceedings with respect to any petition submitted, the Commissioner will also grant an extension of time upon reasonable request. When final action is taken on any such petition, the manufacturer will also be permitted sufficient time to make necessary changes in labeling or formulation of the product. The Commissioner concludes that this procedure is reasonable and in the public interest, in view of the importance of this new regulation. Regulatory action against products would, however, be taken against any false or misleading statements in the labeling as prohibited by 21 CFR Part 125.

Vitamins and minerals for which specific quantitative requirements in human nutrition have been established by the Food and Nutrition Board, except for vitamin D and phosphorus for certain groups, are considered as mandatory components in § 80.1. Vitamins and minerals for which only approximate quantitative requirements have been established are considered as optional components.

The adaptability of the human body to varying intakes of calcium makes the establishment of single "allowances" for this difficult. Many experts believe that 0.5 gram of calcium per day would provide a practical allowance for adults. However, the daily average intake in some industrially advanced countries is well above 0.5 gram per day, with 0.8 to 1.0 gram being a usual intake. Certain population groups have intakes up to 1.5 grams per day, and show no evidence of undesirable side reactions or failure of the body's ability to adjust. On the other hand, the FAO–WHO Expert Group on Calcium Requirements, in a comprehensive report "Calcium Requirements FAO–WHO," Rome, 1961, held the view that a calcium intake above 1.0 gram/day was unlikely to serve any physiologically useful purpose. Their recommendations for practical allowances for infants, children, and adolescents range from 0.4 to 0.7 gram/day.

The lower permissible limits for calcium, phosphorus, and magnesium are less than the limits that would result from applying the general principles because of the physiological and technological problems associated with their physical bulk. Phosphorus is not mandatory in dietary supplements for pregnant or lactating women because of evidence that supplemental phosphorus may increase the problem of leg cramps during pregnancy.

A ratio of dietary calcium to phosphorus of at least 1.0 is desirable to maintain balance of these major constituents of bones and teeth. The ratio in bones is about 2.0. However, this ratio is much lower in the soft tissues so that a ratio of at least 1.0 is reasonable. Consideration of the food supply, including its diversity, indicates the unlikelihood of achieving a ratio significantly greater than 1.0 in a normal well-balanced diet.

For these several reasons, the U.S. RDA for both calcium and phosphorus was set at 1.0 gram per day for adults. This subject needs additional research, and if future results indicate significant changes, the Commissioner will issue the required amendments.

Vitamin D is not mandatory in dietary supplements for adults and children 4 or more years of age because of its availability from vitamin D-fortified milk, its endogenous production, and the uncertainties of exogenous requirements for this group of consumers.

For the categories for adults and children 4 or more years of age and for pregnant or lactating women the upper permissible limits for folacin equal the specified U.S. RDA's for this nutrient to minimize the potential of gross amounts masking the hematological manifestations of pernicious anemia.

The actual amount of active component (of a nutrient) depends on the chemical form in which the nutrient is supplied. A table of reference forms for the water-soluble vitamins commonly used in different chemical forms is provided. For example vitamin B_6 denotes a collective term for a group of naturally occurring pyridines that are metabolically and functionally related—pyridoxine, pyridoxal, and pyridoxamine. Interconversion between the compounds is so active that there is little biological difference between them. However, each form has its own molecular weight and hence must be corrected back to a reference compound to avoid significant variations in quantitative declarations of vitamins present, as recognized in finding of fact No. 28. Thiamine nitrate is a commonly used form of thiamine. Its molecular weight is 327.36. The reference form, "thiamine chloride," has a molecular weight of 300.82. The hydrochloride has a molecular weight of 337.27. Thus, the actual amount of the active form can be readily calculated from the ratio of the respective molecular weights. Niacin (mol. wt. 123.11) is commonly supplied as niacinamide (mol. wt. 122.13), the difference in this case being negligible. The statement of standard recognized chemical compounds provides a sound reference for establishing the actual amount of a nutrient present in the various acceptable chemical forms of a given nutrient.

The Commissioner recognizes that the listing of nutrient ingredients is not in compliance with 21 CFR 1.10, in that they are not required to be listed in order of decreasing predominance. Vitamins and/or minerals in dietary supplements offered as tablets, capsules, wafers, powders, or other similar uniform units, shall be listed in the order as provided in the table under § 80.1(f). If vitamins and/or minerals are offered in the physical form of a conventional food (e.g., physical form of a breakfast cereal), and are added to a food so that a single serving provides 50 percent or more of the U.S. RDA of any one of the added vitamins and/or minerals, unless such addition is permitted or required in other regulations (e.g., a standard of identity or nutritional quality guideline), the labeling shall conform to the requirements of 21 CFR 1.17, in addition to this section.

PROPOSED CONCLUSIONS OF LAW

Based on the foregoing statements in conjunction with the findings of fact herein published the Commissioner concludes, that:

1. It will promote honesty and fair dealing in the interest of consumers, and will assist in carrying out the purpose of the law of providing full information to consumers as to the value of such foods for special dietary use, to promulgate a standard of identity for dietary supplements of vitamins and minerals as hereinafter set forth in § 80.1.

2. Such standard should limit the nutrients contained therein to those listed in § 80.1(f).

3. Such standard should limit the lower and upper amounts of nutrients supplied, to those listed in § 80.1(f).

4. The label of the dietary supplement should bear the statement as hereinafter prescribed by § 80.1(h), "multivitamin and multimineral supplement", "multivitamin supplement", "multimineral supplement", "multivitamin and iron supplement", or "multivitamin supplement with iron", or "---------- supplement" (the blank to be filled in with the name of the vitamin or mineral which the supplement purports or is represented to contain). In addition, such standard should specify the nutrients which shall comprise "multivitamin and multimineral supplements", "multivitamin supplements", "multimineral supplements", " multivitamin and iron supplements", or "multivitamin supplements with iron", and single nutrient supplements as hereinafter prescribed by § 80.1(b).

5. The label of the dietary supplement should bear the name and amount of each vitamin and mineral supplied by the supplement as prescribed by § 80.1(i).

6. The label of the dietary supplement also should name the natural source or chemical form of the nutrient ingredients used.

7. The label of a dietary supplement containing one or more nutrients subject to deterioration should bear an expiration date which will assure that the supplement contains the full declared level of the nutrients when consumed.

TENTATIVE ORDER

Therefore, on the basis of the foregoing findings of fact, discussion, and conclusions of law drawn therefrom: *It is ordered*, That the stay of effective date of § 80.1, which stay was promulgated December 14, 1966 (31 FR 15730), be ended and that § 80.1 be modified to read as follows:

V 38 - 13 JAN 19 73 XUM

PART 80—DEFINITIONS AND STANDARDS OF IDENTITY FOR FOOD FOR SPECIAL DIETARY USES

§ 80.1 Dietary supplements of vitamins and minerals; definition, identity, label statements.

(a) The dietary supplements of vitamins and/or minerals for which definitions and standards of identity are prescribed by this section are prepared and offered as tablets, capsules, wafers, or other similar uniform units; in powder, granular, flake, or liquid form; or in the physical form of conventional foods; and purport to be or are represented for special dietary use by man to supplement his diet by increasing the total dietary intake of one or more of the essential vitamins and/or minerals specified in paragraph (f) of this section. The dietary supplements of vitamins and/or minerals are henceforth referred to as "dietary supplements" in this section.

(b) Classifications of dietary supplements.

(1) A dietary supplement shall contain only those vitamins and/or minerals listed in paragraph (f) of this section and shall be offered for its vitamin and/or mineral content only in the following combinations, with the provision that any vitamin or mineral defined as optional in paragraph (f) of this section may be omitted:

(i) All vitamins and minerals.
(ii) All vitamins.
(iii) All minerals.
(iv) All vitamins and the mineral iron.
(v) Vitamin D may be included in a multivitamin supplement and phosphorus may be included in a multimineral supplement without requiring the inclusion of the additional optional ingredients. The inclusion of any of the other optional ingredients (biotin or pantothenic acid for vitamins and copper or zinc for minerals) requires the inclusion of both such optional ingredients if the product is a multivitamin or multimineral supplement, and requires the inclusion of all four such ingredients if the product is a multivitamin and multimineral supplement.

(2) A dietary supplement may also be composed of any single vitamin or mineral listed in paragraph (f) of this section.

(3) Folic acid is optional for liquid dietary supplements because of instability of the vitamin in liquid preparations. Liquid dietary supplements containing multivitamins but not containing folic acid shall bear the following statement on the label, "This product does not contain the essential vitamin folic acid" which shall immediately follow the listing of vitamins, and minerals as prescribed in paragraph (1) of this section.

(4) Addition to or amendment of the list of permissible combinations of vitamins and/or minerals contained in paragraph (b)(1) of this section may be proposed by the Commissioner of Food and Drugs, on his own initiative, or upon petition by an interested person in accordance with the procedures set forth in Part 2 of this chapter. Any such petition shall be submitted in the form set forth in § 2.65 of this chapter, and shall include scientific data of a human nutritional and/or technological nature to support such addition or amendment as being consistent with the definition and purpose of dietary supplements as described by this section. The Commissioner, upon request, may extend the effective date of this section with respect to any particular product or class of products pending consideration and any administrative or court proceedings relating to any such petition, and may set a new effective date upon completion of the matter.

(5) The provisions of this section shall not apply to any food which contains or consists of any vitamin or mineral listed in § 125.1 (b) and/or (c) of this chapter, or any combination thereof, provided that all of the following requirements are met: (i) No such nutrient is contained at a level higher than the lower limit established for that nutrient pursuant to paragraph (f)(1) of this section, (ii) No direct or implied representative is made on the label, in labeling, or in advertising that the product is a dietary supplement or is adequate or appropriate for supplementing the daily diet with essential nutrients, (iii) If the product is in other than conventional food form, the common or usual name of the product required pursuant to § 1.8 of this chapter includes the names of each of the nutrients included, and (iv) The product is labeled pursuant to the provisions of § 1.17 of this chapter.

(c) General definitions.

(1) Subject to good manufacturing practices, dietary supplements described in this section shall contain in the specified daily quantity no less than the lower limit nor more than the upper limit of any nutrient specified in paragraph (f) of this section for the group(s) for which the supplement is offered.

(2) For the purposes of this section, the term "daily quantity" means the quantity of a dietary supplement that shall be specified in the labeling of the dietary supplement for consumption in a period of 1 day, and which shall be an amount or number of units reasonably suitable for and practicable of consumption in 1 day.

(3) In the event a dietary supplement is offered for more than one specific group, the specified daily quantity for each group shall be stated separately on the label.

(d) The different groups described in § 125.1(b) of this chapter shall be designated as follows: For labeling purposes:

(1) Infants and children under 4 years of age,
(2) Adults and children 4 or more years of age,
(3) Pregnant or lactating women.

(e) This section does not apply to:

(1) Other standardized foods.
(2) Foods the composition of which is defined by other regulations or statutes.
(3) Any food represented for use as the sole item of a meal or of the diet.
(4) Foods represented for use solely under medical supervision in the dietary management of specific diseases and disorders.
(5) Raw agricultural commodities (including marine products) and fabricated and other conventional foods to which single or multiple vitamins and/or minerals are added to improve nutritional quality, unless the total level (including any naturally occurring amounts) of any added vitamin or mineral per single serving attains or exceeds 50 percent of the U.S. Recommended Daily Allowance (U.S. RDA) for adults and children 4 years or more of age as specified in § 125.1(b) of this chapter, in which case the provisions of both this section and § 1.17 of this chapter shall apply. If the provisions of both this section and § 1.17 apply to a food, the labeling of such food shall conform to the labeling established in this section except that the labeling established in paragraph (c) of § 1.17 of this chapter, including the order for listing vitamins and minerals established in paragraph (c)(7)(iv) of that section, shall be used in lieu of the labeling established in paragraph (l)(1) of this section.

(6) Raw agricultural commodities (including marine products) which by their nature are sources of a specific vitamin(s) and/or mineral(s) at a level that, if it had been added, would have brought them within the definition of a dietary supplement. Such shall meet all the requirements of this section if they are represented as dietary supplements. Such foods may also be used as a source of specific vitamins and/or minerals in dietary supplements meeting the requirements of this section.

(7) A food with nutrients restored to pre-processing levels or added pursuant to § 1.8(e) of this chapter so that it is not nutritionally inferior to the food for which it substitutes and which it resembles.

(f) Permissible qualitative and quantitative composition of dietary supplements.

(1) The following table sets forth the permissible qualitative and quantitative composition of dietary supplements of vitamins and/or minerals:

U.S. GOVERNMENT RECOMMENDED DAILY ALLOWANCES (U.S. RDA'S) AND PERMISSIBLE COMPOSITIONAL RANGES FOR DIETARY SUPPLEMENTS OF VITAMINS AND MINERALS

	Unit of measurement	Infants and children under 4 years of age			Adults and children 4 or more years of age			Pregnant or lactating women		
		Lower limit	U.S. RDA	Upper limit	Lower limit	U.S. RDA	Upper limit	Lower limit	U.S. RDA	Upper limit
Vitamins, mandatory:										
Vitamin A	International units	1,250	2,500	2,500	2,500	5,000	5,000	5,000	8,000	8,000
Vitamin D[1]	do	200	400	400				400	400	400
Vitamin E	Milligrams	5.0	10	15	30	60	90	30	30	120
Vitamin C	do	20	40	60				60	60	120
Folic acid[2]	do	0.1	0.2	0.3	0.2	0.4	0.4	0.4	0.8	0.8
Thiamine	do	0.35	0.7	1.05	0.75	1.5	2.25	1.5	1.7	3.0
Riboflavin	do	0.4	0.8	1.2	0.8	1.7	2.6	1.7	2.0	3.4
Niacin	do	4.5	9.0	13.5	10	20	30	20	25	40
Vitamin B_6	do	0.35	0.7	1.05	1.0	2.0	3.0	2.0	2.5	4.0
Vitamin B_{12}	Micrograms	1.5	3.0	4.5	3	6	9	6	8	12
Optional:										
Vitamin D	International units				200	400	400			
Biotin	Milligrams	0.08	0.15	0.22	0.15	0.3	0.45	0.3	0.3	0.6
Pantothenic Acid	do	2.5	5.0	7.5	5.0	10	15	10	10	20
Minerals, mandatory:										
Calcium	Grams	0.125	0.8	1.2	0.125	1.0	1.5	0.125	1.3	2.0
Phosphorus[3]	do	0.125	0.8	1.2	0.125	1.0	1.5			
Iodine	Micrograms	35	70	105	75	150	225	150	150	300
Iron	Milligrams	5.0	10	15	9.0	18	27	18	18	60
Magnesium	do	40	200	300	100	400	600	100	450	800
Optional:										
Phosphorus	Grams							0.125	1.3	2.0
Copper	Milligrams	0.5	1.0	1.5	1.0	2.0	3.0	1.0	2.0	4.0
Zinc	do	4.0	8.0	12	7.5	15	22.5	7.5	15	30

[1] Optional for adults and children 4 or more years of age.
[2] Optional for liquid products.
[3] Optional for pregnant or lactating women.

(2) The U.S. Recommended Daily Allowances (U.S. RDA's) have been derived by the Food and Drug Administration from the "Recommended Dietary Allowances," published by the Food and Nutrition Board, National Academy of Sciences—National Research Council, and are subject to amendment from time to time as more information on human nutrition becomes available.

(g) Acceptable ingredient sources for dietary supplements:

(1) A vitamin or mineral used in a dietary supplement may be supplied by any suitable chemically synthesized or naturally produced substance which is not a food additive as defined in section 201(s) of the act; or if it is a food additive as so defined, it shall be used in conformity with regulations established pursuant to section 409 of the act.

(2) Any safe and suitable substance may be used as a preservative, stabilizer, flavor, sweetener, color, seasoning, carrier, base, or vehicle, or to facilitate preparation of the vitamin and mineral substances. A dietary supplement shall be prepared so that any such substance contained therein does not exceed the amount reasonably required to accomplish its intended physical or technical effect, and so that the biological availability of the vitamin(s) or mineral(s) is not impaired by the presence of such substance. Any such substance shall not be a food additive or color additive as defined in section 201(s) or (t) of the act; or if it is a food additive or color additive as so defined, it shall be used in conformity with regulations established pursuant to section 409 or 706 of the act.

(h) Nomenclature.

(1) The common name of a dietary supplement shall consist of a term descriptive of the vitamin and/or mineral composition of the product, as established in paragraph (h)(2) of this section, together with a phrase or phrases designating the group(s) for which the supplement is represented, as established in paragraph (h)(3) of this section (e.g., "multivitamin and multimineral supplement for infants and children under 4 years of age"). The name of the dietary supplement shall appear prominently and conspicuously on the principal display panel(s) of the label. The letters of the phrase(s) designating the consumer group(s) for which the product is represented shall be no less than one-third the size of those used in the term descriptive of the composition of the product. In addition to the common name prescribed by this paragraph, a dietary supplement may be labeled with a proprietary name: *Provided*, That it is not false or misleading in any particular.

(2) The terms used to describe the vitamin and/or mineral composition of dietary supplements listed in paragraphs (b)(1) and (2) of this section shall be as follows: (i) "Multivitamin and multimineral supplement" for a dietary supplement containing all vitamins and minerals, (ii) "multivitamin supplement" for a dietary supplement containing all vitamins, (iii) "multimineral supplement" for a dietary supplement containing all minerals, (iv) "multivitamin and iron supplement", or "multivitamin supplement with iron" for a dietary supplement containing all vitamins and the mineral iron. (v) "_____-supplement" for a dietary supplement containing a single vitamin or mineral listed as a mandatory or optional ingredient in the table contained in paragraph (f)(1) of this section (the blank to be filled in with the name of the vitamin or mineral).

(3) The phrases used to designate the group(s) for which a dietary supplement is intended shall be as follows: (i) "For infants and children under 4 years of age," (ii) "for adults and children 4 or more years of age," and (iii) "for pregnant or lactating women."

(i) Format for listing vitamins and minerals, and ingredients: (1) Immediately following the name and group designation on the principal display panel, as required by paragraph (h) of this section, or on the information panel (21 CFR 1.8d) if insufficient space is available on the principal display panel, the label shall bear a listing in tabular form of each of the vitamins and/or minerals supplied by the specified daily quantity of the dietary supplement, such daily quantity being specified at the top of the list. The vitamins and/or minerals shall be described by the names appearing in paragraph (f) of this section, shall appear in the order listed in paragraph (f) of this section, and shall be grouped and identified separately as "vitamins" and/or "minerals" without reference to "mandatory" or "optional." The quantity of each vitamin and/or mineral present in a specified daily quantity of the dietary supplement shall be stated as a part of this list and expressed in percentage of the U.S. RDA for each specific group for which the supplement is offered. The quantity of each vitamin and/or mineral present in the specified daily quantity of the dietary supplement shall also appear in the tabular listing in terms of the units of measure specified in paragraph (f) of this section.

(2) For determining the percentage contents of the U.S. RDA's present in the dietary supplement, the quantitative content of the following vitamins shall be calculated in terms of the following chemically identifiable reference forms:

Vitamin	Reference form: Name	Empirical formula	Molecular weight
Vitamin C	*L*-ascorbic acid	$C_6H_8O_6$	176.12
Folic acid	Pteroylmonoglutamic acid	$C_{19}H_{19}N_7O_6$	441.41
Niacin	Niacin	$C_6H_5NO_2$	123.11
Riboflavin	Riboflavin	$C_{17}H_{20}N_4O_6$	376.37
Thiamine	Thiamin chloride	$C_{12}H_{17}ClN_4OS$	300.82
Vitamin B_6	Pyridoxine	$C_8H_{11}NO_3$	169.18
Vitamin B_{12}	Cyanocobalamin	$C_{63}H_{88}CoN_{14}O_{14}P$	1,354.40
Biotin	*d*-Biotin	$C_{10}H_{16}N_2O_3S$	244.31
Pantothenic acid	*D*-pantothenic acid	$C_9H_{17}NO_5$	219.23

V 38 I 13 JAN 19 73 XUM

(3) The following synonyms may be added in parentheses immediately following the name of the vitamin in the statement described in paragraph (i) (1) of this section:

Vitamin	*Synonym*
Vitamin C	Ascorbic acid.
Folic acid	Folacin.
Riboflavin	Vitamin B_2.
Thiamine	Vitamin B_1.

(4) A separate list of nutrient ingredients in the product shall be included on the label pursuant to the requirements of Part 1 of this chapter. Such list shall include the natural source or chemical form of each individual nutrient present in the dietary supplement.

(j) When the dietary supplement is in liquid form and contains alcohol, the label shall state the percent-by-volume of alcohol present.

(k) A dietary supplement containing one or more nutrients, subject to deterioration below the labeled value before consumption shall bear on its outside wrapper or container, as well as on the label of its immediate container, the statement: "Expiration date ———", the blank to be filled in by the month and year. The expiration date shall be the date selected by the manufacturer, packer, or distributor of the dietary supplement on the basis of tests or other information showing that the dietary supplement, until that date, under the conditions of handling, storage, and use prescribed by directions appearing on its label, or, in the absence of such prescribed directions, under customary or usual conditions of handling, storage, and use will contain not less than the quantity of each vitamin and/or mineral, as set forth on its label, when consumed.

(l) All labeling information required by this section shall comply with the conspicuousness required by section 403(f) of the act and § 1.8d of this chapter. In addition, the following labeling requirements shall be met.

(1) The list of nutrients required by paragraph (i) (1) of this section shall appear in uniform type size.

(2) The synonyms permitted by paragraph (i) (3) of this section, if used, and the list of nutrient ingredients required by paragraph (i) (4) of this section shall appear in uniform type size, and in type size no larger than that used for the list of nutrients required by paragraph (i) (1) of this section.

(m) In addition to the requirements of this section, the labels and labeling for a dietary supplement is subject to the prohibitions contained in § 125.2(b) of this chapter.

(n) All labeling for dietary supplements that is ordered after December 31, 1973, and all labeling used for such products shipped in interstate commerce after December 31, 1974, shall comply with the provisions of this section; and if not so labeled, such product shall be deemed to be misbranded under section 403 (a), (g), and (j) of the act.

Any interested person whose appearance was filed at the hearing may, on or before March 20, 1973, file with the Hearing Clerk, Department of Health, Education, and Welfare, room 6–88, 5600 Fishers Lane, Rockville, MD 20852, written exceptions thereto. Exceptions shall point out with particularity the alleged errors in the proposed findings of fact and tentative order, and shall contain specific references to the pages of the transcript of testimony and to the exhibits on which the exceptions are based. Exceptions and accompanying briefs should be submitted in quintuplicate.

Dated: January 12, 1973.

CHARLES C. EDWARDS,
Commissioner of Food and Drugs.

[FR Doc.73–996 Filed 1–18–73;8:45 am]

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

FOOD LABELING

Notice of Opportunity for Exceptions and Comments

The Commissioner of Food and Drugs is publishing in this issue of the FEDERAL REGISTER the following proposals, tentative orders, and regulations, with opportunity for the public to present exceptions and comments.

1. *Nutrition labeling.* A new 21 CFR 1.17, governing nutrition labeling for all food, is published as a final regulation. The Commissioner announced at the meeting of the National Food Advisory Committee on October 30, 1972, that additional time for public consideration of these regulations would be provided. Accordingly, the Commsioner is requesting submission of any additional comment on this regulation on or before February 20, 1973. Any technical changes justified by such comment will be the subject of further modification of the regulation and will be published prior to March 15, 1973. The Commissioner does not anticipate any major changes in this regulation.

2. *Food label information panel.* A new 21 CFR 1.8d, establishing a standard food label information panel, is published as a final regulation. Additional comment on this regulation may also be submitted on or before February 20, 1973.

3. *Food fat labeling.* A new 21 CFR 1.18, governing the labeling of the fatty acid composition and cholesterol content of fat-containing food, is published as a final regulation and 21 CFR 3.41 is revoked. Additional comment on this regulation may also be submitted on or before February 20, 1973.

4. *Special dietary food regulations.* The tentative order on amendments of 21 CFR 125.1–125.3, relating to labeling of special dietary foods, is published in accordance with 21 CFR 2.97. Exceptions to this proposed order may be filed on or before March 20, 1973.

5. *Standard of identity for vitamin-mineral supplements.* The tentative order on a new 21 CFR 80.1, establishing a standard of identity for vitamin-mineral supplements, is published in accordance with 21 CFR 2.97. Exceptions to this proposed order may be filed on or before March 20, 1973.

6. *Food standard labeling changes.* Amendments to several standards of identity for enriched foods, to substitute reference to nutrition labeling in place of the existing reference to special dietary food labeling, are published as a proposal. Comments may be submitted on or before February 20, 1973.

7. *Food flavor labeling.* A revision of 21 CFR 1.12, to define spice and natural and artificial flavor and to establish a uniform pattern for labeling flavor and food to which flavor is added, is published as a proposal. Comments may be submitted on or before March 20, 1973.

8. *Incidental food additives.* Revision of 21 CFR Parts 1 and 5 including addition of a new § 1.10a, relating to exemptions from declaration of incidental ingredients, is published as a proposal. Comments may be submitted on or before March 20, 1973.

9. *Imitation food labeling.* A new 21 CFR 1.8(e), to govern application of the term "imitation" to food, is published as a proposal. Comments may be submitted on or before March 20, 1973.

10. *Standards of identity for mellorine and parevine.* Two new sections in 21 CFR Part 20, establishing standards of identity for mellorine and parevine requiring appropriate fortification and nutrition labeling, and revocation of 21 CFR 3.39, are published as proposals. Comments may be submitted on or before March 20, 1973.

11. *Label declaration of ingredients in standardized foods.* Section 3.88, which urges food manufacturers and distributors to utilize full ingredient declaration for standardized food labels, is clarified and republished.

12. *Uniform effective date for food labeling changes.* A request for comments on the establishment of a uniform effective date for food labeling changes that will be necessary as a result of promulgation of a number of new and revised regulations is published. Such comments may be submitted on or before February 20, 1973.

The Commissioner is publishing these proposals, tentative orders, and final regulations, at one time because many of them are interrelated and it is necessary that a uniform effective date be established for all. The Commissioner has carefully considered the time within which exceptions and comments must be received in order to proceed expeditiously with these matters, and has concluded that the periods set out above are reasonable. No requests for extensions will be granted.

Dated: January 12, 1973.

CHARLES C. EDWARDS,
Commissioner of Food and Drugs.

[FR Doc.73–998 Filed 1–18–73;8:45 am]

FOOD LABELING

Prospective Requirements for Manufacturers, Packers, and Distributors of Food; Request for Comments

The Commissioner of Food and Drugs is promulgating a number of regulations for packaged food, which are designed to furnish the consumer more information concerning the ingredients and nutritional qualities of packaged food, and to present such information in a uniform and readily understandable manner. Some of these regulations will make labeling changes mandatory, while others permit labeling changes on a voluntary basis. In some cases, moreover, these regulations will require extensive changes in current labeling, and the economic impact on the food industry, if these changes were required on a piecemeal basis over a period of time, might well be severe.

The Commissioner, therefore, is of the opinion that the mandatory effective date should be the same for all such regulations to provide an orderly and economical adjustment to the new labeling requirements. Such procedure would be in the interest of consumers as well as industry since it is likely that the cost of multiple, successive piecemeal label revisions, which would otherwise be required, would be passed on to the consumer in the form of higher food prices.

The following sections of the general regulations, under Title 21 of the Code of Federal Regulations, which are published elsewhere in this issue of the FEDERAL REGISTER, will implement some of these changes:

1. Section 1.8d *Food labeling; information panel.*
2. Section 1.17 *Food; nutrition labeling.*
3. Section 80.1 *Definition and Standard of Identity for dietary supplements of vitamins and minerals.*
4. Section 125.1 *Definitions and interpretation of terms.*
5. Section 125.2 *General label statements; dietary properties; placement.*
6. Section 125.3 *Label statements relating to vitamins and minerals.*

Other changes will be required through amendments in food standards, establishment of nutrition guidelines and common or usual names, and other regulations, some of which are published as proposals or final regulations elsewhere in this issue of the FEDERAL REGISTER.

In the past, in support of requests for time for making label changes required by newly promulgated regulations, industry has urged a lead time of 12 to 18 months for adjustment to mandatory labeling changes, because of the practice of certain segments of industry of ordering up to a 12-months supply of labels or labeled containers at one time, and because of the necessity of carrying a label inventory sufficient for several months production.

It is anticipated that the regulations in question will be promulgated within the next 6 months. In view of the multiple regulations involved in this case, and the time required for industry to redesign its labeling, obtain new labeling, and exhaust inventories of current labeling, the Commissioner proposes that a lead time of approximately 18 months for bringing products into full compliance is reasonable and proposes to provide until December 31, 1974, for full compliance for products shipped in interstate commerce.

The Commissioner also recognizes that there may be instances when an 18-month lead time will not be necessary for bringing particular products into compliance. Therefore, the Commissioner proposes to require that any affected product, for which labeling is ordered on or after December 31, 1973, comply in all respects with the provisions of these regulations at the time the labeling is placed into use, regardless of

V 38 - 13 JAN 19 73 XUM

time. Manufacturers are encouraged to order complying labeling and to begin using it at the earliest possible date.

In a policy statement (21 CFR 3.88) published in the FEDERAL REGISTER on March 10, 1972 (37 FR 5120), the Food and Drug Administration encouraged manufacturers, packers, and distributors, to voluntarily disclose in the labeling of food, complete information on the ingredients contained in the food and announced that "the Food and Drug Administration intends to amend the definitions and standards of identity of food by setting into motion, as rapidly as possible, the provisions of section 401 of the Act to require label declaration of all optional ingredients, with the exception of optional spices, flavoring, and colorings, which may continue to be designated as such without specific ingredient declaration." A clarification of this regulation is published elsewhere in this issue of the FEDERAL REGISTER. In addition, legislation requiring declaration of the mandatory ingredients in standardized foods has been initiated. The Commissioner urges that complete ingredient labeling be included at the same time that any labeling changes are made under any of the regulations which are the subject of this notice.

Interested persons may, on or before February 20, 1973, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6-88, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this notice. Comments may be accompanied by a memorandum or brief in support thereof. Received comments maye be seen in the above office during working hours, Monday through Friday.

Dated: January 12, 1973.

CHARLES C. EDWARDS,
Commissioner of Food and Drugs.

Title 7—AGRICULTURE

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Nuts), Department of Agriculture

[Lemon Reg. 569]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

This regulation fixes the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period January 21–27, 1973. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 910. The quantity of lemons so fixed was arrived at after consideration of the total available supply of lemons, the quantity of lemons currently available for market, the fresh market demand for lemons, lemon prices, and the relationship of season average returns to the parity price for lemons.

§ 910.869 Lemon Regulation 569.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this section to limit the quantity of lemons that may be marketed during the ensuing week stems from the production and marketing situation confronting the lemon industry.

(i) The committee has submitted its recommendation with respect to the quantity of lemons it deems advisable to be handled during the ensuing week. Such recommendation resulted from consideration of the factors enumerated in the order. The committee further reports the demand for lemons has eased somewhat, with sales volume this week expected to be down slightly from last week's estimated sales of 205 carlots. Average f.o.b. price was $5.04 per carton the weekended January 13, 1973, compared to $4.95 per carton the previous week. Track and rolling supplies at 121 cars were up 26 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantity of lemons which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule making procedure, and postpone the effective date of this section until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for lemons and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on January 16, 1973.

(b) *Order.* (1) The quantity of lemons grown in California and Arizona which may be handled during the period January 21 through January 27, 1973, is hereby fixed at 175,000 cartons.

(2) As used in this section, "handled" and "carton(s)" have the same meaning as when used in the said amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: January 18, 1973.

PAUL A. NICHOLSON,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

VEGETABLE GROWERS AND OYSTER PLANTERS

In accordance with 5 U.S.C. 553. this amendment is being published without prior rule making because a delay in making available assistance provided by this amendment would be contrary to the public interest.

Subpart A of Part 1832, Title 7, Code of Federal Regulations (37 FR 7293), is amended to provide the following: (1) Section 1832.14(c)(1) requires an applicant to possess a knowledge and the experience necessary to offer a reasonable prospect of success with the vegetable crops produced with Emergency loan funds; (2) § 1832.14(f) increases the amount of an initial Emergency loan that can be made without real estate security; (3) § 1832.17(d)(3) is added to provide that oyster planters may obtain subsequent loans over a 3-year period to complete rehabilitation of their oyster beds without regard to whether credit is available from other sources.

As amended, §§ 1832.14 (c)(1), and (f), and 1832.17(d)(3) will read as follows:

§ 1832.14 EM loans to vegetable growers.

* * * * *

(c) *Eligibility.* * * *

(1) That the applicant possess the knowledge and experience necessary to offer reasonable prospect for success with the specific vegetable crops to be produced with the EM loan.

* * * * *

(f) *Security.* It is the general policy that EM loans to vegetable growers will be secured by a first lien on crops, the best lien on farm machinery and equipment, and the best lien obtainable on farm real estate having sufficient equity to provide reasonably adequate security. A first lien on crops will be required in all cases and there must be real estate security for any initial EM loan in excess of $35,000, and any subsequent EM loan which would cause the applicant's total principal balance on EM loans and Operating loans to exceed $50,000. Applicants who can offer chattel and real estate security will be required to do so. However, a subsequent EM loan which would not cause the applicant's

V 38-14 JAN 22 73 XUM

total principal balance on EM loans and Operating loans to exceed $50,000 may be made upon the security of a crop lien only for an applicant having no equity in chattels or real estate where the loan approval official determines that the loan can be repaid from the crop year's income. This determination will be made cautiously.

. . . . . .

§ 1832.17 EM loans to oyster planters.

. . . . . .

(d) *Eligibility requirements.* . . .

(3) Where it is the normal pattern to replant only one-third of damaged oyster ground each year additional EM loans may be made during subsequent years in order to completely rehabilitate a borrower's oyster beds without regard to whether credit is available from other sources.

. . . . . .

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Administration, Department of Transportation

[Airspace Docket No. 72-WE-45]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Control Zone

On December 8, 1972, a notice of proposed rule making was published in the FEDERAL REGISTER (37 FR 26125) stating that the Federal Aviation Administration was considering an amendment to Part 71 of the Federal Aviation Regulations that would designate a new control zone at Palomar Airport, Carlsbad, Calif.

Interested persons were given 30 days in which to submit written comments, suggestions, or objections. No objections have been received and the proposed amendment is hereby adopted subject to the following change:

Delete FEDERAL REGISTER citation "(37 FR 2056)" and substitute "(37 FR 351)" therefor.

Effective date. This amendment shall be effective 0901 G.m.t., March 29, 1973.

(Sec. 307(a), Federal Aviation Act of 1958, as amended, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c))

Issued in Los Angeles, Calif., on January 9, 1973.

ROBERT O. BLANCHARD,
Acting Director, Western Region.

In § 71.171 "(38 FR 351)" the following control zone is added.

PALOMAR, CALIF.

Within a 3-mile radius of Palomar Airport (latitude 33°07'40" N., longitude 117°16'45" W.) and within 1.5 miles each side of the Oceanside VORTAC 134° radial, extending from the 3-mile radius zone to 4.5 miles southeast of the VORTAC. This control zone shall be effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airman's Information Manual.

[FR Doc.73-1275 Filed 1-19-73;8:45 am]

[Airspace Docket No. 71-SO-166]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Additional Control Areas

On November 7, 1972, a notice of proposed rule making (NPRM) was published in the FEDERAL REGISTER (37 FR 23648) stating that the Federal Aviation Administration (FAA) was considering amendments to Part 71 of the Federal Aviation Regulations that would designate additional control areas along the east coast of the United States.

Interested persons were afforded an opportunity to participate in the proposed rule making through the submission of comments. One adverse comment was received from the State of Florida Department of Transportation, but it was later withdrawn. All other comments received were favorable.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., March 29, 1973, as hereinafter set forth.

In § 71.163 (38 FR 344) the following additional control areas are added:

CONTROL 1404

That airspace extending upward from 2,000 feet MSL bounded on the north by Control 1152; on the east by Control 1150; on the south by Control 1153, and on the west by a line 3 nautical miles from and parallel to the shoreline.

CONTROL 1412

That airspace extending upward from 2,000 feet MSL bounded on the north by Control 1153; on the east by Control 1150; on the south by a line extending from lat. 29°21'30" N., long. 79°08'05" W., westerly to lat. 28°49'00" N., long. 80°41'00" W.; and on the west by a line 3 nautical miles from and parallel to the shoreline.

(Sec. 307(a), 1110, Federal Aviation Act of 1958, 49 U.S.C. 1348, 1510; Executive Order 10854 (34 FR 9565); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C. on January 15, 1973.

H. B. HELSTROM,
Chief, Airspace and Air Traffic Rules Division.

Title 18—CONSERVATION OF POWER AND WATER RESOURCES

Chapter I—Federal Power Commission

[Docket No. R-469; Order 467-A]

PART 2—GENERAL POLICY AND INTERPRETATIONS

Utilization and Conservation of Natural Resources

JANUARY 15, 1973.

By order issued January 8, 1973 (38 FR 1503, January 15, 1973), we issued a statement of policy setting forth priorities-of-deliveries to be invoked by jurisdictional pipeline companies during periods of curtailment. The priorities set forth therein tracked our findings in the opinion we issued concurrently with the policy statement.[1] However, in setting out our statement of policy, we inadvertently omitted procedures to permit the pipeline companies to respond immediately to meet emergency situations that may occur during periods of curtailment.

As we stated in *Arkansas Louisiana, supra:*

> Arkla's curtailment plan must reflect sufficient flexibility to permit immediate response by Arkla to emergency situations during curtailment where supplemental deliveries are required to forestall irreparable injury to life or property. Revised tariff provisions to define and delimit emergency procedures should be filed for Commission review and approval.

Emergency provisions in accordance with the above criteria should be contained in the tariffs of all jurisdictional pipeline companies. Additionally, the emergency provision should also permit the implementation of curtailment procedures to meet environmental emergencies that may occur on a pipeline's system. Accordingly, we are amending our statement of policy by adding a paragraph at the end of § 2.78 of the Commission's general policy and interpretations to provide for the emergency provisions discussed above.

The Commission finds:

(1) The notice and effective date provisions of 5 U.S.C. 553 do not apply with respect to the amendment to the policy statement here adopted.

(2) It is appropriate and in the public interest in administering the Natural Gas Act to adopt the amendment to the policy statement herein ordered.

The Commission, acting pursuant to the provisions of the Natural Gas Act, as amended, particularly sections 4, 5, and 7 (52 Stat. 822, 824, 825; 56 Stat. 83, 84; 61 Stat. 459; 76 Stat. 72; 15 U.S.C. 717c, 717d, 717f) orders:

(A) Part 2 of the Commission's general rules of practice and procedure, general policy and interpretations, Subchapter A, Chapter I, Title 18 of the Code of Federal Regulations is amended by adding a new subparagraph 11 at the end of § 2.78 (a)(11) and, as amended, it will read as follows:

§ 2.78 Utilization and conservation of natural resources—natural gas.

(a) The national interests in the development and utilization of natural gas resources throughout the United States will be served by recognition and implementation of the following priority-of-service categories for use during periods of curtailed deliveries by jurisdictional pipeline companies:

(1) Residential, small commercial (less than 50 Mcf on a peak day).

(2) Large commercial requirements (50 Mcf or more on a peak day) and firm industrial requirements for plant protection, feedstock and process needs.

(3) All industrial requirements not specified in subparagraph (2), (4), (5), (6), (7), or (8) of this paragraph.

(4) Firm industrial requirements for boiler fuel use at less than 3,000 Mcf per day, but more than 1,500 Mcf per day, where alternate fuel capabilities can meet such requirements.

(5) Firm industrial requirements for large volume (3,000 Mcf or more per day) boiler fuel use where alternate fuel capabilities can meet such requirements.

(6) Interruptible requirements of less than 1,500 Mcf per day.

(7) Interruptible requirements of intermediate volumes (from 1,500 Mcf per day through 3,000 Mcf per day).

(8) Interruptible requirements of more than 3,000 Mcf per day.

(9) The priorities-of-deliveries set forth in paragraph (a)(1)-(8) of this section will be applied to the deliveries of all jurisdictional pipeline companies during periods of curtailment on each company's system; except, however, that, upon a finding of extraordinary circumstances after hearing initiated by a petition filed under § 1.7(b) of this chapter, exceptions to those priorities may be permitted.

(10) The above list of priorities requires the full curtailment of the lower priority category volumes to be accomplished before curtailment of any higher priority volumes is commenced. Additionally, the above list requires both the direct and indirect customers of the pipeline that use gas for similar purposes to be placed in the same category of priority.

(11) The tariffs filed with this Commission should contain provisions that will reflect sufficient flexibility to permit pipeline companies to respond to emergency situations (including environmental emergencies) during periods of curtailment where supplemental deliveries are required to forestall irreparable injury to life or property.

(B) The amendment provided for herein shall be effective as of January 15, 1973.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[FR Doc.73-1249 Filed 1-19-73;8:45 am]

[1] Arkansas Louisiana Gas Co., —— FPC ——, Opinion No. 643, issued Jan. 8, 1973.

[Docket No. R-435 Order No. 468]

NET REALIZABLE VALUE OF HYDROCARBON RESERVES

Uniform System of Accounts

JANUARY 15, 1973.

Revisions in Uniform Systems of Accounts for Natural Gas Companies (Classes A, B, C, and D) and Annual Report Form No. 2 to provide that the determination of natural gas reserves on acreage acquired after October 7, 1969, shall be made and attested to by independent appraisers, to disclose the net realizable value and related costs of hydrocarbon reserves, and to eliminate an allowance for equity funds on exploration and development expenditures incurred on or related to acreage acquired after October 7, 1969.

On January 5, 1972, the Commission issued a notice of proposed rule making in this proceeding (37 FR 437, January 11, 1972) proposing to amend its Uniform Systems of Accounts for Natural Gas Companies (Classes A, B, C, and D) and Annual Report Form No. 2 to provide that:

1. Proven and unproven hydrocarbon reserves on acreage acquired after October 7, 1969, shall be determined and attested to by independent appraisers.

2. The net realizable values and related costs of proven and unproven hydrocarbons on such acreage shall be reported in FPC Form No. 2.

3. An allowance for funds used during construction shall not be allowed on other funds used for exploration and development on such acreage.

Comments were invited from interested parties on or before February 22, 1972. The deadline for comments was subsequently extended to March 21, 1972. The Commission received comments from eleven respondents.[1] Before proceeding to the discussion of the proposals by the categories outlined above, we will discuss the reporting and appraisal of unproven hydrocarbon reserves.

Several respondents to the rule making stated that the reporting of unproven reserves would be misleading to investors and could work to the disadvantage of pipeline companies in acquiring new mineral leases. It was also mentioned that the use of net realizable values of unproven reserves to support the costs recorded in the gas plant accounts would delay a writeoff of unproductive costs. After consideration of the comments, we are deleting the reporting and appraisal of unproven reserves from the rule making.

The propcsal that hydrocarbon reserves be determined and attested to each year was opposed by some respondents on the grounds that independent appraisal would be too costly. The cost of such appraisals, however, were not mentioned. It was also commented that the Securities and Exchange Commission accepts "in-house" appraisals and that such appraisals should be accepted by the Commission. It was suggested by two respondents that independent appraisal be made every 3 years instead of every year, as proposed, because of the limited number of petroleum geologists and petroleum engineers to do the work. One respondent suggested that independent appraisal be made every 3 years because it is required under its mortgage indenture to obtain an independent appraisal every 3 years. Finally, one respondent stated that it would be quite costly for it to obtain independent appraisals because of the large number of wells it has with insignificant volumes of natural gas.

We believe that safeguards should be established to ensure that costs recorded in the plant accounts under the full-cost accounting concept do not exceed the value of hydrocarbon reserves discovered. We believe that an independent appraisal of the hydrocarbon reserves would provide a better safeguard than "in-house" estimates. We, however, are modifying the appraisal and attestation provisions, as proposed in the rule making, to require appraisal and attestation no more frequently than every 3 years. For pipeline companies that are now obtaining independent appraisals of their hydrocarbon reserves, appraisal and attestation of such reserves shall be required 3 years from the year of the last appraisal. For pipeline companies that do not obtain independent appraisals of their reserves, appraisal and attestation shall be required beginning in the reporting year 1973. We also take note of the respondent's comments that appraisal would be too costly because of the large number of low producing wells it has and provide that pipeline companies may petition the Commission for partial relief from the appraisal and attestation provision. It, however, is not intended to allow pipeline companies to accumulate costs in their plant accounts without hydrocarbon reserve support for such costs.

Respondents to the rule making excepted to the proposed new schedules (pages 549A, 549B, and 549C) on the grounds that too much detail on costs would be required and it should only be necessary to report the net realizable

[1] Independent Natural Gas Association of America, Colorado Interstate Gas Co., Columbia Gas Transmission Corp., Consolidated Natural Gas Co., Northern Natural Gas Co., Pacific Gas Transmission Co., Texas Eastern Transmission Co., Consumers Power Co., Arthur Anderson & Co., and Lybrand, Ross Bros. & Montgomery.

V38-14 JAN 22 73 XUM

values at the end of the reporting year. The separate assignment of costs to the various hydrocarbons was also expected to. It was suggested that for cost allocation purposes the hydrocarbons be either placed on an equivalent liquid basis or Mcf of natural gas basis.

After consideration of the comments, we are modifying the reporting provisions, as proposed in the rule making, to provide that the hydrocarbon products shall be grouped in one new schedule, page 549A, and eliminating proposed new schedules, pages 549B and 549C. Schedule, page 549A has been structured to group, for reporting purposes, oil and liquid reserves. Natural gas will be reported separately. We have also modified the schedule to require the reporting of the gross costs related to the hydrocarbon products rather than separate cost reporting. Finally, we have modified the schedule to require the reporting of total net realizable value at the end of the year rather than by hydrocarbon products. New schedule page 549D has been redesignated as 549B and has been modified to require the reporting of any significant revisions in the total value of hydrocarbons from the preceding year other than from the addition of new reserves. Pipeline companies are urged to show in their annual reports to stockholders, the data on hydrocarbon costs and values that will be reported to the Commission.

Respondents to the rule making were nearly unanimous in opposing the proposal that an allowance for a pipeline's own funds used for exploration and development on leases acquired after October 7, 1969, not be included in the gas plant accounts. It was alleged, among other things, that the imputed interest is an "actual cost" and such a prohibition would "breach the general accepted accounting principle of capitalizing an allowance on all funds used during construction."

We attempt to maintain our Systems of Accounts consistent with generally accepted principles of accounting except when, for regulatory purposes, deviation from such principles are found to be necessary. Contrary to the respondents allegations, it is not generally accepted as proper outside the regulated field to recognize implicit interest on propriety capital during construction. Since, as stated in the notice of proposed rulemaking, exploration and development costs incurred on or related to leases acquired after October 7, 1969, will not be included in the cost of service for pipeline companies nor be part of the rate base, we adopt in our Uniform System of Accounts for Natural Gas Companies the proposal, as noticed, to eliminate an allowance on the pipeline company's own funds used for exploration and development on such leases as being consistent with sound accounting principles.

Certain constructive suggestions were received from the respondents and have been incorporated in the amendments.

The Commission finds:

(1) The notice and opportunity to participate in this rule making proceeding with respect to the matters presently before this Commission through the submission, in writing, of data, views, comments, and suggestions in the manner described above, are consistent and in accordance with the procedural requirements prescribed by 5 U.S.C. 553.

(2) The amendments to Parts 201 and 204 of the Commission's Uniform Systems of Accounts for Natural Gas Companies, and Annual Report Form No. 2 prescribed by § 260.1 in Chapter I, Title 18 of the Code of Federal Regulations, herein prescribed, are necessary and appropriate for the administration of the Natural Gas Act.

(3) Since the amendments prescribed herein, which were not included in the notice of this proceeding, are of a minor nature and consistent with the prime purpose of the proposed rule making, further compliance with the notice provision of 5 U.S.C. 553 is unnecessary.

(4) Good cause exists for making the amendments to the Uniform Systems of Accounts for Natural Gas Companies ordered herein, effective on the issuance of this order and the revisions to FPC Form No. 2 adopted herein, effective for the reporting year 1972.

(5) Good cause exists for requiring pipeline companies that now obtain independent appraisals of their hydrocarbon reserves to obtain independent appraisals of their reserves and attestation of such appraisals 3 years from the date of the last appraisals and every 3 years thereafter; and for pipeline companies that do not now obtain independent appraisals, independent appraisals of reserves and attestation of such appraisals beginning in the reporting year 1973 and every 3 years thereafter.

The Commission, acting pursuant to provisions of the Natural Gas Act, as amended, particularly sections 8 and 16 (52 Stat. 825, 830; 15 U.S.C. 717g, 717o), orders:

PART 201—UNIFORM SYSTEM OF ACCOUNTS FOR NATURAL GAS COMPANIES

A. The Commission's Uniform System of Accounts for Class A and Class B Natural Gas Companies prescribed by Part 201, Chapter I, Title 18 of the Code of Federal Regulations is amended as follows:

1. Subparagraph "(17) Allowance for funds used during construction" of Gas Plant Instruction "3. Components of Construction Cost" is amended by revising the first sentence. As amended, subparagraph (17) reads:

Gas Plant Instructions

* * * * *

3. *Components of construction cost.* * * *

(17) "Allowance for funds used during construction" includes the net cost for the period of construction of borrowed funds used for construction purposes and a reasonable rate on other funds when so used, except when such other funds are used for exploration and development on leases acquired after October 7, 1969, no allowance on such other funds shall be included in these accounts. No interest charges shall be included in these accounts upon expenditures for construction projects which have been abandoned.

* * * * *

2. The text of the Gas Plant accounts is amended by amending Special Instruction—Costs Related to Leases Acquired after October 7, 1969, immediately following subheading B.1 Natural Gas Production and Gathering Plant. As amended, the Gas Plant Accounts read:

Gas Plant Accounts

* * * * *

2. PRODUCTION PLANT

* * * * *

B. NATURAL GAS PRODUCTION PLANT

B.1 Natural Gas Production and Gathering Plant

Special Instructions—Costs Related to Leases Acquired After October 7, 1969. The net book value of amounts recorded in the natural gas production accounts incurred on or related to leases acquired after October 7, 1969, shall, in general, not exceed the net realizable value (estimated selling price less estimated costs of extraction, completion, and disposal) of recoverable hydrocarbon reserves discovered on such leases. After initiation of exploration and development on leases acquired after October 7, 1969, the utility must determine after a reasonable period of time, and annually thereafter, whether the net realizable value of recoverable reserves on such leases will be sufficient to absorb the net book value of amounts recorded in the accounts. The recoverable reserves shall be determined and attested to by independent appraisers no less frequently than every 3 years. If the net realizable value of recoverable reserves is not sufficient to absorb the net book value of amounts in the production accounts, the utility shall reduce the net book value of the amounts in the accounts to net realizable value of recoverable reserves. The reduction shall be done by first reducing the unamortized amounts recorded in Account 338, Unsuccessful Exploration and Development Costs, by debiting Account 404.1, Amortization and Depletion of Producing Natural Gas Land and Land Rights. Next, if the net book value related to successful costs exceeds the net realizable value of the recoverable reserves, the production plant accounts shall be written down to such net realizable value by appropriate charges and credits to the expense and valuation accounts.

* * * * *

PART 204—UNIFORM SYSTEM OF ACCOUNTS FOR CLASS C NATURAL GAS COMPANIES

B. The Commission's Uniform System of Accounts for Class C and Class D Natural Gas Companies prescribed by Part 204, Chapter I, Title 18 of the Code of Federal Regulations is amended as follows:

1. Gas Plant Instruction "2. Components of construction cost." is amended by adding a new sentence thereto. As revised, Gas Plant Instruction 2 reads:

Gas Plant Instructions

* * * * *

2. *Components of construction cost.* The cost of construction of property chargeable to the gas plant accounts shall include, where applicable, fees for construction certificate applications paid after grant of certificate, the cost of labor, materials and supplies, transportation, work done by others for the utility, injuries and damages incurred in construction work, privileges and permits, special machine service, allowance for funds used during construction, and such portion of general engineering, administrative salaries and expenses, insurance taxes and other analogous items as may be properly includible in construction costs. When the utility employs its own funds in exploration and development on leases acquired after October 7, 1969, no interest on such funds shall be included in these accounts.

* * * * *

2. The text of the Gas Plant accounts is amended by amending Special Instruction—Costs Related to Leases Acquired after October 7, 1969, immediately following subheading B.1 Natural Gas Production and Gathering Plant. As amended, the Gas Plant Accounts read:

Gas Plant Accounts

* * * * *

2. PRODUCTION PLANT

* * * * *

B. NATURAL GAS PRODUCTION PLANT

B. 1 NATURAL GAS PRODUCTION AND GATHERING PLANT

Special Instructions—Costs Related to Leases Acquired After October 7, 1969. The net book value of amounts recorded in the natural gas production accounts incurred on or related to leases acquired after October 7, 1969, shall, in general, not exceed the net realizable value (estimated selling price less estimated costs of extraction, completion, and disposal) of recoverable hydrocarbon reserves discovered on such leases. After initiation of exploration and development on leases acquired after October 7, 1969, the utility must determine after a reasonable period of time, and annually thereafter, whether the net realizable value of recoverable reserves will be sufficient to absorb the net book value of amounts recorded in the accounts. The recoverable reserves shall be determined and attested to by independent appraisers no less frequently than every 3 years. If the net realizable value of recoverable reserves is not sufficient to absorb the net book value of amounts in the production accounts, the utility shall reduce the net book value of the amounts in the accounts to net realizable value of recoverable reserves. The reduction shall be done by first reducing the unamortized amounts recorded in Account 338, Unsuccessful Exploration and Development Costs, by debiting Account 403, Depreciation and Depletion Expense. Next, if the net book value related to successful costs exceeds the net realizable value of the recoverable reserves, the production plant accounts shall be written down to such net realizable value by appropriate charges and credits to the expense and valuation accounts.

* * * * *

C. Schedule, pages 547, Natural Gas Reserves and Land Acreage, 548, Natural Gas Reserves and Land Acreage (Continued), 549, Changes in Estimated Natural Gas Reserves, 549A, Changes in Estimated Hydrocarbon Reserves and Costs, and Net Realizable Value, and 549B, Explanation of Changes in Estimated Hydrocarbon Reserves and Costs, Net Realizable Value, in FPC Form No. 2 Annual Report for Natural Gas Companies (Class A and Class B) prescribed by § 260.1, Chapter I, Title 18 of the Code of Federal Regulations are amended as set forth in Attachment A, hereto.[1]

D. The modifications adopted herein to the Uniform System of Accounts for Class A and Class B Natural Gas Companies and Uniform System of Accounts for Class C and Class D Natural Gas Companies are effective on issuance of this order; and the modifications to FPC Form No. 2 Annual Report for Natural Gas Companies (Class A and Class B) adopted herein effective for the reporting year 1972.

E. Natural gas companies that now obtain independent appraisal of their hydrocarbon reserves shall obtain independent appraisals of their reserves and attestation of such appraisals 3 years from the date of the last appraisal and every 3 years thereafter; and natural gas companies that do not now obtain independent appraisals of their hydrocarbons shall obtain independent appraisal of their reserves and attestation of such appraisals beginning in the reporting year 1973 and every 3 years thereafter.

F. The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.[2]

[SEAL] KENNETH F. PLUMB, *Secretary.*

[FR Doc.73-1234 Filed 1-19-73;8:45 am]

Title 21—FOOD AND DRUGS

Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER C—DRUGS

PART 135a—NEW ANIMAL DRUGS FOR OPHTHALMIC AND TOPICAL USE

Prednisolone Sodium Phosphate-neomycin Sulfate Ophthalmic Ointment

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (11-437V) filed by Merck Sharp & Dohme Research Laboratories, Division of Merck & Co., Inc., Rahway, N.J. 07065, proposing revised labeling for the safe and effective use of prednisolone sodium phosphate-neomycin sulfate ophthalmic ointment for the treatment of cats and dogs. The supplemental application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)), and under the authority delegated to the Commissioner (21 CFR 2.120), Part 135a is amended by adding the following new section:

§ 135a.20 Prednisolone sodium phosphate-neomycin sulfate ophthalmic ointment.

(a) *Specifications.* Prednisolone sodium phosphate-neomycin sulfate ophthalmic ointment contains prednisolone sodium phosphate equivalent to 2.5 milligrams prednisolone 21-phosphate and 5 milligrams neomycin sulfate (equivalent to 3.5 milligrams neomycin base) in each gram of ointment.

(b) *Sponsor.* See code No. 023 in § 135.501(c) of this chapter.

(c) *Conditions of use.* (1) The drug is recommended for use in superficial ocular inflammations or infections limited to the conjunctiva or the anterior segment of the eye of cats and dogs, such as those associated with allergic reactions or gross irritants.

(2) A small quantity of the ointment should be expressed into the conjunctival sac 4 times a day (at intervals of 1 to 8 hours) for a few days until there is a favorable response, then the frequency of application may be reduced to twice daily as long as the condition remains under control. Treatment may require from a few days to several weeks.

(3) All topical ophthalmic preparations containing corticosteroids with or without an antimicrobial agent are contraindicated in the initial treatment of corneal ulcers. They should not be used until the infection is under control and corneal regeneration is well underway.

(4) For use only by or on the order of a licensed veterinarian.

Effective date. This order shall be effective on January 22, 1973.

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i))

Dated: January 15, 1973.

PART 135b—NEW ANIMAL DRUGS FOR IMPLANTATION OR INJECTION

Gentamicin Sulfate Injection, Veterinary

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (38-292V) filed by Schering Corp., 86 Orange Street, Bloomfield, NJ 07003, proposing revised labeling for the use of gentamicin sulfate injection, veterinary to provide for its safe and effective use in cats and to provide for additional indications for its use in

[1] Attachment A filed as part of the original document.

[2] Commissioner Moody included a dissenting statement, filed as part of the original document.

V 38 - 14 JAN 22 73 XUM

dogs. The supplemental application is approved.

For consistency, the name and address of the sponsor is being deleted from § 135b.19(b) and the firm is being identified by their code number as listed in § 135.501(c).

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 135b is amended in § 135b.19 by revising paragraphs (b) and (c) as follows:

§ 135b.19 Gentamicin sulfate injection, veterinary.

• • • • •

(b) *Sponsor.* See code No. 032 in § 135.501(c) of this chapter.

(c) *Conditions of use.* (1) It is used or intended for use:

(i) In dogs for the treatment of urinary tract infections (cystitis, nephritis), and respiratory tract infections (tonsillitis, pneumonia, tracheobronchitis).

(ii) In cats for the treatment of urinary tract infections (cystitis, nephritis), and respiratory tract infections (pneumonitis, pneumonia, upper respiratory infections).

(2) It is administered intramuscularly or subcutaneously at a rate of 2 milligrams per pound of body weight, twice on the first day of treatment and once daily thereafter. If response is not noted after 7 days, the antibiotic sensitivity of the infecting organism should be retested.

Effective date. This order shall be effective on January 22, 1973.

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i))

Dated: January 15, 1973.

C. D. VAN HOUWELING,
Director,
Bureau of Veterinary Medicine.

PART 135b—NEW ANIMAL DRUGS FOR IMPLANTATION OR INJECTION

Prednisolone Sodium Succinate

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (11-593V) filed by the Upjohn Co., Kalamazoo, Mich. 49001, proposing revised labeling regarding the safe and effective use of prednisolone sodium succinate injection for treating dogs, cats, and horses. The supplemental application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under the authority delegated to the Commissioner (21 CFR 2.120), Part 135b is amended by adding the following new section:

§ 135b.35 Prednisolone sodium succinate injection.

(a) *Chemical name.* 11 beta, 17, 21-Trihydroxypregna-1, 4-diene-3, 20-dione 21-succinate sodium salt.

(b) *Specifications.* Each milliliter of prednisolone sodium succinate injection contains: Prednisolone sodium succinate equivalent in activity to 10 milligrams of prednisolone.

(c) *Sponsor.* See code No. 037 in § 135.501(c) of this chapter.

(d) *Conditions of use.* (1) The drug is intended for the treatment of horses, dogs, and cats.

(2) (i) The dosage for horses is 50 to 100 milligrams as an initial dose given intravenously over a period of one-half to 1 minute, or intramuscularly, and may be repeated in inflammatory, allergic, or other stress conditions at intervals of 12, 24, or 48 hours, depending upon the size of the animal, the severity of the condition and the response to treatment.

(ii) In dogs, the drug is administered intravenously at a range of 2.5 to 5 milligrams per pound of body weight as an initial dose followed by maintenance doses at 1, 3, 6 or 10 hour intervals, as determined by the condition of the animal, for treatment of shock.

(iii) In dogs and cats, the drug may be given intramuscularly for treatment of inflammatory, allergic and less severe stress conditions, where immediate effect is not required, at 1 to 5 milligrams ranging upwards to 30 to 50 milligrams in large breeds of dogs. Dosage may be repeated in 12 to 24 hours and continued for 3 to 5 days if necessary. If permanent corticosteroid effect is required oral therapy with prednisolone tablets may be substituted.

(3) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Effective date. This order shall be effective January 22, 1973.

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i))

Dated: January 15, 1973.

C. D. VAN HOUWELING,
Director, Bureau of
Veterinary Medicine.

[FR Doc.73-1273 Filed 1-19-73;8:45 am]

PART 135c—NEW ANIMAL DRUGS IN ORAL DOSAGE FORMS

Acepromazine Maleate Tablets

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (30-702V) filed by Ayerst Laboratories, Division of American Home Products Corp., 685 Third Avenue, New York, NY 10017, proposing revised labeling for the safe and effective use of acepromazine maleate tablets as a neuroleptic agent in dogs and cats. The supplemental application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 135c is amended by adding a new section to read as follows:

§ 135c.97 Acepromazine maleate tablets, veterinary.

(a) *Chemical name.* [10-[3-(Dimethylamino) propyl] phenothiazin-2-yl-methyl ketone] maleate.

(b) *Specifications.* Each tablet contains either 10 or 25 milligrams of acepromazine maleate.

(c) *Sponsor.* See code No. 038 in § 135.501(c) of this chapter.

(d) *Conditions of use.* The drug is used as a tranquilizer in dogs and cats.

(2) The drug is administered orally to dogs at a dosage level of 0.25 to 1.0 milligram of acepromazine maleate per pound of body weight and to cats at a dosage level of 0.5 to 1.0 milligram of acepromazine maleate per pound of body weight. Dosage may be repeated as required.

(3) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Effective date. This order shall be effective on January 22, 1973.

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i))

Dated: January 15, 1973.

C. D. VAN HOUWELING,
Director, Bureau of
Veterinary Medicine.

Title 31—MONEY AND FINANCE: TREASURY

Chapter I—Monetary Offices, Department of the Treasury

PART 103—FINANCIAL RECORDKEEPING AND REPORTING OF CURRENCY AND FOREIGN TRANSACTIONS

Financial Reporting and Recordkeeping

On October 28, 1972, a notice of proposed rule making containing proposed amendments to various provisions of this part was published in the FEDERAL REGISTER (37 FR 23114 (1972)). In accordance with the notice, interested persons were afforded an opportunity to submit written comments. After consideration of all such relevant matters as were presented by interested parties regarding the rules proposed, the following amendments are hereby adopted effective January 17, 1973.

SAMUEL R. PIERCE, Jr.,
General Counsel.

[SEAL] EUGENE T. ROSSIDES,
Assistant Secretary.

The key provisions of the proposal were essentially as follows:

1. Eliminate the requirement that banks keep microfilm copies of checks drawn for $100 or less.

2. Require that information made available to other departments or agencies under this part shall be received in confidence and not disclosed except for official purposes.

3. State specifically that these regulations do not authorize the Secretary or any other person to inspect or review financial records maintained under this part.

4. Eliminate operators of credit card systems from the definition of a financial institution subject to this part.

5. Delete a phrase which allows the Secretary by written order or authorization to impose additional recordkeeping or reporting requirements.

After careful consideration of the comments received, it has been decided to exempt checks of $100 or less from the copying requirement.

With regard to disclosure of information, the proposed change is intended to ensure that information resulting from the recordkeeping and reporting requirements will be made available to other departments or agencies of the United States solely for the purposes intended. Various comments suggested that the proposed language did not go far enough, and that the change should forbid disclosure to any other department or agency. Such a restriction would mean that cases involving information obtained from this Department could not be referred to the Department of Justice for prosecution until the Secretary gave his approval. This would simply cause further delay without serving any worthwhile purpose. Every Federal department or agency has sanctions against the unauthorized disclosure of official information, and those sanctions have proved effective. Accordingly, the proposed language has been adopted unchanged.

Certain of the comments on the proposed regulation dealing with access to records maintained under this part suggested that the proposal is inadequate to protect the rights of bank customers, however, the proposal is intended merely to point out that these regulations do not authorize access to customer records, but that access to such records is governed by other applicable law. The supervisory agencies which have been given responsibility for assuring compliance with the regulations may, of course, have access to these records as necessary to assure that they are being kept as required.

The proposal to eliminate operators of credit card systems from the definition of a financial institution for purposes of this part met with general approval, except that some doubt arose as to its effect upon the operation of bank credit card systems. Since it was agreed that all credit card operators, including banks, should be removed from the scope of the regulations, the definition of a financial institution has been amended to exclude bank credit card systems, as well as operators of credit card systems, from the definition.

Comments on the proposed deletion of the phrase which allows the Secretary by written order or authorization to impose additional recordkeeping or reporting requirements were favorable to the proposal; however, one comment suggested that the phrase "or otherwise modify" the requirements of this part also should be deleted. This suggestion is consistent with the intent of the proposed amendment, and it has been adopted.

Part 103 of Title 31 of the Code of Federal Regulations is amended as follows:

1. Subpart A is amended by deleting from § 103.11 subparagraph (5) of the definition of a financial institution, renumbering the following subparagraphs so that the definition of financial institutions will read as follows:

§ 103.11 Meaning of terms.

• • • • •

Financial institution. Each agency, branch, or office within the United States of any person doing business in one or more of the capacities listed below:

(1) A bank (except bank credit card systems);

(2) A broker or dealer in securities;

(3) A person who engages as a business in dealing in or exchanging currency as, for example, a dealer in foreign exchange or a person engaged primarily in the cashing of checks;

(4) A person who engages as a business in the issuing, selling, or redeeming of travelers' checks, money orders, or similar instruments, except one who does so as a selling agent exclusively or as an incidental part of another business;

(5) A licensed transmitter of funds, or other person engaged in the business of transmitting funds abroad for others.

• • • • •

2. Subpart C is amended by amending § 103.34 to read as follows:

§ 103.34 Additional records to be made and retained by banks.

(a) (1) With respect to each deposit or share account opened with a bank after June 30, 1972, by a person residing or doing business in the United States or by a citizen of the United States, such bank shall, within 45 days from the date such an account is opened, secure and maintain a record of the taxpayer identification number of the person maintaining the account; or in the case of an account of one or more individuals, such bank shall secure and maintain a record of the social security number of an individual having a financial interest in that account. In the event that a bank has been unable to secure the identification required herein with respect to an account within the 45-day period specified, it shall nevertheless not be deemed to be in violation of this section if (i) it has made a reasonable effort to secure such identification, and (ii) it maintains a list containing the names, addresses, and account numbers of those persons from whom it has been unable to secure such identification, and makes the names, addresses, and account numbers of those persons available to the Secretary as directed by him.

(2) The 45-day period provided for in paragraph (a)(1) of this section shall be extended where the person opening the account has applied for a taxpayer identification or social security number on Form SS-4 or SS-5, until such time as the person maintaining the account has had a reasonable opportunity to secure such number and furnish it to the bank.

(3) A taxpayer identification number for a deposit or share account required under paragraph (a)(1) of this section need not be secured in the following instances: (i) accounts for public funds opened by agencies and instrumentalities of Federal, State, local or foreign governments, (ii) accounts for aliens who are (*a*) ambassadors, ministers, career diplomatic or consular officers, or (*b*) naval, military or other attachés of foreign embassies and legations, and for the members of their immediate families, (iii) accounts for aliens who are accredited representatives to international organizations which are entitled to enjoy privileges, exemptions and immunities as an international organization under the International Organization Immunities Act of December 29, 1945 (22 U.S.C. sec. 288), and for the members of their immediate families, (iv) aliens temporarily residing in the United States for a period not to exceed 180 days, (v) aliens not engaged in a trade or business in the United States who are attending a recognized college or university or any training program, supervised or conducted by any agency of the Federal Government, (vi) unincorporated subordinate units of a tax exempt central organization which are covered by a group exemption letter, (vii) interest bearing accounts maintained by a person under 18 years of age opened as part of a school thrift savings program, provided the annual interest does not exceed $10, and (viii) Christmas club, vacation club and similar installment savings programs provided the annual interest does not exceed $10. In instances described in paragraph (a)(3)(vii) and (viii) of this section, the bank shall, within 15 days following the end of any calendar year in which the interest accrued in that year exceeds $10, use its best efforts to secure and maintain the appropriate taxpayer identification number or application form therefor.

(4) The rules and regulations issued by the Internal Revenue Service under section 6109 of the Internal Revenue Code of 1954 shall determine what constitutes a taxpayer identification number and whose number shall be obtained in the case of an account maintained by one or more persons.

(b) Each bank shall, in addition, retain either the original or a microfilm or other copy or reproduction of each of the following:

(1) Each document granting signature authority over each deposit or share account;

(2) Each statement, ledger card or ture authority over each deposit or share account, showing each transaction in, or with respect to, that account;

(3) Each check, clean draft, or money order drawn on the bank or issued and payable by it, except those drawn for $100 or less or those drawn on accounts which can be expected to have drawn on them an average of at least 100 checks per month over the calendar year or on each occasion on which such checks are issued, and which are (i) dividend

V 38 - 14 - JAN 22 73 XUM

checks, (ii) payroll checks, (iii) employee benefit checks, (iv) insurance claim checks, (v) medical benefit checks, (vi) checks drawn on government agency accounts, (vii) checks drawn by brokers or dealers in securities, (viii) checks drawn on fiduciary accounts, (ix) checks drawn on other financial institutions, or (x) pension or annuity checks;

(4) Each item in excess of $100 (other than bank charges or periodic charges made pursuant to agreement with the customer), comprising a debit to a customer's deposit or share account, not required to be kept, and not specifically exempted, under paragraph (b)(3) of this section;

(5) Each item, including checks, drafts, or transfers of credit, of more than $10,000 remitted or transferred to a person, account or place outside the United States;

(6) A record of each remittance or transfer of funds, or of currency, other monetary instruments, checks, investment securities, or credit, of more than $10,000 to a person, account or place outside the United States;

(7) Each check or draft in an amount in excess of $10,000 drawn on or issued by a foreign bank, purchased, received for credit or collection, or otherwise acquired by the bank;

(8) Each item, including checks, drafts or transfers of credit, of more than $10,000 received directly and not through a domestic financial institution, by letter, cable or any other means, from a bank, broker or dealer in foreign exchange outside the United States;

(9) A record of each receipt of currency, other monetary instruments, investment securities or checks, and of each transfer of funds or credit, of more than $10,000 received on any one occasion directly and not through a domestic financial institution, from a bank, broker or dealer in foreign exchange outside the United States; and

(10) Records prepared or received by a bank in the ordinary course of business, which would be needed to reconstruct a demand deposit account and to trace a check in excess of $100 deposited in such account through its domestic processing system or to supply a description of a deposited check in excess of $100. This subparagraph shall be applicable only with respect to demand deposits.

§ 103.35 [Amended]

3. Subpart C is further amended by amending § 103.35 by deleting "paragraph (1)" in paragraph (a)(2), and substituting therefor the words "paragraph (a)(1) of this section"; and by deleting "subsection (1)" in paragraph (a)(3), and substituting therefor the words "paragraph (a)(1) of this section."

4. Subpart D is amended by amending § 103.43 to read as follows:

§ 103.43 Availability of information.

The Secretary may make any information set forth in any report received pursuant to this part available to any other department or agency of the United States upon the request of the head of such department or agency, made in writing and stating the particular information desired, the criminal, tax or regulatory investigation or proceeding in connection with which the information is sought and the official need therefor. Any information made available under this section to other departments or agencies of the United States shall be received by them in confidence, and shall not be disclosed to any person except for official purposes relating to the investigation or proceeding in connection with which the information is sought.

5. Subpart D is further amended by amending § 103.45 to read as follows:

§ 103.45 Exceptions, exemptions, and reports.

(a) The Secretary, in his sole discretion, may be written order or authorization make exceptions to or grant exemptions from the requirements of this part. Such exceptions or exemptions may be conditional or unconditional, may apply to particular persons or to classes of persons, and may apply to particular transactions or classes of transactions. They shall, however, be applicable only as expressly stated in the order of authorization, and they shall be revocable in the sole discretion of the Secretary.

(b) The Secretary shall have authority to further define all terms used herein.

6. Subpart D is further amended by adding a new § 103.51 as follows:

§ 103.51 Access to records.

Except as provided in §§ 103.34(a)(1) and 103.35(a)(1), and except for the purpose of assuring compliance with the recordkeeping and reporting requirements of this part, this part does not authorize the Secretary or any other person to inspect or review the records required to be maintained by subpart C of this part. Other inspection, review or access to such records is governed by other applicable law.

Title 41—PUBLIC CONTRACTS AND PROPERTY MANAGEMENT

Chapter 101—Federal Property Management Regulations

SUBCHAPTER E—SUPPLY AND PROCUREMENT

PART 101-26—PROCUREMENT SOURCES AND PROGRAMS

Subpart 101-26.5—GSA Procurement Programs

PURCHASE OF MOTOR VEHICLES, TRUCKS, AND TRAILERS

This amendment establishes and clarifies policy concerning procurement by executive agencies of motor vehicles, trucks, and trailers. Procedures concerning electronic data processing tape are also reinstated.

1. Section 101-26.501-1 is revised to read as follows:

§ 101-26.501-1 General.

Except as provided for the Department of Defense (DOD) in paragraph (a) of this section, executive agencies shall submit to GSA for procurement their requirements for purchase in the United States of all new passenger motor vehicles (FSC 2310) and trucks/truck tractors (FSC 2320); and all trailers (FSC 2330) not less than 5,000 pounds (except camping, office, and house trailers) and not more than 50,000 pounds payload. Specifically included are sedans, station wagons, carryalls, ambulances, buses, and trucks, including trucks with specialized mounted equipment and truck chassis with special purpose bodies, and camping, office, and house trailers.

(a) DOD shall submit to GSA for procurement its requirements for all commercial-type passenger motor vehicles (FSC 2310), including buses and trucks (FSC 2320) up to 10,000 pounds gross vehicle weight (GVW) except the following:

Buses, convertible to ambulances.
Trucks, convertible to ambulances.
Trucks, 4 x 4, dump, 9,000 GVW with cutdown cab.

(b) When it is determined that specialized requirements for passenger motor vehicles and trucks indicate the need for procurement from sources other than GSA, a request for waiver justifying such procurement shall be submitted in writing to the General Services Administration (FPNM), Washington, D.C. 20406. GSA will notify agencies in writing whether or not a waiver has been granted. Justification for special purpose trucks may be based on a description of the vehicle having unique characteristics such as a special purpose body or equipment that may require close supervision by agency personnel to insure proper installation of the equipment by the contractor; e.g., when a medical van is to be equipped with Government or contractor-supplied equipment. Requests for procurement through sources other than GSA will be handled on a case-by-case basis considering the urgency of the need of the requirement and provided full justification is submitted therefor.

2. Section 101-26.508 is revised to read as follows:

§ 101-26.508 Electronic data processing (EDP) tape and instrumentation tape (wide and intermediate band).

Procurement by Federal agencies of EDP tape and instrumentation tape (wide and intermediate band) shall be accomplished in accordance with the provisions of this § 101-26.508.

(Sec. 205(c) 63 Stat. 390; 40 U.S.C. 486(c))

Effective date. This regulation is effective on January 22, 1973.

Dated: January 12, 1973.

ARTHUR F. SAMPSON,
Acting Administrator of General Services.

[FR Doc.73-1292 Filed 1-19-73;8:45 am]

Title 49—TRANSPORTATION

Chapter III—Federal Highway Administration, Department of Transportation

SUBCHAPTER B—MOTOR CARRIER SAFETY REGULATIONS

[Docket No. MC-36; Notice No. 73-4]

PART 394—RECORDING AND REPORTING OF ACCIDENTS

Contents of Accident Register File

The Director of the Bureau of Motor Carrier Safety is making nonsubstantive editorial corrections to § 394.13(b) of the motor carrier safety regulations. Section 394.13 requires motor carriers to maintain accident registers at their principal places of business. Carriers are required to place certain information concerning their reportable accidents in the register and to include copies of accident reports they have filed in the same file in which the register is maintained.

Owing to an erroneous cross-reference to § 394.7 and an ambiguity in the first sentence of § 394.13(b), it is not now clear that one of the reports required to be kept in the accident-register file is a copy of the accident-report form (Form MCS 50-B or MCS 50-T) filed with the Federal Highway Administration. In addition, the present rule does not, as it should, clearly state that a carrier is obligated to keep, in the accident-register file, only those reports that pertain to reportable accidents; this is the case even though a carrier may, if he chooses, include in the register information pertaining to incidents that are not "reportable accidents," as that term is defined in § 394.3.

In consideration of the foregoing, paragraph (b) of § 394.13 of the Motor Carrier Safety Regulations (Subchapter B of Chapter III in Title 49, CFR) is revised to read as follows:

§ 394.13 Accident register.

* * * * *

(b) The file in which the accident register is maintained must also include a copy of each report that the carrier has filed pursuant to § 394.9, with a State agency, or with an insurer, with respect to any reportable accident entered in the accident register. The reports must be arranged or annotated in a manner which permits them to be identified with specific entries in the accident register.

* * * * *

Since this revision merely makes nonsubstantive corrections of an editorial nature and imposes no additional burden on any person, notice and public procedure thereon are unnecessary and it is effective on January 22, 1973.

This revision is issued under the authority of section 204 of the Interstate Commerce Act, as amended, 49 U.S.C. 304, section 6 of the Department of Transportation Act, 49 U.S.C. 1655, and the delegations of authority by the Secretary of Transportation and the Federal Highway Administrator at 49 CFR 1.48 and 49 CFR 389.4, respectively.

Issued on January 12, 1973.

ROBERT A. KAYE,
Director, Bureau of Motor Carrier Safety.

Chapter X—Interstate Commerce Commission

SUBCHAPTER D—TARIFFS AND SCHEDULES

[Ex Parte No. 280]

PART 1311—SPECIAL PROCEDURES FOR TARIFF FILINGS UNDER THE WAGE AND PRICE STABILIZATION PROGRAM

Change of Regulations to Voluntary Status

Effective January 11, 1973, Phase II of the Wage and Price Stabilization Program was ended by the terms of Executive Order No. 11695. At that time, mandatory price controls, insofar as they affected transportation companies regulated by the Interstate Commerce Commission, came to an end. (See 6 CFR 130.80, 38 FR 1484.) However, the President has directed that under the new Phase III of the Wage and Price Stabilization Program (38 FR 1487):

Regulated industries will be guided by the general criteria listed in present Price Commission regulations and restraint is expected to be reflectd in their actions and the actions of the regulatory agencies.

In light of the foregoing, the mandatory application of the Interstate Commerce Commission's regulations adopted in the above proceeding (37 FR 1107), and appearing at 49 CFR Part 1311, is suspended, effective as of January 11, 1973, until further notice of the Commission, but such regulations shall be construed as voluntary guidelines.

[SEAL] ROBERT L. OSWALD,
Secretary.

JANUARY 16, 1973.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 982]

FILBERTS GROWN IN OREGON AND WASHINGTON

Late Payment and Interest Charges

Notice is hereby given of a proposal to amend the administrative rules and regulations (Subpart—Administrative Rules and Regulations; 7 CFR 982.-432–982.471) by the addition of a new § 982.461 establishing late payment and interest charges for any handler failing to pay his assessments within the time prescribed by the Filbert Control Board. The subpart is operative pursuant to the marketing agreement, as amended, and Order No. 982, as amended (7 CFR Part 982; 37 FR 588), regulating the handling of filberts grown in Oregon and Washington, and is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The proposal was unanimously recommended by the Filbert Control Board.

Section 982.61 of the order was amended (37 FR 588; January 14, 1972) to authorize the Board to impose a late payment charge on any handler who fails to pay his assessment within the time prescribed by the Board. If the handler thereafter fails to pay the amount outstanding, including the late payment charge, within the prescribed time, the Board shall impose an additional charge in the form of interest on the outstanding amount. Section 982.61 also provides for the rate of such charges to be prescribed by the Board, with the approval of the Secretary.

All persons who desire to submit written data, views, or arguments in connection with the aforesaid proposal should file the same in quadruplicate, with the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than January 31, 1973. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.29(b)).

The proposal is to add a new § 982.-461 to the administrative rules and regulations (Subpart—Administrative Rules and Regulations; 7 CFR 982.432–982.471) reading as follows:

§ 982.461 Late payment and interest charges.

The Board shall impose a late payment charge on any handler failing to pay his assessment within 30 days of the billing date shown on the handler's assessment statement received from the Board. Such amount shall be shown on the statement as the "Assessment Due." The late payment charge shall be 5 percent of the unpaid balance of that amount. In the event the handler fails to pay the delinquent amount, including the late payment charge, within 60 days following the billing date, an additional 1 percent interest charge shall be applied monthly thereafter to the unpaid balance, including any accumulated interest. Any amount paid by a handler as assessments, including any charges imposed pursuant to this paragraph, shall be credited when the payment is received in the Board's office.

Dated: January 17, 1973.

PAUL A. NICHOLSON,
Deputy Director,
Fruit and Vegetable Division.

Rural Electrification Administration

[7 CFR Part 1701]

RURAL TELEPHONE FACILITIES

Proposed Revised REA Specification for Plastic-Insulated, Plastic-Jacketed Station Wire

Notice is hereby given that, pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), REA proposes to issue a revision of REA Bulletin 345–18 to announce a revision of REA Specification PE–20 for plastic-insulated, plastic-jacketed station wire. On issuance of REA Bulletin 345–18, Appendix A to Part 1701 will be modified accordingly.

Persons interested in the revised specification may submit written data, views, or comments to the Director, Telephone Operations and Standards Division, Rural Electrification Administration, Room 1355, South Building, U.S. Department of Agriculture, Washington, D.C. 20250, on or before February 21, 1973. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Director, Telephone Operations and Standards Division during regular business hours.

A copy of the revised REA Specification PE–20 may be secured in person or by written request from the Director, Telephone Operations and Standards Division.

The text of REA Bulletin 345–18 announcing the issuance of the revised specification is as follows:

REA BULLETIN 345–18

SUBJECT: REVISION OF REA SPECIFICATION PE–20

I. *Purpose.* To announce the revision of REA Specification PE–20 for Plastic-Insulated, Plastic-Jacketed Station Wire.

II. *General.* This specification has been revised to incorporate the following principal changes:

a. The jacket color has been changed from beige to olive gray.

b. Physical strength requirements have been reduced from 2,400 p.s.i./min. to 1,800 p.s.i. min.

c. A flammability test has been added.

d. Pair-to-pair capacitance unbalance requirements and high voltage testing requirements have been added.

e. The provisions for guarantee have been deleted to agree with other REA wire and cable specifications.

III. *Availability of specification.* Copies of the revised PE–20 will be furnished by REA upon request. Questions concerning the revised specification may be referred to the Chief, Outside Plant Branch, Telephone Operations and Standards Division, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250, telephone number 202—447–3827.

Dated: January 15, 1973.

E. F. RENSHAW,
Assistant Administrator, Telephone.

Federal Aviation Administration

[14 CFR Part 93]

[Docket No. 12425; Notice No. 72-32A]

ANCHORAGE, ALASKA, TERMINAL AREA

Proposed Revision; Extension of Comment Period

The Federal Aviation Administration proposed in Notice 72-32, published in the FEDERAL REGISTER on December 9, 1972 (37 FR 26344), to amend Part 93 of the Federal Aviation Regulations by

revising the Anchorage Area Special Terminal Rule.

That notice provided that interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. It stated further that such communications should be submitted on or before February 21, 1973.

However, due to unusual and lengthy delays in distribution of this notice to the public, the FAA believes that good cause exists for interested persons to be afforded additional time to submit comments.

Therefore, pursuant to the authority delegated to me by the Administrator (14 CFR 11.45), the time within which comments on Notice 72–32 will be received is extended to April 8, 1973.

Issued in Washington, D.C., on January 15, 1973.

RAYMOND G. BELANGER,
Acting Director, Air Traffic Service.

[21 CFR Part 191]

BANNING OF TOYS AND OTHER CHILDREN'S ARTICLES PRESENTING CHOKING, ASPIRATION, AND/OR INGESTION HAZARDS DUE TO SMALL PARTS

Notice of Proposed Rule Making

Section 2(f)(1)(D) of the Federal Hazardous Substances Act provides for the classification of any toy or other article intended for use by children as a hazardous substance upon a determination by regulation that it presents a mechanical hazard. Under section 2(q)(1)(A) of the act, such classification also makes the toy or article a banned hazardous substance. Banned toys and other children's articles are listed in 21 CFR 191.9a.

Small articles are known to have caused choking, aspiration, and ingestion incidents, many of which have resulted in injuries and even death to small children. Injury data from the National Electronic Injury Surveillance System (NEISS) indicate that a significant number of small children have required medical treatment as a result of the ingestion or aspiration of small toy parts and accessible components. Other incidents have required surgical procedures for the removal of aspirated or ingested articles. Many children's articles have small parts which are of a size that may be aspirated or ingested. Such articles may be nonhazardous to children of certain ages who can be expected to keep small objects out of the mouth. The possibility of an aspiration or ingestion injury, however, increases significantly when small parts are accessible components of products intended for use by very young children or when small parts become accessible during normal use or after reasonably foreseeable damage or abuse. The possibility of an injury also increases when small parts are components of mouth-actuated toys or of other mouth-actuated articles intended for young children.

This proposed regulation will ban certain children's articles if they or an accessible component thereof fit within the confines of the truncated right cylinder shown in Figure 1. This standard has been selected after careful consideration of the dimensional characteristics of objects which may be aspirated and/or ingested, or cause young children to choke thereon. The 1¼ inch minimum diameter figure was selected because objects with a greater diameter cannot as readily pass within the widest opening of the average 3-year-old child's anterior dental or jaw segment. In consideration of the fact that an object may be less than 1¼ inches in diameter, and yet also be of sufficient length not to be readily swallowed, the cylinder is 2¼ inches in height at its deepest portion. This will allow a relatively narrow object to meet the standard if it is of sufficient length.

The Commissioner therefore proposes to ban children's articles containing small parts which may become accessible after normal use or after reasonably foreseeable damage or abuse on the basis of a determination that the mechanical hazards associated with the design and manufacture of such articles present an unreasonable risk of personal injury to young children from choking, aspiration, or ingestion. The Commissioner proposes that small articles and articles that may contain accessible small parts not be marketed for use by children under 3 years of age, and that small articles designed for use in the mouth, or such articles having small accessible components, not be marketed for children under 8 years of age.

On December 8, 1972, proposed test methods for simulating use and abuse of toys, games, and other articles intended for use by children were published in the FEDERAL REGISTER (37 FR 26120). For determining whether or not parts of any toy or other article intended for use by children may become accessible under normal use or when subjected to reasonably foreseeable damage or abuse, the applicable tests prescribed under these proposed test methods shall be utilized.

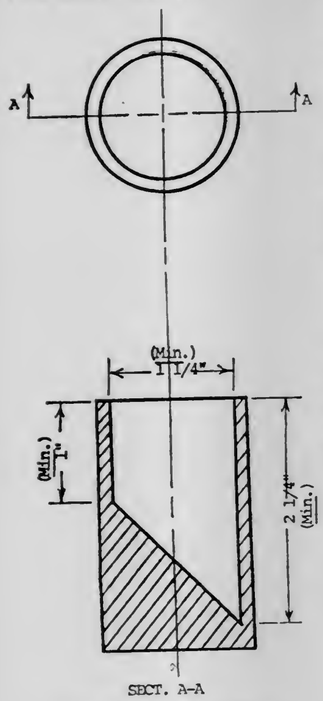
Since the aspiration and ingestion hazards presented by small parts may not be obvious to the persons selecting the toy, the Commissioner further proposes to have articles which are not generally recognized as suitable only for older children labeled with a statement to inform purchasers of the inappropriateness of the article for young children. Stuffed animals, toy trucks, and other articles which are suitable for a wide age range of children, including young children, would be required to bear such cautionary labeling. Although chalk, crayons, and books made entirely of paper are used by children under the age of 3 years, they are excluded from the proposed banning. These articles present no less a potential for aspiration or ingestion than do other children's articles, but, upon weighing the developmental benefits derived from their use with the dangers, the Commissioner concludes that their benefits far outweigh what would be gained from the proposed banning. An additional reason for this determination is that parents, upon giving a small child a piece of chalk or a crayon, generally realize that the article is quite small and is capable of becoming smaller through normal use or breakage and thus take precautionary steps to prevent their being placed in the mouth.

Therefore, pursuant to provisions of the Federal Hazardous Substances Act (secs. 2(f)(1)(D), (q)(1), (s), (3)(e)(1), 74 Stat. 372, 374, 375, as amended, 80 Stat. 1304–1305, 83 Stat. 187–189; 15 U.S.C. 1261, 1262 and under authority delegated to him (21 CFR 2.120), the Commissioner proposes that two new subparagraphs be added to § 191.9a(a) as follows:

§ 191.9a Banned toys and other banned articles intended for use by children.

(a) Toys and other children's articles presenting mechanical hazards.

* * * * * *



(9) Any toy or other article intended for use by children under 3 years of age (except chalk, crayons, and books made entirely of paper) if such toy or other article or any of its components which are accessible, or parts of the toy or other article which become accessible under conditions of normal use or reasonably foreseeable damage or abuse, will fit, in a noncompressed state, into the truncated right cylinder shown in Figure 1. For determining whether or not parts of such toy or other article may become accessible under conditions of normal use or reasonably foreseeable damage or abuse, the applicable tests prescribed by § 191.-22 shall be utilized. Any toy or other children's article that is not generally recognized as being suitable for use only by children 3 years of age or older will be subject to the provisions of this subparagraph unless it meets the following requirements:

(i) The shelf package of the article is prominently and clearly marked in the upper right-hand quarter of the principal display panel with the statement "Caution: Not Recommended for Children Under 3 Years Old." If the article is unpackaged, the required statement shall appear on the article itself or on a tag securely attached to the article.

(ii) All markings required by paragraph (a)(9)(i) of this section shall be of a permanent nature, whether paint stenciled, die-stamped, molded, indelibly stamped. All required markings shall appear in block lettering of a height not less than that specified in this subdivision, shall contrast sharply with their background (whether by color, projection, or indentation), and shall be readily visible and legible. Lettering heights for required markings are as follows:

V 38 - 14 JAN 22 73 XUM

Surface area displaying marking (square inches)	*Minimum height of lettering (inches)*
Under 5	1/16
5 or more and under 25	1/8
25 or more and under 100	3/16
400 or more	1/2
100 or more and under 400	1/4

SECT. A–A

TRUNCATED RIGHT CIRCULAR CYLINDER

FIGURE 1

(10) Any mouth-actuated toy or other mouth-actuated article intended for use by children under 8 years of age if such toy or other such article or any of its components which are accessible, or parts of such toy or other such article which becomes accessible under conditions of normal use or reasonably foreseeable damage or abuse, will fit, in a noncompressed state, into the truncated right cylinder shown in Figure 1 of paragraph (a)(9) of this section. For determining whether or not parts of such toy or other such article may become accessible under conditions of normal use or reasonably foreseeable damage or abuse, the applicable tests prescribed by § 191.23 shall be utilized. Any mouth-actuated toy or other mouth-actuated children's article that is not generally recognized as being suitable for use only by children 8 years of age or older will be subject to the provisions of this subparagraph unless it meets the following requirements:

(i) The shelf package of the article is prominently and clearly marked in the upper right-hand quarter of the principal display panel with the statement "Caution: Not Recommended for Children Under 8 Years Old." If the article is unpackaged, the required statement shall appear on the article itself or on a tag securely attached to the article.

(ii) All markings required by paragraph (a)(10)(i) of this section shall be of a permanent nature, whether paint stenciled, die stamped, molded, or indelibly stamped. All required markings shall appear in block lettering of a height not less than that specified in this subdivision, shall contrast sharply with their background (whether by color, projection, or indentation), and shall be readily visible and legible. Lettering heights for required markings are as follows:

Surface area displaying marking (square inches)	*Minimum height of lettering (inches)*
Under 5	1/16
5 or more and under 25	1/8
25 or more and under 100	3/16
100 or more and under 400	1/4
400 or more	1/2

Interested persons may, on or before March 23, 1973, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 6–88, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: January 12, 1973.

SAM D. FINE,
Associate Commissioner for Compliance.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 19628; FCC 72-995]

FM BROADCAST STATIONS IN UNION SPRINGS AND TALLASSEE, ALA.

Proposed Table of Assignments; Extension of Reply Comment Period

In the matter of amendment of § 73.202 (b), table of assignments, FM broadcast stations. (Union Springs and Tallassee, Ala.) RM–1902, RM–2040.

1. The notice of proposed rule making in the above-entitled proceeding was adopted on November 8, 1972, and published in the FEDERAL REGISTER on November 16, 1972 (37 FR 24369). The date for filing comments has expired and the date for filing reply comments is presently designated as January 15, 1973, respectively.

2. On January 9, 1973, Ne-Ler Co., by its attorney, filed a request for extension of time in which to submit reply comments to and including February 14, 1973. Ne-Ler states that its engineering counsel is located in Florida and because of the necessity of obtaining material from Washington, there will not be adequate time to prepare an appropriate reply by the deadline date.

3. It appears that the additional time is warranted and would serve the public interest. Accordingly, *It is ordered*, That the time for filing reply comments in Docket No. 19628 is extended to and including February 14, 1973.

4. This action is taken pursuant to authority found in sections 4(i), 5(d)(1) and 303(r) of the Communications Act of 1934, as amended and § 0.281(d)(8) of the Commission's rules.

Adopted: January 15, 1973.

Released: January 15, 1973.

[SEAL] HAROLD L. KASSENS,
Acting Chief, Broadcast Bureau.

SECURITIES AND EXCHANGE COMMISSION

[17 CFR, Part 270]

[Release No. IC-7581; File No. 57-469]

INVESTMENT COMPANY REGULATIONS

Requirements To Report Securities Transactions and To Adopt Codes of Ethics

Notice is hereby given that the Securities and Exchange Commission has under consideration the adoption of Rule 17j–1 (17 CFR 270.17j–1) under the Investment Company Act of 1940 (Act) as amended by the Investment Company Amendments Act of 1970 (the "1970 Act") [15 U.S.C. 80a–1 et seq., Public Law 91–547, 84 Stat. 1413]. "The Report of the Special Study of the Securities Markets,"[1] examined the nature and extent of trading in the portfolio securities of an investment company by persons with access to the company's investment information. The "Special Study" found that transactions by investment company "insiders" in the portfolio securities of the investment company often placed such persons in a position of conflict of interest and that the policies which had been adopted by the industry to deal with this problem suggested considerable disagreement as to the nature and extent of obligations

[1] Report of the Special Study of the Securities Markets, H.R. Doc. No. 95 88th Cong., 1st sess., pt. 4, at 235–255 (1963) (Special Study).

in this area. It concluded that clarification and implementation of higher standards were necessary.[2]

Subsequently, after further examination of this subject, in "Public Policy Implications of Investment Company Growth",[3] the Commission recommended that the Act be amended to empower it to adopt rules and regulations for the protection of investors in connection with trading in securities purchased and sold by investment companies by persons affiliated with them and with their advisers and principal underwriters.[4] In response to this recommendation, section 17(j) was added by the 1970 Act (15 U.S.C. 80a–17(j), 84 Stat. 1421).

Section 17(j) [of the Act] makes it

> • • • unlawful for any affiliated person or principal underwriter for a registered investment company or any affiliated person of an investment adviser of or principal underwriter for a registered investment company, to engage in any act, practice, or course of business in connection with the purchase or sale, directly or indirectly, by such person of any security held or to be acquired by such registered investment company in contravention of such rules and regulations as the Commission may adopt to define, and prescribe means reasonably necessary to prevent, such acts, practices, or courses of business as are fraudulent, deceptive, or manipulative. Such rules and regulations may include requirements for the adoption of codes of ethics by registered investment companies and investment advisers of, and principal underwriters for, such investment companies establishing such standards as are reasonably necessary to prevent such acts, practices or courses of business.

After enactment of section 17(j), the Investment Company Institute (ICI) submitted a proposed rule and code of ethics for adoption by the Commission under the section. Several of the suggestions contained in the ICI draft proposal have been adopted in proposed Rule 17j–1. They include defining certain persons as "access persons" and "advisory employees"; requiring such persons to report their transactions to the extent now required of investment advisers by the Investment Advisers Act of 1940 (15 U.S.C. 80b–1 et seq.); exempting certain types of transactions from the coverage of the rule; and allowing any code of ethics adopted to contain a "prior clearance" procedure.

Unlike the ICI proposal, which relied solely upon a code of ethics, Rule 17j–1 proposes a definite antifraud proscription against "insider trading" by access persons with knowledge of the investment company's transactions. It would only apply, however, to natural persons, thereby removing corporate and other business entities from its requirements and restrictions. Further, although the ICI draft proposal did not require violations of the codes of ethics to be reported to the Commission, the proposed rule would. Also, it would provide for a 6-month adjustment period prior to effectiveness. Finally, to provide necessary flexibility, the proposed rule contains an appeal process from the "prior clearance" procedure for transactions which will not result in any disadvantage to the investment company and are consistent with the policies and purposes of the Act and rule.

[4] Mutual Fund Report, at 200.

PROPOSED RULE 17j–1

The proposed rule is designed to implement the provisions of section 17(j) (of the Act). It would define fraudulent, deceptive, or manipulative acts, practices, or courses of business within the meaning of section 17(j) (of the Act); require that certain classes of persons enumerated in that section report their securities transactions; and require that registered investment companies, their investment advisers and principal underwriters adopt codes of ethics. The rule would be adopted pursuant to the authority granted the Commission in sections 17(j), 38(a), and 6(c) of the Act.[5]

PARAGRAPH (a)—DEFINITIONS OF TERMS

Paragraph (a) of proposed Rule 17j–1 sets forth definitions of terms used in the proposed rule. "Security" is defined to mean any security of an issuer, any class of whose securities are being considered for recommendation to, or are being considered for purchase or sale by, or are being purchased or sold currently by a registered investment company. This means that the proposed rule would be applicable to purchase or sales of convertible securities, options, warrants, and debt securities of issuers whose underlying securities are being purchased or sold, being considered for purchase or sale, or being considered for recommendation for purchase or sale. The term "access person" is defined to include officers, directors, partners, and advisory employees of the investment company, its adviser, and principal underwriter.[6]

"Advisory employee" is defined to include any employee of the investment company or its investment adviser who is involved in recommending purchases or sales by the investment company or who obtains information concerning securities recommendations other than as a regular client of such adviser. This definition includes persons not immediately involved in formulating recommendations such as, for example, secretaries who might become aware of recommendations through their normal work.

PARAGRAPH (b)—GENERAL DEFINITION OF THE TERMS FRAUDULENT, DECEPTIVE, OR MANIPULATIVE ACTS, PRACTICES, OR COURSES OF BUSINESS

Paragraph (b) of the proposed rule defines the acts, practices, or courses of business that are fraudulent, deceptive, or manipulative if committed by an affiliated person of or principal underwriter for a registered investment company or an affiliated person of an investment adviser of or principal underwriter for a registered investment company in connection with the purchase or sale directly or indirectly by such person of any security held or to be acquired by such registered investment company. It sets forth general prohibitions, similar to those contained in Rules 10b–5 and 15c–2 (17 CFR 240.10b–5, 240.15c–2) under the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.) and section 206 of the Investment Advisers Act of 1940 (15 U.S.C. 80–b–6), against fraudulent, deceptive, or manipulative acts, practices, or courses of business in connection with purchases or sales by the abovementioned persons of securities held or to be acquired by a registered investment company. As in Rule 15c–2 under the Securities Exchange Act, the scope of this proposed paragraph is not limited by any specific definitions of the terms "fraudulent, deceptive, or manipulative acts, practices, or courses of business" contained in other provisions of the rule.

PARAGRAPH (c)—SPECIFIC DEFINITION OF THE TERMS FRAUDULENT, DECEPTIVE OR MANIPULATIVE ACTS, PRACTICES, OR COURSES OF BUSINESS

Paragraph (c) of the proposed rule sets forth a specific definition of the terms "fraudulent, deceptive, or manipulative acts, practices, or courses of business" as used in section 17(j) (of the Act). It prohibits any "access person," as defined in the proposed paragraph (a), from directly or indirectly purchasing or selling for his own account or any account in which he has a director or indirect beneficial interest, any security which he knows the investment company is purchasing or selling or which he knows is being recommended or is about to be recommended by any advisory employee of the investment company or investment adviser for purchase or sale by the investment company. Subdivision (iii) of paragraph (c) is intended to apply to situations where the advisory employee's consideration of a security for recommendation for purchase or sale has reached an advanced stage. It would not cover, for example, securities reviewed as part of a general industry survey or a general monitoring of the securities markets.

Specifically exempted from the prohibitions of paragraph (c) are securities which are direct obligations of the U.S. Government, purchases and sales executed upon exercise of rights issued by an issuer pro rata to all holders of a class of its securities and purchases or

[5] Section 38(a) of the Act authorizes the Commission to issue such rules as are necessary or appropriate to the exercise of the power conferred upon the Commission in the Act, including prescribing the form in which information required in reports to the Commission shall be set forth. Section 6(c) of the Act provides that the Commission by rule, regulation, or order may exempt any person, security, or transaction or any class or classes of persons, securities, or transactions from any provision of any rule under the Act if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and purposes fairly intended by the policy and provisions of the Act.

[6] "Access persons" would be subject to the trading prohibition of proposed paragraph (c) and the reporting requirement of proposed paragraph (d).

V 38 - 14 - J AN 22 73 XUM

sales effected in any account over which any person subject to the rules has no direct or indirect influence or control.

PARAGRAPH (d)—REPORTING REQUIREMENT

Paragraph (d) of proposed Rule 17j-1 establishes a reporting requirement for those persons with particular access to the decisionmaking process, including "disinterested" directors [7] of investment companies, and "independent" directors [8] of investment advisers and principal underwriters. Such an "access person" would be required to file a report with the investment company, investment adviser or principal underwriter of which he is an affiliated person of all of his securities transactions (other than those transactions exempted from paragraph (c)). Reports required to be filed under this paragraph are patterned after the reporting requirement of Rule 204-2(a)(12) (17 CFR 275.204-2(a)(12)) under the Investment Advisers Act.[9] Paragraph (d)(2) requires the investment company and investment adviser to designate by name any individual considered to be an "advisory employee" within the definition of "access person," and to inform him of his duty to file the prescribed reports.

PARAGRAPH (e)—CODES OF ETHICS

Paragraph (e) of proposed Rule 17j-1 would require registered investment companies, their investment advisers and principal underwriters [10] to adopt a written Code of Ethics establishing, as a minimum, such standards as are reasonably necessary to prohibit affiliated persons from engaging in any acts, practices or courses of business which have been declared to be fraudulent, deceptive or manipulative in paragraph (c). In order to provide greater certainty with respect to whether or not a transaction would be permitted, the paragraph permits such codes to provide an optional "prior written clearance" procedure under which advance clearance could be granted to transactions if the security in question is not being purchased or sold by the registered investment company, or being considered by the investment company or investment adviser for purchase or sale by the investment company. If the access person cannot be granted prior clearance by the clearing authority the access person may appeal that prohibition to a responsible person who will be designated by the investment company, investment adviser or principal underwriter to consider appeals. That person, in reviewing appeals, may grant clearance to the access person where he shall determine that there will be no disadvantage to the investment company, and that the prohibitions of paragraph (c) of this rule [11] should not be applied to the circumstances presented, giving due consideration to the policies and purposes of the Act and the rule. The person designated to consider appeals shall maintain written records to substantiate determinations to grant prior clearance. To provide further flexibility paragraph (e)(2)(iii) of Rule 17j-1 permits a prior clearance procedure to provide that disinterested or independent directors, if they so desire, need not comply with such procedure.

Investment companies, advisers, and underwriters are required to maintain records of the reports filed with them and to review such reports for purposes of determining whether or not violations of their codes have occurred. All violations must be reported immediately to the board of directors of the investment company. Violations, and actions taken in respect to them, must be reported by the investment company to the Commission within 10 days after it has been informed of such violations. A registered investment company, investment adviser or principal underwriter shall not be deemed to have violated the provision of the rule by reason of a violation of its Code of Ethics by any person if it establishes that it instituted adequate procedures and used reasonable diligence to carry out the provisions of such code.

POLICY QUESTION

Comments are specifically requested on an important policy question: The requirements that "disinterested" directors of investment companies file reports of their transactions. Although the Commission desires to avoid inconvenience to such directors, it is also mindful of the importance of maintaining high standards of conduct for all those in a position to benefit from "insider" information about an investment company's intentions. One alternative would have been to limit this requirement to directors who actually acquire information about investment company transactions. However, such a limitation could discourage directors from being fully informed about their company's affairs. The Commission solicits comments upon and suggested alternatives to this requirement in light of these objectives.

Commission action. The Securities and Exchange Commission, pursuant to the authority in sections 6(c), 17(j), and 38(a) of the Investment Company Act of 1940, proposes to amend Part 270 of Chapter II of Title 17 of the Code of Federal Regulations by adding thereto a new § 270.17j-1, reading as follows:

§ 270.17j-1 Fraudulent, deceptive, and manipulative acts, practices and courses of business.

(a) As used in this § 270.17j-1:

(1) The term "security" shall mean any security of an issuer, any class of whose securities are being considered for recommendation to, or are being considered for purchase or sale by, or are being currently purchased or sold by a registered investment company.

(2) The term "access person" shall mean:

(i) With respect to a registered investment company, any director, officer, or advisory employee of such investment company;

(ii) With respect to an investment adviser, any partner, director, officer, or advisory employee of such investment adviser;

(iii) With respect to a principal underwriter, any partner, director, or officer of such principal underwriter.

(3) The term "advisory employee" of a registered investment company or of an investment adviser shall mean any employee of such registered investment company or of such investment adviser who makes any recommendation concerning any security held or to be acquired by such investment company, who participates in the determination of which recommendation shall be made, or whose functions or duties relate to the determination of which recommendation shall be made; any employee who, in connection with his duties, obtains any information concerning which securities are being considered or being considered for recommendation; and any natural person in a control relationship to the investment company or to any investment adviser of the investment company who obtains information concerning securities recommendations other than as a regular client of such investment adviser.

(b) It shall constitute a fraudulent, deceptive, or manipulative act, practice or course of business within the meaning of section 17(j) [of the Act] for any affiliated person of or principal underwriter for a registered investment company or any affiliated person of an investment adviser of or principal underwriter for a registered investment company,

(1) To employ any device, scheme, or artifice to defraud,

(2) To make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which they are made, not misleading, or,

[7] A "disinterested" director of an investment company is a director who is not an interested person with the meaning of section 2(a)(19) of the Act (15 U.S.C. 80a-2(a)(19)).

[8] An "independent" director of an investment adviser or principal underwriter is a director who is not an officer of such investment adviser or principal underwriter. Officers, directors and partners of principal underwriters who are not affiliated persons of the investment company or its adviser and who do not serve as directors or officers of the investment company or its adviser are not required to submit reports under this proposal.

[9] In order to avoid duplication in reporting by persons who would be subject to this proposal and whose transactions are also required to be reported by the investment adviser pursuant to Rule 204(a)(12) or excepted from reporting by proposed Rule 204-2(a)(13) (17 CFR 275.204-2(a)(13), 38 FR —, Rel. No. IA-353), paragraph (d)(3) exempts such persons from the reporting requirement of this proposal. If proposed Rule 204-2(a)(13) is not adopted, this exemption will be removed.

[10] Principal underwriters which are not affiliated persons of investment companies or their advisers and none of whose directors or officers serve as directors or officers of investment companies or their advisers are not required to adopt such a Code of Ethics.

[11] The protection of paragraph (b) of the rule would, of course, still be applicable.

(3) To engage in any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person,

in connection with the purchase or sale, directly or indirectly, by such person of any security held or to be acquired by such registered investment company. The scope of this paragraph shall not be limited by any specific definition of the terms fraudulent, deceptive or manipulative act, practice or course of business contained in other rules adopted pursuant to section 17(j) of the Act.

(c)(1) It shall constitute a fraudulent, deceptive, or manipulative act, practice or course of business within the meaning of section 17(j) [of the Act] for any access person to purchase or sell, directly or indirectly, any security in which such person has, or by reason of such transaction acquires, any direct or indirect benficial interest or ownership and which such person knows: (i) Is currently being purchased or sold by such registered investment company; (ii) is being considered for purchase or sale by such investment company; or (iii) is being recommended or is about to be recommended by any advisory employee of such investment company or investment adviser for purchase or sale by such investment company.

(2) The provisions of paragraph (c)(1) of this section shall not apply to:

(i) Purchases or sales of securities which are direct obligations of the United States,

(ii) Purchases effected upon exercise of rights issued by an issuer pro rata to all holders of a class of its securities to the extent such rights were acquired from such issuer, and sales of such rights so acquired, and

(iii) Purchases or sales effected in any account over which any person subject to this rule has no direct or indirect influence or control.

(d)(1) Every access person as defined in paragraph (a)(2) of this § 270.17j-1 (other than a partner, director, or officer of a principal underwriter which is not an affiliated person of the investment company or its investment adviser and who does not serve as a director or officer of the investment company or its investment adviser) shall file with the investment company, investment adviser or principal underwriter of which he is an affiliate, a report on every transaction in which he has, or by reason of such transaction acquires, any direct or indirect beneficial interest or ownership in a security, except transactions exempted by paragraph (c)(2) of this section, not later than 10 days after the end of each quarter in which the transactions was effected. Such report shall state:

(i) The title and amount of the security involved;

(ii) The date and nature of the transaction (i.e., purchase, sale or other acquisition or disposition);

(iii) The price at which it was effected; and

(iv) The name of the broker, dealer or bank with or through whom the transaction was effected.

Such report may also contain a statement declaring that the reporting of any such transaction shall not be construed as an admission that the access person has any direct or indirect beneficial interest or ownership in the security. If no transactions are executed during any quarter, a report to this effect shall be filed. Reports filed pursuant to this rule shall be available for inspection by the Commission.

(2) Each registered investment company and each investment adviser for such investment company respectively shall designate by name those individuals who come within the class of "advisory employee" as defined in paragraph (a)(3) of this § 270.17j-1 and shall inform such persons of their duty to file the reports prescribed in this § 270.17j-1.

(3) Any person subject to paragraph (d) of this § 270.17j-1, (i) whose transactions are also recorded in the manner required by § 275.204-2(a)(12) of this chapter under the Investment Advisers Act of 1940 or (ii) whose transactions are not required to be included in the records maintained by the investment adviser pursuant to § 275.204-2(a)(13) of this chapter under the Investment Advisers Act of 1940, is exempt from the reporting requirements of this paragraph.

(e)(1) Each registered investment company and each investment adviser of and principal underwriter for such registered investment company (other than an underwriter which is not an affiliated person of the investment company or its investment adviser and none of whose directors or officers serves as a director or officer of the investment company or its adviser) shall adopt a written Code of Ethics establishing, as a minimum, such standards as are reasonably necessary to prohibit any access person from engaging in any acts, practices or courses of business which have been declared to be fraudulent, deceptive or manipulative under paragraph (c) of this § 270.17j-1.

(2) A Code of Ethic may provide that no access person may effect a purchase or sale without obtaining prior written clearance from a person or body designated by the board of directors of such registered investment company, investment adviser or principal underwriter.

(i) If a code contains such a provision any person who effects a purchase or sale after obtaining such prior written clearance shall be deemed not to be in violation of paragraph (c) of this section by reason of such purchase or sale: *Provided*, That, no such written clearance shall be granted if the security in question is being purchased or sold by such investment company or is being considered by such investment company or investment adviser for purchase or sale by such investment company.

(ii) If the access person cannot be granted prior clearance by the clearing authority, such access person may appeal that determination to a person or body designated to consider such appeals by the board of directors of such investment company, investment adviser, or principal underwriter. Such designated person or body may grant prior clearance upon determining that the proposed transaction shall not result in any disadvantage to such investment company, and that the prohibitions of paragraph (c) of this section should not be applied to such circumstances, giving due consideration to the policies and purposes of the Act and rule. Such designated person or body shall maintain written records, including the reasons for any such determination to grant prior clearance.

(iii) Such a Code may provide that a director who is an interested person of a registered investment company solely by reason of the fact that he is a director of such company, and a director of an investment adviser or principal underwriter who is not an officer of such investment adviser or principal underwriter need not obtain prior written clearance before effecting a purchase or sale.

(3) Each investment company, investment adviser and principal underwriter shall keep a current record of every report filed with it pursuant to paragraph (d) of this §270.17j-1 and shall review such reports for the purpose of determining whether or not violations of its Code of Ethics has occurred.

(4) Upon learning of a violation or apparent violation of such Code, the chief executive officer of such investment adviser or principal underwriter shall immediately report such violation to the board of directors of the appropriate registered investment company. Violations, and actions taken in respect to violations, shall be reported by the registered investment company in writing to the Commission within 10 days of being informed of such violations.

(5) A registered investment company, investment adviser or principal underwriter shall not be deemed to have violated the provisions of this section by reason of a violation of its Code of Ethics by any person if it establishes that it instituted adequate procedures and used reasonable diligence to carry out the provisions of such Code.

If adopted, this section will become effective six months and one day from the date of its adoption, to allow all access persons sufficient time to make any necessary adjustments in their personal securities portfolios.

All interested persons are invited to submit their written views and comments on the proposed rule to Lewis J. Mendelson, Assistant Director, Division of Investment Management Regulation, Securities and Exchange Commission, Washington, D.C. 20549 on or before February 28, 1973. All communications in this regard should refer to File No. S7-469 and will be available for public inspection.

(Secs. 6(c), 17(j), 38(a), 54 Stat. 800, 815, 841, 84 Stat. 1420, 15 U.S.C. 80a-6(c), 80a-17(j), 80a-37(a))

[SEAL] RONALD F. HUNT,
Secretary.

Notices

DEPARTMENT OF THE TREASURY

Office of the Secretary

DEBT MANAGEMENT ADVISORY COMMITTEES

Notice of Closed Meetings

Notice is hereby given, pursuant to section 10 of Public Law 92–463, that meetings will be held in Washington on January 30 and 31, 1973, of the following debt mangement advisory committees:

American Bankers Association, Government Borrowing Committee.

Securities Industry Association, Government Securities and Federal Agencies Committee.

The agenda for the meetings will include briefings for the advisory committees by Treasury staff on current debt management problems on January 30, separate deliberations by the two committees on January 30, and separate reports to the Secretary of the Treasury and Treasury staff on the morning of January 31.

A determination as required by section 10(d) of the Act has been made that these meetings are concerned with matters listed in section 552(b) of Title 5 of the United States Code, and that the meetings will not be open to the public.

[SEAL] PAUL A. VOLCKER,
Under Secretary for Monetary Affairs.

Office of the Secretary

[Treasury Dept. Order 82 (Revised)]

DIRECTOR OF OFFICE OF PERSONNEL, ET AL.

Personnel and Physical Security; Organization and Delegation of Authority

Personnel security. 1. Pursuant to the authority vested in the Secretary of the Treasury by Reorganization Plan No. 26 of 1950 and delegated to me by Treasury Department Order No. 190 (Revised), the Director of the Office of Personnel is delegated the responsibility for direction and oversight of the personnel security function in the Department of the Treasury. He will serve as the proper channel through whom matters requiring exceptional attention will be processed. The Director of Personnel will maintain the security files of, and have jurisdiction over granting top secret clearances for, the following employees:

Presidential appointees requiring confirmation by the Senate, and occupants of Executive level positions, to the extent of the Department's authority with respect to these employees.

Heads of bureaus and their first deputies.

Bureau security officers and any official to whom the authority to grant top secret security clearance has been delegated.

In addition, the Director of Personnel will assume jurisdiction over all cases involving a potential determination that an employee in any Treasury bureau or in the Office of the Secretary should be suspended, reassigned, or terminated on the grounds that such action is necessary in the interest of the national security.

2. Authority for performing the operating functions relating to personnel security, including the granting of top secret security clearances, is hereby delegated to the following officials in the Department of the Treasury:

In the Office of the Secretary:

Chief, Office of the Secretary Personnel Division.

In the bureaus:

Commissioner of Accounts.
Director, Bureau of Alcohol, Tobacco and Firearms.
Comptroller of the Currency.
Director, Consolidated Federal Law Enforcement Training Center.
Commissioner of Customs.
Director, Bureau of Engraving and Printing.
Commissioner of Internal Revenue.
Director of the Mint.
Commissioner of the Public Debt.
Treasurer of the United States.
National Director, U.S. Savings Bonds Division.
Director, U.S. Secret Service.

3. The authority delegated herein may be redelegated with the concurrence of the Director of the Office of Personnel or the Assistant Director of Personnel (Personnel Security). In addition, bureau heads who do not find it feasible to carry out these functions may, with the concurrence of the Director of the Office of Personnel or the Assistant Director of Personnel (Personnel Security), request that the functions be performed for them by the head or delegate of one of Treasury's investigative agencies, namely, Bureau of Customs, Internal Revenue Service, or the U.S. Secret Service. Subsequent to the required concurrence the request may be made directly to the head, or his delegate, of the investigative agency.

4. The personnel security program will be carried out under Executive Order 10450 and implementing regulations in the Federal and Treasury Personnel Manuals. In addition, the Director of Personnel of the Department will issue such supplemental regulations and instructions as may be required for the conduct and coordination of the personnel security program in the Department.

Physical security. 5. The Director of the Office of Administrative Programs will have and maintain responsibility for the Department's functions relating to physical security transferred to him by virtue of Treasury Department Order No. 82, Supplement No. 1. These responsibilities are to be carried out pursuant to Executive Order 11652 and implementing Treasury regulations and directives, including Treasury Department Order 160, as revised.

Physical security functions include the following:

1. Document security.
2. Communications security.
3. Building security.
4. Industrial security.

6. This order supersedes Treasury Department Order No. 82 (Revised) and Supplement 1 thereof, and is effective immediately.

Dated: January 17, 1973.

[SEAL] WARREN F. BRECHT,
Assistant Secretary for Administration.

DEPARTMENT OF DEFENSE

Defense Supply Agency

DEFENSE CONTRACT ADMINISTRATION SERVICES

Withdrawal of Notice of Proposed Cancellation of Contracts

JANUARY 15, 1973.

On October 4, 1972, the Director, Defense Supply Agency, issued a letter to Westran Corp. advising the company of proposed sanctions under the provisions of Executive Order 11246 and implementing regulations. The notice of proposed sanctions, as amended, was published in the FEDERAL REGISTER, Volume 37, No. 205, Saturday, October 21, 1972 (37 FR 22756). Subsequently, a consent order between Westran and the Director was entered into as of November 30, 1972. The approved consent order provides a satisfactory solution, when fully implemented, to the deficiencies which resulted in the proposed sanctions.

In accordance with the consent order, the October 4, 1972, notice of proposed sanctions is hereby withdrawn.

WALLACE H. ROBINSON, JR.,
Lieutenant General, USMC, Director.

Department of the Navy

CHIEF OF NAVAL OPERATIONS EXECUTIVE PANEL ADVISORY COMMITTEE

Notice of Closed Meetings

Notice is hereby given that the Chief of Naval Operations Executive Panel Advisory Committee has scheduled closed meetings for January 24 and 25, 1973, at the Program Evaluation Center (Room 4D710), the Pentagon. The meetings will commence at 0900 daily and are scheduled to terminate at 1700. Items to be discussed will include: Navy Strategic Policy and Plans; future Navy force levels in light of projected 1980 worlds; future of higher education in the Navy; recent developments in the Soviet Navy. An unclassified summary of the meetings and a roster of panel members may be obtained from the Executive Secretary, Chief of Naval Operations Executive Panel, Washington, D.C. 20350.

Dated: January 16, 1973.

H. B. ROBERTSON, Jr.,
Rear Admiral, JAGC, U.S. Navy, Acting Judge Advocate General.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

COMMODITY CREDIT CORPORATION ADVISORY BOARD

Notice of Public Meeting

Notice is hereby given that the Commodity Credit Corporation Advisory Board established under Section 9(b) of the Commodity Credit Corporation Charter Act of 1949 (63 Stat. 154, 155; 15 U.S.C. section 714g(b)), will meet at 8:15 a.m. on Wednesday, January 24, 1973, and Thursday, January 25, 1973, in Room 2–W, of the Administration Building of the U.S. Department of Agriculture, Washington, D.C.

The purpose of this regularly scheduled quarterly meeting of the Advisory Board is to survey the policies of the Commodity Credit Corporation in connection with the purchase, storage and sale of commodities, and the operation of lending and price support programs. The meeting will be open to the public.

The names of the Presidential appointees comprising the Advisory Board, agenda, summary of the meeting and other information pertaining to the meeting may be obtained from Mr. Seeley G. Lodwick, Secretary, Commodity Credit Corporation, Room 202–W, Administration Building, U.S. Department of Agriculture, Washington, D.C.

Signed at Washington, D.C., on January 16, 1973.

KENNETH E. FRICK,
Administrator, Agricultural Stabilization and Conservation Service.

HEALTH SERVICES AND MENTAL HEALTH ADMINISTRATION

Statement of Organization, Functions, and Delegations of Authority

Part 3 (Health Services and Mental Health Administration) of the Statement of Organization, Functions, and Delegation of Authority for the Department of Health, Education, and Welfare (33 FR 15953, October 30, 1968), as amended, is hereby amended with regard to section 3–20, *Organization and Functions*, as follows:

After the chapter alphabetically coded 3–N–00—MATERNAL AND CHILD HEALTH SERVICE (3N00)—replace the paragraph *Office of Administrative Management (3N19)*, with the following:

Office of Program and Administrative Management (3N19). (1) Assists the Director in policy formulation and the development of long- and short-range goals and objectives; (2) provides concepts for the development of guidelines and standards for program implementation; (3) oversees the interpretation of program policy in budget formulation; (4) conducts the necessary control functions to assure operational compliance with program objectives; (5) defines and identifies data needs for use in planning, analysis, and evaluation of Maternal and Child Health Service programs; (6) assures program coordination and liaison between the Director and the operating program offices; (7) assists Regional and Headquarters staff in the development and interpretation of policies and guidelines; (8) plans, directs, and coordinates administrative management activities of Maternal and Child Health Service; (9) provides program information to the staff of the HSMHA Office of Financial Management in the operation of a financial management system for the Service, including program policy interpretation in budget formulation and execution and in preparation of program planning and budgeting data; (10) develops and implements management policies, procedures, and systems; and (11) serves as the focal point for liaison with officials of the Office of the Administrator and the Office of the Secretary on financial, personnel, organization, supply, contracts, and other management matters.

Dated: January 16, 1973.

STEVEN D. KOHLERT,
Deputy Assistant Secretary for Management.

Public Health Service

SCHOLARSHIP GRANTS TO SCHOOLS OF MEDICINE, OSTEOPATHY, DENTISTRY, OPTOMETRY, PODIATRY, PHARMACY, AND VETERINARY MEDICINE

Determination of "Low-Income Background" Breakpoints

On July 4, 1972 (37 FR 13177) final regulations (42 CFR Part 57, Subpart G) were published governing the award of scholarship grants to public or other nonprofit schools of medicine, osteopathy, dentistry, optometry, podiatry, pharmacy, or veterinary medicine for scholarships to be awarded annually by such schools to students thereof pursuant to section 780 of the Public Health Service Act. Under this authority, grant funds are to be allocated to schools by a formula based upon the greater of one-tenth of the number of full-time students of such school or the number of full-time students of a school who are from low-income backgrounds. Section 57.605(c) of the implementing regulations provides in pertinent part that:

> Students will be considered to be from "low-income backgrounds" if they come from families with annual incomes below levels based on low-income thresholds by family size published by the U.S. Bureau of Census, as adjusted annually for changes in the consumer price index, multiplied by a factor to be determined by the Secretary for adaptation to this program. Such factor and the income levels as adjusted will be published annually by the Secretary in the FEDERAL REGISTER.

Notice is hereby given that the breakpoints listed below will be utilized in determination of what constitutes "low-income background" for purposes of allocating grant funds to schools for scholarships to be awarded for the 1973–74 academic year. These breakpoints have been derived from low-income thresholds published by the U.S. Bureau of the Census, utilizing an index adopted by a Federal Interagency Committee for use in a variety of Federal programs. The thresholds have been updated for 1972 to reflect the average level of the Consumer Price Index from January through August, 1972, and have been multiplied by a factor of 1.3 for adaptation to the Health Professions scholarship program.

Size of family (Including parents and children or other dependents)	*Income level [1] (Before personal income taxes)*
2	$3,700
3	$4,300
4	$5,500
5	$6,600
6	$7,400
7 or more	$9,000

[1] Rounded to $100.

Dated: January 12, 1973.

ROBERT Q. MARSTON,
Director,
National Institutes of Health.

ATOMIC ENERGY COMMISSION

[Dockets Nos. 50-317, 50-318]

BALTIMORE GAS AND ELECTRIC CO.

Notice of Prehearing Conference

JANUARY 17, 1973.

In the matter of Baltimore Gas & Electric Co. (Calvert Cliffs Nuclear Power Plant, Units 1 and 2).

Pursuant to the Commission's notice of hearing dated September 13, 1972 (37 FR 19393), a prehearing conference in the above entitled proceeding will be held at 10 a.m., on Friday, February 9, 1973, in Room 111 of the Lafayette Building, 811 Vermont Avenue NW., Washington, DC.

The purpose of the prehearing conference will be:

(1) To consider the stipulation dated December 1, 1972, filed jointly by the Baltimore Gas & Electric Co. (Applicant) and the Chesapeake Environmental Protection Association (Intervenor) and the motion to accept the stipulation, which stipulation and answer were subsequently joined in by the regulatory staff by supplemental answer dated January 5, 1973.

(2) To set a hearing schedule; and to establish dates for the submittal of written testimony and the identification of witnesses; and

(3) To consider such other matters as may aid in the orderly disposition of the proceeding.

The Board will require the parties at the prehearing conference, either in the form of briefs or oral presentation, to express their views with respect to the application to this licensing proceeding of the Federal Water Pollution Control Act amendments of 1972.

It is so ordered.

Issued at Washington, D.C., this 17th day of January 1973.

For the Atomic Safety and Licensing Board.

CHARLES A. HASKINS,
Chairman.

[FR Doc.73-1305 Filed 1-19-73;8:45 am]

[Dockets Nos. 50-404, 50-405]

VIRGINIA ELECTRIC AND POWER CO.

Notice and Order for Prehearing Conference

JANUARY 17, 1973.

In the matter of Virginia Electric and Power Co. (North Anna Nuclear Power Station, Units 3 and 4).

The Atomic Energy Commission, by a notice of hearing dated September 21, 1972, and published in the FEDERAL REGISTER on October 4, 1972 at volume 37, page 20879, gave notice that a hearing would be held, at a time and place to be set in the future by an atomic safety and licensing board, to consider an application filed under the Atomic Energy Act of 1954 by Virginia Electric and Power Co. The application is for a construction permit for two pressurized water nuclear power reactors designated as North Anna Nuclear Power Station, Units 3 and 4, to be located on the applicant's site, south of the North Anna River, approximately 24 miles southwest of Fredericksburg, in Louisa County, Va. As indicated in that notice of hearing, the issues to be determined by the atomic safety and licensing board are those identified in the notice pursuant to the Atomic Energy Act of 1954 and the National Environmental Policy Act of 1969.

A notice dated December 4, 1972, published in the FEDERAL REGISTER on December 8, 1972, at Volume 37, page 26145, announced the appointment of an atomic safety and licensing board in this proceeding consisting of R. B. Briggs, Dr. Emil T. Chanlett, and Sidney G. Kingsley, chairman, with Dr. Kenneth A. McCollom as a technically qualified alternate and Daniel M. Head as alternate chairman.

Both the notice of hearing and the notice of appointment of the atomic safety and licensing board announced that the date and place of a prehearing conference and of a hearing would be scheduled by the atomic safety and licensing board and would be published in the FEDERAL REGISTER.

Please take notice that a prehearing conference, constituting both the special prehearing conference pursuant to section 2.751a of the Commission's rules of practice (Volume 10, Code of Federal Regulations, Part 2) and the prehearing conference pursuant to § 2.752 of the rules of practice, will be held at 1 p.m. local time on February 14, 1973 at the Council Chamber, City Hall, Princess Anne Street, Fredericksburg, Va., to consider:

1. Identification, simplification and clarification of the issues;

2. The necessity or desirability of amending the pleadings;

3. The need for discovery, if any, and the time required therefor;

4. Stipulations, and admissions of fact and of the contents and authenticity of documents in order to avoid unnecessary proof;

5. Identification of witnesses and the limitation of the number of expert witnesses, and other steps to expedite the presentation of evidence;

6. Procedures, including rules of evidence, to be followed in the presentation of evidence at the evidentiary hearing;

7. The effect of Public Law 92-500, section 401(a), the certification provision of the Federal Water Pollution Control Act Amendments of 1972, on the proof required at the evidentiary hearing. It is expected that the parties will be prepared to advise the board as to applicable State and Federal water quality standards and effluent limitations, and the effect on this proceeding of section 511(c) of the amendments of 1972;

8. Establishment of a schedule for further action, including a hearing schedule; and

9. Such other matters as may aid in the orderly disposition of the proceeding.

Members of the public are invited to attend the prehearing conference and any later prehearing conferences, as well as the evidentiary hearing to be held at a later date to be fixed by the atomic safety and licensing board.

The prehearing conference will be limited to the purposes specified, in preparation for the later evidentiary hearing. No evidence will be received at the prehearing conference, and there will not be an opportunity at the prehearing conference to present statements by members of the public who wish to make limited appearances for that purpose. Applications for permission to make limited appearances for the purpose of making such statements will be ruled upon by the atomic safety and licensing board at the evidentiary hearing to be held later.

It is ordered, That counsel shall conduct informal conferences, including telephone conferences, to the extent that they may be practicable, to expedite the proceeding and in particular to advance the purposes of the prehearing conference.

Dated this 17th day of January 1973 at Washington, D.C.

ATOMIC SAFETY AND LICENSING BOARD,
SIDNEY G. KINGSLEY,
Chairman.

[FR Doc.73-1306 Filed 1-19-73;8:45 am]

COMMISSION ON CIVIL RIGHTS

NEW YORK STATE ADVISORY COMMITTEE

Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a meeting of the New York State Advisory Committee will convene at 7 p.m. on January 25, 1973, at 26 Federal Plaza, Room 1639, New York, NY 10007. Persons wishing to attend this meeting should contact the Committee Chairman, or the Northeastern Regional Office of the Commission at 26 Federal Plaza, Room 1639, New York, NY 10007. The purpose of this meeting will be to discuss project proposals for adoption by the Subcommittee on Sex Discrimination.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

Dated at Washington, D.C., January 16, 1973.

ISAIAH T. CRESWELL, JR.,
Advisory Committee Management Officer.

[FR Doc.73-1304 Filed 1-19-73;8:45 am]

WISCONSIN STATE ADVISORY COMMITTEE

Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a meeting of the Wisconsin State Advisory Committee will convene at 1:30 p.m. on January 24, 1973, at the Federal Building, 517 East Wisconsin, Milwaukee, WI 53202. Persons wishing to attend this meeting should contact the Committee Chairman, or the Midwestern Regional Office of the Commission at 219 South Dearborn Street, Room 1428, Chicago, IL 60604. The purpose of this meeting will be (1) to discuss followup to the report "The Black Student in the Wisconsin State Universities System," (2) plan followup on the study and report "Police Isolation and Community Needs" and (3) discuss plans for the Committee's program involving civil rights of American Indians in Wisconsin.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

Dated at Washington, D.C., January 16, 1973.

ISAIAH T. CRESWELL, JR.,
Advisory Committee Management Officer.

FEDERAL POWER COMMISSION

[Docket No. E-7743]

CONNECTICUT LIGHT & POWER CO.

Notice of Further Extension of Time and Postponement of Hearing

JANUARY 16, 1973.

On January 11, 1973, the Connecticut Municipal Group filed a motion for extension of time for the presentation of prepared testimony and exhibits as established by order issued August 14, 1972, and amended by notice issued November 30, 1972. The motion states that all parties to the proceeding consent to the request.

Upon consideration, notice is hereby given that the procedural dates fixed by order issued August 14, 1972, and amended by notice of November 30, 1972, in the above matter are further modified as follows:

Service of Intervenor's evidence—February 28, 1973.
Service of rebuttal evidence of Connecticut Light & Power Co.—March 21, 1973.
Hearing to commence—April 5, 1973 (10 a.m., e.s.t.).

The following dates are unchanged:

Service of staff's evidence—January 15, 1973.
Prehearing conference—January 23, 1973 (10 a.m., e.s.t.).

KENNETH F. PLUMB,
Secretary.

GENERAL SERVICES ADMINISTRATION

[Federal Property Management Regs., Temporary Reg. F-164]

SECRETARY OF DEFENSE

Delegation of Authority

1. *Purpose.* This regulation delegates authority to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government in a telephone communications rate proceeding.

2. *Effective date.* This regulation is effective immediately.

3. *Delegation.* a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d) (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government before the Indiana Public Service Commission in a proceeding (Cause No. 33172) involving the application of Indiana Bell Telephone Co. for a telephone rate increase.

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration, and, further, shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

ARTHUR F. SAMPSON,
Acting Administrator of General Services.

JANUARY 15, 1973.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

HAWAII DEVELOPMENTAL PLAN

State Occupational Safety and Health Standards and Their Enforcement; Notice of Submission of Plan and Availability for Public Comment

1. *Submission and description of plan.* Pursuant to section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) and § 1902.11 of Title 29, Code of Federal Regulations, notice is hereby given that an Occupational Safety and Health Plan for the State of Hawaii has been submitted to the Assistant Secretary of Labor for Occupational Safety and Health. The Assistant Secretary has preliminarily reviewed the plan, and hereby gives notice that the question of the approval of the plan is in issue before him.

V38-14 JAN 22 73 XUM

The plan designates the Department of Labor and Industrial Relations as the agency responsible for administering the plan throughout the State. It proposes to define the occupational safety and health issues covered by it as defined by the Secretary of Labor in 29 CFR 1902.2 (c)(1). All occupational safety and health standards promulgated by the U.S. Secretary of Labor will be adopted under the plan as well as certain standards deemed to be "as effective as" the Federal Standard, except those found in 29 CFR Parts 1915, 1916, 1917 and 1918 (ship repairing, shipbuilding, shipbreaking and longshoring), and after public hearing will become effective 3 months after the standards are approved by the Secretary of Labor.

Within the plan there is the Hawaii Occupational Safety and Health Law which became law on May 16, 1972. The law as enacted gives the Department of Labor and Industrial Relations the statutory authority to implement an occupational safety and health plan modeled after the Federal Act. There are provisions within it granting the Director of Labor and Industrial Relations the authority to inspect workplaces and to issue citations for the abatement of violations and there is also included a prohibition against advance notice of such inspections. The law is also intended to insure employer and employee representatives an opportunity to accompany inspectors and to call attention to possible violations; notification of employees or their representatives when no compliance action is taken as a result of alleged violations; protection of employees against discharge in terms and conditions of employment; adequate safeguards to protect trade secrets. There is provision made for the prompt restraint of imminent danger situations and a system of penalties for violation of the law.

The plan also includes proposed amendments to be considered by the Hawaii Legislature during its 1973 session amending the Occupational Safety and Health Law, and related provisions, to bring them into conformity with the requirements of Part 1902.

The law and the proposed amendments are accompanied by a statement of the Governor's support for them and an opinion from the Attorney General that the law will meet the requirements of the Occupational Safety and Health Act of 1970 and is consistent with the constitution and other laws of the State.

The law sets forth the general authority and scope for implementing the Hawaii Plan, but at the same time, the plan is developmental within 29 CFR Part 1902.(b) in that specific rules and regulations must be adopted to carry out the plan and to make it fully operational. There is set forth in the proposed plan a timetable for the accomplishment of developmental goals under the Hawaii Plan. The timetable covers such general areas as the development of State Occupational Safety and Health Codes, training of personnel, the development of a budget and the submission of proposed legislation. The plan also contains a comprehensive description of personnel to be employed under the State's merit system as well as its proposed budget and resources.

2. *Location of plan for inspection and copying.* A copy of the plan may be inspected and copied during normal business hours at the following locations: Office of Federal and State Operations, Occupational Safety and Health Administration, Room 305, 400 First Street NW., Washington, DC 20210; Regional Administrator, Occupational Safety and Health Administration, Room 9470, Federal Office Building, 450 Golden Gate Avenue, San Francisco, CA 94102; and the offices of the Department of Labor and Industrial Relations, Room 308, 825 Miliani Street, Honolulu, HA 96813.

3. *Public participation.* Interested persons are hereby given until February 21, 1973, to submit to the Assistant Secretary written data, views, and arguments concerning the plan. The submissions are to be addressed to the Director, Office of Federal and State Operations, Room 305, 400 First Street NW., Washington, DC 20210. The written comments will be available for public inspection and copying at the above address.

Any interested person(s) may request an informal hearing concerning the proposed plan, or any part thereof, whenever particularized written objections thereto are filed by February 21, 1973. If the Assistant Secretary finds that substantial objections are filed, he shall hold a formal or informal hearing on the subjects and issues involved.

The Assistant Secretary for Occupational Safety and Health shall thereafter consider all relevant comments and arguments presented and issue his decision as to approval or disapproval of the plan.

Signed at Washington, D.C., this 16th day of January 1973.

G. C. GUENTHER,
Assistant Secretary of Labor.

[FR Doc.73-1287 Filed 1-19-73;8:45 am]

ILLINOIS DEVELOPMENTAL PLAN

State Occupational Safety and Health Standards and Their Enforcement; Notice of Informal Hearing

1. *Submission and description of plan.* Pursuant to section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) and § 1902.11 of Title 29, Code of Federal Regulations, notice is hereby given that an occupational safety and health plan for the State of Illinois has been submitted to the Assistant Secretary of Labor for Occupational Safety and Health. The Assistant Secretary has preliminarily reviewed the plan, and hereby gives notice that the question of the approval of the plan is in issue before him.

The plan designates the Industrial Commission and the Department of Labor as the agencies responsible for administering the plan throughout the State. It proposes to define the occupational safety and health issues covered by it as defined by the Secretary of Labor in 29 CFR 1902.2(c)(1). Illinois has adopted all Federal safety and health standards contained in 29 CFR Parts 1910 and 1926. However, some modifications to certain standards are also included in the plan. The plan contains assurances of the continued effectiveness of Illinois standards.

Illinois has existing enabling legislation: The Illinois Health and Safety Act (Ill. Rev. Stat., Ch. 48, pars. 137.1 et seq.); and the Illinois Safety Inspection and Education Act (Ill. Rev. Stat., Ch. 48, pars. 59.1 et seq.). However, Illinois has proposed amendments to these Acts (Illinois Senate Bill 1600) to bring the plan into full conformity with 29 CFR Part 1902. These amendments are accompanied by a statement of support from the Governor and an Attorney General Opinion that the amended Acts will be constitutional and consistent with the laws of Illinois.

Under the amended Acts, the Illinois Industrial Commission and the Department of Labor will have full authority to implement and carry out all provisions of the State plan. The plan as implemented will require employer and employee compliance; provide for inspections including prompt responses to complaints; prohibit unauthorized advance notice of inspections; and establish a safety and health program for public employees.

Furthermore, there will be procedures for the prompt restraint or elimination of imminent dangers; protection of trade secrets; a system of sanctions against employers; employer rights of review with employee participation; and a program for voluntary compliance. The plan also includes assurances of sufficient resources and qualified personnel hired under a merit system.

2. *Location of plan for inspection and copying.* A copy of the plan may be inspected and copied during normal business hours at the following locations: Office of Federal and State Cperations, Occupational Safety and Health Administration, Room 305, 400 First Street NW., Washington, DC 20210; Regional Administrator, Occupational Safety and Health Administration, U.S. Department of Labor, 300 South Wacker Drive, Room 1201, Chicago, IL 60606; Illinois Department of Labor, or Illinois Industrial Commission, 160 La Salle Street, Chicago, IL 60601.

3. *Public participation.* Interested persons are hereby given until February 21, 1973, in which to submit to the Assistant Secretary written data, views, and arguments, concerning the plan. The submissions are to be addressed to the Director, Office of Federal and State Operations, Room 305, 400 First Street NW., Washington, DC 20210. The written comments will be available for public inspection and copying at the above address.

Any interested person(s) may request an informal hearing concerning the proposed plan, or any part thereof, whenever particularized written objections thereto are filed by February 21, 1973. If the Assistant Secretary finds that substantial objections are filed, he shall hold a formal or informal hearing on the subjects and issues involved.

The Assistant Secretary of Labor for Occupational Safety and Health shall thereafter consider all relevant comments and arguments presented and issue his decision as to approval or disapproval of the plan.

Signed at Washington, D.C., this 16th day of January 1973.

G. C. GUENTHER,
Assistant Secretary of Labor.

[FR Doc.73-1285 Filed 1-19-73;8:45 am]

MARYLAND DEVELOPMENT PLAN

State Occupational Safety and Health Standards and Their Enforcement; Notice of Submission of Plan and Availability for Public Comment

1. *Submission and description of plan.* Pursuant to section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) and § 1902.11 of Title 29, Code of Federal Regulations, notice is hereby given that an Occupational Safety and Health Plan for the State of Maryland has been submitted to the Assistant Secretary of Labor for Occupational Safety and Health. The Assistant Secretary has preliminarily reviewed the plan, and hereby gives notice that the question of approval of the plan is in issue before him.

The plan identifies the Division of Labor and Industry in the Department of Licensing and Regulation as the State agency designated by the Governor of the State to administer the plan throughout the State. It defines the covered occupational safety and health issues as defined by the Secretary of Labor in 29 CFR 1902.2(c)(1). It provides a description of personnel employed under a merit system; the coverage of employees of political subdivisions; and procedures for the prompt restraint or elimination of imminent danger situations.

The plan includes proposed draft legislation to be considered by the Maryland Legislature during its 1973 session. Under the legislation the Division of Labor and Industry will have full authority to enforce and administer laws respecting safety and health of employees in all workplaces of the State with the exception of employees of the United States, or where there is occupational safety and health protection of employees under the following Federal laws: the Atomic Energy Act of 1954, 42 U.S.C. 2021; the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 801; the Federal Metal and Nonmetallic Mine Safety Act, 30 U.S.C. 721; and the Longshoremen's and Harbor Workers' Compensation Act, 33 U.S.C. 901.

The legislation further proposes to bring the plan into conformity with the requirements of 29 CFR Part 1902 in areas such as procedures for variances and the protection of employees from hazards; and procedures for the development and promulgation of standards, including standards for protection of employees against new and unforeseen hazards.

The legislation is also intended to insure inspections in response to complaints; give employer and employee representatives an opportunity to accompany inspectors in order to aid inspections; notification of employees or their representatives when no compliance action is taken as a result of alleged violations, including informal review; notification of employees of their protections and obligations; protection of employees against discharge or discrimination in terms and conditions of employment; adequate safeguards to protect trade secrets; provision for prompt notice to employers and employees of alleged violations of standards and abatement requirements; a system of sanctions against employers for violations of standards; and employer right of review and employee participation in review proceedings.

Included in the plan is a statement of the Governor's support for the proposed legislation and a statement of legal opinion that it will meet the requirements of the Occupational Safety and Health Act of 1970, and is consistent with the constitution and laws of Maryland. The plan sets out goals and provides a timetable for bringing it into full conformity with Part 1902 including provision for developmental programs in agriculture and occupational health.

2. *Location of plan for inspection and copying.* A copy of the plan may be inspected and copied during normal business hours at the following locations: Office of Federal and State Operations, Occupational Safety and Health Administration, Room 305, Railway Labor Building, 400 First Street NW., Washington, DC 20210; Regional Administrator, Occupational Safety and Health Administration, Department of Labor, Suite 410, Penn Square Building, 1317 Filbert Street, Philadelphia, PA 19107; and the Office of the Commissioner, Division of Labor and Industry, 203 East Baltimore Street, Baltimore, MD 21202. Copies of the plan may be obtained at the expense of the person(s) requesting the copies.

3. *Public participation.* Interested persons are hereby given until February 21, 1973, in which to submit to the Assistant Secretary written data, views, and arguments, concerning the plan. The submissions are to be addressed to the Director, Office of Federal and State Operations, Occupational Safety and Health Administration, Railway Labor Building, Room 305, U.S. Department of Labor, Washington, D.C. 20210. The written comments will be available for public inspection and copying, at the expense of the person(s) requesting such copies, at the above address.

Any interested person(s) may request an informal hearing concerning the proposed plan, or any part thereof, whenever particularized written objections thereto are filed by February 21, 1973. If the Assistant Secretary finds that substantial objections are filed, he shall hold a formal or informal hearing on the subjects and issues involved.

The Assistant Secretary of Labor for Occupational Safety and Health shall thereafter consider all relevant comments and arguments presented and issue his decision as to approval or disapproval of the plan.

Signed at Washington, D.C., this 16th day of January 1973.

G. C. GUENTHER,
Assistant Secretary of Labor.

CALIFORNIA AIR QUALITY STANDARDS

Approval and Promulgation of Implementation Plans

V 38 - 14 JAN 22 73 XUM

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

CALIFORNIA AIR QUALITY STANDARDS

Approval and Promulgation of Implementation Plans

This notice of proposed rule making sets forth a transportation control plan for the Metropolitan Los Angeles Intrastate Air Quality Control Region (hereinafter, Los Angeles AQCR or South Coast Air Basin), as required by order of the U.S. District Court for the Central District of California, November 16, 1972. This proposal results from the failure of the State of California to submit an acceptable implementation plan for the attainment and maintenance of the National Primary Ambient Air Quality Standard for photochemical oxidants.

BACKGROUND

Under the Clean Air Act Amendments of 1970 (hereinafter referred to as the Act), enacted December 31, 1970 (Public Law No. 91-604, 42 U.S.C. 1857 et seq.), Congress required the States to prepare plans to implement the National Ambient Air Quality Standards promulgated on the basis of health and public welfare effects by EPA.

EPA promulgated the ambient standards on April 30, 1971. Pursuant to the statutory timetable, each State had 9 months in which to develop, adopt, and submit detailed plans for implementation of the ambient standards. The State plans submitted on January 31, 1972, were to contain emission limitations and such other measures as necessary to insure attainment and maintenance of the ambient standards, including transportation controls if necessary. (Clean Air Act, section 110(a)(2)(B).)

In most areas of the country the ambient standards could be met by the imposition of emission controls on stationary sources of pollution. EPA and the States had adequate knowledge of and experience with these types of controls. Their feasibility, effectiveness, and impact upon the sources as well as the community could be evaluated with reasonable accuracy. In other areas of the country, mobile sources were a predominant source of pollution, but the ambient standards would be met as a result of the decrease in pollution due to increasingly stringent Federal emission standards for new cars required by other sections of the Clean Air Act.

However, in certain areas the combination of controls on stationary sources and the Federal emission standards for new cars would not be sufficient. Therefore "transportation controls," i.e., measures which would reduce individual vehicle emissions and/or vehicle miles traveled, became necessary. Unlike the situation with respect to stationary sources, however, neither EPA nor the States had any real experience with these types of controls. The nature of the controls required, their effectiveness, their effect on air quality, and their social and economic impacts were essentially unknown. Accordingly, the Administrator determined that it was unreasonable to require that States include transportation controls in the plans submitted on January 31, 1972. He determined that States could instead submit a description of the transportation control measures which they were considering on that date. The submission of the actual transportation control strategies, when required, was deferred until February 15, 1973. It was anticipated that the additional year would give both EPA and the States more time to study this new problem, so that intelligent choices could be made by the States and so that EPA, in accordance with its responsibilities under the law, could make a meaningful review of the strategy selected by the State.

On May 31, 1972, in accordance with the Act, the Administrator disapproved California's plan for the Los Angeles AQCR (South Coast Air Basin) because the plan on its face did not provide for the achievement of the ambient standard for photochemical oxidants, 37 FR 10842, May 31, 1972 (40 CFR 52.238).

On September 6, 1972, in "City of Riverside, et. al. v. Ruckelshaus," Civil No. 72-2122-H, the city of Riverside, the city of San Bernardino, and various other organizations and individuals brought suit against EPA in the U.S. District Court for the Central District of California. The complaint stated that the Administrator had failed to promulgate transportation controls for the South Coast Air Basin although such controls were needed and the portions of California's plan which lacked such controls had been disapproved. Pursuant to that complaint, the U.S. District Court determined on November 16, 1972, that the Act did not permit the time for further study of the impact and effectiveness of transportation controls. Accordingly, the Court ordered the Administrator to "• • • prepare and publish in the FEDERAL REGISTER by no later than January 15, 1973, (proposed) regulations setting forth an implementation plan" for attainment of the primary ambient air quality standard for photochemical oxidants. This notice of proposed rule making is in compliance with the Court's order.

The Governor of California requested an extension to 1977 to meet the primary standard for photochemical oxidants. Therefore, this proposal is directed toward meeting that deadline.

It should be noted that the State of California is continuing to develop a transportation control strategy for the South Coast Basin. Since the State may proceed in accordance with the original schedule allowed by EPA, the State strategy is expected to be submitted to EPA in mid-February. It has been the Administrator's policy to be guided in his final promulgation by approvable segments of the State plan.

POLLUTION IN THE LOS ANGELES AQCR

The South Coast Air Basin covers a major portion of Southern California, encompassing all of Orange and Ventura Counties, the western portion of Riverside County, the southwest portion of San Bernardino County, the southern coastal portion of Santa Barbara County, and all but the extreme northeastern corner of Los Angeles County. (The air quality problems of the region are, in many ways, unique.) The region is geographically and meteorologically closed. The encircling mountains and frequent inversions hold in pollutants, and the Southern California climate provides ample sunshine to aid the formation of photochemical smog. The automobile is by fair the dominant mode of transportation. For example, in 1972 the South Coast Air Basin contained over 10 million persons and nearly 6 million motor vehicles.

This extremely high automobile population, combined with a low-density, sprawling pattern of development which distributes the population over the entire area of the basin, together make the application of transportation controls as well as the necessary alternatives, e.g., mass transit, extremely difficult in the Los Angeles region. Moreover, the area is still growing. The current rate of population growth is now a 1.7-percent increase per year. However, the automobile population grows more rapidly, at 3 percent to 4 percent per year, and gasoline consumption grows even more quickly, at 4.5 percent per year.

The Primary National Ambient Air Quality Standard for photochemical ovidents is 160μg/m3 0.08 parts per million (p.p.m.) average for a 1-hour period not to be exceeded more than once per year. The standard, promulgated on April 30, 1971 (36 FR 8186), is based on evidence of increased frequency of asthma attacks in some asthmatic subjects on days when estimated hourly average concentrations of photochemical oxidants reached 0.10 p.p.m. A level of 0.08 p.p.m. was therefore judged necessary by the Administrator to protect public health with an adequate margin of safety, as required by the Act.

In 1970, this standard was exceeded at some location in the Los Angeles AQCR on at least 250 days. The maximum 1-hour reading for oxidants in the region in 1970 was 0.62 p.p.m. in Riverside. This reading exceeded the national standard nearly eight-fold. The second highest reading was 0.58 p.p.m. During 1970 a full 10 percent of the oxidant readings taken in the basin were 0.40 p.p.m. (five times the national standard) or higher.

SUMMARY

Studies presently available to the Administrator indicate that a reduction of approximately 87 percent in projected emissions of reactive hydrocarbons is necessary to achieve the National Primary Ambient Air Quality Standard for photochemical oxidant by 1977 in the Los Angeles AQCR.

As most of the reactive hydrocarbon emissions in the South Coast Basin are attributable to motor vehicle emissions, the analysis available to EPA indicates that in addition to stringent controls for stationary sources and requirements for limiting emission of individual motor vehicles a reduction in vehicle miles traveled (VMT) by gasoline-powered motor vehicles of over 80 percent will have to be effected to achieve the ambient air quality standard for photochemical oxidants in 1977 as required by law. The proposed regulatory mechanism to accomplish the reduction in vehicle miles traveled (VMT) is gasoline rationing.

Based on the extent of analysis which it has been possible to complete so far, the Administrator has concluded that the approach proposed today, including the VMT reduction, is the only one which could be proposed at this time with any confidence that it can achieve the ambient air quality standards. Other approaches, some of which may be less extreme, appear to present problems regarding feasibility and effectiveness. The Administrator emphasizes that further analysis may demonstrate that other options are available.

Although the Environmental Protection Agency (EPA) has serious reservations as to the feasibility and desirability of the course of action proposed here, legal requirements placed on the Agency by the Act leave the Administrator with no presently available legal alternative but to propose this plan. It is clear that extreme measures will be necessary to comply with statutory requirements. Indeed, it appears that any plan that will attain the primary standard by 1977, whether it includes gasoline rationing or some other strategy to reduce VMT, will lead to significant economic disruptions and will certainly result in a major transformation in the life style of residents of the South Coast Air Basin.

No air pollution control plan for the South Coast Air Basin will be promulgated in final form until full public participation and debate, including public hearings, has taken place. The participation of State and local officials in both the development and the implementation of the plan is also of vital importance. Extensive public hearings will be held upon this and alternative proposals no sooner than 30 days from the date of this notice of proposed rule making. Dates, times, and places, will be announced in a forthcoming issue of the FEDERAL REGISTER.

It is hoped that the public debate will focus on the proposed plan, on possible alternative control plans and also on measures (such as the development of a mass transit system) which could reduce the adverse consequences of any plan. The Administrator is concerned that all positive and adverse aspects of the issue be publicly aired and weighed so that resultant decisions will be in the total public interest.

CURRENT STUDIES

The Environmental Protection Agency has published the results of an investigation of certain transportation control measures in "Prediction of the Effects of Transportation Controls on Air Quality in Major Metropolitan Areas," (The Six Cities Study), November 1972. Additional information is contained in "Evaluating Controls to Reduce Motor Vehicle Emissions in Major Metropolitan Areas, Final Report," November 1972. Both reports are available from EPA, Office of Technical Information and Publications, Research Triangle Park, N.C. 27711. Additional information is contained in the EPA document, "Control Strategies for In-use Vehicles," November 1972. This report is available from EPA, Mobile Source Pollution Control Program, 401 M Street SW., Washington, DC 20460. Specific studies to limit automobile emissions and usage in the Metropolitan Los Angeles Intrastate Air Quality Control Region are currently being done under EPA contract. The results of these studies will be available in February 1973, and preliminary results were used in the development of the proposed regulations.

TRANSPORTATION CONTROL ALTERNATIVES

The Administrator's analysis of the air quality problems of the South Coast Air Basin indicates that if all available measures are taken to reduce reactive hydrocarbon emissions from individual motor vehicles and stationary sources, the ambient air quality standard for photochemical oxidants will still be exceeded in the basin approximately 90 days per year in 1977. These 90 days will occur between the months of May and October. The analysis further indicates that motor vehicles, notably automobiles, will be the predominant source of reactive hydrocarbons after all available measures to reduce the emissions of individual vehicles and stationary sources have been taken. Further control measures to meet the ambient air quality standards must therefore consist of reductions in motor vehicle use, or vehicle miles traveled (VMT). A VMT reduction of over 80 percent is required to achieve compliance with the ambient air quality standards in 1977. Lesser reductions are needed in subsequent years as a result of the Federal motor vehicle emissions control program. However, the analysis indicated that VMT reductions of up to 50 percent may be needed as late as 1935.

The required VMT reductions can be obtained by several alternative means:

(1) Reduce VMT by the required amount during the entire period, May to October, through increased use of mass transit, increased car pooling, vehicle free zones, gasoline rationing, increasing the cost of motor vehicle use, limiting the number of automobiles and motorcycles registered, land use controls, or a combination of these.

(2) Forecast up to 24 hours in advance the days on which the ambient air quality standard for oxidants will be exceeded, and use emergency regulatory means to prohibit the use of motor vehicles (or all but certain classes of motor vehicles) on those days. (Intermittent control)

(3) Through application of one or more of the measures listed in (1), reduce VMT enough (perhaps 40 percent) to bring the number of days the ambient air quality standard is violated to a level substantially below 90 days (perhaps to 20 to 25 days). Apply the emergency measures described in (2) on those days for which the air quality standard is forecast to be violated (partial intermittent control). (The number of days per year on which these emergency measures must be taken can be expected to decline as the prevalence in the vehicle population of vehicles with 1975 Federal emission controls increases.)

While intermittent or partial intermittent controls may provide potentially attractive alternatives, the effectiveness of such controls, including the technical feasibility of adequately forecasting the need for emergency measures, is uncertain at this time. Various measures to reduce VMT on a continuing basis may be available but present substantial questions as to effectiveness and feasibility. Only gasoline rationing is presently considered to be demonstrably effective to achieve compliance with the ambient air quality standards by 1977. It is expected that the magnitude of needed VMT reductions will decrease beyond 1977 as the prevalence in vehicle population of automobiles with Federal 1975 emissions controls increases, but it does not appear that at any time would Federal 1975 emissions controls alone result in achievement of the ambient standards.

PROPOSED CONTROL STRATEGY

The Administrator proposes to require controls on stationary sources and retrofit devices and inspections on automobiles as described below, and to reduce VMT by a system of gasoline rationing, the system to be effective during the smog season, May through October. The amount of rationing may be different for different months, up to an expected maximum of 82 percent. The rationing system may be enforced at the individual vehicle operator's level, with gas coupons required to purchase gasoline. Or it may be enforced at the manufacturer's level only, with price controls at the retail level (to prevent windfall profits) and all gasoline sold on the basis of first-come-first-served. Public comment is invited on these options, and on questions of implementation, including eligibility for coupons, and transferability of coupons. Comment is is also invited on the possibility of rationing gaseous fuels

PROPOSED CONTROLS ON STATIONARY SOURCES

Controls to prevent hydrocarbon emissions will be imposed on a variety of sta-

V 38 - 14 JAN 22 73 XUM

tionary sources. The Los Angeles County Air Pollution Control District (APCD) has made changes in its restrictions (Rule 66) on solvent use. We propose that the controls in the amended regulation apply to the entire South Coast Basin. Vapor recovery systems that prevent evaporation of gasoline into the air will be required for service stations. In addition, a change in the substance used in industrial "degreasing" operations will be required. Finally, a vapor recovery system that prevents evaporation of solvents into the air will be required of dry cleaners. Should additional stationary source controls prove feasible and desirable, they may be proposed at a later date.

The EPA is currently carrying on an investigation of the the adequacy of the local air pollution control district regulations exempting certain organic compounds from control. It is anticipated that these regulations (such as Rule 66, Los Angeles County) will be reevaluated prior to 1975 after extensive additional experimental studies.

PROPOSED CONTROLS ON MOBILE SOURCES

Due to their substantial contribution to hydrocarbon emissions in the South Coast Basin (1,056 tons/day in 1970 vs. 195 tons/day from stationary sources), transportation sources, principally automobiles, also must be controlled. Calculations by EPA indicate that the 1970 mobile emissions are significantly different from those contained in the Implemetation Plan submitted by California in February 1972. The difference is attributable to more accurate emission factors that have recently become available (see "An Interim Report on Motor Vehicle Emission Estimation," Kircher and Armstrong, EPA, October 1972, and available from the Office of Land Use Planning, EPA, Research Triangle Park, N.C. 27711). As a result of these calculations, the hydrocarbon emissions from all sources in 1970 are significantly less than in the plan (1,250 tons/day vs. 1,590 tons/day reactive HC). The revised emissions values are being incorporated by the State into its present calculations.

Although the Federal emission standards for new cars will impose very stringent emission limitations on new autos beginning in 1975 and 1976, the limitations will not be adequate to meet the national ambient standard in the South Coast Air Basin by the deadline of July 1977, since by that time on more than 20 to 30 percent of the vehicle population will be 1975 or later cars.

Additional controls will include retrofit devices, installed on pre-1975 automobiles, inspection programs, and gaseous fuel conversion of fleet vehicles. The State of California will require vacuum spark advance disconnection (VSAD) on most 1955 to 1970 cars, and positive crankcase ventilation (PCV) on most 1955 to 1970 cars.

The following controls are proposed by EPA. All light- and heavy-duty gasoline-powered vehicles will be required to be inspected annually using a loaded emissions test (i.e., dynamometer loading test), a test that simulates actual driving conditions. Vehicle owners will be required to have any maintenance performed which is needed to insure that all pollution control devices on the vehicle work properly and the vehicle operates at low pollution levels.

Evaporative controls to prevent evaporation of gasoline from the gas tank and carburetor will be required as retrofit on all 1966 to 1969 model year light-duty gasoline-powered vehicles and on 1966 to 1972 model year heavy-duty gasoline-powered vehicles. A further requirement will be the installation of an oxidizing catalyst on all 1966 to 1974 model year light- and heavy-duty gasoline vehicles.

Finally, all 1971 to 1974 model year light and heavy duty vehicles in all fleets of over 10 vehicles will be required to convert to run on gaseous fuels.

PROPOSED REDUCTION IN VMT

Reducing the emissions of each car is not enough to meet and maintain the national standards. The vast number of cars in the basin offsets much of the emissions reductions gained by control devices on individual cars. The combined effect of all the controls to be placed on stationary sources and automobiles mentioned above will reduce the number of days on which the oxidant standard is exceeded to about 90 days per year. In order to meet the more stringent requirement of the law, limitations must be placed upon the amount of driving done in the South Coast Basin.

The highest oxidant reading in 1970 in the South Coast Basin was 0.62 p.p.m., at Riverside, and the plan proposed by the Administrator must be capable of reducing hydrocarbon emissions sufficiently that the reading would not exceed 0.08 p.p.m. To do this, in addition to imposing the controls over stationary and automotive sources described above, VMT must be reduced by approximately 82 percent for the peak period. Reductions will be effected by a system of gasoline rationing effective during the months of May through October. (Public comment is invited on the possibility of also rationing gaseous fuels.)

The following table is a summary of the effect of each element of the proposed strategy on the overall reduction necessary. The uncontrolled emissions in 1977 are projected to be 691 tons per day of reactive hydrocarbons. The total allowable emissions to meet the 0.08 National Standard are 161 tons per day. All calculations are based on 1970 air quality data as 1970 is the year for which the emissions inventory is available. There is no reason to believe that 1970 was a year of unusually high oxidant concentrations. The 0.62 p.p.m. maximum oxidant value used here is the same as that used by the State to evaluate emission reductions measures after excluding a higher reading whose validity was challenged.

COMPILATION OF CONTROL STRATEGY EFFECTS ON JUNE 30, 1977

	Tons per day	Percent of total reduction due to each control
Stationary source emissions without control strategy	140	
Expected reductions:		
a. Dry cleaning vapor recovery	−6	1
b. Degreaser substitute	−25	5
c. Other stationary rule strengthening	−45	9
Stationary emissions remaining	64	
Motorcycle emissions without control strategy	30	
Expected reductions	0	
Motorcycle emissions remaining	30	
Aircraft emissions without control strategy	35	
Expected reductions	−11	2
Aircraft emissions remaining	24	
Mobile emissions from on-highway light and heavy duty vehicles and from gasoline marketing operations without control strategy	488	
Expected reduction:		
a. Gasoline marketing vapor control	−37	7
b. VSAD and PCV retrofit	−13	2
c. Inspection and maintenance	−28	5
d. Vehicle evaporative control retrofit	−19	4
e. Gaseous fuel conversion	−8	2
f. Oxidizing catalyst retrofit	−70	13
g. Gas rationing	−269	51
Mobile emissions remaining	42	
Total emissions without control strategy	691	
Total reductions	−531	100
Total emissions remaining	160	

The regulations proposed herein implement the basic control strategy. Supplemental regulations will be proposed at a later time.

Additional technical information is contained in: Technical Support Document for the Proposed Transportation Control Strategy for the Metropolitan Los Angeles Intrastate Air Quality Control Region, available from the Region IX Office, Environmental Protection Agency, 100 California Street, San Francisco, CA 94111.

ECONOMIC AND SOCIAL IMPACT OF THE LOS ANGELES TRANSPORTATION CONTROL PLAN

Congress recognized that achievement of the goals of the Clean Air Act would have a significant impact on many urban areas. A quantitative assessment of the impact of the plan on the economic and social fabric of the community has not been possible due to the lack of time and the innate complexity of the issue. However, we have tried to describe the type of impacts which would occur. First, vehicle owners may have to assume the direct costs of emission abatement equipment to bring their vehicles into compliance. Second, reduction in the mobility of workers and consumers could have a major impact on the economic fabric of the community. Third, interference with the ability of citizens to move as freely will alter the lifestyle of the region. Obviously, the severity of the impact depends on the degree of vehicle usage restrictions, on the manner that direct costs of abatement equipment are financed, and the degree to which the effects can be ameliorated, particularly through the development of a mass transit system.

DIRECT COSTS TO AUTOMOBILE OWNERS

Elements common to all of the transportation control strategies considered are retrofitting of light-duty vehicles, an inspection and maintenance program to insure proper functioning of abatement equipment and emission control devices on gasoline marketing equipment. The cost of control devices could range from $200 to $400. The annual cost of inspection/maintenance and the increased cost of gasoline caused by marketing controls is estimated to be $5 to $15.

If a sizable share of these costs falls on individual automobile drivers, the burden will weigh more heavily on low-income families. This effect is exacerbated by the fact that older cars, subject to higher abatement equipment costs, tend to be owned by low-income families.

EFFECT ON THE ECONOMIC FABRIC OF THE COMMUNITY

The direct and indirect effects of the plan on the economy of the basin are obviously dependent on the extent of the reduction in VMT.

Wage and salary earners. If VMT reductions resulted in workers missing work, loss of income could result. Such a loss of income would have a corresponding impact on purchasing power affecting business sales. If a mass transit system could be developed to replace the use of autos in work-related trips (⅓ of VMT), then the income loss could be minimized.

The monetary cost to the worker of shifting from the auto to mass transit would depend on the degree of transit fare subsidization.

Service and retail industry. The impact on service and retail establishments will depend on the ability of a mass transit system to service nonwork trips. Further study is clearly needed to assess how well and at what cost a transit system could fulfill this task. We would expect, however, that it is easier to design a transit system to carry work-related trips.

The use of autos for nonwork-related trips depends on the control strategy. Gas rationing places a limit on the number of miles traveled. Intermittent controls limit travel during crisis periods but allow travel at other times. Intermittent controls would have less of an impact on buying activities by consumers if people can tailor their nonwork trips to correspond with noncrisis periods. People may be able to delay shopping and recreation trips for days, thus alleviating the impact of decreased mobility on sales. Alternatively, service and retail establishments may be able to tailor sales hours to nonpeak, noncrisis periods.

The adverse effect on service and retail sales also depends critically on the ability of individuals to economize on nonwork trips and still shop and engage in recreation activities. We simply do not know the extent to which nonwork trips can be combined or eliminated resulting in a significant decrease in the number of miles traveled without a deterioration in the standard of living.

Manufacturing, wholesale trade and the distribution system. Maintenance of the system to distribute goods is critical to the viability of the economy, especially for life-sustaining necessities.

Large trucks are already largely diesel powered and would be allowed to operate under the proposed plan. Fleet vehicles could convert to gaseous fuel at a cost of $500 to $800 per vehicle. Smaller gasoline powered trucks and vehicles would have to be retrofitted with control devices. Their operation would, however, be restricted under gas rationing or under intermittent controls during crisis periods.

Cost of doing business may rise to an unknown extent. Business may also be faced with increased pressure for higher wages and salaries as workers try to offset increased costs to the individual resulting from the transportation control plan. It is not known whether such cost increases will be significant enough to affect the competitive position of firms in the South Coast Air Basin, causing them to lose sales both within the South Coast Air Basin and on goods now produced within the basin and sold to other markets.

Time limitations have made it impossible to investigate effects on specific industries. Some industries will be adversely affected while other will experience an increase in sales. For instance, the burden would fall very hard on service stations and automotive supply outlets. On the other hand, the demand for mass transit and communication facilities will increase. Even with more time, it is not clear that a reasonable estimate of the impact on specific industries could be made.

TAX REVENUE IMPLICATIONS

The transportation control plan will have direct and indirect effects on local, State, and Federal tax revenues. Some illustrative impacts are cited below.

It is not clear whether property taxes collected in the South Coast Air Basin will rise or fall. It seems certain that property values will change depending on location. For example, property near shipping and work zones will increase in value while that in suburban vicinities will decrease.

Excise, sales, profit, and income taxes would probably decline if purchasing power in the South Coast Air Basin diminishes. Excise taxes from gasoline would certainly fall. However, declines in revenues related to some forms of spending (gasoline) will be offset to some degree by increased expenditures for other goods.

The effect on State and local budgets will also depend on whether subsidies and/or new taxes (parking, gasoline) related to the transportation control plan will be instituted.

SUMMARY OF IMPACTS

Maintenance of the economic fabric of the South Coast Air Basin requires:

(1) Workers being able to get to and from their jobs so that production and labor income can be maintained.

(2) Sufficient commercial vehicular mobility to allow the distribution system to function effectively.

(3) Sufficient mobility to roughly maintain the present pattern and level of spending (shopping, recreation, etc.).

The inability to perform any of these basic economic functions would cause serious dislocations to the South Coast Air Basin economy leading to the loss of jobs, which in turn leads to lower purchasing power, and drops in sales.

The viability of the economy may be adversely affected under any significant reduction of VMT. The monetary cost of improved air quality will be significant, although how seriously this might affect industry is undetermined. How serious the impact will be depends critically on supplementary policy actions designed to maintain the standard of living especially:

(1) The development of a mass transit system to substitute for automobiles.

(2) The extent of subsidization of abatement equipment and a mass transit system.

(3) The degree to which people are able to economize on their use of the automobile and still perform the functions which support their standard of living.

EPA EFFORTS TO MITIGATE THE EFFECTS OF PROPOSED REGULATIONS

The combined effect of these proposed regulations, together with the California Implementation Plan, will eliminate the danger to human health and welfare that exists in the South Coast Air Basin from air pollution. They will, however, have a great economic and social impact. The Administrator will make every effort possible to mitigate the effects of his final promulgation. He will be in contact with the Department of Transportation and other departments as necessary. The Administrator of EPA will request that the departments and agencies give special attention to the needs of the South Coast Air Basin for stategies to reduce VMT and for mass transit to replace the automobile travel eliminated by the proposed controls, aid to those whose businesses are damaged by restricted automobile travel, and aid to those whose jobs are affected by the proposals (particularly those in the automobile service industries, such as service stations and mechanics).

THE NEED FOR MASS TRANSIT

The development of large-scale mass transit facilities in the Los Angeles area is essential to any effort to mitigate the disruptions that can be caused by significant reductions in automobile use. A

V38-14 JAN 22 73 XUM

public mass transportation system that can absorb the travelers displaced by sizable reductions in gasoline consumption or vehicle miles traveled will have to be considerably more extensive than the system now existing in Los Angeles. The existing Los Angeles Rapid Transit District system consists of about 1,500 buses. The maintenance of reasonable mobility of the commuter will require many times this number of buses together with many service improvements to provide viable alternative transportation modes. Although the Administrator may not have authority to direct Los Angeles to provide expanded mass transit facilities, he is firmly of the belief that such expanded facilities are essential to the success of any air pollution control strategy for the South Coast Air Basin. The Administrator therefore is conducting an investigation of the needs and possibilities for transit expansion in the basin and he encourages and will provide all possible support to efforts by Federal, State, local governmental, and private groups to expand the mass transit facilities in the basin.

The Administrator recognizes that the present low density, sprawling land use pattern in the Los Angeles area is not conducive to the efficient use of mass transit. The long-term problems of attaining and maintaining high levels of transit service and usage would be considerably eased through the application of public policy measures to promote the centralization and corridorization of activities that generate large demands for transportation. The time period required for such policy measures to take effect prohibits their use by the Administrator to achieve the ambient air quality standards by 1977. In addition, such measures would not eliminate the need for many of the emissions control measures proposed here. However, proper land use policies would greatly assist the long-term implementation of such emissions control measures as VMT reductions.

PUBLIC COMMENTS SOLICITED

Although the Administrator has concluded that the proposed plan is the only approach available to him at the present time that is demonstrably capable of achieving compliance with the requirements of the Act, further analysis may demonstrate that more appropriate options are available. He therefore desires to obtain the comments and suggestions of the public on the problems of achieving the ambient air quality standards in the South Coast Air Basin. Comments are particularly invited pertaining to measures that may be taken by Federal, State, or local authorities to support or supplement the proposed air pollution control strategy for the basis (e.g., expanded mass transit), means of implementing these measures, and the comparative social and economic effects of alternative pollution control measures.

Questions also exist as the EPA's authority and capability for actual implementation of this proposal and of alternatives. These questions include the extent to which State or local governments should be required to perform functions contemplated by the proposal and the difficulties involved in Federal or State enforcement of the plan.

Extensive public hearings will be held on this and alternative proposals no sooner than 30 days from the date of this notice of proposed rule making. Dates, times, and places will be announced in a forthcoming issue of the FEDERAL REGISTER.

The Administrator's final promulgation of transportation controls for the South Coast Basin will be profoundly influenced by the comments and testimony he receives, as well as by the approvable strategies submitted by the State in mid-February as part of the State plan. These influences, and the additional analysis of alternative strategies that can be made in the time between this proposal and final promulgation, may lead the Administrator to adopt final regulations that differ in important ways from this proposal.

SUBMITTAL OF WRITTEN COMMENTS

Interested persons may participate in this rule making by submitting written comments, preferably in triplicate, to the Regional Administrator, EPA, Region IX, 100 California Street, San Francisco, CA 94111. All relevant comments received not later than March 23, 1973, will be considered. Receipt of comments will be acknowledged, but substantive responses to individual comments will not be provided. Comments received will be available for public inspection during normal business hours at the EPA Region IX Office, and at locations to be announced in the Los Angeles area. The changes proposed by this notice with appropriate modification will be effective on January 22, 1973. This notice of proposed rule making is issued under the authority of section 110(c) and 301(a) of the Clean Air Act (42 U.S.C. 1857 et seq.).

Dated: January 15, 1973.

WILLIAM D. RUCKELSHAUS,
Administrator,
Environmental Protection Agency.

It is proposed to amend Part 52 of Chapter I, Title 40, of the Code of Federal Regulations as follows:

Subpart F—California

1. Section 52.229 is amended by adding paragraphs (b) through (j), as follows:

§ 52.229 Control strategy and regulations: Photochemical oxidants (hydrocarbons), Metropolitan Los Angeles Intrastate Region.

* * * * *

(b) *Regulation for control of evaporative emissions.* (1) For purposes of this paragraph:

(i) "Evaporative control device" means a device installed on a motor vehicle to prevent the escape of gasoline vapor from the gasoline tank and carburetor.

(ii) "Registered" as applied to a motor vehicle, means that such motor vehicle is duly licensed for general operation on public roads or highways by the appropriate agency of the Federal Government or by the State.

(2) This regulation is applicable in those portions of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Santa Barbara Counties contained within the Metropolitan Los Angeles Intrastate Air Quality Control Region (AQCR) in the State of California. The requirements of this regulation shall be effective commencing on January 1, 1976.

(3) Prior to January 1, 1976, an evaporative control device of at least 85 percent efficiency which is approved by the Administrator shall be properly installed, in good working order, and in operation on all registered light-duty gasoline-powered vehicles of model years 1966 through 1969 and all registered heavy-duty gasoline vehicles of model years 1966 through 1972. Approved evaporative control devices shall be installed on a schedule determined by the Administrator.

(4) After January 1, 1976, the following shall apply in the areas specified in paragraph (b)(2), of this section:

(i) The State of California shall not register light-duty vehicles which do not comply with the provisions of paragraph (b)(3) of this section.

(ii) No owner of light-duty vehicles shall operate or allow the operation of such vehicles which do not comply with the provisions of paragraph (b)(3) of this section.

(c) *Regulation for gaseous fuel conversion.* (1) For purposes of this paragraph:

(i) "Fleet vehicle" means any one of ten (10) or more light- and heavy-duty vehicles operated by the same person(s) or business and used principally in connection with the same occupation or related occupations.

(ii) "Gaseous fuel" means liquified or pressurized petroleum or natural gases which are used as fuel for light-duty vehicles.

(2) This regulation is applicable in those portions of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Santa Barbara Counties contained within the Metropolitan Los Angeles Intrastate Air Quality Control Region (AQCR) in the State of California. The requirements of this regulation shall be effective commencing on January 1, 1975.

(3) All registered gasoline-powered fleet vehicles of model years prior to 1975 shall be equipped for and operated on gaseous fuel by the effective date of this regulation. Conversion of such fleet vehicles for use of gaseous fuel shall be on a schedule determined by the Administrator.

(4) After January 1, 1975, the following shall apply in the areas specified in paragraph (c)(2) of this section:

(i) The State of California shall not register vehicles which do not comply with the provisions of paragraph (b)(3) of this section.

(ii) No owner of fleet vehicles shall operate or allow the operation of such vehicles which do not comply with the provisions of paragraph (c)(3) of this section.

(d) *Regulation for yearly inspection and maintenance.* (1) For purposes of this paragraph: "Inspection and maintenance" means a program to reduce emissions from in-use vehicles through identifying vehicles that need emissions control related maintenance and requiring that maintenance be performed.

(2) This regulation is applicable in those sections of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Santa Barbara Counties contained within the Metropolitan Los Angeles Intrastate Air Quality Control Region (AQCR) in the State of California. The requirements of this regulation shall be effective commencing on January 1, 1975.

(3) All registered gasoline-powered light- and heavy-duty motor vehicles shall be inspected annually for emissions and, as necessary, maintained by the owner in order to pass the inspection. This shall be done by personnel, facilities and procedures which shall be proposed and promulgated by the Administrator.

(4) After January 1, 1975, the following shall apply in the areas specified in paragraph (d)(2) of this section:

(i) The State of California shall not register light-duty vehicles which do not comply with the provisions of paragraph (d)(3) of this section and procedures promulgated pursuant thereto.

(ii) No owner of light-duty vehicles shall operate or allow the operation of such vehicles which do not comply with the provisions of paragraph (d)(3) of this section.

(e) *Regulation for oxidizing catalyst.* (1) For the purposes of this paragraph: "Oxidizing catalyst" means a device installed in the exhaust system of the vehicle that utilizes a catalyst and, if necessary, an air pump to reduce emissions of hydrocarbons and carbon monoxide from that vehicle.

(2) This regulation is applicable in those sections of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Santa Barbara Counties contained within the Mertopolitan Los Angeles Intrastate Air Quality Control Region (AQCR) in the State of California. The requirements of this regulation shall be effective commencing on January 1, 1975.

(3) All registered gasoline-powered light- and heavy-duty motor vehicles of model years 1966 through 1974, shall be equipped with an appropriate oxidizing catalyst exhaust retrofit in accordance with paragraph (e)(2) of this section, approved by the Administrator.

(4) After January 1, 1975, the following shall apply in the areas specified in paragraph (e)(2) of this section:

(i) The State of California shall not register light-duty vehicles which do not comply with the provisions of paragraph (e)(3) of this section.

(ii) No owner of light-duty vehicles shall operate or allow the operation of such vehicles which do not comply with the provisions of paragraph (e)(3) of this section.

(f) *Regulation for purchase of gasoline.* (1) For purposes of this paragraph:

(i) "Control period" means a portion of a calendar year in which gasoline sales are regulated.

(ii) "Retail outlet" means any service station, filling station, garage, store or other place of business at which gasoline is transferred directly to consumers in the regular course of business.

(2) This regulation is applicable in those portions of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Santa Barbara Counties contained within the Metropolitan Los Angeles Intrastate Air Quality Control Region (AQCR) in the State of California. The requirements of this regulation shall be in effect commencing May 1, 1975, and shall remain in effect through October 31, 1975. The regulation shall be effective in the same control periods during each calendar year thereafter, until such time as the Administrator determines the regulation to be no longer necessary for the attainment and maintenance of the national standard for photochemical oxidants (hydrocarbons).

(3) During the control periods, as specified in paragraph (f)(2) of this section, the sale of gasoline to retail outlets and to the owners and operators of motor vehicles shall be controlled by directions of the Administrator, EPA.

(4) The amount of gasoline to be controlled shall be determined by the Administrator no later than 30 days prior to the effective date of a control period. This determination shall be based on the hydrocarbon emission reduction required for the attainment and maintenance of the national standard for photochemical oxidants in Metropolitan Los Angeles Intrastate AQCR.

(g) *Volatile organic compound loading facilities.* (1) This regulation is applicable in those portions of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Santa Barbara Counties contained within the Metropolitan Los Angeles Intrastate Air Quality Control Region (AQCR) in the State of California. The requirement of paragraph (g)(2) of this section shall be effective commencing July 1, 1973.

(2) No person shall load or allow the loading of volatile organic compounds having a vapor pressure of 1.5 pounds per square inch absolute or greater, under actual storage conditions, into any tank truck or trailer, railroad tank car, locomotive, aircraft, stationary storage tank with a capacity greater than 5 gallons from any loading facility unless such tank or loading facility is equipped with a vapor collection and disposal system, or its equivalent, properly installed, in good working order, and in operation. Loading shall be accomplished in such a manner that all displaced vapor and air will be vented only to the vapor disposal system. A means shall be provided to prevent liquid organic compound drainage from the loading device when it is removed from the hatch, or to accomplish complete drainage before such removal. The vapor disposal portion of the system shall consist of one of the following:

(i) An absorber system or condensation system with a minimum recovery efficiency of 90 percent by weight of all the volatile organic compound vapors and gases entering such disposal system.

(ii) A vapor handling system which directs all vapors to a fuel gas system.

(iii) Other equipment of at least 90 percent efficiency, provided plans for such equipment are submitted to and approved by the Air Pollution Control Officer.

Intermediate storage vessels may be used prior to disposal of vapors under paragraph (g)(2)(i), (ii), or (iii), provided they are so designed as to prevent release of vapors at any time during use.

(3) Notwithstanding paragraph (g)(2) of this section, no person loading or allowing the loading of the above specified compounds in the above specified storage vessels from the above specified loading facilities, any of which were in existence on the effective date of this regulation, or in the process of being installed for use on said effective date, shall be subject to the provisions of paragraph (g)(2) of this section until January 1, 1974: *Provided, however,* That such person is hereby required to file on or before July 1, 1973, a compliance schedule with the Administrator showing how the person will bring his operation into compliance with paragraph (g)(2) of this section on or before January 1, 1974. Failure to file such compliance schedule or abide by its terms shall render the prohibition contained in paragraph (g)(2) of this section immediately applicable to such person on July 1, 1973, or on the date of said person's failure to abide by said compliance schedule, whichever is later.

(h) *Control of drycleaning solvent evaporation.* (1) For the purposes of this paragraph: "Drycleaning operation" means that process by which an organic solvent is used in the commercial cleaning of garments and other fabric materials.

(2) This regulation is applicable in those portions of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Santa Barbara Counties contained within the Metropolitan Los Angeles Intrastate Air Quality Control Region (AQCR) in the State of California. The requirements of this regulation shall be effective commencing on January 1, 1974.

(3) No person shall operate a drycleaning operation unless the uncontrolled organic emissions from such operation have been reduced at least 85 percent.

(4) Drycleaning operations emitting less than three (3) pounds per hour and less than 15 pounds per day are exempt from this regulation.

(5) If incineration is used as a control technique, 90 percent or more of the carbon in the organic compounds being incinerated must be oxidized to carbon dioxide.

V38-14 JAN 22 73 XUM

(6) Drycleaning operations using solvents considered nonreactive by Rule 66 part (k) of the Los Angeles APCD current regulations are exempt from this regulation.

(i) *Degreasing operations.* (1) For the purposes of this paragraph: "Degreasing" means the operation of using an organic solvent as a surface cleaning agent prior to fabricating, surface coating, electroplating or any other process.

(2) This regulation is applicable in those portions of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Santa Barbara Counties contained within the Metropolitan Los Angeles Intrastate Air Quality Control Region (AQCR) in the State of California. The requirements of this regulation shall be effective commencing on January 1, 1974.

(3) No person shall use trichloroethylene (TCE) degreaser as a degreasing solvent.

(j) *Organic solvent usage: Federal regulation replacing parts of Rule 66 of Los Angeles, Orange, and San Bernardino Counties, Rule 36 of Santa Barbara County, Rule 69 of Riverside County, and Rule 66 of Ventura County.* (1) This regulation is applicable in those portions of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Santa Barbara Counties contained within the Metropolitan Los Angeles Intrastate Air Quality Control Region (AQCR) in the State of California. This regulation is effective immediately upon promulgation.

(2) Subparagraph 1 of Rule 66 of Los Angeles, Orange, and San Bernardino Counties, Rule 36 of Santa Barbara County, and Rule 69 of Riverside County, and subparagraph 8 of Rule 66 of Ventura County as contained in the Local Air Pollution Control District Regulations for the South Coast Air Basin, Implementation Plan for the State of California, is amended by replacing subsubparagraph 5 (subsubparagraph e in the case of Ventura County), and adding in place thereof the following subsubparagraphs 5, 6, and 7 (e, f, and g in the case of Ventura County): [i The provisions of this rule shall not apply to:]

* * * * *

5. The use of any material, in any article, machine, equipment or other contrivance described in sections (a), (b), (c) or (d), if:

(i) The volatile content of such material consists only of water and organic solvents, and

(ii) The organic solvents comprise not more than 20 percent by volume of said volatile content, and

(iii) The volatile content is not photochemically reactive as defined in section (k), and

(iv) The organic solvent or any material containing organic solvent does not come into contact with flame.

6. The use of any material, in any article, machine, equipment or other contrivance described in sections (a), (b), (c), or (d), if:

(i) The organic solvent content of such material does not exceed 20 percent by volume of said material, and

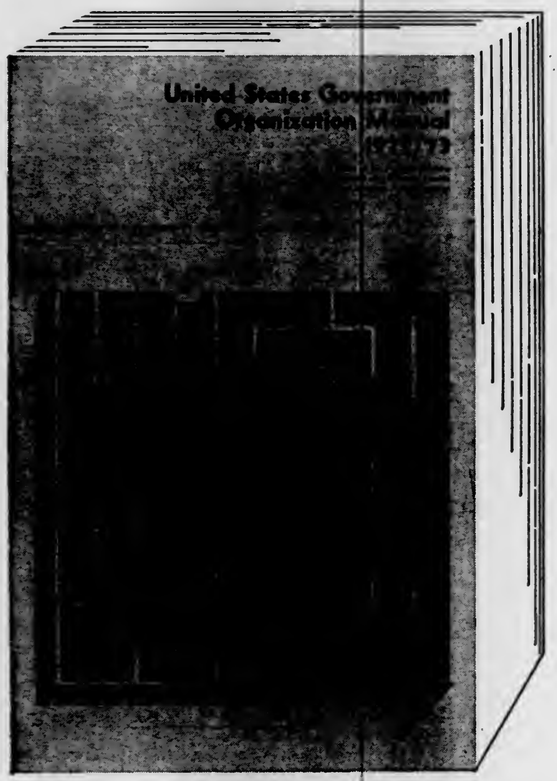
(ii) The volatile content is not photochemically reactive as defined in section (k), and

(iii) More than 50 percent by volume of such volatile material is evaporated before entering a chamber heated above ambient application temperature, and

(iv) The organic solvent or any material containing organic solvent does not come into contact with flame.

7. The use of any material, in any article, machine, equipment or other contrivance described in sections (a), (b), (c), or (d), if:

(i) The organic solvent content of such material does not exceed 5 percent by volume of said material, and



(ii) The volatile content is not photochemically reactive as defined in section (k), and

(iii) The organic solvent or any material containing organic solvent does not come into contact with flame.

An Invaluable Reference Tool

1972/73 Edition

This guidebook provides information about significant programs and functions of the U.S. Government agencies, and identifies key officials in each agency.

Included with most agency statements are "Sources of Information" sections which give helpful information on:

- Employment
- Contracting with the Federal Government
- Environmental programs
- Small business opportunities
- Federal publications
- Speakers and films available to civic and educational groups

This handbook is a "must" for teachers, students, librarians, researchers, businessmen, and lawyers who need current official information about the U.S. Government.

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1973, and specifies how they are affected.

Title 3—The President

EXECUTIVE ORDER 11698

Relating to the Implementation of the Convention on the Taking of Evidence Abroad in Civil or Commercial Matters

The Convention on the Taking of Evidence Abroad in Civil or Commercial Matters was ratified by the United States of America and was proclaimed by the President on September 15, 1972. It came into force on October 7, 1972. By Article 2 of the Convention each of the Contracting States undertakes to designate a Central Authority to implement the Convention.

NOW, THEREFORE, by virtue of the authority vested in me as President of the United States of America, it is ordered as follows:

The Department of Justice is designated as the Central Authority to receive Letters of Request coming from a judicial authority of another Contracting State and to transmit them to the authority competent to execute them.

Richard Nixon

THE WHITE HOUSE,
January 19, 1973.

V 38 - 15 JAN 23 73 XUM

Rules and Regulations

Title 7—AGRICULTURE

Chapter I—Agricultural Marketing Service (Standards, Inspections, Marketing Practices) Department of Agriculture

SUBCHAPTER C—REGULATIONS AND STANDARDS UNDER THE AGRICULTURAL MARKETING ACT OF 1946

PART 53—LIVESTOCK, MEATS, PREPARED MEATS, AND MEAT PRODUCTS (GRADING, CERTIFICATION, AND STANDARDS)

Subpart A—Regulations

FEES FOR GRADING SERVICE

This document updates the regulations under which voluntary meat grading and related services are provided by increasing the hourly fees charged to users of this self-supporting service.

The Agricultural Marketing Act of 1946 provides for the collection of fees equal as nearly as may be to the cost of the services, such as Federal meat grading services, rendered under its provisions. Public Law 92-210 and Executive Order 11691 increased salaries paid to Federal employees. Therefore, it has been determined that, in order to cover the increased cost of Federal meat grading services resulting from increases in salaries paid to Federal employees and increases in other costs, the hourly fee must be increased as provided for herein.

Pursuant to the authority of sections 203 and 205 of the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1622, 1624), the provisions of 7 CFR 53.29(a) prescribing fees in connection with the performance of Federal meat grading services are hereby amended by changing the phrases "$12.40 per hour," "$14.60 per hour," and "$24.80 per hour" to "$13 per hour," "$15.20 per hour," and "$26 per hour" respectively.

The need for the increase and the amount thereby are dependent upon facts within the knowledge of the Agricultural Marketing Service. Therefore, under the provisions of 5 U.S.C. 553, it is found that notice and other public procedures with respect to this amendment are impractical and unnecessary and good cause is found to make the amendment effective less than 30 days after publication in the FEDERAL REGISTER.

This amendment shall become effective February 4, 1973, with respect to all Federal meat grading services rendered on and after that date, including service under commitment agreement whether heretofore or hereafter made.

(Secs. 203, 205, 60 Stat. 1087, 1090, 7 U.S.C. 1622, 1624)

Done at Washington, D.C., this 17th day of January 1973.

E. L. PETERSON,
Administrator.

[FR Doc.73-1327 Filed 1-22-73;8:45 am]

Chapter IX—Agricultural Marketing Service (Marketing Agreements and Orders; Fruits, Vegetables, Nuts), Department of Agriculture

[Navel Orange Reg. 283, Amdt. 1]

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

This regulation increases the quantity of California-Arizona Navel oranges that may be shipped to fresh market during the weekly regulation period January 12-18, 1973. The quantity that may be shipped is increased due to improved market conditions for Naval oranges. The regulation and this amendment are issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 907.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of Navel oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Navel Orange Administrative Committee, established under the same amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such Navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for an increase in the quantity of oranges available for handling during the current week results from changes that have taken place in the marketing situation since the issuance of Navel Orange Regulation 283 (38 FR 1270). The marketing picture now indicates that there is a greater demand for Navel oranges than existed when the regulation was made effective. Therefore, in order to provide an opportunity for handlers to handle a sufficient volume of Navel oranges to fill the current market demand thereby making a greater quantity of Navel oranges available to meet such increased demand, the regulation should be amended, as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication thereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restriction on the handling of Navel oranges grown in Arizona and designated part of California.

(b) *Order, as amended.* The provisions in paragraph (b)(1) (i), (ii), and (iii) of § 907.583 (Navel Orange Regulation 283 (38 FR 1270)) are hereby amended to read as follows:

§ 907.583 Navel orange regulation 283.

* * * * * *

(b) *Order.* (1) * * *

(i) District 1: 891,000 Cartons;

(ii) District 2: 165,000 Cartons;

(iii) District 3: 44,000 Cartons.

Title 14—AERONAUTICS AND SPACE

Chapter I—Federal Aviation Administration, Department of Transportation

[Docket No. 71-CE-25-AD, Amdt. 39-1586]

PART 39—AIRWORTHINESS DIRECTIVES

Helio Models H-250, H-295, H-391, H-391B, H-395, and H-395A Airplanes

Amendment 39-1320 (36 FR 20033, 20034), AD 71-21-11, published in the FEDERAL REGISTER on October 15, 1971, applicable to Helio Models H-250, H-295, H-391, H-391B, H-395, and H-395A airplanes, is an Airworthiness Directive which requires in part, inspection of the lower right and left, main spar, steel carry through fitting P/N 391-030-4072, for cracks or corrosion in accordance with Helio Aircraft Company Service Bulletin No. 36. The initial inspection interval is 3,000 hours' time-in-service for landplanes and 1,500 hours' time-in-service for seaplanes.

Subsequent to the issuance of AD 71-21-11 the agency has been advised that many of the airplanes subject to the AD are operated in both land and sea configurations. Under such circumstances, airplane operators are having a problem in determining the inspection time for such airplanes. Accordingly, it is necessary to amend Paragraph A of the AD to provide for appropriate in-service time for the dual configuration airplanes.

Since this amendment provides for clarification and is in the interest of safety, it imposes no additional burden on any person, notice and public procedure hereon are impracticable and good cause exists for making the amendment effective in less than 30 days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator 14 CFR 11.89 (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations, Paragraph A of Amendment 39-1320, AD 71-21-11 is amended so that it now reads as follows:

(A) Within the next 10 hours' time in service, on all land planes with 3,000 or more hours' time in service, or upon accumulation of 3,000 hours' time in service; and on all seaplanes with 1,500 or more hours' time in service, or upon accumulation of 1,500 hours time in service; and on all airplanes operating in both landplane and seaplane configurations with 3,000 or more hours' time in service or upon accumulation of 3,000 hours' time in service,[1] and thereafter on all aircraft listed in this AD at intervals not to exceed 100 hours, gamma ray inspect both the lower left and right, main spar, steel carry through fitting, P/N 391-030-4072, for cracks or corrosion in accordance with Helio Aircraft Company Service Bulletin No. 36 or later revision approved by the Chief, Engineering and Manufacturing Branch, FAA, Central Region.

This amendment becomes effective January 29, 1973.

(Secs. 313(a), 601, 603 Federal Aviation Act of 1958, 49 U.S.C. 1354(a), 1421, 1423; sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Kansas City, Mo., on January 12, 1973.

JOHN M. CYROCKI,
Director, Central Region.

[FR Doc.73-1336 Filed 1-22-73;8:45 am]

[Airspace Docket No. 72-RM-27]

PART 73—SPECIAL USE AIRSPACE

Alteration of Restricted Area

On November 30, 1972, a notice of proposed rule making (NPRM) was published in the FEDERAL REGISTER (37 FR 25401) stating that the Federal Aviation Administration (FAA) was considering an amendment to Part 73 of the Federal Aviation Regulations that would expand the annual time of use and change the controlling agency of restricted area R-7001, Guernsey, Wyo.

Interested persons were afforded an opportunity to participate in the proposed rule making through the submission of comments. No objections were received.

In consideration of the foregoing, Part 73 of the Federal Aviation Regulations is amended, effective 0901 G.m.t., March 1, 1973, as hereinafter set forth.

In § 73.70 (38 FR 677) the time of designation and the controlling agency of R-7001 are revised as follows:

WYOMING

R-7001—Guernsey, Wyo.
Time of designation: 0430 to 2400 local time March 1 through November 30.
Controlling agency: Federal Aviation Administration, Denver ARTC Center.

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on January 15, 1973.

H. B. HELSTROM,
Chief, Airspace and Air Traffic Rules Division.

[FR Doc.73-1337 Filed 1-22-73;8:45 am]

[Airspace Docket No. 72-NE-30]

PART 73—SPECIAL USE AIRSPACE

Alteration of Restricted Area

The purpose of this amendment to Part 73 of the Federal Aviation Regulations is to reduce the lateral dimensions and to change the name of the using agency of the Camp Edwards, Mass., Restricted Area, R-4101.

The Department of the Army has requested that Restricted Area R-4101 be reduced slightly to afford clearance for aircraft executing instrument approaches to Runway 23 at Otis Air Force Base, Mass., without interrupting firing activities within R-4101. They also requested that the name of the using agency be changed.

Since this amendment restores airspace to the public and relieves a restriction, notice and public procedure thereon are unnecessary, and good cause exists for making this amendment effective on less than 30 days notice.

In consideration of the foregoing, Part 73 of the Federal Aviation Regulations is amended, effective on January 23, 1973, as hereinafter set forth.

Section 73.41 (38 FR 654), R-4101, Camp Edwards, Mass., is amended as follows:

1. In "Boundaries" "to latitude 41°42' 20'' N., longitude 70°30'15'' W.;" is deleted and "to latitude 41°42'23'' N., longitude 70°30'21'' W.;" is substituted therefor.

2. The using agency is changed to "Commander, U.S. Army Garrison, Camp Edwards, Mass."

(Sec. 307(a), Federal Aviation Act of 1958, 49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act, 49 U.S.C. 1655(c))

Issued in Washington, D.C., on January 17, 1973.

H. B. HELSTROM,
Chief, Airspace and Air Traffic Rules Division.

[FR Doc.73-1338 Filed 1-22-73;8:45 am]

Title 16—COMMERCIAL PRACTICES

SUBCHAPTER A—PROCEDURES AND RULES OF PRACTICE

PART 4—MISCELLANEOUS RULES

Records

Correction

In FR Doc. 73-1059, appearing at page 1730, in the issue of Thursday, January 18, 1973, in the fourth line of the first paragraph, the date reading "January 31, 1973", should read "February 3, 1973".

Title 19—CUSTOMS DUTIES

Chapter I—Bureau of Customs, Department of the Treasury

[T.D. 73-28]

PART 153—ANTIDUMPING

Northern Bleached Hardwood Kraft Pulp From Canada

JANUARY 17, 1973.

Section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)), gives the Secretary of the Treasury responsibility for determination of sales at less than fair value. Pursuant to this authority the Secretary of the Treasury has determined that prime grade and off-grade northern bleached hardwood kraft pulp from Canada is being, or is likely to be, sold at less than fair value within the meaning of section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)). (Published in the FEDERAL REGISTER of Sept. 30, 1972 (37 FR 20580-81, FR Doc. 72-16804).)

Section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)), gives the U.S. Tariff Commission responsibility for determination of injury or likelihood of injury. The U.S. Tariff Commission has determined, and on December 27, 1972, it notified the Secretary of the Treasury that an industry in the United States is being, and is likely to be, injured by reason of the importation of prime grade and off-grade northern bleached hardwood kraft pulp from Canada that is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended. (Published in the FEDERAL REGISTER of Jan. 3, 1973 (38 FR 87, FR Doc. 73-103).)

On behalf of the Secretary of the Treasury, I hereby make public these determinations, which constitute a finding of dumping with respect to prime grade and off-grade northern bleached hardwood kraft pulp from Canada.

Section 153.43 of the Customs Regulations is amended by adding the following to the list of findings of dumping currently in effect:

Merchandise	Country	T.D.
Northern Bleached Hardwood Kraft Pulp—prime grade and off-grade.	Canada.	73-28

(Secs. 201, 407, 42 Stat. 11, as amended, 18; 19 U.S.C. 160, 173)

[SEAL] EUGENE T. ROSSIDES,
Assistant Secretary of the Treasury.

FR Doc.73-1466 Filed 1-22-73;8:45 am

Title 20—EMPLOYEES' BENEFITS

Chapter V—Manpower Administration, Department of Labor

PART 614—UNEMPLOYMENT COMPENSATION FOR EX-SERVICEMEN

Schedule of Remuneration

The issuance of Executive Order 11692, 37 FR 27609, providing increased pay and allowances for members of the uniformed services, makes it necessary to amend § 614.19 of Title 20 of the Code of Federal Regulations, which contains the schedule of remuneration for each pay grade of ex-servicemen used in the administration of the program of unemployment compensation for ex-servicemen established by Subchapter II of Chapter 85 of Title 5 of the United States Code (5 U.S.C. 8521-8525).

The provisions of 5 U.S.C. 553 which require notice of proposed rulemaking, public participation in their adoption, and delay in effective date are not applicable because such notice, public participation, and delay are found not to be in the public interest which in this instance requires the prompt implementation of the amended schedule of remuneration by the several State agencies administering such program. Accordingly this change is effective January 23, 1973.

Section 614.19 of Title 20, Code of Federal Regulations, is revised to read:

§ 614.19 Schedule of remuneration.

(a) The schedule provided in this paragraph applies to first claims under the UCX program filed on or after March 4, 1973.

Pay Grades:	*Monthly rates*
1. Commissioned officer:	
O-10	$3,590
O-9	3,579
O-8	3,259
O-7	2,874
O-6	2,439
O-5	1,977
O-4	1,636
O-3	1,354
O-2	1,033
O-1	794
2. Warrant Officer:	
W-4	$1,570
W-3	1,314
W-2	1,092
W-1	882
3. Enlisted personnel:	
E-9	$1,336
E-8	1,138
E-7	980
E-6	846
E-5	699
E-4	582
E-3	528
E-2	494
E-1	452

(b) The deletion from paragraph (a) of this section of schedules of remuneration applicable to periods of time prior to March 4, 1973, and heretofore published in 37 FR 2434; 36 FR 22975; 36 FR 3456; 35 FR 9000; 34 FR 12434; 33 FR 10086; 33 FR 3635; 32 FR 20974; 30 FR 13120; 29 FR 13102; and 23 FR 8699, does not revoke such schedules.

(5 U.S.C. 8508 and 8521(a)(2))

Signed at Washington, D.C., this 18th day of January 1973.

MALCOLM R. LOVELL, JR.,
Assistant Secretary for Manpower.

[FR Doc.73-1399 Filed 1-22-73;8:45 am]

Title 29—LABOR

Subtitle A—Office of the Secretary of Labor

PART 55—GRANTS UNDER THE EMERGENCY EMPLOYMENT ACT OF 1971

Miscellaneous Amendments

These amendments to the regulations issued pursuant to the Emergency Employment Act are promulgated in order:

(1) To reflect changes in standards for referral to work contained in the so-called WIN amendments to the Social Security Act, Public Law 92-223, approved December 28, 1971.

(2) To bring priorities for referral of veterans by the Employment Service to public employment under the Act into accord with standards generally used by the Employment Service.

(3) To eliminate the qualifying period of unemployment for recently-discharged veterans.

(4) To clarify the Secretary's authority to waive residency requirements for grants made with discretionary funds and to reserve to him new authority to waive residence requirements for special veterans except under grants made pursuant to section 6.

Because these regulations are either interpretative in nature and already being applied or waive a restriction, I find it unnecessary to publish notice of proposed rulemaking with opportunity for comments or to delay the effective date. Accordingly these regulations will be effective on January 23, 1973.

1. Section 55.1(q)(2) is amended to read as follows:

§ 55.1 Definitions.

• • • • • •

(q) "Unemployed person" means—

• • • • • •

(2) A person who is 18 years of age or older, and a recipient of money payments pursuant to a State plan approved under the public assistance titles of the Social Security Act or a person whose income, resources or need are counted with that of such a recipient for determining public assistance entitlement, whose need does not arise from a strike or lockout at his usual place of employment, and who (i) has been without work for 1 week or longer and (*a*) volunteers for work, or (*b*) has been deemed job-ready under the Work Incentive Program in accordance with procedures established pursuant to § 56.5 of this chapter; or (ii) is working in a job providing insufficient income to enable him and his family to be self-supporting without welfare assistance.

• • • • • •

2. Paragraphs (d), (e), and (f) of § 55.7 are amended to read as follows:

§ 55.7 Selection of participants.

• • • • • •

(d) All job vacancies under the program, except those to which former employees are being recalled, shall be listed with the State Employment Security Agency at least 48 hours before such vacancies are filled, during which period the Employment Service will first refer veterans in accordance with its referral priorities. Upon request, the Employment Service will make a special effort to include in its referrals, and if necessary to recruit, special veterans and/or members of the other significant segments of the population as set forth at § 55.7(c). A list of such job openings will also be made available to any other public or private organizations or agencies, including veterans' organizations, for making them known to disabled and special veterans.

[1] NOTE: To obtain equivalent time in service, multiply seaplane time by two.

V 38 - 15 JAN 23 73 XUM

(e) Participants may not have been employed by a Program Agent or subagent less than 30 days prior to being reemployed by the same unit of government. All others who qualify as unemployed under § 55.1(q)(1) may not have worked for any employer less than 14 days prior to employment under the Act, except that veterans may be employed immediately after their discharge from active service in the Armed Forces. Recipients of welfare assistance whose eligibility arises under § 55.1(q)(2) are deemed to have been unemployed from the time they qualified for assistance.

(f) Each Program Agent and the employing agencies receiving funds through it shall select all participants from among those eligible individuals who reside in the geographical area over which the Program Agent has jurisdiction for purposes of this Act and shall place them within reasonable commuting distance of such area. When a State government is given funds for expenditure within the geographic area of another Program Agent, the participants it selects must reside in that geographical area. This paragraph is subject to exceptions in individual cases provided the total number of participants residing in each Program Agent's area remains the same. This paragraph does not apply to individuals recalled to their former jobs. The Secretary retains the right to waive the residency requirement insofar as it applies to members of the segment of the unemployed or underemployed described in paragraph (c)(vii) of this section, or to special veterans.

• • • • •

3. Section 55.58 is amended by deleting the last clause reading: "if he finds it might impede the conduct of any demonstration program." As amended the section reads:

§ 55.58 Waiver of requirements by Secretary.

The Secretary may waive any requirement under this subpart that is not specifically required by the Act.

Signed at Washington, D.C., this 17th day of January 1973.

PAUL J. FASSER, JR.,
Deputy Assistant Secretary for Manpower and Manpower Administrator.

[FR Doc.73-1356 Filed 1-22-73;8:45 am]

Title 41—PUBLIC CONTRACTS AND PROPERTY MANAGEMENT

Chapter 3—Department of Health, Education, and Welfare

PART 3-3—PROCUREMENT BY NEGOTIATION

Subpart 3-3.51—Selection of Offerors for Negotiation and Award

On pages 18924, 18925, and 18926, of the FEDERAL REGISTER of September 16, 1972, there was published a notice of proposed rule making to issue a regulation establishing policies and procedures for selection of offerors for negotiation and award. After consideration of all such relevant matter as was presented by interested persons, the amendment as so proposed is hereby adopted, subject to the following changes:

1. In the second sentence of § 3-3.5101, Applicability, the phrase "with the product" is changed to read: "with the item being procured."

2. In paragraph (b) of § 3-3.5102, Requests for proposal, the following changes are made:

(a) The following is added to as the beginning of the first sentence: "Unless otherwise authorized by the procedures of the operating agency, • • •"

(b) The phrase "and concurrently with" in the second sentence is deleted.

3. After the first sentence of paragraph (c) of § 3-3.5102, Requests for proposal, the following is added: "(See § 1-3.807-3 for requirements for cost or pricing data.)"

4. That part of paragraph (f) of § 3-3.5102, Requests for proposals, reading "No other factors" is hereby changed to read: "No factors • • •"

5. The following changes are made in § 3-3.5103, Evaluation of technical proposals:

(a) The last sentence of paragraph (d) is deleted and the following is substituted therefor: "Discussions with offerors relative to any aspect of the procurement shall be held only with the contracting officer or his authorized representative."

(b) In the last sentence, the phrase "if the clarification revises his" is hereby changed to read: "if the clarification results in an offeror revising its • • •."

(6) The word "of" is changed to "for" in the third sentence of § 3-3.5104, Technical evaluation report.

(7) The following change is made in paragraph (c) of § 3-3.5106, Competitive range: The comma after the words "price" and "analysis" in the second sentence are deleted.

(8) The word "supplied" in the last sentence of §3-3.5108, Closing of negotiations, is deleted.

(9) Paragraph (b) of § 3-3.5109, Selection of contractor, is hereby relettered (c) and the following is added as the new paragraph (b): "(b) Research and development contracts should be awarded to those organizations, including educational institutions, which have the highest competence in the specific field of science or technology involved. However, awards should not be made for research and development capabilities that exceed those needed for the successful performance of the particular project."

Effective date. These regulations shall become effective on January 23, 1973.

Dated: January 17, 1973.

N. B. HOUSTON,
Deputy Assistant Secretary for Administration.

The new Subpart 3-3.51 reads as follows:

Subpart 3-3.51—Selection of Offerors for Negotiation and Award

Sec.
3-3.5100 Scope of subpart.
3-3.5101 Applicability.
3-3.5102 Requests for proposals.
3-3.5103 Evaluation of technical proposals.
3-3.5104 Technical evaluation report.
3-3.5105 Evaluation of business proposals.
3-3.5106 Competitive range.
3-3.5107 Conduct of discussions.
3-3.5108 Closing of negotiations.
3-3.5109 Selection of contractor.
3-3.5110 Notice and debriefing.

AUTHORITY: 5 U.S.C. 301; 40 U.S.C. 486(c).

§ 3-3.5100 Scope of subpart.

This section provides guidance to all DHEW personnel regarding (a) evaluation of the technical and other aspects of proposals and (b) the requirement for "written or oral discussion" with concerns whose proposals are "within a competitive range," under competitive negotiated procurements.

§ 3-3.5101 Applicability.

This section is applicable to all competitive negotiated procurements conducted by DHEW under the authority of the Federal Procurement Regulations (FPR). Those portions of this section concerning written or oral discussions need not be applied: (a) to procurements in implementation of authorized set-aside programs; (b) to procurements where the existence of adequate competition or accurate prior cost experience with the item being procured clearly demonstrates that acceptance of an initial proposal without discussions would result in fair and reasonable prices, provided the request for proposals notifies all offerors of the possibility that award may be made without discussion and provided award is in fact made without any written or oral discussions.

§ 3-3.5102 Requests for proposals.

(a) Careful drafting of the request for proposals (RFP) is vital to the proper working of the competitive process. Particular efforts must be made to develop an accurate statement of work in order to preclude ambiguities and to avoid misunderstandings which might otherwise surface at later stages of the procurement.

(b) Unless otherwise authorized by the procedures of the operating agency, the RFP shall require that a proposal generally will be in two parts: a "Technical Proposal" and a "Business Proposal." Each of the parts shall be separate and complete in itself so that evaluation of one may be accomplished independently of evaluation of the other. Generally, the RFP will provide that the "Technical Proposal" not contain any reference to cost. Resource information, such as data concerning labor hours and categories, materials, subcontracts, travel, computer time, etc., shall be included in the "Technical Proposal" so that offeror's understanding of the scope of work may be evaluated.

(c) The instructions to the offerors concerning the "Business Proposal" should require submission of cost information in sufficient detail to allow a complete cost analysis. (See 1-3.807-3 of this title for requirements for cost or pricing data.) Categories and amounts of labor, materials, travel, computer time, as well as information with regard to contractor past performance, including contracts or subcontracts for like services or supplies, financial capacity, certifications, and representations, and other pertinent administrative and business information should also be requested.

(d) Evaluation criteria must be developed by technical personnel, at the time of initiation of the procurement request, for inclusion by the contracting officer in the RFP. These criteria and their relative importance or weight require the exercise of judgment on a case-by-case basis, since the criteria must be tailored to the requirements of each particular procurement. These criteria must be submitted to the contracting officer in sufficient time to allow for this review before the issuance of the request for proposal. Since these criteria will serve as the standard against which all proposals will be evaluated, it is imperative that they be chosen carefully to emphasize those factors considered to be critical to the selection of a contractor.

(e) The RFP must inform offerors of all evaluation criteria and of the relative importance or weight attached to each criterion, although there need not be stated a numerical weighting formula. Evaluation criteria shall be described fully enough in each RFP to inform prospective offerors of the significant matters which should be addressed in the proposals. The technical and business proposal instructions of the RFP must inform the offeror of all information deemed essential to proper evaluation of the proposal, so that all competitors are aware of all requirements and so that the difference(s) in proposals will reflect the offeror's differing responses to unambiguous RFP requirements and criteria.

(f) No factors other than those set forth in the request for proposals as the evaluation criteria shall be used in the evaluation of technical proposals.

(g) The RFP evaluation criteria shall not be modified except by a formal amendment to the RFP.

§ 3-3.5103 Evaluation of technical proposals.

(a) The technical proposals received by the contracting officer will be forwarded to the technical evaluators for evaluation; the business portion of the proposal will be retained by the contracting officer for evaluation.

(b) The technical evaluators will evaluate each proposal in strict conformity with the evaluation criteria of the RFP and will assign each proposal a score. A technical ranking will then be compiled. The technical evaluators shall then identify each proposal as either acceptable or unacceptable. Predetermined cutoff scores shall not be employed.

(c) The technical evaluators shall then determine whether any proposal which has been rated as unacceptable might be considered acceptable upon the furnishing of clarifying data by the offeror, and the contracting officer will be so informed. The contracting officer will arrange for the submission of clarifying data in writing or by consultation, and furnish it to the technical evaluators for their consideration.

(d) It is essential to the competitive procurement process that all information contained in offerors' proposals be maintained in strict confidence. In no event during the evaluation period shall any offeror be told the number of proposals received, prices, cost ranges, or the Government cost estimate. Discussions with offerors relative to any aspect of the procurement shall be held only with the contracting officer or his authorized representative.

(e) For the sole purpose of eliminating any uncertainty or ambiguity in an initial proposal, the contracting officer may make inquiry of an offeror. Such inquiry of and clarification furnished by such offeror shall not be considered to constitute "discussions" within the meaning of § 1-3.805-1(g) of this title and shall not necessitate any inquiry of other offerors. However, if the clarification results in an offeror revising its proposal or it would in any way prejudice the interests of other offerors, discussions must be held with all responsible offerors within the competitive range.

§ 3-3.5104 Technical evaluation report.

A technical evaluation report shall be prepared and signed by the technical evaluators, furnished the contracting officer, and maintained as a permanent record in the contract file. The report shall reflect the ranking of the proposals and shall identify each proposal as acceptable or unacceptable in accordance with § 3-3.5103 (b) and (c). The report shall also include a narrative evaluation specifying the strengths and weaknesses of each proposal, and any reservations or qualifications that might bear upon the selection of sources for negotiation and award. Concrete technical reasons supporting a determination of unacceptability with regard to any proposal shall be included.

§ 3-3.5105 Evaluation of business proposals.

(a) Each business proposal requires some form of price or cost analysis. The contracting officer must exercise judgment in determining the extent of analysis in each case. In high-dollar value procurements, the analysis should be thorough and the record carefully documented to disclose the extent to which the various elements of costs, fixed fee, or profit contained in the contractor's proposals were analyzed. The negotiation memorandum should also reflect the consideration given to the recommendations, if any, of the price analyst and the basis for nonacceptance or departure from the recommendations during the course of negotiations.

(b) The contracting officer must appraise the management capability of the offeror to perform the required work in a timely manner. In making this appraisal, he must consider such factors as the company's management organization, past performance, reputation for reliability, and availability of the required facilities, and cost controls.

§ 3-3.5106 Competitive range.

Unless an award is made without any discussions in accordance with § 3-3.5101, discussions shall be conducted with each offeror in the "competitive range." The competitive range is composed of those offerors with which there is a possibility of conducting meaningful discussions which could result in the improvement of their offers, price and other factors considered. Determining which proposals fall within a competitive range will depend upon the particular circumstances of each negotiation. Cost or price alone is sometimes controlling, but technical capability and other relevant criteria may be paramount. The decision as to which firms are and which firms are not within a competitive range is a matter of administrative discretion. There could conceivably be a business proposal in which the cost or price is so high that it seems to be completely out of the competitive range. However, before making such a determination the contracting officer should consult with the technical personnel to determine possible reasons for the apparently excessive price. In determining the competitive range, the contracting officer should consider the following:

(a) A proposal must be considered to be within the competitive range unless it is either so inferior technically or so high in cost as to preclude any possibility of meaningful negotiation with the offeror, or unless the offeror does not have a reasonable chance of being selected for the final award.

(b) The competitive range should be decided on the basis of the array of scores or relative ranking of the offerors, not on a predetermined absolute score or cutoff level of acceptability. Borderline proposals must not be excluded from consideration automatically if they are reasonably susceptible of being made acceptable by clarification or discussions.

(c) No offeror who is in the competitive range shall be eliminated from the competitive range solely because of an offer to deliver services or supplies of a higher quality than required. If there is no substantial basis for distinguishing between the technical excellence of proposal(s) meeting the Government's requirements, price or best buy analysis should then become the controlling factor.

§ 3-3.5107 Conduct of discussions.

(a) The contracting officer, in cooperation with technical personnel, must conduct written or oral discussions (negotiations) of the work to be performed, the cost of the work, and other relevant

V38-15 JAN 23 73 XUM

topics with all those offerors within the competitive range. The contracting officer shall point out to each offeror the ambiguities, uncertainties, and deficiencies, if any, in its proposal. He shall then give each offeror a reasonable opportunity to support, clarify, correct, improve or revise its proposal. Discussions with one offeror shall neither identify areas in which another has apparently achieved a higher evaluation or provided more detail (nor transmit information) which could give one offeror a competitive advantage over another. Cost estimates made by the Government will not be disclosed.

(b) Careful judgment will be exercised in determining the extent of discussions. In some cases more than one round of discussions with all the offerors within the competitive range may be required. The time available, the expense and administrative limitations, and the size and significance of the procurement should all be considered in deciding on the type, duration, and depth of the discussions.

§ 3–3.5108 Closing of negotiations.

In order to properly terminate negotiations, the contracting officer shall advise each offeror within the competitive range that (a) negotiations are being conducted, (b) offerors are being asked for "best and final offer," not merely to confirm or reconfirm prior offers, and (c) any revision or modification of proposals must be submitted by the cutoff date.

§ 3–3.5109 Selection of contractor.

(a) After the close of discussions and the receipt of any addenda to proposals, the contracting officer shall select for award the offeror(s) whose proposal(s) offers the greatest advantage to the Government, price and other factors considered.

(b) Research and development contracts should be awarded to those organizations, including educational institutions, which have the highest competence in the specific field of science or technology involved. However, awards should not be made for research and development capabilities that exceed those needed for the successful performance of the particular project.

(c) Whenever the contract is to have a fixed price, price may not be disregarded in selecting a contractor. This is particularly true where more than one acceptable offer from technically qualified sources remains for consideration after conduct of negotiations. If a lower-priced, lower-scored offer meets the Government's needs, acceptance of a higher-priced, higher-scored offer shall be supported by a specific determination by the contracting officer that the technical superiority of the higher-priced offer warrants the additional cost involved in the award of a contract to that offeror.

§ 3–3.5110 Notice and debriefing.

Promptly after award of the contract, notice of unsuccessful offerors will be given in accordance with HEWPR 3–3.103.

[FR Doc.73–1389 Filed 1–22–73;8:45 am]

PART 3–75—DELEGATIONS OF AUTHORITY

Miscellaneous Amendments

Chapter 3, Title 41, Code of Federal Regulations, is amended as set forth below. The purpose of this amendment is to bring published delegations of authority into conformity with current organizational structure, designations, and administrative practices.

It is the general policy of the Department of Health, Education, and Welfare to allow time for interested parties to take part in the rule making process. However, the amendment herein involves minor technical matters. Therefore, the public rule making process is deemed unnecessary in this instance.

1. Contents of Subpart 3–75.1, is revised to read as follows:

Subpart 3–75.1—Procurement Authority

Sec.
3–75.100 Scope of subpart.
3–75.101 Head of the procuring activity.
3–75.102 Authority delegated.
3–75.103 Redelegation.
3–75.104 Limitations.
3–75.104–1 Determinations and findings.
3–75.104–2 Fixed fee.
3–75.104–3 Review and approval of contracts.
3–75.104–4 Mistakes in bids.
3–75.104–5 Establishment of Departmental procurement policy.

AUTHORITY: 5 U.S.C. 301, 40 U.S.C.

Subpart 3–75.1—Procurement Authority

2. Sections 3–75.101, 3–75.102, 3–75.104–2 and 3–75.104–3 of Subpart 3–75.1 are amended as follows:

§ 3–75.101 Head of the procuring activity.

In addition to the heads of the operating agencies, the following officials are designated "Head of the procuring activity":

(a) Directors, Regional Offices;

(b) Director of Procurement and Material Management, OASAM;

(c) Director, Office of Administrative Services, OS; and

(d) Director, Facilities Engineering and Construction Agency, OASAM.

§ 3–75.102 Authority delegated.

Heads of procuring activities are authorized to: (a) Enter into, modify, administer and terminate contracts for property and services, and to make related determinations and findings; (b) settle termination claims; (c) appoint contracting officers; and (d) promulgate procurement directives in conformance with the stated policy of this Department.

§ 3–75.104–2 Fixed fee.

Proposed fees under cost-plus-a-fixed-fee contracts which exceed the following shall be approved only by the head of the procuring activity or his designee. A designee for making these determinations must be at least one organizational level above the contracting officer:

(a) Ten percent of the estimated cost, exclusive of fee, of any cost-plus-a-fixed-fee contract for experimental, developmental, or research work.

(b) Seven percent of the estimated cost, exclusive of fee, of any other cost-plus-a-fixed-fee contract.

§ 3–75.104–3 Review and approval of contracts.

Preaward contract reviews shall be conducted by those officials designated in § 3–50.101 of this chapter.

Subpart 3–75.4—Alcohol and Controlled Substances

3. Subpart 3–75.4 is revised to read as follows:

Subpart 3–75.4—Alcohol and Controlled Substances

Sec.
3–75.400 Scope of subpart.
3–75.401 Authority delegated.
3–75.402 Redelegation.

AUTHORITY: 5 U.S.C. 301, 40 U.S.C. 486(c).

§ 3–75.400 Scope of subpart.

This subpart authorizes heads of certain procuring activities to sign applications to procure alcohol and to appoint individuals to order controlled substances as defined by the Bureau of Narcotics and Dangerous Drugs (see Title 21 CFR).

§ 3–75.401 Authority delegated.

The following officials are authorized to sign applications to procure tax-free specially denatured alcohol and to appoint accredited officials to order controlled substances, in accordance with laws and regulations of the Treasury Department, the Department of Justice, and the requirements and conditions of Subpart 3–5.56 of this chapter:

(a) Administrator, Health Services and Mental Health Administration;

(b) Director, National Institutes of Health;

(c) Commissioner of Food and Drugs; and

(d) Director of Procurement and Materiel Management, OASAM.

Effective date. This amendment shall be effective on January 23, 1973.

Dated: January 17, 1973.

N. B. HOUSTON,
Deputy Assistant Secretary for Administration.

[FR Doc.73–1388 Filed 1–22–73;8:45 am]

Title 46—SHIPPING

Chapter II—Maritime Administration, Department of Commerce

SUBCHAPTER H—TRAINING

[General Order 97, Rev., Amdt. 11]

PART 310—MERCHANT MARINE TRAINING

Subpart C—Admission and Training of Cadets at the U.S. Merchant Marine Academy

Effective January 21, 1973 § 310.58 of this subpart is amended by changing the first sentence of paragraph (c) thereof to read as follows:

§ 310.58 Training on subsidized vessels.

* * * * * * *

(c) *Pay.* Cadets, while attached to merchant vessels, shall receive pay at the rate of $283.05 per month from their steamship company employers. * * *

(Sec. 204, 49 Stat. 1987, as amended; 46 U.S.C. 1114)

Dated: January 16, 1973.

By order of the Assistant Secretary of Commerce for Maritime Affairs.

JAMES S. DAWSON, JR.,
Secretary.

[FR Doc.73–1413 Filed 1–22–73;8:45 am]

Title 49—TRANSPORTATION

Chapter V—National Highway Traffic Safety Administration, Department of Transportation

[Docket No. 72–7; Notice 2]

PART 577—DEFECT NOTIFICATION

This notice establishes a new regulation covering notifications of motor vehicle safety defects and nonconformity to safety standards. The notice proposing these regulations was published May 17, 1972 (37 FR 9783).

The regulation is intended to improve the response of owners in vehicle notification campaigns. Data which the NHTSA has been receiving on the completion rates of notification campaigns show a wide range of completion rates, with campaigns involving newer vehicles, and more serious safety problems, having higher completion rates than others. In many campaigns, however, the rate is alarmingly low.

An examination of the notifications sent by manufacturers reveals wide disparity in emphasis. Although precise evaluation of the impact of notification letters is difficult, due to its being largely subjective, the NHTSA is of the opinion that many notifications have tended to deemphasize the safety problems involved. Some of these notification letters are questionably within the requirements of the National Traffic and Motor Vehicle Safety Act, and litigation on a case-by-case basis to improve them is impracticable. These regulations are intended to insure that all notification letters contain sufficient information, as determined by NHTSA, to properly notify purchasers.

The regulation applies to manufacturers of incomplete and complete motor vehicles, and motor vehicle equipment. In the case of vehicles manufactured in two or more stages, compliance by any one of the manufacturers of the vehicle is considered compliance by all. This provision is based on similar language in the Defect Reports regulation (49 CFR Part 573), and is included in response to comments received.

The regulation requires the notification to contain substantially the information specified in the proposal. It requires each notification to begin with a statement that it is sent pursuant to the requirements of the National Traffic and Motor Vehicle Safety Act. The NHTSA did not concur with comments to the effect that the inclusion of this statement would not promote the purpose of the regulation. The regulation requires the notification to state that the manufacturer, or the National Highway Traffic Safety Administrator, as the case may be, has determined that a defect relating to motor vehicle safety (or a noncompliance with a motor vehicle safety standard) exists in the vehicle type, or item of motor vehicle equipment, with which the notification is concerned. When the manufacturer (or the Administrator) has, as part of his determination, also found that the defect may not exist in each such vehicle or equipment item, he may include a statement to that effect. The NHTSA has decided to allow such statements based on comments that many defects in fact do not exist in each vehice or equipment item of the group whose owners are notified.

The manufacturer must also describe the defect, evaluate the risk it poses to traffic safety, and specify measures which the recipient should take to have it remedied. In each case, the regulation requires information which the NHTSA has determined will meet these objectives. In describing the defect, the manufacturer must indicate the vehicle system or particular items of equipment affected, describe the malfunction that may occur, including operating conditions that may cause it to occur, and precautions the purchaser should take to reduce the likelihood of its occurrence. In providing that the vehicle system affected be mentioned, the regulation reflects comments to the effect that listing each particular part involved would be too technical to be useful to most consumers.

In evaluating the risk to traffic safety, the manufacturer must indicate if vehicle crash is the potential result, and whatever warning may occur. Where vehicle crash is not the potential result, the manufacturer must indicate the general type of injury which the defect can cause. Although many comments protested that it was impossible to predict a specific type of injury, the NHTSA believes that manufacturers can easily foresee the general type of injury, such as asphyxiation, that can result from those defects which are not expected to result in crashes.

In stating measures to be taken to repair the defect, the requirements differ in the case where the manufacturer's dealers repair the vehicle free of charge to the purchaser, where the manufacturer merely offers to pay for the repair, and where he refuses to pay for the repair. The purpose of this distinction is to provide information sufficient to have adequate repairs made in each case.

Where the manufacturer's dealers repair the vehicle free of charge, the notification must include a general description of the work involved, the manufacturer's estimate of when his dealers will be supplied with parts and instructions, and his estimate of the time reasonably necessary to perform the labor involved in correcting the defect. The agency's position is that consumers are entitled to know approximately when their cars will be repaired and how much labor is needed in order for the repair to be made. The NHTSA realizes that dealers frequently retain vehicles longer than the actual work involved, due to difficulties in scheduling repairs. However, manufacturers are free to impart this information to consumers under the regulation. Some comments objected to requiring manufacturers to provide information on when replacement parts will be available, on the basis that manufacturers cannot know, at the time a notification is issued, precisely when parts deliveries will be made to dealers. To include this information, it is argued, would therefore delay the issuance of the notification. The NHTSA has modified the proposed language to allow manufacturers to "estimate" when corrective parts will be available. The estimate would be based on the manufacturer's knowledge at the time the notification is sent, thereby eliminating any reasons for delay.

When manufacturers do not provide for repairs to be made by dealers, the notification is required to contain, in addition, full lists of parts and complete instructions on making the repairs. The regulation also requires the manufacturer to recommend, generally, where the vehicle should be repaired, and manufacturers are free to make general and specific recommendations. This requirement reflects the intent of the proposal that manufacturers who believe particular repairs may require special expertise should indicate that fact to purchasers.

When the manufacturer does not offer to pay for the repairs, he must, in addition, include full cost information on necessary parts. The notice would have required the retail cost of all parts, and information on labor charges of the manufacturer's dealers in the general area of the purchaser. In response to comments, the cost information is limited to the suggested retail price of parts.

V 38 - 15 JAN 23 73 XUM

Manufacturers have indicated they do not set actual prices of parts, but do have suggested list prices. With respect to labor charges, manufacturers have indicated that labor charges vary, and that requiring them to ascertain exact charges would delay issuance of notifications. The NHTSA believes these comments to be well founded, and has dropped the proposed requirements regarding labor charges. Consumers will still have information on costs of parts, and time necessary for repairs to be performed, from which they can obtain a fair idea of the cost of a repair.

The regulations prohibit the notification from stating or implying that the problem is not a defect, or that it does not relate to motor vehicle safety. Moreover, in those cases where the notification is sent pursuant to the direction of the Administrator, it cannot state or imply that the manufacturer disagrees with the Administrator's finding. Many comments opposed these requirements on the basis that they unconstitutionally limited manufacturers' freedom of speech. The NHTSA emphatically rejects this contention. Notification letters are not intended to serve as forums where manufacturers can argue that problems are not safety related or dispute the Administration's findings. Their purpose is to unambiguously and adequately induce owners to remedy a potentially hazardous situation. The NHTSA is of the opinion that there is ample precedent that allows the Federal Government to require manufacturers to warn purchasers in a particular manner that certain products they manufacture may be hazardous. If a manufacturer does not believe that his condition is a safety-related defect, he is not required by law to notify owners at all. It is only when he determines that a defect exists that he must notify in accordance with the regulations. Similarly, when the Administrator has made the finding that a certain product is defective, the manufacturer can administratively and judicially challenge this determination as provided in the National Traffic and Motor Vehicle Safety Act before sending a notification.

The NHTSA received other objections to the proposed requirements. Numerous tire manufacturers argued that parts of the regulation dealing with repairs of defects are inappropriate when applied to them, since repairs generally meant replacement. Certain manufacturers of lighting equipment argued that notification requirements should not apply to them at all. The NHTSA disagrees with both of these contentions. In the case of tire manufacturers, the NHTSA believes that the requirements can be followed. If the repair of a defective tire entails its replacement, this can certainly be stated within the regulatory scheme. Similarly, lighting equipment manufacturers are responsible for defects to the same extent as manufacturers of other equipment. The NHTSA rejects completely the argument that no lighting failures can be considered safety related because of the millions of lights that burn out every year without resulting in accidents. The question in each case is not whether a failure may occur, but whether a defect exists, and whether the defect may cause a hazardous situation to arise.

The notice of proposed rule making would have prohibited manufacturers from making statements contemporaneous with the notification that disagreed with its conclusions. This proposal has not been adopted. After careful consideration, the NHTSA has determined that its inclusion is probably unnecessary. The agency's position is that if notification letters clearly and unambiguously describe and evaluate defects in accordance with this regulation, other statements by manufacturers will not normally affect reactions of consumers.

Certain comments requested that manufacturers be allowed to state in the notification that it does not constitute an admission of liability or wrongdoing. The regulation does not preclude the making of such statements, as the agency has concluded that their inclusion will not significantly deter owners from having repairs made.

One comment suggested that the notification be required to contain a postage-free card by which consumers could notify manufacturers when vehicles had been sold or otherwise disposed of. While the NHTSA believes this practice would be advantageous in improving notification campaigns, it has concluded that such a requirement would be outside the scope of the regulation, which is limited to notifications to first purchasers and warranty holders.

Certain comments objected to the regulations on the ground that they prescribed a rigid format in an area where each case must be treated separately, and thus where flexibility was required. The NHTSA has modified to some extent the proposed restrictions on format. Manufacturers are free, within the limits established, to compose notifications to fit each case. As issued, these regulations do not require rigid, inflexible letters (only the first two sentences must contain specific statements in a set order), but require that manufacturers include certain important items of information. It is hoped that manufacturers in meeting these requirements will provide required information in easily understandable form.

In light of the above, a new Part 577, Defect Notification is added to Chapter V of Title 49, Code of Federal Regulations, to read as set forth as below.

Effective date: March 26, 1973. Because these requirements are not technical in nature, and do not require leadtimes for compliance, good cause exists, and is hereby found, for an effective date less than 180 days from the day of issuance.

Issued on January 17, 1973.

DOUGLAS W. TOMS,
Administrator.

Sec.

577.1 Scope.
577.2 Purpose.
577.3 Application.
577.4 Notification initiated by manufacturer.
577.5 Notification pursuant to administrative proceeding.
577.6 Disclaimers.
577.7 Conformity to statutory requirements.

AUTHORITY: Sections 108, 112, 113, 119, Public Law 89-563, 80 Stat. 718 as amended, sections 2, 4, Public Law 91-265, 84 Stat. 262 (15 U.S.C. 1397, 1401, 1402, 1408); delegation of authority at 49 CFR 1.51.

§ 577.1 Scope.

This part sets forth requirements for notification to first purchasers and warranty holders of motor vehicles and motor vehicle equipment of the possibility of a defect relating to motor vehicle safety or a noncompliance with a Federal motor vehicle safety standard.

§ 577.2 Purpose.

The purpose of this part is to insure that defect notifications provide adequate information to recipients, and effectively motivate owners of potentially defective or noncomplying motor vehicles or items of motor vehicle equipment to have vehicles and equipment inspected and, where necessary, repaired as quickly as possible.

§ 577.3 Application.

This part applies to manufacturers of complete motor vehicles, incomplete motor vehicles, and motor vehicle equipment. In the case of vehicles manufactured in two or more stages, compliance by either the manufacturer of the incomplete vehicle or any subsequent manufacturer shall be considered compliance by each of those manufacturers.

§ 577.4 Notification initiated by manufacturer.

Whenever a manufacturer of motor vehicles or tires determines that a defect potentially existing in any motor vehicle or item of motor vehicle equipment he produces relates to motor vehicle safety, he shall notify by certified mail the first purchaser (where known) of such vehicle or item of motor vehicle equipment, and any subsequent purchaser to whom a warranty on such vehicle or item of equipment has been transferred. The notification shall contain the following information. In the case of paragraphs (a) and (b) of this section, the information shall be presented in the form and in the order specified. The information required in paragraphs (c), (d), and (e) of this section may be presented in any order.

(a) An opening statement: "This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act."

(b) (1) The statement: "(Manufacturer's name or division) has determined that a defect which relates to motor vehicle safety exists in (identifying criteria of motor vehicles or item of motor vehicle equipment)."

(2) When the manufacturer determines that the defect may not exist in each such vehicle or equipment item, he may include, in addition, a statement to that effect.

(c) A clear description of the defect, which must include—

(1) Identification of the vehicle system or particular item or items of motor vehicle equipment affected;

(2) A description of the malfunction that may occur;

(3) A statement of operating or other conditions that may cause the malfunction to occur; and

(4) Precautions, if any, that the purchaser should take to reduce the chance that the malfunction will occur before the vehicle is repaired.

(d) An evaluation of the risk to traffic safety reasonably related to the defect.

(1) When vehicle crash is the potential occurrence, the evaluation must include whichever of the following statements is appropriate:

(i) That the defect can cause vehicle crash without prior warning, or

(ii) A description of whatever warning may occur, and a statement that if this warning is not heeded, vehicle crash can occur.

(2) When vehicle crash is not the potential occurrence, the evaluation must include a statement indicating the general type of injury to occupants of the vehicle, or to persons outside the vehicle, that can result from the defect.

(e) A statement of measures to be taken to repair the defect, in accordance with whichever of the following is appropriate.

(1) When the manufacturer offers to repair the defect through his dealers without charge to the purchaser, the statement shall include:

(i) A general description of the work involved in repairing the defect;

(ii) The manufacturer's estimate of the day by which his dealers will be supplied with parts and instructions for correcting the defect; and

(iii) The manufacturer's estimate of the time reasonably necessary to perform the labor required to correct the defect.

(2) When the manufacturer does not provide for the repairs to be performed by his dealers, but will bear the cost of the repair, the statement shall include—

(i) The name and part number of each part that must be added, replaced, or modified;

(ii) A description of any modifications that must be made to existing parts;

(iii) Information on where needed parts will be available, including the manufacturer's estimate of the day after which they will be generally available;

(iv) A detailed description (including appropriate illustrations) of each step required to correct the defect;

(v) The manufacturer's estimate of the time reasonably necessary to perform the labor required to correct the defect; and

(vi) The manufacturer's recommendation as to whom the purchaser should have perform the necessary work.

(3) When the manufacturer does not bear the cost of repair, the statement shall include—

(i) The name, part number, and suggested list price of each part that must be added or replaced;

(ii) A description of any modifications that must be made to existing parts, which must also be identified by name and part number;

(iii) Information on where needed parts will be available, including the manufacturer's estimate of the day after which they will be generally available;

(iv) A detailed description (including appropriate illustrations) of each step required to repair the defect;

(v) The manufacturer's estimate of the time reasonably necessary to perform the labor required to correct the defect; and

(vi) The manufacturer's recommendations as to whom the purchaser should have perform the necessary work.

§ 577.5 Notification pursuant to administrative proceeding.

A notification made by a manufacturer of motor vehicles or motor vehicle equipment as a result of proceedings conducted pursuant to section 113(e) of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 1402(e)), shall be made in the manner specified in § 577.4 (a) through (e), except that the statement required pursuant to § 577.4(b) shall indicate that—

(a) The determination has been made by the National Highway Traffic Safety Administrator, and

(b) If appropriate, the determination is of noncompliance with a Federal motor vehicle safety standard.

§ 577.6 Disclaimers.

(a) A notification sent pursuant to § 577.4 or § 577.5 shall not contain any statement or implication that the problem discussed in the letter is not a defect, that it does not relate to motor vehicle safety, and, except as specifically provided in this part, that it is not present in the purchaser's vehicle.

(b) A notification sent pursuant to § 577.5 shall not state or imply that the manufacturer disagrees with the Administrator's finding of a defect relating to motor vehicle safety or a noncompliance with a Federal motor vehicle safety standard.

§ 577.7 Conformity to statutory requirements.

A notification that does not conform to the requirements of this part shall not be in compliance with sections 108 and 113 of the National Traffic and Motor Vehicle Safety Act.

Chapter X—Interstate Commerce Commission

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Rev. S. O. 1117]

PART 1033—CAR SERVICE

Substitution of Hopper Cars for Covered Hopper Cars

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 16th day of January 1973.

It appearing, That an acute shortage of covered hopper cars for transporting shipments of grain or soybeans exists in certain sections of the country; that some carriers have adequate supplies of open hopper cars; that use of these cars for transporting grain or soybeans is precluded by certain tariff provisions requiring the use of covered hopper cars, thus curtailing shipments of grain or soybeans and creating great economic loss; that present regulations and practices with respect to the use, supply, control, movement, and distribution of covered hopper cars are ineffective. It is the opinion of the Commission that an emergency exists requiring immediate action to promote car service in the interest of the public and the commerce of the people. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1117 Substitution of hopper cars for covered hopper cars.

(a) Each common carrier by railroad subject to the Interstate Commerce Act shall observe, enforce, and obey the following rules, regulations, and practices with respect to its car service:

(1) Substitution of cars: Subject to the concurrence of the shipper, the carrier may substitute open hopper cars for shipments of grain or soybeans, whether from the point of origin or from an intermediate in-transit point, regardless of tariff provisions requiring the use of covered hoppers.

(2) Minimum weights: The minimum weights per shipment of grain or soybeans transported in open hopper cars substituted for covered hopper cars shall be the minimum weights specified in the tariffs for shipments made in covered hopper cars regardless of the number of open hopper cars required to be used to secure the minimum weight.

(3) In shipping grain or soybeans in open hopper cars in lieu of covered hopper cars, as provided herein, the shipper shall be deemed to have acknowledged the terms and conditions of the contract of carriage embodied in the bill of lading that the carrier shall not be liable for injury, loss, or damage to the lading resulting from a defect or vice in such property.

(4) Bills of lading covering movements authorized by this order shall contain a notation that shipment is moving under authority of Service Order No. 1117.

(5) The term "open hopper cars" means all cars listed in the Official Railway Equipment Register, I.C.C. R.E.R. No. 386, issued by W. J. Trezise, or successive issues thereof, as having mechanical designations "HD", "HE", "HF", "HFA", "HFD", "HK", "HM", "HMA", "HT", or "HTB."

(6) The term "covered hopper cars" means all cars listed in the Official Railway Equipment Register, I.C.C. No. 386,

V 38-15 JAN 23 73 XUM

issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "LO."

(b) Rules and regulations suspended: The operation of tariffs or other rules and regulations, insofar as they conflict with the provisions of this order, is hereby suspended.

(c) Application: The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(d) Effective date: This order shall become effective at 12:01 a.m., January 18, 1973.

(e) Expiration date: The provisions of this order shall expire at 11:59 p.m., March 31, 1973, unless otherwise modified, changed, or suspended by order of this Commission.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies secs. 1(10-17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10-17, 15(4), and 17(2))

It is further ordered, That a copy of this order and direction shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this order be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

Bureau of Mines

[30 CFR Parts 55, 56, 57]

METAL AND NONMETALLIC MINES

Health and Safety Standards; Extension of Time for Comments

In Part II of the FEDERAL REGISTER for December 9, 1972 (37 FR 26378-26380), there was published proposed revisions, additions, and deletions of certain health and safety standards for metal and nonmetallic mines under the Federal Metal and Nonmetallic Mine Safety Act (30 U.S.C. 721 et seq.). The proposed standards amend Parts 55, 56 and 57 of Subchapter N, Chapter I, Title 30, Code of Federal Regulations, relating, respectively, to open pit mines, sand, gravel, and crushed stone operations, and underground mines.

Interested persons were afforded a period of 30 days from the date of publication of the notice in the FEDERAL REGISTER within which to submit written comments, suggestions, and objections to the proposed revisions and amendments. A request has been received for an extension of time in view of the fact that the Christmas and New Year holiday season fell within the 30 day period, communication difficulties resulted, and, therefore, interested persons did not have a reasonable opportunity to prepare and submit comments, suggestions, and objections. The period of time within which interested persons may make written comments, suggestions and objections to the proposed amendments and revisions to Parts 55, 56, and 57 is hereby extended to January 31, 1973. Communications should be addressed to Director, Bureau of Mines, Department of the Interior, Washington, D.C. 20240.

JOHN B. RIGG,
Deputy Assistant Secretary of the Interior.

JANUARY 19, 1973.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 72-SW-81]

VOR FEDERAL AIRWAY

Proposed Extension

The Federal Aviation Administration (FAA) is considering an amendment to Part 71 of the Federal Aviation Regulations that would extend Victor Airway 62 from the Cabezon Intersection to Gallup, N. Mex.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southwest Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Post Office Box 1689, Fort Worth, TX 76101. All communications received on or before February 22, 1973, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Administration, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, DC 20591. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

The proposed amendment would extend V-62 from Cabezon Intersection to Gallup, N. Mex., via the INT Gallup 089° T (075° M) and Santa Fe, N. Mex., 268° T (255° M) radials. The extension of V-62 would permit IFR aircraft to proceed directly between Santa Fe and Gallup without deviating to the south via the Albuquerque terminal area. The extension would afford a saving of more than 20 miles. The proposal would also reduce controller workload and decrease traffic congestion over Albuquerque VORTAC.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Washington, D.C., on January 17, 1973.

H. B. HELSTROM,
Chief, Airspace and Air Traffic Rules Division.

RENEGOTIATION BOARD

[32 CFR Part 1460]

PRINCIPLES AND FACTORS IN DETERMINING EXCESSIVE PROFITS

Contribution to the Defense Effort

The Renegotiation Board pursuant to section 109 of the Renegotiation Act of 1951, as amended (50 U.S.C.A., App. section 1211 et seq.), proposes to issue the following regulations on or before February 22, 1973.

Interested persons are hereby notified that any changes, to be considered, must be presented, in writing, to the Renegotiation Board, 2000 M Street NW., Washington, DC 20446, on or before February 22, 1973.

Written material or suggestions submitted will be available for public inspection during regular business hours in the library at the principal office of the Board, 2000 M Street NW., Washington, DC.

Dated: January 18, 1973.

RICHARD T. BURRESS,
Chairman.

This Part 1460 is amended by deleting § 1460.13 *Contribution to the defense effort* in its entirety and inserting in lieu thereof the following:

§ 1460.13 Contribution to the defense effort.

(a) *Statutory provision.* Section 103 (e) of the act provides that in determining excessive profits there shall be taken into consideration the following factor:

(4) Nature and extent of contribution to the defense effort, including inventive and

V38-15 JAN 23 73 XUM

developmental contribution and cooperation with the Government and other contractors in supplying technical assistance.

(b) *Comment.* Every contractor contributes to the defense effort when he performs or assists others to perform a defense contract or subcontract, or when, in connection with such a contract, or subcontract, he otherwise renders a service of value to a defense program or objective. Limited credit will be accorded under this factor for routine performance of a contract, whereas more credit will be given, in such degree as the facts may warrant, if the performance, assistance or other service of the contractor exceeds, in nature and extent, that which is required or may reasonably be expected of him. Examples of contributions for which such credit will be given, as warranted, include (1) superior performance in excess of contract requirements, such as completion of urgent work ahead of schedule at the request of the procuring Department, or exceeding specifications in a manner beneficial to the defense effort; (2) ingenuity in providing new uses for products or production machinery or equipment; (3) overcoming difficulties, which others have failed to overcome, in providing materials or services for the defense effort; (4) experimental and developmental work of high value to the defense effort; (5) new inventions, techniques and processes of unusual merit; (6) cooperation with the Government and with other contractors in contributing proprietary data or in developing and supplying technical assistance to alternative or competitive sources of supply.

(Sec. 109, 65 Stat. 22; 50 U.S.C.A., App. sec. 1219)

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Ch. II]

[Release Nos. 34-9889, IC-7534]

MUTUAL FUND DISTRIBUTIONS

Extension of Time for Order Directing Public Proceedings

On November 3, 1972 the Commission announced (Investment Company Act Release No. 7475 and in the FEDERAL REGISTER issue of November 17, 1972, 37 FR 24449, 37 FR 24711) that, having reviewed its staff study of the Potential Economic Impact of the Repeal of section 22(d) of the Investment Company Act of 1940 (15 U.S.C. 80a-22(d)) and the Economic Study of the Distribution of Mutual Funds and Variable Annuities conducted for the National Association of Securities Dealers ("NASD") by Booz, Allen, & Hamilton, Inc., it had scheduled public hearings to commence on December 11, 1972, in order to seek a wide range of viewpoints with respect to the justification for retail price maintenance in the distribution of mutual funds, the options which would be open if section 22(d) of the Investment Company Act of 1940 were repealed and how the industry would adjust to such a change.

The National Association of Securities Dealers, Inc., the Investment Company Institute, the American Life Convention-Life Insurance Association of America, and the Independent Broker Dealers Trade Association all have requested additional time in which to consider the issues and to formulate their positions.

The Commission is determined that the hearings be as productive as possible and that all participants have adequate opportunity to give in-depth and thoughtful consideration to the issues presented. In view of the breadth and significance of the hearings and the complexity of the issues which they raise, and considering the pendancy of other Commission hearings[1] which claim the attention of many of the same members of the bar and industry associations, the Commission has determined to postpone the commencement of the Hearings on Mutual Fund Distribution (Administrative Proceeding File No. 4-164) until February 12, 1973.

As indicated in Investment Company Act Release No. 7475, the Commission desires that persons who request an opportunity to be heard make a written submission in the first instance. Oral statements will be invited from those who have made submissions and have requested to be heard. Persons making oral presentations should be prepared to respond to inquiries from the Commission and its staff.

Interested persons are requested to submit their views, any data or other comments or information in triplicate to Allan S. Mostoff, Director, Division of Investment Company Regulation, Washington, D.C. 20549, no later than February 2, 1973. All such material should be designated "Mutual Fund Distribution Hearings," File No. 4-164.

By the Commission.

[SEAL] RONALD F. HUNT, *Secretary.*

NOVEMBER 30, 1972.

[17 CFR Parts 250, 259]

[Release No. 35-17843; File No. 57-470]

INTEREST OF CERTAIN KINDS OF LESSORS UNDER LONG-TERM NET LEASES OF UTILITY FACILITIES

Exclusion from Definition of Ownership

The Securities and Exchange Commission is considering a proposed Rule 7(d) (17 CFR 250.7(d)) which would declare holders of certain kinds of essentially passive interests in electric or gas utility facilities created by standard types of long-term net leases to operating public-utility companies not to be electric or gas utility companies under sections 2(a)(3) and 2(a)(4) of the Public Utility Holding Company Act of 1935 (the "Act"). Lessors of almost half a billion dollars of such facilities have sought individual exemptions from the Act in the past two years. The proposed rule is limited to leases which effectively insulate the legal or beneficial owners of the facility from any significant influence on the public-utility company's operation and from participation in its revenues or income.

STATUTORY BASIS

The rule is proposed under the rule-making authority granted the Commission by section 20(a), including the authority to define accounting, technical and trade terms used in the Act. The rule in effect defines the term "own" in sections 2(a)(3) and 2(a)(4) by specifying that the property interest of the lessor in a facility subject to a long-term net lease is not the kind of ownership to which these sections apply.

BACKGROUND AND PURPOSE

In developing this proposal, the Commission has considered the scope and purpose of the statutory definitions of electric and gas utility companies in sections 2(a)(3) and 2(a)(4) of the Act and the appropriate use of its regulatory powers in terms of the public interest and of the interest of investors and consumers.

Sections 2(a)(3) and 2(a)(4) of the Act define "electric utility company" and "gas utility company," respectively, as "any company which owns or operates" electric or gas facilities therein specified (emphasis added). The Commission is satisfied that the use of the disjunctive was deliberate and that the Act was intended to apply to holding-company systems involved in the ownership of utility assets, even if the operation of such assets was divorced from the owner by lease or otherwise. The lease was one form of control of utility assets in use when the Act was adopted. The Commission has dealt with a number of resulting problems in its administration of section 11 of the Act. The large-scale use of leases as a means of financing the acquisition of particular utility facilities is a relatively new development.

In the past 2 years 23 applications for exemption from the Act have been filed by financial institutions holding legal or beneficial title to almost half a billion dollars of utility facilities. It does not seem necessary to treat such institutions as statutory utility companies, and thus subject many of them, together with their parents and associate companies, to regulation under the Act. Exemptive orders were issued on some applications under sections 2(a)(3) and 2(a)(4). But when it became apparent that a recurring problem of major proportions was involved and that the financing arrangements varied significantly in form and terms, the staff of the Commission undertook a study of the underlying issues with a view to developing a general rule to establish the status of such lessors. The granting of individual exemptions was deferred during that study, and applicants for such exemptions were entitled to the interim exemption provided by sections 2(a)(3) and 2(a)(4) during the pendency of their application.

In promulgating the proposed rule the Commission expresses no opinion as to the desirability of the lease method of acquiring utility facilities. The Act does not grant the Commssion a general supervisory jurisdiction over the utility industry. The primary authority over rates and the financing of operating utility companies not subject to the Act remains in the several States. But leasing, if excessively used, could have long-range effects on the reliability and efficiency of the service rendered by public-utility companies, and on the quality of the conventional securities held by investors.

The proposed rule is based on the belief that public-utility companies and appropriate regulatory authorities can evaluate the advantages and disadvantages of individual lease transactions in particular circumstances, and that such authorities will confine the use of lease financing within proper bounds.

EXPLANATION AND ANALYSIS OF THE PROPOSED RULE

Paragraph d(1) of the rule applies to each company (a term defined by section 2(a)(2) of the Act to include noncorporate entities) having a title, direct or indirect, legal or beneficial, to the facilities subject to a long-term net lease, which meets the standards set forth therein. A wide variety of legal forms are used in this field. The rule is directed to the substance of ownership, not only to technicalities of title.

Subdivision (i) requires that the utility facility to be leased directly to a public-utility company under a long-term net lease and employed by it in its utility operation. The rule would apply only to a net lease which grants operating control of the facility to the public-utility company on a long-term basis.

Subdivision (ii) limits the exclusion to a company primarily engaged in another business.

Subdivision (iii) requires that the terms of the lease have been expressly approved by the regulatory authority having jurisdiction over rates and service of the lessee. The need for this requirement is explained in the preceding discussion of the background and purpose of the rule.

Subdivisions (iv) and (v), respectively, preclude short-term leases and any profit sharing in revenues or income. A lessor under a lease which contains either of these features is treated as a real rather than a passive owner of utility assets for purposes of the Act.

The "grandfather" clause comprising the last sentence of paragraph (d)(1) covers applications already on file, since transactions thereunder have largely been consummated in reliance on the good faith exemption available for pending applications. Such applications meet the standards of the proposed rule in most respects. Only subdivisions (iii) and (iv) might create technical deficiencies in documents already executed, so they are made inapplicable to pending applications.

Paragraph (d)(2) declares that the exclusion defined in paragraph (d)(1) shall cease to be available upon termination of the lease relationship. It is not realistic to consider the owner of the facility to be a passive owner after it has reasserted its dominion over the property. Such an event is most likely to occur if the lessee becomes involved in financial difficulties. Provision is made for this contingency by providing three methods of continuing the lessor's status under the rule by a new lease, by a sale, or by surrender of title to the lessee and by assuming the position of a secured creditor. Since prompt agreement on the terms of a permanent lease may not be feasible, express provision is made for use of a temporary operating agreement, so long as rent thereunder is a fixed amount.

Paragraph (d)(3) provides that a public-utility company shall not cease to be such by reason of a lease of part or all of its facilities. A lease by a public-utility company as lessor has nothing in common with the financing transactions to which this rule is directed.

Paragraph (d)(4) makes explicit the fact that compliance with paragraph (d)(1) does not relieve a company from its other obligations, if any, under the Act.

Paragraph (d)(5) requires the filing of a certificate, in a form annexed hereto, describing each lease to which the rule is applicable, and providing for amendments upon changes in the ownership of interests or the amendment or termination of the underlying lease.

For a fuller exposition of the objectives of the rule, there is appended hereto a staff report prepared by the Division of Corporate Regulation.[1]

Commission action. Pursuant to authority in section 20(a) of the Public Utility Holding Company Act of 1935, the Securities and Exchange Commission proposed to amend § 250.7 in Chapter II of Title 17 of the Code of Federal Regulations by adding thereunder a new paragraph (d), and to amend Part 259 of said chapter by adding a new § 259.404 under Subpart E thereof, all reading as follows:

§ 250.7 Companies deemed not to be electric or gas utility companies.

* * * * *

(d) A company shall not be deemed to be an electric utility company or a gas utility company which owns any of the facilities specified in sections 2(a)(3) and 2(a)(4 (of the Act) (including nuclear fuel) provided that:

(1) Such company owns the facility as a company, as a trustee, or as holder of a beneficial interest under a trust, or as a purchaser or assignee of any of the foregoing; and

(i) Such facility is leased directly to a public-utility company under a long-term net lease and is or is to be employed by the lessee in its operations as a public-utility company; and

(ii) Such company is otherwise primarily engaged in one or more businesses other than the business of a public-utility company, or is a company all of whose equity interest is owned by one or more companies so engaged, either directly or through subsidiary companies; and

(iii) The terms of the lease have been expressly authorized or approved by the regulatory authority having jurisdiction over the rates and service of the public-utility company which leases such facility; and

(iv) The lease of the facility extends for an initial term of not less than four-fifths of the expected useful life of the facility as specified in the lease, or for a minimum term of 20 years if not so specified, except for termination of the lease upon events therein set forth; and

(v) The rent reserved under the lease shall not include any amount based, directly or indirectly, on revenues or income of the public-utility company, or any part thereof.

Paragraph (d)(1) (iii) and (iv) of this section shall not apply to a lease related to an application for exemption under sections 2(a)(3) or 2(a)(4) (of the Act) filed by a company on or before December 1, 1972.

(2) Paragraph (d)(1) of this section shall cease to be applicable in the event of termination of the lease during its term, unless within 90 days of the date of termination, and subject to such prior or subsequent regulatory and other approvals as by law may be required, such company, as defined in this section, negotiates a new lease or an operating agreement at a fixed rental, sells the facility, or surrenders ownership and assumes the status of a secured creditor.

(3) A public-utility company shall not cease to be such by reason of a lease, directly or indirectly, of part or all of its facilities to any associate company or to any person.

(4) Except to the extent provided in paragraph (d)(1) of this section shall not relieve any company from such other provisions of the Act, and rules and regulations promulgated thereunder, as may be applicable.

(5) Any company specified in paragraph (d)(1) of this section shall file,

[1] Public Proceeding on Estimates, Forecasts or Projections of Economic Performance, and Related Subjects, Securities Act Release No. 9844 (Nov. 1, 1972); Proposal to Adopt Securities Exchange Act Rule 19b-2, Securities Exchange Act Release No. 9716 (Aug. 3, 1972), 37 FR 16490 (Aug. 12, 1972).

[1] Copies of the staff report have been filed as part of this document with the Office of the Federal Register. Copies thereof as part of Release No. 35-17843 may be obtained on request from the Securities and Exchange Commission, Washington, D.C. 20549.

V 38 - 15 JAN 23 73 XUM

or join in the filing of, a certificate on a form prescribed by the Commission, as to each lease within 30 days of its execution. Upon any change in legal or beneficial ownership, such new owner shall file an appropriate amendment within 30 days of such change. If the lease is amended, or if the facility ceases, for any reason, to be subject to the lease, the holder of legal title to the facility shall file an appropriate amendment within 30 days of the event.

§ 259.404 Certificate to be filed pursuant to § 250.7(d) of this chapter.

This form must be filed with the Commission by any lessor or beneficial owner of a utility facility which has been leased by it to an operating public-utility company, within 30 days after execution of the lease, if any beneficial owner of such facility seeks exclusion from the status of an electric or gas utility company under the Act pursuant to § 250.7(d) of this chapter.

All interested persons are invited to submit in writing, in triplicate, their views and comments on the proposed Rule 7(d) to Aaron Levy, Director, Division of Corporate Regulation, Securities and Exchange Commission, Washington, D.C. 20549, on or before February 22, 1973. Such communications should refer to File No. S7-470. All such communications will be available for public inspection.

By the Commission.

[SEAL] RONALD F. HUNT, *Secretary.*

CERTIFICATE PURSUANT TO RULE 7(d)
PUBLIC UTILITY HOLDING COMPANY ACT OF 1935

The undersigned certify that this certificate accurately summarizes, as required in the instructions hereto, the information requested as to the lease identified herein and the transactions for the financing thereof.

1. Lessee public-utility company----------
Address ----------
2. Date of lease ----------
2a. Expected date facility will be placed in service ----------
3. Regulatory authority which has acted on transaction: ----------
(Name)

(Date of order)
4. Initial term of lease----------
4a. Renewal options----------
5. Brief description of facility----------

----
6 Manufacturer or supplier----------
7. Cost of facility $----------
8. Basic rent. Initial term $---------- 8a. Periodic installment $---------- (Amount) ---------- (Period)
9. Holder of legal title to facility

Address ----------
10. Holders of beneficial interests:

Name and address	*Amount invested*	*Percent of equity*

11. If part or all of the financing is supplied by loan on which only principal and a fixed rate of interest is payable, state:

Amount borrowed ---------- Interest rate ----------
Number of lenders ---------- Terms of repayment ----------
(Amount) (Period)
Date executed ---------- Signature of Holder of legal title ----------

Signatures of Holders of beneficial interests shall be annexed and incorporated herein.

INSTRUCTIONS TO FORM

This form must be filed within 30 days after execution of any lease of a utility facility to an operating public-utility company if any legal or beneficial owners thereof seek exclusion from the status of an electric utility or a gas utility company by reason of Rule 7(d) under the Public Utility Holding Company Act of 1935.

1. In the event the actual purchase of the property to be leased or the contemplated financing has not been completed, estimates or approximations may be inserted in the form, where appropriate, and the certificate amended within 30 days after the facility has been placed in service. Appropriate amendments are also required within 30 days after (1) a transfer or alteration of any beneficial interest, (2) a change of legal title, (3) amendment of the lease, or (4) termination of the lease for any cause, stating the effective date of termination.

2. The initial term of lease is to be stated in years from the date the facility is delivered to the lessee or the date fixed in the lease for the purpose of computing rent if it does not differ materially from the delivery date. Lessee's obligations to make interim payments prior to delivery may be disregarded if they are equivalent to interest for the delay. Renewal options, if any, should be summarized concisely and remote contingencies may be ignored. For example, "May be extended for two 5-year periods at lessee's election" would be sufficient.

3. The description of the facility should state merely its nature and an indication of its capacity. Such descriptions as the following are sufficient:

Two turbo generators-------- 50,000 kw.
Two LNG storage tanks------ 100,000 MCF.
Nuclear fuel assembly--------

4. The cost of the facility is the cost to the lessors. If the lease specifies a cost, that figure may be used if it does not differ materially from the lessors' total expenditures, including borrowed funds.

5. The term "basic rent" refers to the net rent payable by the lessee, excluding all costs borne directly by it and all reimbursements to the lessor for out-of-pocket costs. If the lease states a basic rent, that amount may be shown if it does not differ materially from the foregoing. If the basic rent defined in the lease is stated in terms of a percentage of cost, the form should show an amount computed by applying that percentage to the cost shown, whether actual or estimated. The rent is to be stated in total for the initial term of the lease, and the amount payable for each periodic installment is also to be stated. If the rent varies from period to period, the installments may be summarized by specifying the period to which each rate applies. For example:

Semiannually

Years—1 to 10---------- $--------
Years—11 to 21---------- --------
Years—22 to 25---------- --------

6. If the repayment of a loan is by amortization of principal and interest in level installments, the terms of repayment may be described by simply stating the amount of the installment, and its frequency. Variations in the rate may be summarized in the same manner as specified for variations in the basic rent.

7. The term "holder of a beneficial interest" includes any person entitled to receive any portion of the lease rent or to receive the property upon expiration of the lease, except a person entitled only to receive a return of money lent with a fixed rate of interest.

8. Provision is made in the form for showing the interest of each beneficial owner in terms of a percentage of the total equity. In the event beneficial owners do not share on a simple percentage basis, the percentages are to be left blank and a summary of their rights substituted.

9. The certificate is to be executed by the holder of legal title to the facility and by each holder of a beneficial interest. Signature pages may be annexed as required.

DEPARTMENT OF THE TREASURY

Fiscal Service

[Dept. Circ. 570, 1972 Rev., Supp. No. 12]

FIRST GENERAL INSURANCE COMPANY

Surety Companies Acceptable on Federal Bonds; Change of Name

Southern General Insurance Company, Philadelphia, Pennsylvania, a Georgia corporation, has formally changed its name to First General Insurance Company, effective October 4, 1972. Documents evidencing the change of name are on file in the Treasury.

A new Certificate of Authority as an acceptable surety on Federal bonds, dated October 4, 1972, has been issued by the Secretary of the Treasury to First General Insurance Company, Philadelphia, Pennsylvania, under sections 6 to 13 of title 6 of the United States Code, to replace the Certificate issued July 1, 1972 (37 FR 13599, July 11, 1972) to the Company under its former name, Southern General Insurance Company. The underwriting limitation of $143,000 previously established for the Company remains unchanged.

The change in name of Southern General Insurance Company does not affect its status or liability with respect to any obligation in favor of the United States or in which the United States has an interest, which it may have undertaken pursuant to the Certificate of Authority issued by the Secretary of the Treasury.

Certificates of Authority expire on June 30 each year, unless sooner revoked and new Certificates are issued on July 1, so long as the companies remain qualified (31 CFR Part 223). A list of qualified companies is published annually as of July 1, in Department Circular 570, with details as to underwriting limitations, areas in which licensed to transact surety business and other information. Copies of the Circular, when issued, may be obtained from the Treasury Department, Bureau of Accounts, Audit Staff, Washington, D.C. 20226.

Dated: January 16, 1973.

[SEAL] JOHN K. CARLOCK, *Fiscal Assistant Secretary.*

Office of Hearings and Appeals

[Docket No. M 73-23]

EASTERN ASSOCIATED COAL CORP.

Petition for Modification of Application of Mandatory Safety Standard

In regard petition of Eastern Associated Coal Corp., for modification of application of mandatory safety standard (sec. 308(b) of Act; and 30 CFR 75.802), Docket No. M 73-23, Kopperston No. 1 Mine et al.

In accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), notice is given that Eastern Associated Corp., 1728 Koppers Building, Pittsburgh, Pa. 15219, has filed on January 9, 1973, a petition to modify

V 38 - 15 JAN 23 73 XUM

the application of section 308(b) of the Act and 30 CFR 75.802 to its Kopperston No. 1, Keystone Nos. 2, 3, and 4, Federal No. 1, Joanne and Delmont Mines.

Section 308(b) of the Act which is additionally published as § 75.802 of Title 30, Code of Federal Regulations, provides:

(b) High-voltage circuits extending underground and supplying portable, mobile, or stationary high-voltage equipment shall contain either a direct or derived neutral which shall be grounded through a suitable resistor at the source transformers, and a grounding circuit, originating at the grounded side of the grounding resistor, shall extend along with the power conductors and serve as a grounding conductor for the frames of all high-voltage equipment supplied power from that circuit, except that the Secretary or his authorized representative may permit ungrounded high-voltage circuits to be extended underground to feed stationary electrical equipment if such circuits are either steel armored or installed in grounded, rigid steel conduit throughout their entire length, and upon his finding that such exception does not pose a hazard to the miners. Within 100 feet of the point on the surface where high-voltage circuits enter the underground portion of the mine, disconnecting devices shall be installed and so equipped or designed in such a manner that it can be determined by visual observation that the power is disconnected, except that the Secretary or his authorized representative may permit such devices to be installed at a greater distance from such area of the mine if he determines, based on existing physical conditions, that such installation will be more accessible at a greater distance and will not pose any hazard to the miners.

Petitioner requests the Secretary to modify the application of the above standard so as to permit it to continue the use of the following electrical system at each of the aforesaid seven coal mines:

• • • [The] surface stationary high-voltage equipment is not provided with a grounding circuit at the grounded side of the resistors in order to serve as a grounding conductor for the frames of such equipment and they do not have a resistance grounded neutral at the power source, but they do have a neutral at the neutral deriving or Zig-Zag transformer.

Petitioner states that the above electrical systems will guarantee no less than the same measure of protection as that provided under the Bureau of Mines' interpretation of the requirements of section 308(b) of the Act.

Parties interested in this petition may request a hearing on the petition or furnish comments on it on or before February 22, 1973. Such request or comments must be filed with the Hearings Division, Office of Hearings and Appeals, Room 1124, 4015 Wilson Boulevard, Arlington, VA 22203. Copies of the petition are available for inspection at that address.

JAMES M. DAY,
Director,
Office of Hearings and Appeals.

JANUARY 16, 1973.

[FR Doc.73-1354 Filed 1-22-73;8:45 am]

[Docket No. M 73-22]

IMPERIAL COAL CO.

Petition for Modification of Mandatory Safety Standard

In regard petition of the Imperial Coal Co., for modification of mandatory safety standard (30 CFR 75.1100-2(c)(1), Docket No. M 73-22.

In accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. 861(c) (1970)), notice is hereby given that the Imperial Coal Co. has filed a petition to modify the application of 30 CFR 75.1100-2(c)(1) to its Eagle Mine.

The portion of the regulation involved provides as follows:

(c) *Haulage tracks.* (1) In mines producing 300 tons of coal or more per shift waterlines shall be installed parallel to all haulage tracks using mechanized equipment in the track or adjacent entry and shall extend to the loading point of each working section. Waterlines shall be equipped with outlet valves at intervals of not more than 500 feet, and 500 feet of firehose with fittings suitable for connection with such waterlines shall be provided at strategic locations. Two portable water cars, readily available, may be used in lieu of waterlines prescribed under this paragraph.

Petitioner proposes to substitute the following for the last sentence in paragraph (c)(1):

Two Tri-Class ABC Dry Chemical extinguishers readily available be used in lieu of waterlines or water cars, each to have the following specifications:

Kiddie 200 ABC-1 (or equivalent). A portable wheeled extinguisher for every class of fire having a capacity of at least 150 pounds of pressurized ammonium phosphate.

Each extinguisher to be mounted on 30-inch steel wheels.

In addition, petitioner proposes to install and maintain an additional fire extinguisher of the same type at each working section, which will also be readily available.

Petitioner asserts that the proposed modification will provide greater safety in several respects. At the high altitude where the Eagle Mine is situated petitioner has experienced severe problems with frozen waterlines; chemicals not subject to freezing would provide greater safety. Also, the use of water in extinguishing electrical or oil and grease fires is more hazardous than the use of chemicals.

Parties interested in this petition may request a hearing on the petition or furnish comments on it on or before February 22, 1973. Such request or comments must be filed with the Office of Hearings and Appeals, U.S. Department of the Interior, 6432 Federal Building, Salt Lake City, Utah 84111. Copies of the petition are available for inspection at that address.

JAMES M. DAY,
Director,
Office of Hearings and Appeals.

JANUARY 12, 1973.

[FR Doc.73-1366 Filed 1-22-73;8:45 am]

[Docket No. M 73-15]

ISLAND CREEK COAL CO.

Petition for Modification of Mandatory Safety Standard

In regard petition of Island Creek Coal Co., for modification of mandatory safety standard, Docket No. M 73-15.

Take notice that Island Creek Coal Co., Holden, W. Va., has filed a petition to modify sections 303(y)(1), 303(y)(2), and 317(f)(4) of the Federal Coal Mine Health and Safety Act of 1969. These sections provide as follows:

SEC. 303(y)(1). In any coal mine opened after the operative date of this title, the entries used as intake and return aircourses shall be separated from belt haulage entries, and each operator of such mine shall limit the velocity of the air coursed through belt haulage entries to the amount necessary to provide an adequate supply of oxygen in such entries, and to insure that the air therein shall contain less than 1.0 volume percent of methane, and such air shall not be used to ventilate active working places. Whenever an authorized representative of the Secretary finds, in the case of any coal mine opened on or prior to the operative date of this title which has been developed with more than two entries, that the conditions in the entries, other than belt haulage entries, are such as to permit adequately the coursing of intake or return air through such entries, (1) the belt haulage entries shall not be used to ventilate, unless such entries are necessary to ventilate, active working places, and (2) when the belt haulage entries are not necessary to ventilate the active working places, the operator of such mine shall limit the velocity of the air coursed through the belt haulage entries to the amount necessary to provide an adequate supply of oxygen in such entries and to insure that the air therein shall contain less than 1.0 volume percent of methane.

SEC. 303(y)(2). In any coal mine opened on or after the operative date of this title, or, in the case of a coal mine opened prior to such date, in any new working section of such mine, where trolley haulage systems are maintained and where trolley wires or trolley feeder wires are installed, an authorized representative of the Secretary shall require a sufficient number of entries or rooms as intake aircourses in order to limit, as prescribed by the Secretary, the velocity of air currents on such haulageways for the purpose of minimizing the hazards associated with fires and dust explosions in such haulageways.

• • • • •

SEC. 317(f)(4). In the case of all coal mines opened on or after the operative date of this title, and in the case of all new working sections opened on or after such date in mines opened prior to such date, the escapeway required by this section to be ventilated with intake air shall be separated from the belt and trolley haulage entries of the mine for the entire length of such entries to the beginning of each working section, except that the Secretary or his authorized representative may permit such separation to be extended for a greater or lesser distance so long as such extension does not pose a hazard to the miners.

Island Creek Coal Co. makes the following statement in support of its petition for modification:

• • • This request (petition) is for approval of the four-entry system of (longwall) mining as practiced at our other four deep mines, in this area, and at other mines throughout our industry. • • • We and other people in our industry, have been granted such modifications for other mines, operating under heavy cover, employing the same system (longwall) of mining.

The No. 3 Pocahontas seam lies under 1,200 to 2,800 feet of cover • • •. The coal itself is very friable and the methane liberation is • • • very high as experienced at the other four mines operating, in the seam, in this area. When longwalls start retreating the methane liberation will range from 7 million to 12 million cubic feet per 24 hours. • • • it is essential that high volumes of air be introduced into the mine • • •.

• • • There is serious concern on the part of management, the union and the men that any departure from the four-entry system of developing longwall panels will unnecessarily jeopardize the safety of the men at the Beatrice mine and other such deep mines in this area.

• • • It is understood that this request applies to longwall access entries and to modifications of sections 317(f)(4), 303(y)(1), and 303(y)(2).

Parties interested in this petition shall file their answer or comments and their request for a hearing, if they wish one, within 30 days from the date of publication of this notice in the FEDERAL REGISTER, with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, Ballston Tower No. 3, 4015 Wilson Boulevard, Arlington, VA 22203. Copies of the petition are available for inspection at that address.

JAMES M. DAY,
Director,
Office of Hearings and Appeals.

JANUARY 11, 1973.

[FR Doc.73-1365 Filed 1-22-73;8:45 am]

[Docket No. M73-21]

MOUNTAIN TOP COAL CO.

Petition for Modification of Safety Standard

In regard to petition of Mountain Top Coal Co., for modification of application of mandatory safety standards (Sec. 305(m) of the Act; and 30 CFR 75.518), Docket No. M73-21, Orchard Slope Mine.

In accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c)(1970), notice is given that Mountain Top Coal Co., 415 St. Francis Street, Minersville, PA 17954, filed on January 2, 1973, a petition to modify the application of section 305(m) of the Act and § 75.518 of the Secretary's implementing Regulations (30 CFR 75.518) to its Orchard Slope Mine.

Section 305(m) of the Act and § 75.518 of the regulations provide in identical language that:

(m) Automatic circuit-breaking devices or fuses of the correct type and capacity shall be installed so as to protect all electric equipment and circuits against short circuit and overloads. Three-phase motors on all electric equipment shall be provided with overload protection that will deenergize all three phases in the event that any phase is overloaded.

Petitioner requests the Secretary to modify the application of the above-quoted standard so as to permit it to operate without using a circuit breaker in its small mine. Petitioner alleges that its present electrical system is safer, or at the very least as safe, as any circuit breaker on the market for the following reasons. (1) No high voltage "to speak of" is used inside the mine and three-phase electrical power is properly grounded to a 7.5-horsepower pump motor which is situated in the mine apart from the location of working areas. (2) The power lines to the pump are energized only 1 to 1½ hours a day during the wet months of December to March and 20 minutes a day during the months of April to November. (3) All power is entirely disconnected before any work is ever performed on the pump or electric wiring. (4) Petitioner states that its mine is nongassy and water is pumped out of the mine before men enter it and no men enter the mine when the power is on. Fuses are replaced every year and Petitioner has never had an accident of any kind in 23 years of working in the orchard seam.

Petitioner avers that its electrical system affords at least the same measure of protection as that provided by circuit breakers because the pump is not located where men are working, all wiring to the pump is isolated from working and traveling areas, the power lines are not energized while men are in the mine and power for the pump is controlled from the surface.

Petition requests that its petition be given prompt consideration because its operations are confined to a family partnership hiring no employees and the developmental nature of the mine requires elimination of all unnecessary expenditures.

Parties interested in this petition should, on or before February 22, 1973, file their answers or comments with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, VA 22203. Copies of the petition are available for inspection at that address.

JAMES M. DAY,
Director,
Office of Hearings and Appeals.

SOCIAL AND REHABILITATION SERVICE

Statement of Organization, Functions, and Delegation of Authority

Part 5 of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health, Education, and Welfare, Social and Rehabilitation Service (35 FR 780, January 20, 1970) is hereby further amended as follows:

Under 5–B, Assistance Payments Administration, delete the Assistance Payments Administration, and all that follows to the Community Services Administration. Insert in lieu thereof the following:

ASSISTANCE PAYMENTS ADMINISTRATION

The mission of the Assistance Payments Administration is to promote leadership in the planning, development, and coordination of those Social and Rehabilitation Service programs which provide for the administrative and financial assistance aspects of public assistance programs under the Social Security Act, as amended. The Assistance Payments Administration has responsibility for programs of assistance for U.S. citizens or nationals returned from foreign countries and welfare planning for refugees and immigrants. The Assistance Payments Administration is administered by a Commissioner under the direction of the Administrator, Social and Rehabilitation Service.

OFFICE OF COMMISSIONER

The Commissioner, with the assistance of the Deputy Commissioner, provides executive direction and leadership to all program activities of the Assistance Payments Administration (APA), in the administration of the maintenance assistance programs.

Advises the Administrator, Social and Rehabilitation Service (SRS), on matters concerning assistance payments activities. Directs the assistance payments activities toward the objective of improved program delivery with adequate safeguards to protect and promote the legal, civil, and human rights of persons served. Coordinates APA objectives and operations with other SRS organizations, and provides professional consultation to the Regional Commissioners and Assistance Payments staff to enhance the delivery of the maintenance assistance program by State and local agencies for persons in economic need. Provides technical consultation through Regional Commissioners and Regional Assistance Payments staff to State and local agencies. Recommends policy and serves as the focal point for preparation of the maintenance assistance budget, and administration of Assistance Payments activities.

Develops the organization, policies, systems and procedures for administrative and structural reform of the income maintenance system.

Administrative Office. Within general guidelines from SRS, provides APA administrative and program support. Provides internal APA administrative services such as duplicating, messenger service, travel services, including preparation and preaudit of travel vouchers; and provides for all APA Central Office Staff personnel placement and recruitment services, facilities, and organization development. Provides APA inputs, control and liaison with SRS service units, such as organization development, personnel, and general services. Responsible for budget execution.

Office of Program Integrity. Plans and conducts special audits and investigations of any description as may be requested by the Commissioner, and management initiatives to maintain program integrity through alert and positive actions to avert and/or minimize the causes which bring criticism to the Federal-State administration of public assistance programs. Reviews State central fraud unit reports for trends and evidence of State activity and provides technical assistance to State fraud units on the proper and effective handling of fraud cases.

Provides liaison with States on matters relating to locating absent parents, obtaining support payments, fraud and related subjects.

Repatriate and Refugee Program Office. Carries out the Commissioner's delegated responsibility to operate three special Federal programs financed entirely with Federal funds, which provide financial assistance, hospital care and other services to mentally ill nationals and U.S. citizens repatriated from foreign countries (Public Law 86–571 and section 1113, Social Security Act), and to Cuban refugees (Public Law 87–510).

Develops program objectives and the implementing policies and procedures for application by State and local public welfare agencies which administer the programs in behalf of DHEW. Responsible for day to day program operation, and supervises regional office staff which works with State and local agencies. Approves claims for reimbursement of State expenditures. Maintains data on social characteristics of repatriates assisted by States for use in program planning, budget estimates, and reports.

Coordinates the return of nationals and citizens with the Office of Special Consular Services, U.S. Department of State, and the reception of Cuban refugees with that Office and the SRS Cuban Repatriate Program Staff.

Office of Public Information and Inquiries. Plans, directs, and coordinates the public affairs program for APA and serves as focal point for the Commissioner on public affairs and public relations aspects of APA programs.

OFFICE OF ASSOCIATE COMMISSIONER FOR PLANNING AND EVALUATION

Provides leadership and coordination for program planning and evaluation. Develops plans for structural reform of the nation's income maintenance system serving as the focal point within SRS and the Department for welfare reform planning.

Responsible for quality control planning and conduct in the State Public Assistance program to insure that accurate and timely payments are made to those entitled to assistance and that the program is administered fairly and efficiently.

Responsible for program planning and budgeting, cost estimating and analysis, and research and evaluation of the income maintenance program.

Division of Program Evaluation and Planning. Responsible for long-range income maintenance program planning, recommending objectives, and devising proposed program strategies; directs and coordinates program planning and participates in planning legislation and regulations. Develops a basic research framework and formulates research strategy; designs demonstrations, surveys, and case studies to elicit new information. Obtains data from National Center for Social Statistics, Regional Offices, and other sources and arranges data in formats to facilitate analysis; analyzes trends in program operations; prepares cost estimates and justifications for projecting workloads, and cost of activities under existing law. Provides input to SRS for budget planning and formulation, for APA programs. Evaluates program operations including developing of models for analysis of basic evaluation strategy, providing analytical and review materials relating to research findings, and feedback of information for use by managers to revise procedures or restate objectives or reformulate strategies.

Division of Quality Control. Directs the planning and implementation of the quality control systems of State income maintenance programs. Insures that the quality control review program evaluates the accuracy and effectiveness of State and beneficiary compliance with Federal program policies and standards. Directs the analysis of statistical and other operating data on quality control to determine trends and other information for quality control system evaluation. Provides leadership in reviewing and assessing, in coordination with regional offices, the effectiveness of State quality control systems.

Establishes and maintains the Federal monitoring system of State quality control operations.

Evaluates the performance of regional monitoring of State quality control systems.

Directs and coordinates the provision of consultation and technical assistance on quality control systems.

Division of Operational Planning. Develops plans for structural reform of the nation's income maintenance system. Serves as the focal point within the Social and Rehabilitation Service and the Department for welfare reform planning. Develops alternative models for reform of the structure and administration of the delivery system for cash assistance. Advises the Commissioner of the Assistance Payments Administration, the Administrator of the Social and Rehabilitation Service and officials in the Office of the Secretary with respect to the administrative implications of reform proposals. Plans specific implementing steps to carry out welfare reform including organizational proposals, staffing patterns, facilities, costs, regulations, policy materials methods and procedures for all.

OFFICE OF ASSOCIATE COMMISSIONER FOR PROGRAM MANAGEMENT

Responsible for the administration, operation and coordination of the income maintenance program. Insures that necessary policy requirements for the program are appropriate and in consonance with the laws and Departmental policies. Responsible for the preparation of standards to be used by States in determining amounts of assistance grants and other guidance materials for eligibility determination, standards for staffing, organizing, and devising systems and methods for efficient, effective, and economical administration of the program. Coordinates Assistance Payments Administration contacts with Regional Offices and State agencies as required to provide technical assistance. Coordinates actions initiated by the Regional Offices for State compliance with Federal program requirements. Maintains current information on the income maintenance program characteristics for each State.

Division of State Systems Management. Develops policy and standards for the guidance of States in the organization and administration of the income maintenance program, including financing and fiscal management, personnel administration, automatic data processing, office layout and work flow, forms design, work measurement and other management tools. Develops and promotes programs for State income maintenance staffs for the implementation of new administrative policies and procedures. Participates with the Regional Offices in the review of State operations as required. Provides technical assistance to the Regional Offices and coordinates on individual State problems.

Division of Program Implementation and Review. Provides instructions, guidelines, and technical assistance to the regions in monitoring and review of State administration of the income maintenance programs. Responsible for APA activities relating to the compliance process, maintenance, and publication of the characteristics of the State income maintenance programs and maintains the official State plans governing the conduct of these programs. Performs special studies of administrative practices as required. Analyzes program review findings for program development and planning. Monitors regional offices activity in the performance of priority objectives. Serves as the focal point in APA for interchange of information, instructions, reports. Provides or manages technical assistance to the Regions and coordinates on individual state problems.

Division of Income and Resources. Formulates interpretations, policies, standards, and procedures on provisions of the Social Security Act concerned with need and assistance payments to eligible individuals. Areas of work include: Definition of "needy" and "medically indigent"; utilization and conservation of income and resources; need determination and the related money payment; methods for training mothers of dependent children in child-care and homemaking skills; program definitions and levels in State general assistance programs; development of a national budget standard applicable for assistance administration. Provides technical assistance to regions and States. Provides consultation and maintains liaison within the Department and with other national public and voluntary agencies and organizations in these areas.

Division of Program Payment Standards. Formulates Federal regulations, policies, and standards and procedures to promote the improvement of the assistance payments aspects of the public welfare programs. Enables the APA to provide leadership in the assistance payments programs including the establishment of the definition of the eligibility factors that determine the scope of program coverage and the realization and protection of the rights of applicants and recipients. Provides technical assistance to and advice to other APA staff. Develops recommended public assistance legislative objectives; initiates recommendations for Federal legislation and evaluates proposals made elsewhere. Provides liaison with other Federal agencies and voluntary organizations in these assigned areas.

Dated: December 19, 1972.

JOHN G. VENEMAN,
Under Secretary.

ATOMIC ENERGY COMMISSION

[Docket No. 50–382]

LOUISIANA POWER & LIGHT CO.

Notice of Adjourned Session of Prehearing Conference

In the matter of Louisiana Power & Light Co. (Waterford Steam Electric Station Unit 3), Docket No. 50–382.

Please take notice that an adjourned session of the prehearing conference in this proceeding, to consider the subjects identified in the notice and order for prehearing conference dated November 16, 1972, and published in the FEDERAL REGISTER, on Tuesday, November 21, 1972, at volume 37, page 24777, will be held pursuant to §§ 2.751a and 2.752 of the rules of practice of the Atomic Energy Commission (vol. 10, Code of Federal Regulations, Part 2) at 10 a.m. local time on February 16, 1973, at Room 265, U.S. Court of Appeals, 600 Camp Street, New Orleans, LA.

Members of the public are invited to attend this prehearing conference and any later prehearing conferences, as well as the evidentiary hearing to be held at a later date to be fixed by the atomic safety and licensing board.

The prehearing conference will be limited to the purposes specified, in preparation for the later evidentiary hearing. No evidence will be received at this pre-hearing conference, nor will there be an opportunity at the pre-hearing conference to present statements by members of the public who wish to make limited appearances for that purpose. Applications for permission to make limited appearances for the purpose of making such statements will be ruled upon by the atomic safety and licensing board at the evidentiary hearing to be held later.

The attention of counsel is directed to the provisions of the notice and order of November 16, 1972, concerning informal conferences to expedite the proceeding.

Dated this 17th day of January 1973, at Washington, D.C.

ATOMIC SAFETY AND LICENSING BOARD,
SIDNEY G. KINGSLEY,
Chairman.

FEDERAL COMMUNICATIONS COMMISSION

[Report 631]

COMMON CARRIER SERVICES INFORMATION [1]

Domestic Public Radio Services Applications Accepted for Filing [2]

JANUARY 15, 1973.

Pursuant to §§ 1.227(b)(3) and 21.30(b) of the Commission's rules, an application, in order to be considered with any domestic public radio services application appearing on the attached list, must be substantially complete and tendered for filing by whichever date is earlier: (a) The close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which subsequent applications are in conflict) as having been accepted for filing. An application which is subsequently amended by a major change will be considered to be a newly filed application. It is to be noted that the cut-off dates are set forth in the alternative—applications will be entitled to consideration with those listed in the appendix if filed by the end of the 60-day period, only if the Commission has not acted upon the application by that time pursuant to the first alternative earlier date. The mutual exclusivity rights of a new application accepted for filing, is directed to §§ 1.227 and 21.27 of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

The attention of any party in interest desiring to file pleadings pursuant to section 309 of the Communications Act of 1934, as amended, concerning any domestic public radio services application accepted for filing, is directed to §§ 21.27 and 1.227 of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
Secretary.

APPLICATIONS ACCEPTED FOR FILING

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

4940-C2-P-73—King Communications, Inc. (KQD310), for additional facilities to operate on 454.050 MHz at location No. 3: 1464 Tarman, Essexville, Mich.

4944-C2-P-73—Joplin Mobilfone Service, Inc. (New), for a new one-way station to operate on 152.24 MHz at 3601 East 20th Street, Joplin, MO.

4945-C2-P-73—Answer, Inc., of San Antonio (New), for a new one-way station to operate on 35.58 MHz at the KWEX-TV Tower, 111 Martinez Street, San Antonio, TX.

4957-C2-P-73—Xavier W. Nady (KLF920), replace transmitter operating on 152.24 MHz, change the antenna system and relocate facilities near the Pierce-King County line, Tacoma, Wash.

4958-C2-TC-73—Contact of Farmington, Inc., consent to transfer of control from Carl Ogden, Transferor, to Robert L. Wolfe, Transferee. Station: KKO340 Farmington, N. Mex.

4959-C2-MP-73—General Telephone Company of the Northwest, Inc. (KTS244), change the base frequency to 454.575 MHz at 13013 Northeast 65th Street, Kirkland, WA.

4960-C2-AL-73—New Jersey Exchanges, Inc., consent to assignment of license from New Jersey Exchanges, Inc., Assignor to Radiofone Corporation of New Jersey, Assignee Station: KEG738 Hawthorne, N.J.

4961-C2-P-73—Rapid Answering Service (KSV900), for additional facilities to operate on 152.03 MHz at 1110 Fuller Street, Big Rapids, MI.

4980-C2-AL-73—Pacific Power & Light Co., consent to assignment of license from Pacific Power & Light Co., Assignor to Northwestern Telephone System, Inc., Assignee. Station: KFL914.

4982-C2-P-73—Mobilphone of Kansas (New), for a new one-way station to operate on 152.24 MHz at 1101 Kansas Street, Great Bend, KS.

4983-C2-P-73—Zipcall (KCH890), for additional facilities to operate on 2178 MHz control at 111 Perkins Street, Boston, MA. location No. 10.

4984-C2-P-73—Orange County Radiotelephone Service, Inc. (KMB304), change the antenna system and relocate facilities operating on 454.35 MHz to 3.5 miles east of Newport Beach, Signal Peak, Calif.

5033-C2-P-73—New England Telephone & Telegraph Co. (KCA207), for additional facilities to operate on 454.625 MHz at Silver Hill, Observatory Avenue, Haverhill, Mass.

5034-C2-P-73—Radio Paging & Telephone Answering Service of Charlotte (KIM905), to relocate facilities operating on 35.22 MHz at 300 South College Street, Charlotte, NC.

5036-C2-P-73—Autophone of San Antonio (New), for a new one-way station to operate on 35.22 MHz at 700 East Hildebrand, San Antonio, TX.

5037-C2-P-73—Mountain States Telephone & Telegraph Co. (KKI458), replace test transmitter operating on 157.77, 157.83, 157.89, 157.95, 158.01, and 158.07 MHz at 120 Fourth Street, Northwest Albuquerque, NM.

5038-C2-P-(2)-73—Northwestern Bell Telephone Co. (KAQ605), replace transmitters operating on 152.63 and 152.75 MHz, change the antenna system and relocate facilities to 126 South Dakota Avenue, Sioux Falls, SD.

5046-C2-P-73—Rad Com Electronics, Inc. (New), for a new two-way station to operate on 152.12 MHz at Turnwater Hill, approximately 15 miles west-southwest of Olympia, Wash.

5050-C2-P-(2)-73—Mobile Radio Telephone Service, Inc. (New), for a new two-way station to operate on 454.275 and 454.300 MHz near Manitou Springs, Cheyenne Mountain, Mountain Grove, Mo., azimuth 138°13'.

5051-C2-P-73—Empire Communications Co. (KFL965), for additional facilities to operate on 152.21 MHz 0.7 mile northwest on Awbrey Butte, Bend, Oreg.

5052-C2-P-73—Beep Communications Systems, Inc. (KEA285), for additional facilities to operate on 152.03 MHz at a new site described as location No. 2: West Gate Drive, Huntington, N.Y.

5053-C2-P-73—Auto Phone Service (KIX508), replace transmitter and change the antenna system operating on 35.22 MHz at the Cherry Plaza Hotel, Central Avenue and Eola Street, Orlando, Fla.

5054-C2-P/ML-73—South Central Bell Telephone Co. (KLF514), for additional facilities to operate on 152.84 and 158.10 MHz utilizing five (5) units in any temporary location within the States of Alabama, Kentucky, Louisiana, Mississippi, and Tennessee.

Major Amendment

7538-C2-P-(2)-72—Delaware Mobile Telephone Co. (New), amend to include request to add additional frequencies: 454.125 and 454.325 MHz at 0.2 mile southwest of Main Street, Woodside, Del. For other particulars see Report No. 601, dated June 19, 1973.

RURAL RADIO SERVICE

5047-C1-P-73—Mountain States Telephone & Telegraph Co. (KYS24), replace transmitter operating on 157.77 MHz and add frequency 156.01 MHz at Timber Range Station, 22.4 miles northeast of Pine, Ariz.

4958-C1-TC-73—Contact of Farmington, consent to transfer of control from Carl Ogden, transferor, to Robert L. Wolfe, Transferee. Station: KLC45 Temp-Fixed.

POINT-TO-POINT MICROWAVE RADIO SERVICE

(Informative: Nebraska Consolidated Communications Corp. has filed applications for four new stations. These applications are part of NCCC's specialized system between St. George, Mo., and Atlanta, Ga.)

4883-C1-P-73—Nebraska Consolidated Communications Corp. (New), Signal Mountain, 4.1 miles northwest of Westover, Ala. Latitude 33°23'44" N., longitude 86°35'02" W. Frequencies 6226.9H to Talladega, Ala., azimuth 79°53' and 6226.9V to Hopkins, Ala., azimuth 281°01'.

4884-C1-P-73—Same (New), 1.8 miles north of Talladega, Ala. Latitude 33°27'51" N., longitude 86°07'16" W. Frequencies 5974.8H to Heflin, Ala., azimuth 64°02' and 5974.8V to Signal Mountain, Ala., azimuth 260°08'.

4885-C1-P-73—Same (New), 2.1 miles northwest of Heflin, Ala. Latitude 33°40'02" N., longitude 85°37'10" W. Frequencies 6226.9H to Buchanan, Ga., azimuth 70°31' and 6226.9V to Talladega, Ala., azimuth 244°18'.

4886-C1-P-73—Same (New), 1.4 miles east of Buchanan, Ga. Latitude 33°47'58" N., longitude 85°10'08" W. Frequencies 5974.8V to Douglasville, Ga., azimuth 99°42' and 5974.8H to Heflin, Ala., azimuth 250°46'.

4887-C1-MP-73—Same (WOI42), 2 miles west-northwest of Theon, Tex. Latitude 30°45'24" N., longitude 97°37'53" W. Modification C.P. to change frequency 5982.3H to 5974.8V toward Austin, Tex., azimuth 205°13'.

4888-C1-MP-73—Same (WOI43). Modification C.P. to relocate station to 5.2 miles west of Austin, Tex. Latitude 30°18'54" N., longitude 97°52'16" W. Change frequencies 6226.9V to 6345.5H toward Bastrop, Tex., azimuth 110°54' and 6226.9H to 6345.5H toward Theon, Tex., azimuth 25°06'. Change azimuth of frequency 6226.9H toward San Marcos, Tex. to 195°36'.

4889-C1-MP-73—Same (WOI44), 1 mile northeast of Bastrop, Tex. Latitude 30°07'30" N., longitude 97°18'09" W. Modification C.P. to change frequency 5974.8H to 6093.8H toward Austin, Tex., azimuth 291°11'.

4890-C1-MP-73—Same (WOI49), northwest city limits of San Marcos, Tex. Latitude 29°54'24" N., longitude 98°00'07" W. Modification C.P. to change frequency 5945.2V to 6034.2H toward Austin, Tex. azimuth 15°32'.

4891-C1-MP-73—Same (WOH95), 1.5 miles west-southwest of St. George, Mo. Latitude 37°22'26" N., longitude 92°28'14" W. Modification of C.P. to add frequency 6226.9V to Mountain Grove, Mo., azimuth 138°13'.

4946-C1-P-73—New England Telephone & Telegraph Co. (KCL54), 185 Franklin Street, Boston, MA. Latitude 42°21'20" N., longitude 71°03'21" W. C.P. to add frequency 6345.5H MHz toward Marshfield, Mass.

[1] All applications listed in the appendix are subject to further consideration and review and may be returned and/or dismissed if not found to be in accordance with the Commission's rules, regulations and other requirements.

[2] The above alternative cut-off rules apply to those applications listed in the appendix as having been accepted in Domestic Public Land Mobile Radio, Rural Radio, Point-to-Point Microwave Radio and Local Television Transmission Services (Part 21 of the rules).

V38-15 JAN 23 73 XUM

POINT-TO-POINT MICROWAVE RADIO SERVICE—continued

4947–C1–P–73—Same (KVH81), 0.9 mile south-southeast of Marshfield Hills, Marshfield, Mass. Latitude 42°08'01" N., longitude 70°43'59" W. C.P. to add frequency 6093.5V MHz toward Boston, Mass.; frequency 6093.5H MHz toward Plymouth, Mass.

4948–C1–P–73—Same (New), Seven Hills Road, Plymouth, Mass. Latitude 41°56'36" N., longitude 70°42'07" W. C.P. for a new station on frequency 6345.5V MHz toward Marshfield, Mass.; frequency 6345.5H MHz toward Barnstable, Mass.

4949–C1–P–73—Same (KCA75), 3 miles west-southwest of Barnstable, Mass. Latitude 41°40'57" N., longitude 70°21'17" W. C.P. to add frequency 6093.5V MHz toward Plymouth, Mass.

4950–C1–P–73—Southwestern Bell Telephone Co. (KKZ85), Avenue I and 25th Street, Galveston, Tex. Latitude 29°18'03" N., longitude 94°47'38" W. C.P. to replace transmitter on frequencies 6004.5V and 6123.1V MHz toward Port Bolivar, Tex.

4951–C1–P–73—Same (KKZ86), Nelson Street near 15th Street, Port Bolivar, Tex. Latitude 29°22'54" N., longitude 94°45'51" W. C.P. to replace transmitter and correct azimuth on frequencies 6286.2V and 6404.8V MHz toward Galveston, Tex.

4952–C1–P–73—American Telephone & Telegraph Co. (KCM82), 1.6 miles south of Littleton, Mass. Latitude 42°31'29" N., longitude 71°27'49" W. C.P. to add frequency 4050H MHz toward Chester, N.H.

4953–C1–P–73—Same (KCB79), 2.6 miles southeast of Chester, N.H. Latitude 42°55'18" N., longitude 71°13'34" W. C.P. to add frequency 4090H MHz toward Littleton, Mass.; frequency 3990H MHz toward Sanford, Maine.

4954–C1–P–73—Same (KCB80), 2 miles southwest of Sanford, Maine. Latitude 43°25'14" N., longitude 70°48'12" W. C.P. to add frequency 3950H MHz toward Chester, N.H.; frequency 3950H MHz toward Portland, Maine.

4955–C1–P–73—Same (KCB81), 45 Forest Avenue, Portland, ME. Latitude 43°39'21" N., longitude 70°15'52" W. C.P. to add frequency 3990H MHz toward Sanford, Maine.

4956–C1–P/L–73—Southern Bell Telephone & Telegraph Co. (WPF99), 1909 Wynnton Road, Columbus, GA. Latitude 32°28'06" N., longitude 84°57'59" W. C.P. for a new station on frequency 10,755H MHz toward WYEA–TV, Columbus, Ga.

4981–C1–AL–(7)–73—Pacific Power & Light Co. 4985–C1–P–73—The Mountain States Telephone & Telegraph Co. (New), 17.5 miles east-northeast of Sells, Kitt Peak National Observatory, Ariz. Latitude 31°57'42" N., longitude 111°35'59" W. C.P. for a new station on frequency 6390.0V MHz toward Tumamoo Hill, Ariz.

4986–C1–P–73—Same (New), Tumamoo Hill, 1.5 miles west of Tucson, Ariz. Latitude 32°12'51" N., longitude 111°00'18" W. C.P. for a new station on frequency 6137.9V MHz toward Kitt Peak, Ariz.

4933–C1–ML–73—American Telephone & Telegraph Co. (KGJ25), Lewistown, 5.5 miles southwest of Thurmont, Md. Latitude 39°34'34" N., longitude 77°29'17" W. Modification of license to change polarization from H to V on frequencies 3750V, 3830V, 3910V, 3990V, 4070V, and 4150V MHz toward Monrovia, Md.

4934–C1–ML–73—Same (KGN99), Monrovia, 7.5 miles southeast of Frederick, Md. Latitude 39°20'55" N., longitude 77°16'51" W. Modification of license to change polarization from H to V on frequencies 3750V, 3830V, 3910V, 3990V, 4070V, and 4150V MHz toward Monrovia, Md.

4937–C1–ML–73—Same (KGA26), Wyndmoor, Springfield Township, Pa. Latitude 40°05'02" N., longitude 75°11'19" W. Modification of license to change polarization from V to H on frequencies 6197.2H and 6375.2H MHz toward Finland, Pa.; frequencies 6197.2H and 6375.2H MHz toward Philadelphia, Pa.

3171–C1–R–73—General Telephone Co. of California (KZI31), in any temporary fixed location within the territory of the grantee. Application for renewal of radio station for term: April 1, 1973, to April 1, 1974.

5031–C1–P–73—Western Carolina Telephone Co. (New), Spring Street, Highlands, N.C. Latitude 35°30'11" N., longitude 83°12'03" W. C.P. for a new station on frequencies 6286.2H and 6404.8H MHz toward Cowee Bald, N.C., via passive reflector.

POINT-TO-POINT MICROWAVE RADIO SERVICE—continued

5032–C1–P–73—Same (KIW86), Cowee Bald, N.C. Latitude 35°19'36" N., longitude 83°20'07" W. C.P. to add frequencies 6034.2H and 6152.8H MHz toward Highlands, N.C., via passive reflector.

5035–C1–ML–73—Illinois Bell Telephone Co. (KSO96), 2.6 miles south-southwest of Delavan, Ill. Latitude 40°20'11" N., longitude 89°33'24" W. Modification of license to change polarization from V to H on frequencies 4070H, 4150H, and 8750H MHz toward Sunnyland, Ill.

5039–C1–P–73—American Telephone & Telegraph Co. (KZA40), 1.8 miles west of Rosenberg, Tex. Latitude 29°33'15" N., longitude 95°50'41" W. C.P. to add frequencies 6286.2H and 6404.8H MHz toward Arcola, Tex.

5040–C1–P–73—Same (KZA41), 2.1 miles northwest of Arcola, Tex. Latitude 29°31'31" N., longitude 95°29'02" W. C.P. to add frequencies 6034.2V and 6152.8V MHz toward Rosenberg, Tex.; frequencies 6034.2H and 6152.8H MHz toward Houston, Tex.

5041–C1–P–73—American Telephone & Telegraph Co. (New), West Main Street and Wesleyan Avenue, Houston, Tex. Latitude 29°44'09" N., longitude 95°26'27" W. C.P. for a new station on frequencies 6286.2V and 6404.8V MHz toward Arcola, Tex.

5042–C1–P–73—The Mountain States Telephone & Telegraph Co. (WBO95), 1510 North Park Avenue, Park City, UT. Latitude 40°39'22" N., longitude 111°30'18" W. C.P. to add frequencies 11,405H and 11,645V MHz toward Heber City, Utah, via passive reflector.

5043–C1–P–73—Same (New), 145 West Center Street, Heber City, Utah. Latitude 40°30'26" N., longitude 111°24'54" W. C.P. for a new station on frequencies 10,715V and 10,955H MHz toward Park City, Utah, via passive reflector.

5045–C1–P–73—Southwestern Bell Telephone Co. (KKB37), 1116 Houston Street, Fort Worth, Tex. Latitude 32°44'57" N., longitude 97°19'31" W. C.P. to add frequency 4110.0V MHz toward Roanoke, Tex.

5048–C1–P–73—United Telephone Company of the Carolinas, Inc. (KJH37), Lobeco, S.C. Latitude 32°33'17" N., longitude 80°44'59" W. C.P. to add frequency 6345.5V MHz toward Beaufort, S.C.

8288–C1–P–72—Nebraska Consolidated Communications Corp. (New), resubmitted: C.P. for a new fixed station at Omaha, Nebr. Latitude 41°15'28" N., longitude 95°56'24" W. Frequencies 6226.9H, 6286.2H, 6345.9H, 6404.8H, and 6375.2V MHz toward Magnolia, Iowa on azimuth 5°30'.

8290–C1–P–72—Same (New), resubmitted: C.P. for a new fixed station 4 miles west of Decatur, Nebr. Latitude 42°00'32" N., longitude 96°21'15" W. Frequencies 6226.9V, 6286.2V, 6345.5V, 6404.8V, and 6375.2H MHz toward Sioux City, Iowa, on azimuth 351°54'; frequencies 6226.9V and 6286.2V MHz toward Magnolia, Iowa, on azimuth 129°08'.

8289–C1–P–72—Same (New), resubmitted: C.P. for a new fixed station 1.5 miles northnorthwest of Magnolia, Iowa. Latitude 41°43'09" N., longitude 95°52'50" W. Frequencies 5945.2V, 6004.5V, 6063.8V, 6123.1V, and 6152.8H MHz toward Decatur, Nebr., on azimuth 309°27'; frequencies 6004.5H and 6063.5H MHz toward Omaha, Nebr., on azimuth 185°33'.

8291–C1–P–72—Same (New), resubmitted: C.P. for a new fixed station 0.5 mile northeast of War Eagle Park, Sioux City, Iowa. Latitude 42°29'51" N., longitude 96°26'53" W. Frequencies 6049.0H, 6108.3H, and 6167.6H MHz toward Vermillion, S. Dak., on azimuth 316°25'; frequencies 5945.2V and 6004.5V toward Decatur, Nebr. on azimuth 171°50'; frequency 10,775H MHz toward Sioux City, Iowa, on azimuth 91°01'; frequency 11,015H MHz toward Sioux City, Iowa, on azimuth 89°35'; frequency 11,175H MHz toward Sioux City, Iowa, on azimuth 82°56'.

8292–C1–P–72—Nebraska Consolidated Communications Corp. (New), resubmitted: C.P. for a new fixed station 5.5 miles east of Vermillion, S. Dak. Latitude 42°47'08" N., longitude 96°49'16" W. Frequency 6197.2V, 6315.9V, and 6375.2V MHz toward Beresford, S. Dak., on azimuth 6°14'.

8293–C1–P–72—Same (New), resubmitted: C.P. for a new fixed station 5.5 miles north of Beresford, S. Dak. Latitude 43°09'49" N., longitude 96°45'53" W. Frequency 6034.2H, 6093.5H, and 6152.8H MHz toward Sioux Falls, S. Dak., on azimuth 3°48'.

8294–C1–P–72—Same (New), resubmitted: C.P. for a new fixed station 0.25 mile south of Sioux Falls, S. Dak. Latitude 43°29'20" N., longitude 96°44'06" W. Frequency 1166.5H MHz toward Sioux Falls, S. Dak., on azimuth 3°30'; frequency 1142.5H MHz toward Sioux Falls, S. Dak., on azimuth 8°45'; frequency 6226.9H MHz toward Mitchell, S. Dak., on azimuth 287°24'.

Correction

The following application should have appeared on Public Notice No. 623, dated November 20, 1972.

3227–C1–ML–73—Pacific Northwest Bell Telephone Co. (KOC65), 819 Southwest Oak Street, Portland, OR. Latitude 45°31'22" N., longitude 122°40'42" W. Modification of license to change polarization from H to V on frequencies 3770V and 3850V MHz toward Sentinel Hill, Oreg.

MULTIPOINT DISTRIBUTION SERVICE

INFORMATIVE: Consistent with the Commission's ruling in Midwest Corporation *et al.*, FCC 73–1 (released January 5, 1973), applicants in the Multipoint Distribution Service proposing interstate communications service are not required, for FCC purposes, to submit a copy of any state certification necessary to the provision of intrastate service. However, applicants proposing only intrastate services must include in their applications a copy of any such certificate that may be required pursuant to rule section 21.15(c)(4). Unless a proposal is clearly interstate in nature (e.g. the service area extends across a staate boundary), it will be considered solely intrastate absent information on interstate service, including the method by which it will be accomplished. Pending applications should be amended to reflect this information as appropriate.

5030–C5–P–73—Electro-Media Multipoint Service, Inc. (New), Arlington Towers, 100 Arlington Avnue, Reno, NV. C.P. for a new station on frequencies 2154.75 (Visual) 2150.25 (Aural). (Primary Service Area: Reno, Nev.)

5055–C5–73—H. L. Woodbury (New), Texas Building at intersection of Locust and Oak Streets, Denton, Tex. Latitude 33°12'56" N., longitude 97°07'55" W. C.P. for a new station on frequencies 2154.75 (Visual) 2150.25 (Aural). (Primary Service Area: Denton, Tex.)

5056–C5–P–73—Midwest Corp. (New), 3522 East 112th Street, Tacoma, WA. Latitude 47°9'15" N., longitude 122°22'41" W. C.P. for a new station on frequencies 2154.75 (Visual) 2150.25 (Aural). (Primary Service Area: Tacoma, Wash.)

Informative

It appears that the following applications may be mutually exclusive subject to the Commission's rules regarding ex parte presentations, reasons of potential electrical interference.

NEVADA—Reno

A. Michael Lipper, (New), 3465–C5–P–73—Electro-Media Multipoint Service, Inc. (New), 5030–C5–P–73.

WASHINGTON—Tacoma

Howard S. Klotz & William Corbus (New), 4475–C5–P–73—Midwest Corp. (New), 5056–C5–P–73.

SUBMARINE CABLE LANDING SERVICE

S–C–L–46–1—ITT World Communications, Inc., for a license to land and operate in Hawaii and Guam, jointly with other carriers, a submarine cable between Hawaii and Okinawa.

S–C–L–46–2—RCA Global Communications, Inc., for a license to land and operate in Hawaii and Guam the Transpac-2 submarine cable between Hawaii and Okinawa.

S–C–L–46–3—Western Union International, Inc, for a joint license to land and operate a submarine cable in Hawaii and Guam which will extend between Hawaii and Okinawa via Guam.

APPLICATIONS FILED PURSUANT TO SECTION 214 OF THE COMMUNICATIONS ACT OF 1934, AS AMENDED

Telephone Wire Facilities

P–C–8520—General Telephone Company of Upstate New York, Inc., Informal (Section 63.03) for authority to supplement existing facilities to meet normal toll and special growth at various locations in New York and Pennsylvania.

P–C–8521—The Mountain States Telephone & Telegraph Co., Informal (Section 63.03) for authority to supplement facilities in Arizona, Colorado, Montana, Utah, and Wyoming.

P–C–8522—Delaware Valley Telephone Co., Informal (Section 63.03) for authority to supplement existing facilities to meet normal toll and special growth at various locations in New York and Pennsylvania.

Telephone Wire Facilities—Continued

P–C–8523—Northwestern Bell Telephone Co., Informal (Section 63.03) for authority to supplement existing facilities between Clarinda, Iowa, and Omaha, Nebr.

P–C–7435–2—Hawaiian Telephone Co., Formal (Section 63.01) for authority to acquire from Communications Satellite Corp. and to operate a channel between an appropriate satellite over the Pacific Ocean for use in providing a high speed digital data transmission and reception service between Hawaii and the United States Mainland.

Telegraph Wire Facilities

T–C–1745–1–M—The French Telegraph Cable Co., Formal (Section 63.01) for authority to shorten and simplify the customer's route (FTCC) by eliminating the cross-channel link.

T–C–2530—RCA Global Communications, Inc., Formal (Section 63.01) for authority to participate in the construction and operation of the Transpac-2 submarine cable system between the Island of Oahu in the State of Hawaii and the Island of Okinawa via the Island of Guam.

T–C–2531—Western Union International, Inc., Formal (Section 63.01) for authority to provide experimental international Telepost service from the gateway cities of New York, San Francisco, and Washington, on the one hand, to Argentina, Brazil, Indonesia, and Venezuela on the other hand.

T–C–2532—Western Union International, Inc., Formal (Section 63.01) for authority to participate in the construction and operation of a submarine cable between Hawaii and Okinawa via Guam.

T–C–2533—ITT World Communications, Inc., Formal (Section 63.01) for authority to participate in the construction and operation of a deep sea submarine cable system between Hawaii and Okinawa via Guam.

T–C–2534—Domsat Corp., Formal (Section 63.01) for authority to lease and to operate facilities to extend Lettergram Service between the United States Mainland and Hawaii, and to construct a message switching center in Honolulu, Hawaii.

Corrections

T–C–2462–2—TRT Telecommunications Corp. Correct File No. to read: T–C–2462–3. See Report No. 625, dated December 4, 1972.

In Report No. 627, dated December 18, 1972, under Telegraph Wire Facilities, delete the correction.

T–C–2469–1—TRT Telecommunications Corp. Correct File No. to read: T–C–2462–4 and correct entry to read: Formal (Section 63.01) for authority to lease and to operate a satellite telegraph-grade circuit to institute direct telex service between the United States and Peru and points beyond. This Application was accompanied by a petition for reallocation of one satellite telegraph circuit and one satellite voice circuit to Peru. Comments on said petition may be filed no later than the date of filing comments on the accompanying application.
